La Roche Academic Policies & Regulations

A Disclaimer
This publication is not to be viewed as an irrevocable contract between the College and the student and is subject to change consistent with policies of the Board of Trustees. The College reserves the right to repeal, change, amend, modify, add, withdraw the contents herein, without notice of obligation.

Academic Standing Classification of Students
At the end of each semester the Registrar classifies students according to the number of credit hours they have completed:

- A freshman is one who has completed fewer than 30 credits.
- A sophomore is one who has completed between 30 and 59 credits.
- A junior is one who has completed between 60 and 89 credits.
- A senior is one who has completed 90 credits or more.
- A full-time student is one who is registered for 12 or more credit hours in a regular semester.
- A part-time student is one who is carrying less than 12 credit hours in a regular semester.
- A matriculated student is one who has satisfied all admission requirements for a degree program and is taking courses leading to a degree.
- A special student is one who is not pursuing a degree or certificate program at La Roche College. All special students are required to register each term through the Graduate Studies and Adult Education Office.

Dean's List
Each semester those full-time students (12 credits or more) who have earned a QPA of 3.500 or higher are placed on the dean's honor list. Part-time students who have accumulated 12 credits in consecutive semesters, including summer, and have earned a QPA of 3.500 or higher are placed on the dean's honor list.

Good Academic Standing
Students are in good academic standing at the college when their cumulative and semester quality point average is 2.000 or above.

Not In Good Academic Standing
Students are not in good academic standing at the college when their cumulative and/or semester quality point averages are below 2.000. Students not in good academic standing are required to work with a designated academic support advisor on strategies to enhance their academic performance. The Academic Standing Review Board carefully considers the individual circumstances of all students who are not in good standing and, at its discretion, may recommend that students not in good standing be subject to one of the following four categories of action: 1) Academic Warning; 2) Academic Probation; 3) Academic Suspension; or 4) Academic Dismissal.

Academic Warning
Students whose cumulative quality point averages (QPAs) are 2.000 or above but whose semester QPAs are below 2.000 may be placed on academic warning for the subsequent fall or spring semester.

Any student placed on academic warning is required to work with a designated support advisor on strategies to improve his or her academic performance.

Academic Probation
Full-time students whose cumulative quality point averages are below 2.000 (1.800 for freshmen), or who are subject to a second placement on academic warning, may be placed on academic probation for their subsequent fall or spring semester of enrollment.

Part-time students who have accumulated 12 credits attempted and whose cumulative quality point averages fall below 2.000 (1.800 for freshman) may be placed on academic probation for their subsequent fall or spring semester of enrollment.

Any student placed on academic probation is required to work with a designated academic support advisor on strategies to enhance his or her academic performance. Any student placed on academic probation may be restricted to no more than 13 credits for his or her subsequent fall or spring semester of enrollment, and may be subject to other conditions as required by the academic support advisor or the Academic Standing Review Board.

Academic Suspension
Any full-time student whose semester quality point average is below 1.000 or who is subject to a second placement on academic probation may be immediately suspended from the college for the subsequent spring or fall semester. Suspension decisions are made by the Academic Standing Review Board. Students who have been suspended will be assigned an academic support advisor with whom they will work to accomplish the prescribed strategies necessary for their reinstatement. Reinstatement of any student who has been suspended will be at the discretion of the Academic Standing Review Board based on consideration of the student's written request for reinstatement and of the academic support advisor's recommendations. Students reinstated from a suspension will remain on academic probation during the semester of their re-enrollment.

Academic Dismissal
Students may be dismissed from the college if they are subject to placement on academic probation for two consecutive semesters or fail to make progress after reinstatement to the college from suspension. Dismissal decisions are recommended by the Academic Standing Review Board to the Vice President for Academic Affairs and Academic Dean. The Academic Standing Review Board will carefully consider the student's total academic record prior to making a recommendation to dismiss.
Appeal Policy and Procedure

Students may appeal an academic suspension or academic dismissal by submitting a letter to the Vice President for Academic Affairs and Academic Dean within ten days of receipt of notification.

Athletic Eligibility

La Roche College recognizes that the development of students is not solely one of academic growth and that other activities contribute to the achievement of the goals set by the college in carrying out its mission with students.

Participation in varsity sports serves as an important function for participating students and also serves as a method of public relations, recruitment of students, visibility for the college and retention of students.

It is understood that academic growth of students has the highest priority. It is also understood that the college's membership in intercollegiate conferences or associations requires commitment to certain standards shared with other member schools.

To show concern for and to assure that academic growth is not impeded by participation in varsity athletics, certain restrictions are placed on student participation. These restrictions are intended for the student's guidance and assistance just as restrictions on students in general are imposed when academic growth is not satisfactory.

Policy

No student will be permitted to participate in an intercollegiate sports program during the time that the student is ineligible according to the standards of the National Collegiate Athletic Association (NCAA) and La Roche College.

Athletic academic eligibility is defined as having a cumulative QPA of 1.800 in the student's first year (first two semesters) at La Roche College. Students must receive a cumulative QPA of 2.000 in the completion of the following six semesters. If a first year student earns a semester QPA of more than 1.500, but less than 1.800 in the first semester of attendance, that student may participate during the second semester under the following conditions:

1. The student, the academic advisor, the athletic director, and the coach agree to the participation.
2. The student carries no more than 12-13 credits in the semester.
3. A written contract is agreed to by the player, the academic advisor, and the coach, whereby the student adheres to a specific plan of study including regular involvement with the Academic Enrichment Center, tutoring if deemed advisable and continual reports and checks with instructors.
4. The contract so established will be filed with the athletic director prior to the first game of the new semester. Any student who is in his/her third through eighth semester and receives a semester QPA below 2.000 while still maintaining a cumulative QPA of 2.000 or above is athletically eligible to participate in intercollegiate athletics. In any case when a student-athlete is brought to the Academic Standards Review Board at La Roche College and the review board, in coordination with the athletic department, finds that it is in the student's best academic interest not to participate in an intercollegiate sport for a particular semester; that recommendation will be upheld to meet La Roche College's academic standards. Thus, a student who is academically eligible by the NCAA standards must comply with the more stringent standards of La Roche College, if applicable.

Biometric Signature Usage Policy

Purpose: As required by Middle States Commission on Higher Education, to verify compliance with Federal Regulations requiring that institutions have effective procedures in place to ensure that the students who register in a distance or correspondence education course are the same students who participate in and complete the course, and receive the academic credit (34 CFR 602.17 (g)).

This policy is intended to reflect La Roche College's commitment to the principles, goals, and ideal described in the college’s Mission Statement.

Revision History: New

Persons Affected: Faculty and students

Policy: A new federal policy to verify the identity of online students has been put into place by the U.S. Department of Education. In response to this policy, La Roche College is requiring that all students enrolled in courses where all or part of the graded activity is delivered online, to verify their identity with the student authentication system, Biometric Signature ID.

Biometric Signature ID, through their gesture biometrics technology, will ensure that La Roche College maintains the highest level of academic integrity in online learning.

Faculty teaching only face-to-face classes, with no online component, are not required to use BioSig-ID. However, if they use the LMS (Blackboard) as a supplemental classroom aid to allow students to submit assignments through the site, then the student identity verification through BioSig-ID will be required.

Every course syllabus should include the following paragraph:

Biometric Signature ID

Online courses at La Roche College require students to participate in a new security system. This new software system is used to verify a student’s ID using just your mouse, touchpad, stylus, or touch screen, and all courses which require taking an exam, quiz and/or any gradable assignment online will require student verification. No special hardware or software downloads are necessary. This identification technology is from a company called Biometric Signature ID (BSI). Verifying student identification is a new mandate from the federal government with which our institution needs to comply. Instructions to enroll can be found on the intranet in the Online Student Services page.

This new software system enables a student to easily verify their identity using a mouse, stylus, touchpad or touch screen and does not require any special hardware or software.
Students will register and enroll ONE TIME ONLY to create a password in the first course of the session
• This same password will be used for all courses to access gradable events
• Students will be required to watch a short instructional video to understand “HOW” to use the gesture biometric technology
• Faculty will place the instructional video as a link with introductory remarks and as an assignment
  • http://www.biosig-id.com/BSI-QI/BSI-QI.html
• During the first contact into the course, and after viewing the video, the student will register and enroll using the link provided.

PROCEDURES:

1. At the beginning of each semester, the student establishes a “password” using BioSig-ID in the first course in which they receive a BioSig-ID assignment. Returning students simply verify their identity using their existing password.
2. It is strongly suggested that faculty create an assignment (gradable event) where the students must authenticate their identity as suggested for any gradable event such as a test or assignment that is turned in remotely via Blackboard
3. The more times a student uses BioSig-ID, the more valid the authentication becomes and the less likely the student is to forget his or her BioSig-ID password.

Definitions:
1. Biometric Signature ID – BioSig-ID
2. Learning Management System (LMS) - La Roche uses Blackboard as their learning management system.
3. Online course – Asynchronous online instruction delivered to a group of students or an individual student, without any face-to-face meeting requirement.
4. Online hybrid course – Blended classes with some face-to-face component, but where 51% to 99% of the direct instruction is online
5. On-campus course is delivered face-to-face, including those that use web-based technology to facilitate what is essentially a face-to-face course. This includes the use of Blackboard to post syllabus and assignments. An on-campus course requires less than 50% of that course to be offered online.

Authority: The Vice President for Academic Affairs and Academic Dean delegates the authority to implement and oversee this policy to the Online Learning and Faculty Support & Technology Coordinator.

Continuous renewal: This policy will be reviewed two years from its effective date to determine its effectiveness and appropriateness; or sooner to reflect substantive change.

Confidentiality of Student Records

Notification of Rights Under the Family Educational Rights and Privacy Act

The Family Educational Rights and Privacy Act (FERPA) affords students certain rights with respect to their education records. La Roche College respects the rights of all students and fully complies with FERPA. These rights are:

• The right to inspect and review the student's education records within 15 days of the day the college receives a request for access. Students should submit written requests identifying record(s) they wish to inspect to the Registrar. The Registrar will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained in the Registrar's Office, the student will be directed to the appropriate college administrator.

• The right to request amendment of the student's education record. Students may ask the college to amend a record that they believe is inaccurate or misleading. They should write to the college administrator responsible for the record, clearly identify the part of the record they want changed, and specify why it is inaccurate or misleading. If the administrator makes the decision not to amend the record as requested by the student, the student will be notified and advised of his or her right to a hearing.

• The right to consent to disclosures of personally identifiable information contained in the student's education records, except to the extent that FERPA authorizes disclosure without consent. One exception which permits disclosure without consent is disclosure to school officials which legitimate educational interests. A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibility.

• A school official is a person employed by the College in an administrative, supervisory, academic, or support staff position (including law enforcement unit personnel and health staff); a person or company with whom the College has contracted (such as an attorney, auditor, or collection agent); a person serving on the Board of Trustees; or a student serving on an official committee such as disciplinary or grievance or assisting another school official in performing his or her tasks (work study).

The right to file a complaint with the U.S. Department of Education concerning alleged failures by La Roche College to comply with the requirements of FERPA. The name and address of the office that administers FERPA is:

Family Policy Compliance Office
U.S. Department of Education
400 Maryland Avenue, SW
Washington, DC 20202-4605

In accordance with FERPA, La Roche College has designated the following information as "directory information," which may be made available upon request without the student's written permission:

• Student's name, address and phone number
• Date and place of birth
• Major field of study
• Participation in officially recognized activities or sports
- Weight, height and physical condition of members of athletic teams
- Dates of attendance
- Degrees and awards received, including Dean's List (not QPA)
- Student's photograph
- Most recent previous education agency or institution attended

This information may be routinely made public by the College unless the student informs the Registrar (CC224) in writing that any or all of the information designated should not be released without the student's prior consent.

Credit Hour Policy

Federal Regulations

The credit hour is defined by the U.S. Department of Education as a basic institutional measure of the level of instruction and academic rigor that establishes eligibility for federal funding.1 Both within and between institutions, consistency in credit hour determinations has implications for the transferability of credit and for demonstrating that all courses and programs—regardless of teaching and learning formats or delivery mode—are of sufficient academic rigor, content, and depth.

The U.S. Department of Education defines “credit hour” as:

“…An amount of work represented in intended learning outcomes and verified by evidence of student achievement that is an institutionally established equivalency that reasonably approximates not less than:

(1) one hour of classroom or direct faculty instruction and a minimum of two hours of out-of-class student work for approximately fifteen weeks for one semester or trimester hour of credit, or ten to twelve weeks for one quarter hour of credit, or the equivalent amount of work over a different amount of time; or,

(2) at least an equivalent amount of work as required in paragraph (1) of this definition for other academic activities as established by the institution, including laboratory work, internships, practica, studio work, and other academic work leading to the award of credit hours.”

The Carnegie unit, represented in point (1) above, has served as the traditional unit of measure, but the Department also recognizes that institutions are developing other measures of educational content and credit equivalency.

The Middle States Commission on Higher Education, in its Credit Hour Policy, effective August 23, 2013, requires institutions to verify compliance with Credit Hour regulations.

http://www.msche.org/documents/CreditHourPolicy.PDF

The Middle States Commission on Higher Education provides guidelines to remind institutions of their responsibility to meet all Federal, state, and other relevant policies, regulations, and requirements governing credit hours. These guidelines can be found online at the following web address:

1 U.S. Department of Education Office of Post-Secondary Education, “Guidance to Institutions and Accrediting Agencies Regarding a Credit Hour as Defined in the Final Regulations Published on October 29, 2010.”

Credit Hour Definition for Online Courses

Although government agencies set reasonable and suitable expectations for time spend earning credits, the Middle States Commission on Higher Education “considers assessment evidence to be the most compelling evidence that an institution’s academic offerings are of appropriate academic content, breadth, length, and rigor.”

http://www.msche.org/documents/CreditHourPolicy.PDF

In accordance with the U.S. Department of Education, in any seven-day period, a student is expected to be academically engaged through, for example, classroom attendance, examinations, practica, laboratory work, internships, and supervised studio work. In the case of distance education and correspondence education, academic engagement would include, but not be limited to, submitting an academic assignment; taking an exam, an interactive tutorial, or computer-assisted instruction; attending a study group that was assigned by the institution; contributing to an academic online discussion; and initiating contact with a faculty member to ask a question about the academic subject studied in the course. Merely logging into the electronic classroom does not constitute academic engagement. Source: U.S. Department of Education CH-A5, 2.22.2013.

La Roche College assigns credit hours in ways that are consistent with U.S. Department of Education credit hour regulations by adopting the “credit hour” as the unit measure of instruction for awarding credit, based on the Carnegie Unit system:

<table>
<thead>
<tr>
<th>Semester Hours Awarded</th>

</tbody>
</table>

• One lecture (taught) or seminar (discussion) credit hour represents 1 hour per week of scheduled class/seminar time and 2 hours of student preparation time. Most lecture and seminar courses are awarded 3 credit hours. Over an entire semester, this formula represents at least 45 hours of class time and 90 hours of student preparation.

• One laboratory credit hour represents 1 hour per week of lecture or discussion time plus 1-2 hours per week of scheduled supervised or independent laboratory work, and 2 hours of student preparation time. Most laboratory courses are awarded up to 4 credit hours. This calculation represents at least 45 hours of class time, between 45 and 90 hours of laboratory time, and 90 hours of student preparation per semester.

• One practice credit hour (supervised clinical rounds, visual or performing art studio, supervised student teaching, fieldwork, etc.) represents 3-4 hours per week of supervised and/or independent practice. This in turn represents between 45 and 60 hours of work per semester. Blocks of 3 practice credit hours, which equate to a studio or practice course, represent between 135 and 180 total hours of academic work per semester.

• One independent study (thesis or dissertation research) hour is calculated similarly to practice credit hours.

• Internship or apprenticeship credit hours are determined by negotiation between the supervising faculty and the work supervisor at the cooperating site, both of whom must judge and certify different aspects of the student’s work. The credit formula is similar to that for practice credit.

LA ROCHE CLASS MEETING TIMES IN HOURS – 3 CREDIT COURSES

**Accelerated Courses must meet the same semester credit hours as traditional semester-length classes. Within the shortened time frame, accelerated classes must supplement face-to-face contact with one or more of the following:

• Lecture/discussion/chat sessions delivered synchronously directly by the instructor via Blackboard, Skype, etc.

• Required and faculty-involved asynchronous interaction via discussion boards, blogs, wikis, other appropriate social media, etc. in Blackboard or other means.

• Proctored tests/exams or student evaluation tasks delivered through Blackboard.

• Assignments (reading, writing, video, experiential/field work, service learning, laboratory work, studio work, supervised or independent practice, etc.) that exceed assignments required for a face-to-face course.

Departments must document, through their course syllabi, how accelerated courses will meet the minimum semester credit hour requirement. Faculty will complete a Credit Hour Compliance form and submit to the department secretary along with corresponding course syllabus prior to each semester the course is taught.

Online Courses

In accordance with Middle States recognition of assessment evidence as the most compelling evidence for measuring level of instruction and academic rigor, all online courses must be designed to include the content and meet the outcomes and level of rigor that would be expected to be covered in a course that meets face-to-face according to the La Roche Credit Hour Policy. Faculty will complete a Credit Hour Compliance form and submit to the department secretary along with corresponding course syllabus prior to each semester the course is taught.

Regular Review

Department Chairs are responsible for conducting a regular review of courses within their departments to ensure that all courses are in compliance with the credit-hour policy. This review is conducted across all schools, disciplines, and course levels, and modes of instruction. The Core and Curriculum Committees of the Senate review and approve all new courses, according to procedures established and published in the Faculty Handbook.
An annual review by Department Chairs ensures that course continue to meet the established student learning outcomes, with the results
documented in the online assessment tool, WEAVE.
Registrar to regularly audit the semester schedules to ensure that on-campus classes comply with established credit-hour requirements.

DEFINITIONS
Academic Rigor
Teaching, learning, and assessment which promotes student growth in knowledge of the discipline and the ability to analyze, synthesize, and
critically evaluate the content under study.
Asynchronous
A student-centered teaching method that uses online learning resources to facilitate information sharing outside the constraints of time and place
among a network of people.
Web-Facilitated
Course that uses Web-based technology to supplement what is essentially a face-to-face course.
Course Methods
La Roche College has adopted the following course method definitions:

IN CLASSROOM:

Note: For Financial Aid purposes, PHEAA defines classroom instruction to include faculty instruction
within a laboratory, shop or hospital clinical setting.” to exclude “…videotaped courses used in the home
setting, correspondence courses, or on-line courses.” PHEAA considers hybrid courses as distance
learning courses. Source: PHEAA Distance Education Supplement 2012-2013.

Lecture

Courses delivered face-to-face, including those that use web-based technology to supplement what is
essentially a face-to-face course. This includes the use of Blackboard to post syllabus and assignments.

Lab

Students carry out experiments requiring special laboratory equipment and facilities.

Studio

Students develop technical or creative skills such as painting, music, drama, or design.

Clinical/Student Teaching

Students develop professional skills by actual practice involving patients or students. Typically conducted
at approved off-site locations.

Independent
Study/Directed
Study/Directed Research

A course of study with predefined objectives where the student works with a faculty member to decide
how the student is going to meet those objectives. The student and faculty member agree on what the
student will do (e.g., required readings, research, and work products), how the student’s work will be
evaluated, and on what the relative timeframe for completion of the work will be. The student must
interact with the faculty member on a regular and substantive basis to assure progress within the course or
program. Source: 34 CFR 668.10

Internship

Determined by negotiation between the supervising faculty and the work supervisor at the cooperating site,
both of whom must judge and certify different aspects of the student’s work. Source: USNEI Typically
conducted off- site.

ONLINE:

Note: For financial aid purposes PHEAA defines online course as those where 51% or more of the class is
delivered online.

Online

Asynchronous online instruction delivered to a group of students or an individual student where 100% of
the class is conducted online.

Online Hybrid

Blended classes with some face-to-face component, where 51 to 99%of the class is conducted online.

Degree Requirements
To qualify for a degree from La Roche, a student must:
1. Complete the core curriculum (see Core Curriculum).
2. Successfully earn a minimum of 120-132 credits and fulfill the residency requirement (must complete the last 30 credits at La Roche).
3. Select a major and complete the program of studies that meets the divisional requirements and the approval of his/her advisor.
4. Achieve a cumulative quality point average (QPA) of 2.000 or "C" and QPA of all courses required to complete the major except those
majors where more than a 2.000 is required. In those instances, students must achieve the major QPA as stated in the college catalog.
5. Students must file a formal application for graduation by the deadline published in the academic calendar. A graduation fee is payable at
that time. Forms may be obtained from the students’ advisors, or on the Registrar’s web page. The forms must be returned to the
Registrar’s Office in the College Center.
Developmental Courses
The college recognizes that all students who possess a potential for success in a baccalaureate program begin their college careers with varied

Page 11 of 293


The college recognizes that all students who possess a potential for success in a baccalaureate program begin their college careers with varied preparations. Some students require assistance in writing, English, reading, arithmetic and/or algebra before they are prepared to engage in college level study in these areas.

Through the college's placement testing program (see The Academic Program and Placement Tests) the college identifies students who require assistance in the above areas. Specific courses and their term of completion are assigned by the Assistant Dean for Academic Affairs, Academic & Career Advising in consultation with appropriate faculty. Developmental courses are required of students who do not achieve satisfactory levels on the academic course placement tests. A grade of C or higher is required to progress to college level courses. Developmental course credits apply toward a student’s class standing and academic progress for financial aid purposes for all financial aid programs except the PHEAA grant program. Developmental course credits do NOT, however, apply toward college graduation credit requirements, nor may their grades be calculated toward Dean’s List consideration.

The following are developmental courses:
- MATH0010 Basic Mathematics I
- MATH0015 Beginning Algebra
- ESLN0085-0120 English as a Second Language

Experiential Education Programs: (Credit for Life; Directed Study; Directed Research; Independent Study; Internship
Credit For Life Experience

Credit for life experience may be earned for learning gained prior to enrollment at La Roche College. To earn credit for life experience, learning must relate directly to a course offered by La Roche and appear in the catalogue, with the exception of courses listed as internship, independent study or directed research. The total number of credits awarded for life experience may not exceed 30 and may not be included in the last 30 credits required for residency. Each division determines the number of credits awarded for life experience to be counted toward a major. Students should contact their advisor or the registrar for a description of each program, restrictions and procedures.

Directed Study

A Directed Study offers students the opportunity to study individually with a faculty member, on a contractual basis, to substitute for a course that is needed for the student’s program of study, but is not available in a particular semester. The Directed Study must provide a rigorous academic experience equivalent to that of any undergraduate course, and all student learning outcomes for the course must be met.

Students will be expected to meet with faculty as agreed upon in the Directed Study proposal. The amount of supervision will be determined by the faculty member and included on the Directed Study form. The student must also complete independent work time commensurate with in-class courses, where 45 hours of learning activities are required for every one credit earned. (135 hours for a three-credit course.) Students must document their hours on the Directed Study Time Sheet.

Students wishing to complete a Directed Study must have a QPA of 2.5 or higher, and may complete up to six credits of Directed Study during their tenure at La Roche. Exceptions for graduating seniors will be made with the approval of the Vice President of Academic Affairs.

Directed Research

Directed research involves the student in the research process by actually engaging in research under the supervision of a full-time faculty member in a related discipline. The purpose of a Directed research project is to explore a theoretical or experimental research problem, the goal of which is a substantive paper or written report containing significant analysis and interpretation.

Directed Research is not a replacement for an existing course, but requires greater direct supervision by a faculty member than an independent study. The amount of supervision will be determined by the faculty member and included on the Directed Research form.

In accordance with the College’s Credit Hour Policy, students must complete work time commensurate with laboratory courses, where between 45 to 90 hours of learning activities are required for every one credit earned. (135 to 180 hours for a three-credit course.) Students must document their hours on the Directed Research Time Sheet.

Directed Research is limited to 2-4 credits per semester for upper class students in an academic major which establishes the prerequisites. Students may take up to a total of 8 credits of directed research during their tenure at La Roche.

Students must register for a Directed Research by the end of the established add/drop period for the semester or session.

Independent Study

Independent study is an in-depth examination of a particular topic, on a contractual basis and under the limited supervision of a full-time faculty member in a related discipline. Independent study is not a substitute for a formal course, but provides the student with the opportunity to pursue a subject in more depth and in a more independent manner than is possible in a traditional course. Students are responsible for developing their own proposal, following through with assignments and working independently. The amount of supervision will be determined by the faculty member and included on the Directed Research form.

Student initiated proposals, including rationale and goals, must be submitted via the Independent Study Form and approved by the faculty member, the student’s advisor and the department chair.

In accordance with the College’s Credit hour policy, students must complete independent work time commensurate with in-class courses, where 45 hours of learning activities are required for every one credit earned. (135 hours for a three-credit course.) Students must document their hours on the Independent Study Time Sheet.

Students wishing to complete an independent study must have a QPA of 2.5 or higher. Students may take up a total of 6 credits of independent study during their tenure at La Roche.
Students must register for an Independent Study by the end of the established add/drop period for the semester or session.

**Internship**
As part of the academic curriculum, internships are available to students to provide an opportunity to apply formal theory and classroom learning to a field experience associated with their academic major. Juniors and/or seniors who have completed a minimum of 15 credits at La Roche College and 12 credits in their major may coordinate an internship with their academic advisor. Initial inquiries concerning internships should be directed to the Student Academic Support Services Office.

**Grading System**
The college awards the following grades and assigns quality points on a 4-point per credit scale:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Points Per Credit</th>
<th>Quality Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>4.000</td>

**Midterm Grade Policy**
A grade at midterm is required for all freshman students both fall and spring semesters. In addition, faculty are required to report any earned "D" or "F" midterm grades for students other than freshmen.

**Incomplete Grade Policy**
In exceptional cases, a student may request an incomplete grade "X" for a course. If approved by the instructor, the request for an incomplete will be submitted on the appropriate form to the Registrar's Office. In the event that the student does not complete the necessary work within six (6) weeks after the beginning of the next academic semester, the "X" grade will automatically become an "F" grade. Extension beyond six weeks may be granted by the faculty member in the most compelling circumstances. The faculty member must send an email to the Registrar for approval requesting this extension with a deadline date for required work. It is the responsibility of the faculty member to communicate this information to the student.

**Pass or No Credit**
A student may register for one pass or no credit course each semester. Major, major elective courses, and college graduation requirement courses are not available for the pass or no credit option, except for internship courses. Individual departments will determine whether internship courses will be graded on a pass or no credit basis.

Application for the pass or no credit option may be obtained from the Registrar's Office. Signed applications must be submitted at the time of registration. This formal application is irrevocable after the last day to add. Since no quality points are assigned for a pass or no credit grade, the grade is not used in the calculation of the QPA.

**Placement Tests**
Freshmen students are required to complete academic course placement tests prior to their first semester enrollment. Testing is required in three areas: writing, mathematics, and computer applications. Transfer students who have not or will not receive transfer credit for college writing I and/or college algebra must complete the appropriate placement tests prior to their first semester enrollment.

Students who do not achieve satisfactory levels on the placement tests are required to complete appropriate developmental courses. Specific courses and their term of completion are assigned by the Student Academic Support Services Office in consultation with appropriate faculty. Developmental course credits apply toward a student's class standing and academic progress for financial aid purposes. Developmental course credits do NOT, however, apply toward college graduation credit requirements, nor may their grades be calculated toward Dean's List consideration or calculated into a student’s QPA.

**Repeated Course**
A course may not be repeated more than twice without the approval of the student’s academic advisor and department chair. When a course is repeated, the grades received in both the original course and the subsequent course will remain on the student’s academic record. The higher of the two grades earned is included in the computation of the cumulative grade point average (GPA).

The repeated course must be the same in which the original grade was earned. In extenuating circumstances where a course is no longer offered, another course of similar content, verified by the chair of the department offering the course, may be approved as the replacement. If a course number or title changes, with no change in content, the new number and title will be accepted as the replacement.

Courses may not be repeated at any other institution and have that grade accepted as a replacement for the original grade earned at La Roche.

**Semester Credit Maximum**

The average number of credits carried by full-time students is 12-15 hours each semester. Full-time tuition rate will be charged to students who take up to 17 credits. Students with a 3.00 QPA for the preceding semester and a 2.5 cumulative average may take more than 17 credit hours during a semester with approval of the student’s academic advisor.

**Student Evaluation**

During the last week of each semester each student confidentially and anonymously evaluates each course in which s/he is enrolled. The faculty use these evaluations as a guide in improving their teaching and advising.

**Temporary Transfer**

Once a student is matriculated at La Roche College, no more than two courses, not to exceed 8 credits, may be taken and transferred from other colleges. Authorization to have these credits transferred to La Roche must be obtained in writing before enrolling at another college. Students may not transfer credits during their residency (the last 30 credits of their coursework). Students who have accumulated 60 credits may not transfer credits from a community college, a junior college, or other two year program. Only courses not available through La Roche may be taken at other institutions. In most cases, permission for temporary transfer will be granted for the summer semester only.

**Transcripts**

All requests for official transcripts are obtained through an on-line system. A fee is charged for each official transcript requested. A transcript will not be released for any student who has not met their financial obligations to the college.

**Transfer and Extramural Credits**

A student may transfer to La Roche College from other accredited colleges or universities. In such cases, only those credits transfer which: (1) are congruent with the academic programs of La Roche, and (2) the student received an A, B, or C grade. Credits are evaluated course-by-course by the Registrar. In all cases the academic departments at La Roche will have final determination on the evaluation of courses which satisfy major and/or department requirements. Transfer students may transfer credits toward their major at La Roche with the following limitations:

- Graphics, Design and Communication - individually determined by the department chair.
- Humanities - 9 credits in a major
- Sciences - 50% of the credits in a major
- Administration and Management - 39 credits in a major
- Social Sciences - 15 credits in a major

Transfer credits are not included in the computation of the QPA but are accepted toward a degree.

**Withdrawal from the College**

If a student voluntarily withdraws from the college for any reason he/she must complete an exit survey and withdrawal on-line. This procedure must be followed by all students wishing to withdraw from La Roche including those taking La Roche classes at all campus locations or cross registered at other institutions. All refunds of tuition and fees are based on the official date of withdrawal. Failure to properly complete the withdrawal process may result in the loss of good standing.

**Graduation Application Procedures**

Students who plan to graduate in December, May, or August must file a formal application for graduation by the deadline published in the academic calendar. Students will need to complete an on-line application for graduation, and meet with their advisor to confirm completion of graduation requirements. Graduation fee is due at time of completion of the application, this fee can be paid on-line, in the Registrar's Office or Student Accounts Office. Students will not be certified for graduation without filing an on-line application for graduation.

**Academic Honors**

In order to recognize and encourage excellence in academic achievement, the college acknowledges at commencement those individuals who attain superior performance. Students may be graduated with college or major honors if they have completed at least 45 credits at La Roche. A student with a cumulative QPA as follows:

- QPA of 3.900 - 4.000 Summa Cum Laude (with highest honors)
- QPA of 3.750 - 3.899 Magna Cum Laude (with high honors)
- QPA of 3.500 - 3.749 Cum Laude (with honors)

Major honors are awarded by faculty as outlined for the honors program.

**Registration**
A student is permitted to attend only those classes for which he or she is officially registered. New students are registered for classes prior to the beginning of their first semester. Returning students register on-line during mid-semester for the following term. Dates of registration are published in the academic calendar.

Credits will not be granted nor grades recorded on a transcript for any course for which a student is not officially registered.

Many advanced (upper level) courses have prerequisites as indicated in the catalogue. A student may not register for a course until he or she has met the prerequisites or unless the division chairperson or department chairperson grants permission in writing.

Adding or Dropping of Classes

Classes may be added only during the scheduled add/drop period each semester; the last date to add a class is published in the academic calendar. Students are permitted to drop a class after the first week of classes each semester and the final date of the drop period is published in the academic calendar. Classes dropped after the first week of classes are included on the student's transcript and indicated by a withdraw "W" grade.

In order to add or drop a class, the proper form, obtainable in the Registrar's Office, must be submitted to the registrar with the appropriate signatures. An add/drop fee is required when adding and/or dropping a class after the scheduled deadline for each event. This fee is payable in the Registrar's Office.

Non-attendance does NOT constitute an official class drop. Failure to drop a class will result in an "F" grade on the student's transcript.

Attendance does NOT constitute an official class add. Grades will not be issued nor recorded for a student who completes a class for which he/she is not officially registered.

Audit

Students may audit courses. An audit signifies that the student will not be asked to meet the course requirements such as written assignments or examinations, but that he or she has the privilege of class attendance and participation. Formal application for this option must be made at the time of registration. The tuition for an audited course is identical to the tuition for degree status. No credits toward graduation can be earned for audited courses, and no grade can be given. One may not change from an audit to a regular credit basis once the add period has ended.

Class Attendance

Each instructor is responsible for determining attendance requirements and informing students. Every student enrolled in a course is fully responsible for meeting the requirements stipulated by the instructor. In most cases class time will be integral to the thorough understanding and effective use of the subject matter of the course. A student who misses class may endanger his/her progress and seriously hinder successful completion of the course.

Prolonged absence from classes due to serious illness or emergency should be reported as soon as possible to the Student Academic Support Services Office. Such prolonged absence may necessitate a withdrawal from the course or courses in question.

Credit By Examination

Instructor Prepared Challenge Examination affords students an opportunity to demonstrate that the knowledge associated with a particular course has already been gained. Challenge exams are not recommended for students unfamiliar with the subject area. With appropriate permission, matriculated La Roche students may take an instructor prepared Challenge Examination for a particular course. Students may challenge a course during residency only if he/she has or will have completed 30 credits of La Roche College class instruction. A maximum of 60 credits may be earned through credit by a Challenge Exam. Divisions determine and maintain both a list of courses available for challenge and restrictions on courses challenged during a student's residency. Normally, a course is challenged only during the semester in which it is offered. Students may not challenge a course which they have failed or retake a failed Challenge Exam. Additionally, students may not challenge a course for which they have registered after the last day of the add period.

Students must pay an application fee and complete the appropriate form, available from the Registrar's Office. Signatures from the instructor, the advisor & division chair or department chairperson are necessary. An additional per credit fee is required when credits are granted for the completed exam.

Standardized Examinations

The college will award credit for the following standardized examinations: ACT/PEP, CLEP, DANTES, and Advanced Placement. A student can earn CLEP credit in the general examinations and the various subject examinations. The criteria used for awarding credit are the Recommendations Concerning Use of College Level Examination Program (CLEP) published annually by the American Council on Education. Each academic division determines if CLEP is applicable to their specific majors.

No standardized examinations are permitted during the student's residency.

On the AP Examinations for High School Standards, a score of 3 or 4 allows a student to waive a specific course and take the next higher level course. A score of 4 or 5 is needed, however, to receive college credit for the course.

Cross Registration

Any full-time student may cross-register for one course each semester at any one of the Pittsburgh Council on Higher Education (PCHE) institutions, provided the course is open for cross-registration. The grade earned for a cross-registered course is calculated in the student's GPA. There is no PCHE cross-registration available in the summer or for intercessions. An authorized registration form must be approved by the advisor and the Registrar's Office. Forms are filed with the registrar of the host and home institutions before the deadline for such registration.

La Roche students should use the La Roche College tuition, refund, and add/drop policies any time they cross-register at another institution. However, students are responsible for paying for special course or laboratory fees to the host institution. For further information concerning cross-registration, contact the Registrar's Office.

Member colleges of PCHE, in addition to La Roche, are: Carlow, Carnegie Mellon, Chatham, Community College of Allegheny County, Duquesne, Pittsburgh Theological Seminary, Point Park, Robert Morris, and University of Pittsburgh. La Roche students having accumulated 60
credits are not permitted to register for courses at a community, junior college or other 2-year programs.

**Tuition and Fees**

The following figures represent tuition and fees for the 2013-2014 academic year at La Roche College. If you have questions, please contact the Student Accounts Office at:

- PHONE: 412-536-1030
- FAX: 412-536-1075
- E-MAIL: stuacct@laroche.edu

*Note: Tuition and fees are subject to change without notice.*

**Transfer and Non-Traditional Credit**

Every student transferring to La Roche College will have their transcripts evaluated by the Registrar after they have been admitted. Credits will be awarded on a course-by-course basis, taking into account course descriptions, outcomes and objectives. The Registrar may choose to consult faculty for further review of courses. In all cases the academic departments will have final determination in the evaluation of courses which satisfy partment/major requirements.

Transfer Credit Limits

- La Roche College will accept a maximum of 90 credits toward an undergraduate degree from four-year degree-granting institutions, regionally accredited by one of the six accrediting organizations recognized by the Council on Higher Education Accreditation and the United States Department of Education.

- A maximum of 66 credits will be accepted toward an undergraduate degree from regionally accredited Community or Junior Colleges that offer two-year education programs and awards associate degrees.

[Click here for Community College Transfer Equivalency Guides]

- A maximum of 45 credits will be accepted toward an undergraduate degree from a technical school, accredited by an agency recognized by the Department of Education. A technical school is defined as a two-year institution of higher education that focuses on an occupational or technical curriculum, and awards associate degrees at the conclusion of the program.

- La Roche may accept up to 6 semester hours of graduate credit toward a graduate degree at the discretion of the department.

In all cases, only those courses which are congruent with the academic programs of La Roche will be accepted.

Students may transfer in no more than 50% of the courses counted for a major. Individual departments may further limit the number of credits accepted to fulfill major requirements.

[Click here for more details.]

Students may transfer in no more than 50% of the courses counted for a minor.

**Residency Requirement**

- All students must complete the last 30 credits (in residency) at La Roche College. In extenuating academic circumstances, the Vice President of Academic Affairs and Academic Dean may grant an exception to the residency policy. Transfer credit and credits from all other sources (see below) cannot be included within the last 30 credits.

**Grades, Credits and GPA**

- Only courses with a letter grade of “C” or better are accepted in transfer.
- Transfer credit is not calculated in the La Roche College grade point average.
- La Roche College operates on a semester system. Courses accepted from institutions on a quarter system are transferred at 2/3 value.
Official Transcripts and Evaluations

- All transfer students must request and file official transcripts of courses taken at other institutions before transfer credit will be awarded.
- Transfer students who attended universities outside of the United States must submit an international credential evaluation report which explains how their international education compares to the U.S. system. (Transcripts must be translated into English before an evaluation can be processed.) A course-by-course evaluation including a grade point average (GPA) must be sent directly from an approved evaluation service to La Roche College.

Courses Not Accepted In Transfer

- Computer technology courses completed more than 10 years before a student’s matriculation at La Roche
- Courses completed more than 10 years before a student’s matriculation at La Roche into a nursing major, unless the student is a licensed Registered Nurse
- Courses offered for non-credit Continuing Education Units (CEU)
- Remedial courses in English or Mathematics, usually numbered below 100
- Non-credit courses providing instruction in English as a Second Language
- Course completed with a grade of “P” or “S” (Pass or Satisfactory); unless verified in writing by the Registrar of the prior institution that such grade is equivalent to a grade of “C”.

Non-Traditional Learning Options

La Roche College will accept a maximum of 60 credits total from non-traditional sources listed below:

- Advanced Placement (AP). Departments approve qualifying scores through the Advanced Placement Program of the Educational Testing Service (ETS). Students must have their scores sent directly to the College Registrar to receive credit.

- Challenge Examinations. A qualified applicant may earn credit by proficiency Examination upon the recommendation of the department chair and the approval of the registrar. The exam is administered by a La Roche faculty member must be completed prior to the last 30 hours at La Roche with a minimum grade of C.

- External Examinations. Satisfactory scores on the College Level Examination Program (CLEP), Defense Activity for Non-Traditional Education Support (DANTES), and other examinations evaluated by American Council on Education (ACE) for college-level credit. Students must have scores reported directly to the College Registrar.

- Credit for Training. Credit will be awarded for military training that has been evaluated and recommended for college credit by the American Council on Education (ACE). Students must submit documentation (AARTS or SMARTS transcript is recommended, at minimum a DD214 or DD295) of training to the College Registrar.

- Credit for Life Experience. A La Roche student can earn up to 30 credits at the undergraduate level through work and life experience through the development of a portfolio. Portfolios are submitted to the Registrar’s Office and evaluated by La Roche faculty in the student’s intended major. Credit for Life Experience credit hours can be applied toward general and major electives and courses for lower and upper division requirements for your major.

## Residence Fees

| Category                      | Description                                                                 | Amount  
|-------------------------------|-----------------------------------------------------------------------------|---------
| **Residence Hall key and damage deposit (non-refundable)** |                                                | $100.00 |
| **Providence Meal Plan per semester** |                                                | $1895.00 |
| **Red &White Meal Plan per semester** |                                                | $1710.00 |
| **Ketteler Meal Plan per semester** |                                                | $1572.00 |
| **Bold Hall room charges** |                                                | $3267.00 |
| **Mahler/Peters/Schneider room charges** |                                                | $2888.00 |
| **Parking Fee for Resident Students (required only if you have a car)** |                                                | $100.00 |

## Processing Fees

| Category                      | Description                                                                 | Amount  
|-------------------------------|-----------------------------------------------------------------------------|---------
| **Late Application Fee for Graduation** |                                                | $25.00  |
| **Reprint/Replacement Diploma** |                                                | $40.00  |
| **Late Registration Fee (after Registration Deadline)** |                                                | $100.00 |
| **Incomplete Grade Processing Fee** |                                                | $5.00   |
| **International Application Fee** |                                                | $50.00  |
| **Graduation Application Fee** |                                                | $85.00  |
| **Class Withdrawal Fee (After Add/Drop)** |                                                | $50.00  |
| **Insufficient Funds Returned Check** |                                                | $25.00  |
| **Official Transcript Copy** |                                                | $7.50   |

## Other Fees/Semester

| Category                      | Description                                                                 | Amount  
|-------------------------------|-----------------------------------------------------------------------------|---------
| **Student Support and Development** |                                                | $200.00 |
| **Curricular Support and Learning Technology Fee** |                                                | $175.00 |
| **ESL Fee**                   |                                                | $60.00  |

*Note: Tuition and fees are subject to change without notice.*

La Roche College

Board of Trustees
The Board of Trustees of La Roche College is committed to the school's mission and to ensuring that adequate fiscal resources are available to realize that mission. The Board further affirms the teaching, research and service roles of higher education and the concomitant value of academic freedom in a free and democratic American society.

In particular, the Board affirms the value of a college education which promotes the development of civic responsibility and productive working members of society; the importance of the American enterprise system as the cornerstone of a strong and free economy; the strength of the Catholic heritage of the College and the need to educate for social justice; and the social goal of providing access to higher education for diverse citizens of the society.

The quality education and financial health of La Roche College depends to a large measure on the competence of those chosen to serve as trustees. Some of the skills the College seeks in trustees are: ability to raise and manage financial resources; knowledge of higher education; knowledge of local, state, and/or federal government; lobbying or political skills; knowledge of real estate and legal expertise. The Board seeks diversity of age; sex; educational, racial, ethnic and religious background; and social and political views.

Regular meetings of the Board are held in the months of February, May and October. The following are current Board members:

Officers of the Board

Steven M. Massaro, Chair
Vice President, Business Development
Massaro Corporation

Kathryn A. Jolley, ASID, BS ’81, Vice Chair
Principal
DRS Architects, Inc.

Members of the Board

Sister Kathleen Angel, CDP, Ph.D. ’68
Residence Director
St. Clare’s Villa, Alton, IL

Lee Baierl
President
Baierl Automotive

Godfrey Biravanga C.P.A. ’01
Senior Audit Manager
SunTrust Bank

Jesse C. Campayno
President/Owner
Campayno Consulting Services, Inc.

Hugo M. Churchill (Emeritus)
Gibsonia, PA

La Roche Course Catalogue

La Roche College Core Curriculum

The Core Curriculum is the Liberal Arts foundation of a La Roche College education. As students progress through a diverse yet coordinated succession of Core courses, they are challenged to develop the fundamental proficiencies necessary for success in any field of study; to read, write, think, and act critically and creatively in diverse areas of intellectual inquiry; to explore within interdisciplinary settings the individual, local, and global contexts in which they live; and to develop standards of ethical belief and behavior in their academic and personal lives. As such, the Core prepares students to participate intellectually, ethically, creatively, and spiritually within their communities, professions, and world.

Upon successful completion of the Core, students are expected to demonstrate the following characteristics, in addition to the learning outcomes described for each component and the component courses of the curriculum.

• Competence in the fundamental activities necessary for success in any field of study.
• The power to pose academic questions in areas of intellectual inquiry outside the student's major field of study, and to draw on the principles, methodologies, and resources native to those areas in addressing these questions.
• The ability to recognize the complex, interdisciplinary nature of knowledge as it is generated in the world today, and the corresponding ability to approach issues from a variety of perspectives and with a variety of analytical tools.
• The imaginative capacity to conceptualize the interrelationships between local and global communities, and the moral capacity to act on that awareness to further freedom, peace, justice, and well-being for all the world's people.
• The conviction that academic study is infused with ethical choices and concerns, and the courage to promote ethical beliefs and behavior in their academic and personal lives.

The La Roche College Core Curriculum consists of the following components:

- The La Roche Experience
- Fundamental Skills
- Select Courses
- Community & Global Courses

Specific learning outcomes for each component of the Core Curriculum can be found here. (Core Curriculum Learning Outcomes)

I. The La Roche Experience (4 credits) – The La Roche Experience is composed of four 1-credit courses taken over four semesters. The course emphasizes the history of La Roche College and introduces students to issues in Diversity and Discrimination, Regions of Conflict, and Economic Justice.

II. Fundamental Skills (12 credits) - These courses provide a foundation of skills for lifelong learning, including writing, mathematics, analytical thinking, problem solving, computer applications, information literacy, and basic knowledge of a foreign language. Students may test out of these requirements. Those who test out of a fundamental course can use the credits for electives.

- ENGL1011 - College Writing: Exposition I
- ENGL1011L – College Writing: Exposition I Lab
- ENGL1012 - College Writing: Exposition II
- MATH1010/A – College Algebra (minimum math requirement for credit toward degree)
- ISTC1005 - Practical Computer Applications

III. Select Courses - These courses emphasize broad-based, liberal education and challenge students to explore the principles, methodologies, and resources within areas of intellectual inquiry outside their major field of study. Twelve (12) – eighteen (18) credits are required, including study within each of the following domains:

- History
- Science
- Literature
- Social and Cultural Systems
- Religion or Philosophy
- Aesthetics

Students can fulfill six domains with four courses because: 1) some courses may investigate two domains and will thus carry more than one domain designation; 2) students may fulfill a domain requirement through courses taken in their major, e.g., a literature major would necessarily have "in-depth study of the principles" of literature.

Community Courses and Global Courses (6 credits): effective for new students entering in Fall 2008.

- COMM - Community
- GLBL - Global

These courses emphasize the integration of knowledge and the interconnections between the local and the global. Students are required to take one Community course and one Global course. These courses should be taken in sequence, with the Global course taken after the Community course.

Students entering La Roche College before Fall 2008 fall under the Integrative 100-level, 200-level, and 300-level course sequence for a total of 9 credits of integrative experience course work. Refer to the previous catalog for descriptions of this requirement.

## Detail - Business Division

### Accounting

Management Information Systems Technology is a member of the Accreditation Council for Business Schools and Programs (ACBSP), a leading specialized accreditation association for business education.

The major in accounting is designed to give students a comprehensive treatment of current accounting principles and practices. The main goals of the program are to prepare students for professional careers in accounting and to aid them in meeting the education requirements for the Pennsylvania CPA and CMA certifications. The program also provides preparation for graduate study in accounting, business or public administration. Accounting courses give students ample opportunity to achieve a degree of proficiency in accounting skills and analytical techniques. To complete the accounting major successfully, the following course work is required:

- 48 credits in Business Core Requirements
- 21 credits in Accounting Major Requirements
- 6 credits in Accounting Major Electives
9 credits in Skills Components

34 credits in CORE Curriculum

Accounting Major Requirements: 21 credits

Taxation I
Taxation II
Intermediate Accounting I
Intermediate Accounting II
Cost Accounting
Advanced Accounting
Auditing

Business Core Requirements: 48 credits

Accounting I
Accounting II
Managerial Accounting
Macroeconomics
Microeconomics
Fundamentals of Management
Business Law I
Organizational Behavior
Human Resources Administration
Operations Management
Seminar-Business Policy
Financial Management
Financial Institutions
International Business Management
Practical Computer Applications
Marketing Management

Major Electives: 6 credits

Accounting with Computers
Accounting Internship I
Accounting Internship II
Business Law II
Business Organization & Regulation
Investments
Commercial Bank Management
Managerial Finance
International Finance
International Legal Environment
Advanced Practical Computer Applications
Management Of Information Systems
Data Base Management Systems
Distributed Data Processing

Skills Component Requirements: 9 credits

Professional Presentation
Calculus for Business, Economics, & Managerial Sciences
Probability & Statistics

Accounting 4+1

The 4+1 program was established to create a seamless transition from undergraduate to graduate study. The Master of Science in Accounting offers an advanced level of study in various, specific topics in the accounting profession that do not typically appear in the undergraduate level. Students enrolled in the program will be able to further their professional careers with the knowledge gained from these advanced level courses. Students' successful completion of this program will meet the 150 hour CPA certification requirement.

To successfully complete the Accounting 4+1 major, the following coursework is required:
- 48 credits listed under Business Core (major component)
- 21 credits of Major Requirements
- 6 credits of Major Electives
- 9 credits of Skills Component
- 34 CORE credits
- General Elective credits if needed
- 30 Master's Level Credits
- A minimum of 150 credits are required for degree, the last 30 of which must be earned at La Roche College. (Developmental course work does not count toward the minimum number of credits required for graduation)

Management Information Systems Technology is a member of the Accreditation Council for Business Schools and Programs (ACBSP), a leading specialized accreditation association for business education.

The central objectives of the major in finance are to develop students' critical and analytical skills and to enable them to apply these skills effectively in identifying and solving problems in the area of finance. A second program objective is to foster within the student awareness of values and moral issues in modern finance.

To successfully complete the Finance Degree, a minimum of 120 credits are required, the last 30 of which must be earned at La Roche College.

The following coursework is required:

- **48 credits of Business Core Requirements**
- **15 credits of Finance Major Requirements**
- **12 credits of Finance Major Electives**
- **9 credits of Skills Components**
- **34 credits of CORE Curriculum courses**

Information Technology

This major prepares students for employment in a wide range of technical computer-based occupations ranging from networking to database administration, help desk solutions, and web administration.

To successfully complete the Information Technology Major, the following coursework is required:

- 54 credits of IT Major Requirements
- 18-21 credits to secure a minor

Note that all IT majors are required to take a minor. MIS (Management Information Systems) is not available as a minor for these purposes.

- 45-48 credits of CORE Curriculum courses and General Electives as required to reach 120.

A minimum of 120 credits is required for completion of degree, the last 30 of which must be completed at La Roche College.

Note: The IT program is not structured to be a part of La Roche College's undergraduate business programs and therefore is not included in its ACBSP accreditation.

IT Elective: Select 1

Distributed Data Processing  ISTC2050  
Web Page Usability & Programming  ISTC3008  
Computer Programming: COBOL  ISTC3020  
Scripting for the Web  ISTC3028  
Advanced Networking & Telecom  ISTC3031

International Affairs
The International Affairs program will offer students the opportunity to develop a global perspective by being exposed to the complexities of world politics and economics. It will instill in students an awareness and appreciation for the mosaic of cultural diversity among nations and peoples. Students will become familiar with the rapidly developing international organizational structures in government, business, and other areas of international activity. Students will have career opportunities in public service in international areas of government and diplomacy, international governmental and non-governmental organizations, and international business.

To complete the International Affairs concentration successfully, the following coursework is required:

120 credits are required for graduation, the last 30 of which must be completed at La Roche College.

- 36 credits of International Affairs Major Requirements
- 18 credits of International Affairs Major Electives (NOTE: Students may select up to 9 credits in History and/or Geography).
- 12 modern language credits in a language other than the student's native language (can be waived for International Students through completion of a Challenge Exam)
- 37 credits Core Curriculum courses
- 17 credits of General Electives selected by the student and the advisor.

### International Affairs Major Electives: 18 credits

### International Management

Management Information Systems Technology is a member of the Accreditation Council for Business Schools and Programs (ACBSP), a leading specialized accreditation association for business education.

The major in international management is designed to offer students an opportunity to broaden their perspectives to include the international aspects of management of business enterprises. A central objective is to train students interested in a career in international business by familiarizing them with the international operations of business enterprises and other institutions.
Students become familiar with the international economic and legal environment through a comprehensive review of international trade, foreign investment and the international monetary and legal systems. Students are further encouraged to develop a global perspective in their education by learning a foreign language, studying world geography, world politics and other courses with an international emphasis.

To complete the international management major successfully, the following course work is required:

- 48 credits in Business Core courses
- 9 credits of Skills Component courses
- 12 credits of International Management Major Requirements
- 12 credits of International Management Major Electives
- 6-8 credits in a Foreign Language other than the student's native language
- 34 credits of CORE Curriculum requirements

A minimum of 120 credits is required for graduation, the last 30 of which must be completed at La Roche College.

**Business Core Requirements: 48 credits**

Leadership

THIS PROGRAM IS OFFERED BOTH ON CAMPUS AND ONLINE.

We’ve designed the Leadership bachelor degree completion program with your needs in mind. In as little as 19 months, you can earn a Bachelor of Science. Once you’ve earned your degree, you’ll be poised to compete in a 21st-century economy and pursue a career in business or management.

With Leadership, we get down to business. We focus on writing, research methods, organizational behavior, information technology, human resources administration and communications. You’ll enroll in our intensive 30-credit program and take 9 consecutive courses over a 19-month period. You’ll work in cohorts with people who come from similar professional backgrounds.

The Leadership program is designed for the working adult that has already completed some college coursework. While the Leadership program only consists of 30 credits, you must complete the equivalent of 120 credits of college coursework to earn your degree. La Roche can accept up to 90 transfer credits in some situations. You can also explore other ways to meet the requirements, including:

- Traditional or accelerated courses from La Roche College
- College-Level Examination Program (CLEP), a standardized multiple choice test for various subject areas
- Credits earned through Credit For Life Experience
- Challenge Exams
  - 30 Leadership program credits
  - 90 Core/General elective credits (which includes transfer credits)

This degree completion program is designed for adult and transfer students interested in careers in business and management. The goals of the Leadership degree completion program are to enhance and further develop:

- Interpersonal and leadership skills
- Written and oral communication skills
- Real world problem solving and decision making skills
- Learner independence and self-reliance
- Understanding of the research process and its application.

We strongly recommend that students have at least 60 credits in transfer. To successfully complete the Leadership Program, the following course work is required:
LEAD Component Requirements: 30 credits

- Dynamics of Teams
- Information Literacy Skills
- Management & Financial Analysis
- Macro Organizational Behavior
- Leadership and Ethics
- Communicating Change
- HR Concepts & Negotiations
- Global Thinking & E-commerce
- Capstone Project

Management

Management Information Systems Technology is a member of the Accreditation Council for Business Schools and Programs (ACBSP), a leading specialized accreditation association for business education.

This major is designed to give students a solid foundation in the area of management. The main goals of the program are to prepare students for career opportunities in business administration and to prepare them for further study at the graduate level in business or public administration.

To successfully complete the Management Degree a minimum of 120 credits are required, the last 30 of which must be taken at La Roche College.

The following coursework is required:

- 48 credits of Business Core Requirements
- 21 credits of Management Major Electives (can be selected from any of the Accounting, Finance, Information Systems, International Management, Administration & Management, Marketing or Real Estate courses, except ACCT1001, ADMG1001 or ADMG1030)
- 9 credits of Skills Components
- 34 credits of CORE Curriculum courses

Business Core Requirements: 48 credits

- Accounting I ACCT2003
- Accounting II ACCT2004
- Managerial Accounting ACCT2013
- Macroeconomics ADMG1005
- Microeconomics ADMG1006
- Fundamentals of Management ADMG1018
- Business Law I ADMG2009
- Organizational Behavior ADMG2018
- Human Resources Administration ADMG2025

- Marketing Management MRKT2021

Skills Component: 9 credits (select MATH1030 or MATH1070)

- Professional Presentation ADMG3024
- Calculus for Business, Economics, & Managerial Sciences MATH1030
- Probability & Statistics MATH1040
- Finite Mathematics for Business MATH1070

Management Information Systems
Management Information Systems Technology is a member of the Accreditation Council for Business Schools and Programs (ACBSP), a leading specialized accreditation association for business education.

The major is designed to provide students with the knowledge, abilities and attitudes needed to function effectively as business and organizational programmers and analysts. Further, it provides students with the educational background for lifelong professional, cultural, educational and personal development. The MIS major will receive in-depth education and training in at least three different career-related areas:

- In systems development methodologies, which provide the fundamental problem-solving approaches used in the profession
- In technical computer skills, which provide the tools for implementing those problem solutions
- In business theory, which provides an understanding of the context within which the systems are implemented.

This program is part of our Management and Information Systems Technology (MIST) program in the Business Division.

To complete the Management Information Systems major successfully, the following course work is required.

- 48 Business Core Requirements credits
- 12 Skills Component credits
- 27 MIS major credits
- 3 MIS major elective credits
- 34 credits of Core Requirements
- A minimum of 120 credits are required for degree, the last 30 of which must be completed at La Roche College.

Marketing

Management Information Systems Technology is a member of the Accreditation Council for Business Schools and Programs (ACBSP), a leading specialized accreditation association for business education.

The field of Marketing includes a variety of related business activities. While individual occupations within these diverse areas may be specialized, decisions in any one of them require a broad understanding of the marketing process and an ability to analyze the factors that influence it. The marketing process begins with the identification and design of products or services, which will satisfy customer needs in both for-profit and non-profit environments. It continues with the packaging, pricing, advertising, distribution, sales promotion and servicing of the firms' offerings, whether in the real space or virtual (internet) environment.

The major in Marketing is designed as a comprehensive study of all these activities, providing both the common background required for any marketing career and an opportunity for specialization based on the student's interests. Students learn through the classroom as well as outside research projects involving real world marketing challenges.

This broadly designed major is appropriate for careers in:

• generalized marketing and brand management
• advertising, PR, and promotional strategy
• personal selling and sales management
• retail merchandising and management, and
• marketing research

In this extremely competitive age of business, marketing provides the tools and skills necessary for differentiating companies, products and individuals. An understanding of product design, advertising, pricing, consumer behavior and distribution management is also essential. This major will actively promote an internship experience for students that can greatly facilitate the job search process.

To complete the Marketing major successfully, the following course work is required:
• 48 Business Core Requirement credits
• 9 Skills Component credits
• 15 Marketing major required credits
• 15 Marketing major recommended electives
• 34 CORE academic program requirements and general electives

A minimum of 120 credits is required for graduation, the last 30 of which must be earned at La Roche College.

**Medical Imaging**
This major is meant to prepare students for a career in Medical Imaging, including, but not limited to, radiography, MRI, nuclear medicine and ultrasound. A student must have already completed an approved hospital program in one of these areas.

To successfully complete the Medical Imaging major, the following coursework is required:

- Current RT or RDMS Certification (60 credits)
- 21 credits of Liberal Arts courses
- 27 credits of CORE curriculum courses
- 12 credits of General Electives

A minimum of 120 credits are required for the degree, the last 30 of which must be earned at La Roche College.

**Liberal Arts Component: 21 Credits**

**Professional Studies**

This is a capstone program for adult students who wish to complete their college education. This program is designed to enhance workplace skills such as planning, workflow management, problem solving, listening and communication, labor/management relations and motivation techniques.

This degree completion program is designed for adult and transfer students interested in business and management.

To complete the professional studies major successfully, the following course work is required:

- 45 or more transfer credits
- 18 credits as listed under Applied Professional Studies
- 18 credits as listed under either Track I, II, or III (50% of the track must be at 3000 or 4000 level)
- 9 credits listed under Business Skills
- 30 credits of CORE Curriculum courses
- 45 General Elective credits

A minimum of 120 credits is required for graduation, the last 30 of which must be earned at La Roche College.

Marketing Management: MRKT2021
Marketing Research: MRKT3033

Accounting Minor
Eighteen (18) credits are required for completion of a minor in Accounting. Three (3) academic years are estimated for completion with respect to fall/spring course rotation and prerequisites. Students interested in preparing for the CPA examination should consult with the Accounting Department Chair for assistance. Completion of this minor alone may not necessarily facilitate adequate preparation for the professional credential.

Elective Courses: 9 credits
Accounting with Computers: ACCT2025
Taxation I: ACCT3001
Taxation II: ACCT3002
Intermediate Accounting I: ACCT3011
Intermediate Accounting II: ACCT3012
Cost Accounting: ACCT3014
Advanced Accounting: ACCT4001
Auditing: ACCT4002

Required Courses: 9 credits
Accounting I: ACCT2003
Accounting II: ACCT2004
Managerial Accounting: ACCT2013

Finance Minor
Twenty-one credits (21) are required for completion of a minor in Finance.
NOTE: An Accounting, Management, E-Commerce or International Management major would need only three (3) courses to receive a minor in Finance. Students pursuing any of these majors should consult with their advisor.

Choose one of the following courses (3 credits)
Risk Management & Insurance: FINC3040
Real Estate Investment: FINC4039
International Finance: INMT4046

Required Courses (18 credits)
Accounting I: ACCT2003
Accounting II: ACCT2004
Taxation I: ACCT3001
Investments: FINC3031
Information Technology Minor

Requirements: 18 credits

3 academic years are estimated for Information Technology minor completion with respect to fall/spring course rotation and prerequisites.

Required Courses: 6 credits

Problem Solving ISTC1021
Management Of Information Systems ISTC2021

Select 4 courses from the list below: 12 credits

Computer Crime CRIM3043
Advanced Database Theory CSCI4055
Advanced Practical Computer Applications ISTC1006
Computer Hardware ISTC1025
IST: A Global Perspective ISTC2005
Introduction to Cyberspace ISTC2008
Computer-Based Training & DL ISTC2025
Networking ISTC2030
Data Base Management Systems ISTC2045
Advanced Computer Hardware ISTC3000
Legal Issues & Info Tech ISTC3005

IT Services Administration ISTC3010
Human Computer Interaction ISTC3015
Advanced Data Base Management Concepts ISTC3046

Management Information Systems Minor

Requirements: 18 credits

3 academic years are estimated for Computer Information Systems minor completion with respect to fall/spring course rotation and prerequisites.

Minor Electives: 6 credits

Database Systems Theory CSCI2055
Problem Solving ISTC1021
Introduction to Cyberspace ISTC2008
Distributed Data Processing ISTC2050
Web Page Usability & Programming ISTC3008

Required Courses: 12 credits

Management Of Information Systems ISTC2021
Data Base Management Systems ISTC2045
Advanced Data Base Management Concepts ISTC3046

Required Courses: Select 1 of the following courses

Project Management ADMG3015
Systems Analysis & Design ISTC4042

Management Minor

Three (3) academic years are estimated for completion of the Management Minor with respect to fall/spring course rotation and prerequisites. Management and Information Systems Technologies (MIST) majors may not declare a management minor.

To complete the Management Minor, 18 credits are required.

Required Courses:

Intro to Administration & Management ADMG1001
Fundamentals of Management
Human Resources Administration
Marketing Management

Select 1 of the following courses:

- Macroeconomics
- Microeconomics

Select 1 of the following courses:

- Accounting Concepts
- Accounting I

Marketing Minor

To complete the Marketing Minor, a total of 15 credits are required.

Minor Electives: Select 9 credits (3 courses)

- Advertising & Public Relations
- Personal Selling
- Sports Marketing
- Marketing Research
- International Marketing & Export Management
- Internet Marketing
- Brand Management
- Services Marketing
- Sports Administration & Management
- Contemporary Topics in Marketing
- Retail Marketing & Management
- Sales Management

Minor Requirements: 6 credits (Select MRKT3012 or MRKT4014)

- Marketing Management
- Buyer Behavior
- Marketing Strategy

Web Design and Development

The Web Design and Development Minor combines the best of the Graphic and Communication Design, Information Technology and Marketing departments to provide a well-balanced overview of both programming and design. There are two distinct programs for this minor:

1. for students enrolled as Graphic and Communication Design major
2. for students enrolled in Information Systems Technology and all other majors on campus

To successfully complete the Web Design and Development Minor students will complete a minimum of 15 credits and maintain GPA of 2.0 in their minor coursework.

Note: Students enrolled in this minor will be required to purchase or have access to their own specific URL and complete access to administering the URL. The student must maintain and keep the URL active during the life of their minor coursework.

Minor Electives (All Majors Except GCD): Select 3 credits

- Fundamentals of Electronic Publishing
- Computer-Based Training & DL
- Data Base Management Systems
- Web Page Usability & Programming
- Human Computer Interaction

**Accounting Certificate**
Certificate Benefits

You may have your bachelor's degree and are working in a position at your company that requires you to perform accounting- or finance-related job duties. If you like them, and you want to take the next step in building your career, you should learn more about this new program at La Roche. Accounting is a booming job market right now; recruiters are actively seeking La Roche accounting graduates to join their businesses. This certificate also will help you further your goal of becoming a CPA or CMA.

Course of Study

To complete the Accounting Certificate 24 credits are needed: 12 credits of Required Courses and 12 credits of Electives that provide you with an accounting certificate that documents your concentrated study in the field.

Electives: 12 credits (Select 4 courses)

Consulting for Organizational Learning, Development and Change

This certificate provides students with specific knowledge and skills in human resources development, upon which expertise in the practice and analysis of organizational communications is built. Students also gain a solid working knowledge of the ideas and activities involved in designing and evaluating organizational training and development programs. Theories, concepts, and tools necessary for the initiation and implementation of organizational change are covered in this certificate program.

Contemporary Concepts in Human Resources Management

This program provides an up-to-date overview of contemporary concepts in the field of human resources management. The student will learn to analyze a variety of organizational structures and select one that is compatible with a company's technological and environmental needs. Ideal for the entering student, this certificate provides a broad-based view of organization management as well as exposure to information systems and other "contemporary" processes and issues.
Financial Aspects of Human Resources Management

This certificate introduces students to key financial aspects of the human resources management field. Valuable insight into the basic concepts of finance and budgeting as well as a broadened theory and practical application related to labor economics and compensation management is provided.

Required Courses (Select one of the following):

- Training & Development (HRMT6012)
- Planning & Implementing Change (HRMT6020)
- Labor Relations & Collective Bargaining (HRMT6021)
- Performance Management Systems (HRMT6036)

Required Courses:

- Financial Analysis & Budgeting (HRMT5011)
- Compensation Management (HRMT6013)
- Employee Benefits Management (HRMT6015)

HR Professional

A graduate-level track designed for the practicing HR professional who wants to take the PHR or SPHR Certification Examination. Twelve credits are required for completion of this Certificate. HRMT5012, 5020 and 6035 are required courses. Students may select HRMT6013, 6015, 6016 OR 6021 to complete credit requirements.

Human Resources Generalist

The HR generalist certificate provides instruction in the essential elements of the HR generalist's job-recruitment, benefits, management, and managing human resource information systems. "HR Generalist" is the title used by most organizations to describe the typical HR staff professional. It provides you with specific knowledge and skills in human resources for an entry level position.

Human Resources Information Systems and Technology

This certificate provides the student with skills in HR database design, development, and management, including the use of the internet for recruitment and other corporate purposes. As human resource information systems are being used by more and more corporations today, the certificate gives the graduate an edge in the hunt for promotions and new jobs.

Legal Aspects of Human Resources Management

This certificate provides a comprehensive introduction to the current legislation that affects human resources management practice. Ideal for an individual interested in human resources administration, this certificate prepares the student for "office work" with HR-benefits, compensation analyst, personnel officer, or HR assistant.
Managing Information Technology and Change

Successful completion of this certificate will provide professionals with the skills to access, understand, develop, implement, and evaluate the new technology as well as develop the management skills of leading and managing the change effort in the organization.

Human Resources Information Systems HRMT6000
Planning & Implementing Change HRMT6020
Managing Information Technology & Change Processes HRMT6034

Master of Science in Accounting

The Business Division in collaboration with the Accounting Department at La Roche College, have developed a Master of Science in Accounting. The program is tailored to meet the needs of the Accounting professional who is becoming more and more critical in businesses, both small and large. The 30-credit masters level Accounting Program will offer one of the few comprehensive, non-MBA, graduate Accounting programs in Western Pennsylvania.

It is our desire that students enrolled in the graduate program at La Roche will develop advanced accounting skills and techniques that can be put to use immediately to enhance their career and their competitiveness.

The graduate program will prepare the accounting student for the challenges and issues within the complex and changing field of accounting. The program will prepare students to succeed by exploring advance topics such as international accounting, updates in SEC reporting and contemporary topics in taxation. Students will also have the opportunity to apply their coursework, accounting principles and techniques to a real organization in the Applied Research in Accounting course.

Upon successful completion of the Master of Science in Accounting, graduates will be prepared for successful careers in the accounting field, as well as provide the necessary preparation for CPA licensure.

OBJECTIVES:

• To provide students with sound theoretical background in the accounting field and develop professional competencies in advanced accounting, taxation, forensic accounting and advanced auditing.

• To provide students with the requisite specialized knowledge of advanced accounting principles and to do so in an ethical and responsible manner.

• To contribute to the profession of Accounting by preparing students for the CPA exam and/or requirements for licensure.

Required Courses: 30 credits

Ethics & Professional Responsibilities in Accounting ACCT5020
Modern Accounting Information Systems ACCT5035
The Business of Reading & Writing ACCT5040
Fraud Examination ACCT5050
Advanced Forensic Accounting ACCT6020
Wealth Management ACCT6050
Accounting for Not-for-Profit Entities ACCT6060
Contemporary Issues in Taxation ACCT6080
International Accounting ACCT6085
Applied Research ACCT6099

Master of Science in Human Resources Management
La Roche College's human resources master's program is tailored to the needs of the HR professional and offers a solid managerial base to others who take on the challenge of managing a workforce. La Roche College offers one of the few comprehensive human resource management programs in Pennsylvania. Achieving your Master of Science degree in Human Resources Management will place you several rungs above the competition.

Effective managers get things done through people. They need to draw on storehouses of practical and theoretical knowledge. At La Roche, you'll develop coaching skills and learn business principles and management techniques that you can put to use immediately to enhance your career and your competitiveness. You will gain the career mobility you desire. And you will earn a valuable and respected credential - a master's degree in Human Resource Management.

The HRM Master's Curriculum

The program consists of 36 credits. Courses follow a well-sequenced plan founded on a common core of 21 credits. The common core, taken by all students, offers an interdisciplinary foundation that provides students with knowledge pertaining to the major issues in human resource management.

HR Concentrations

Beyond the 21 core credits students specialize in one of four concentrations:

- Concentration A-HR Administration
- Concentration B-Consulting for Organizational Learning, Development, and Change
- Concentration C-Strategic Management and Leadership
- Concentration D-Managing Information Technology in Organizations and HR

The La Roche Graduate Program faculty are dedicated professors who enjoy leadership positions in their areas of expertise. Adjunct faculty are respected professionals in Pittsburgh's public and private sectors. Together, they provide a unique blend of theory and application.

Students should also successfully complete all prerequisite courses required for admission. Prerequisite coursework credits do not count toward the 36 credit graduate degree completion requirement.

Part-time students typically finish the HRM program in two and one-half years; however, every student is afforded six years in which to complete his/her study. Students may also finish in less than two years, depending on time available for graduate study.

On rare occasions transfer credits may be awarded for previous graduate coursework as well as credits earned in the Graduate Courses.

Note: The Graduate Program in Human Resource Management is separate from La Roche College's undergraduate business programs and is not a part of its ACBSP accreditation.

In addition to the Master's Program, we offer 8 certifications in particular areas of HR:
Ideal for the HR professional interested in upgrading his/her skill set, our four- course certificate programs can be a more convenient alternative to the full Masters Program. However, students who successfully complete a certificate program with no less than a "B" in every course are exempt from the GMAT or GRE testing requirements for entrance into the Masters program. Click on the link above to learn more about the HRM Certificate programs.

Following are the Concentration, Core and Elective requirements for the Masters of Science in Human Resources Management.

*Core Course Requirements (21 credits)

Financial Analysis & Budgeting
Legal Aspects of Human Resources Management
Quantitative Research Methods in Human Resources Management
Organizational Behavior
Organizational Theory

SHRM Learning System HRMT6035
Performance Management Systems HRMT6036

**Concentration B - Consulting for Organizational Learning, Development & Change:** HRMT6012-Training & HRMT6020-Planning & Implementing Change required, plus nine (9) credits from the following:

- Computer & Web-based Training HRMT6001
- Workplace Diversity HRMT6002
- Current Topics in HRM HRMT6006
- Training & Development HRMT6012
- Employee Health & Safety HRMT6016
- Leadership HRMT6018
- Planning & Implementing Change HRMT6020
- Managing Information Technology & Change Processes HRMT6034
- SHRM Learning System HRMT6035
- Performance Management Systems HRMT6036

**Concentration C - Strategic Management & Leadership:** HRMT6018-Leadership and HRMT6036-Performance Management required, plus nine (9) credits from the following:

- Human Resources Information Systems HRMT6000
- Workplace Diversity HRMT6002
- Current Topics in HRM HRMT6006
- Advanced Legal Aspects HRMT6011
- Compensation Management HRMT6013
- Employee Health & Safety HRMT6016
- Recruitment & Placement HRMT6017
- Leadership HRMT6018
- Planning & Implementing Change HRMT6020
- Labor Relations & Collective Bargaining HRMT6021
- SHRM Learning System HRMT6035
- Performance Management Systems HRMT6036

**Concentration D - Managing Information Technology in Organizations and HR:** HRMT6000-HRIS and HRMT6034-Managing IT required, plus nine (9) credits from the following:

- Human Resources Information Systems HRMT6000
- Computer & Web-based Training HRMT6001
- Current Topics in HRM HRMT6006
- Leadership HRMT6018
- Planning & Implementing Change HRMT6020
- Internet & Technical Recruiting HRMT6028
- Managing Information Technology & Change Processes HRMT6034
- SHRM Learning System HRMT6035
Programs of Study

Majors
Graphic Design
Interior Design

Minors
Visual Communication Minor

Detail - Design Division

Graphic Design

The Graphic Design Program prepares students for exciting careers in visual communication: graphic design, advertising, illustration, photography, typography, packaging, publication and multimedia. Grounded in the foundation principals and elements of design, the curriculum prepares students to meet the technological challenges of this fast-paced career through experiences in design software such as: the Adobe Creative Suite 3 (including InDesign, Photoshop and Illustrator), Flash, Dreamweaver, Final Cut and Quicktime Pro. The first two academic years, known as the Foundation Program, culminate with the Mid-Collegiate Review process (see below). The student then moves into the Professional Program, which emphasizes presentation opportunities, internships, team problem solving and professional portfolio development.

Mid-Collegiate Review

Prior to enrolling in upper level design courses, transfer students and students who have reached the mid-point (second semester of the sophomore year) in the Graphic Design Program, must pass a Mid-Collegiate Review. In an interview with the student, the faculty will assess the student's work from all foundation courses along with the student's motivation and attitude, presentation skills, career goals and academic record. The criteria for the review is fully outlined prior to the meeting, and the student will receive a written evaluation following the interview. As a result of the review process, the faculty will recommend that the student either: (1) continue in the Graphic Design Program, (2) continue in the program with recommendations (e.g. attend summer classes or complete individualized assignments), (3) continue in the program with requirements (e.g. take specified courses or attend summer classes), or (4) change majors before the next academic term. It will be the professional consensus of the faculty, and not simply individual grades, that will determine whether or not a student will be allowed to continue in the program.

To complete the Graphic Design Program successfully, the following coursework is required:

- 63 credits of Graphic Design Major Requirements
- 15 credits of Graphic Design Major Electives
- 12 credits of Art History Requirements
- 34 credits of CORE Curriculum courses
- Successful completion of Mid-Collegiate Review

A minimum of 124 credits is required for graduation, the last 30 of which must be earned at La Roche.

Academic Standards

Students must earn a grade of "C" or above in all Graphic Design major requirements to fulfill prerequisites and degree requirements. Grades below a "C", including "C-", will affect participation in portfolio reviews and advancement in the curriculum.
Course Rotation

Graphic Design courses are offered sequentially during the academic year and the summer as enrollment permits. Courses are also offered in the evening. Note: students will be unable to complete the program without taking courses during the day.

Internship Requirement

All students are required to complete a 3-credit internship during their junior or senior year.

Transfer Policy

Transfer students apply through the Office of Adult Education and Graduate Studies. Students applying with 12 or more credits of design-related coursework may be asked to present their work to a designated member of the Graphic Design faculty for evaluation and placement in the curriculum. Placement is determined by the content of transferred credits in comparison with courses in the La Roche Graphic Design Foundation Program. Incoming transfer students need to be aware that additional semesters may be needed in order to meet the requirements of the curriculum. Additionally, all transfer students must sit for and pass the Mid-Collegiate Review before enrolling in upper-level design courses.

Interior Design
The La Roche College Interior Design Program believes that a successful interior design education enhances a student's innate creativity and interest in the built environment. An interior design education also effectively teaches the knowledge and skills needed to evolve holistic, thoughtfully conceived design solutions in response to humanity's aesthetic, emotional, and utilitarian design needs. The program's mission is to prepare students to perform as design professionals with a life-long desire to remain current in the profession and be advocates for design excellence, thereby promoting the importance of interior design to society.

This major prepares students for careers in commercial and residential interior design in large and small interior design and architecture firms, as well as industrial, commercial and institutional organizations. It also provides a solid foundation for students who wish to own a design firm or pursue a graduate degree in design. The interior design program fosters the transition to the professional world by requiring all majors to complete an internship experience in the field prior to graduation.

Entering interior design majors are required to purchase a laptop computer with software that is commonly used in the profession. Specific computer requirements for the 2011-2012 academic year can be viewed at http://intranet.laroche.edu/sci/overview.cfm. These requirements are updated annually in the summer.

The Council for Interior Design Accreditation has granted accreditation to the La Roche College Interior Design Program continuously since 1985. The College also holds National Association of Schools of Art and Design (NASAD) accreditation, which extends to the Interior Design program. Membership in the student chapter of the American Society of Interior Design (ASID) and in the International Interior Design Association (IIDA) is available to all design majors.

**Interior Design Portfolio Review**

To advance in the curriculum, Interior Design majors are required to present a portfolio of their work to the interior design faculty at two key points in their education:

1. **Freshman Review**

   Students submit work for Freshman Review after completing IDSN1020, IDSN1021, and IDSN1062 with grades of "C" or above. Students may advance to IDSN2038a Interior Design II only after completing the Advisory Review process. Freshman Review results in one of three recommendations:

   - to continue in interior design;
   - to continue in interior design with stated reservations and recommended action; or
   - to change majors before the next academic term

2. **Sophomore Review**

   Students submit work for Sophomore Review after completing IDSN2038b and four of the following five courses with grades of "C" or above: IDSN1023, IDSN2015, IDSN2044, IDSN2045 and IDSN2046.

   Exception: Students in the Three-Year Accelerated Curriculum must pass IDSN2038a and IDSN2038b and five of the following six courses with grades of "C" or above: IDSN1023, IDSN2015, IDSN2037, IDSN2044, IDSN2045, and IDSN3040.

   Students may advance to IDSN3028a Interior Design III only after successfully completing the Sophomore Review process. Sophomore Review results in one of three decisions:
• student is invited to continue to major in interior design;

• student is required to repeat IDsN2038b Interior Design II the next semester, and submit work for Sophomore Review again (note: this option may only be offered once); or

• student is required to change majors before the beginning of the next term.

Students must earn a grade of "C" or above in all interior design major requirements to fulfill prerequisites and graduation requirements. Grades below a "C" may delay participation in portfolio reviews and advancement in the curriculum.

Interior design courses are offered during summer session as enrollment permits. Courses also are offered in the evening, but students are unable to complete the program without taking courses during the day.

The program is technically a four-and-one-half year curriculum because a student must earn a minimum of 133 credit hours to attain a Bachelor of Science in Interior Design (BSID) degree, with the last 30 credit hours earned at La Roche College. The following course work is required:

• 78 credits of interior design major requirements

• 15 credits of interior design major electives; in addition to the courses shown below, students may select electives from Graphic & Communication Design. Six of the 15 credits are business-related electives; options include accounting, advertising, management, marketing, and finance

• 34 credits of college core requirements

• 3 credits of general electives

To complete the curriculum in four years, students must attend summer school or carry more than 15 hours a semester. (See Semester Credit Maximum for the College policy on overload.)

A Five-Year Extended Curriculum has been created for students who wish to pursue a minor (e.g., psychology, management, visual communications, etc.) or for those who enter with test scores that indicate an extended curriculum would be beneficial. Additionally, a Three-Year Accelerated Curriculum has been developed for mature students who transfer a significant number of credits (generally 30 or more) from another institution. Admittance into the Three-Year Accelerated Curriculum is by invitation only. All curriculum alternatives include the same interior design course work. Information about these various ways of completing the curriculum is available in the Interior Design Department.

Requirements:

In fulfilling the 78 credits of major requirements, students choose either ARTH1018 or another approved ARTH course.

Visual Communication Minor

A minor in Visual Communication will provide experiences directed toward the development of visual literacy: creative problem-solving and the design process, graphic techniques, visual language systems and the organization of visual elements. Especially useful to those students majoring in Marketing or Professional Writing, the Visual Communication minor will provide a practical mix of experiences complementing both verbal and visual communication.

The minor must be completed within the student's graduation timetable.

The Visual Communication minor is available to all students except those pursuing the Graphic & Communication Design degree.

A minimum of 18 credits, 6 courses, must be chosen from either of the following two sequences of art/design studio courses and MAC-based digital courses.

**Sequence A: Design Studio - Choose 9 credits**

Middle Level Education: English/Language Arts and Reading

A major in Middle Level English/Language Arts and Reading is meant to prepare students for a career as a highly qualified teacher education candidate skilled to teach any core subject at the 4th-6th grade level and skilled to teach the English/Language Arts and Reading content area at the 7th-8th grade level. For state certification, students must meet all competency standards set by the Pennsylvania Department of Education. To successfully complete the Middle Level English/Language Arts and Reading Certification major, the following coursework is required:

- 40 credits of Major Requirements
- 47 credits of Education Requirements
- 40 CORE credits
- A minimum of 127 credits are required for degree, the last 30 of which must be earned at La Roche College. Developmental coursework does not count towards the minimum number of credits required for graduation.

Middle Level Education: Mathematics

A major in Middle Level Mathematics is meant to prepare students for a career as a highly qualified teacher education candidate skilled to teach any core subject at the 4th-6th grade level and skilled to teach mathematics at the 7th-8th grade level.

To successfully complete the Mathematics Certification major, the following coursework must be completed:

- 41 credits of Major Requirements
- 47 credits of Education Requirements
- 40 CORE credits

A minimum of 128 credits are required for degree, the last 30 of which must be completed at La Roche College. Developmental coursework does not count toward the minimum number of required credits for graduation.

Middle Level Social Studies Education with Dual Major in History

A dual major in Middle Level Social Studies and History is meant to prepare students for a career as a highly qualified teacher education candidate skilled to teach any core subject at the 4th-6th grade level and skilled to teach Social Studies content area in the 7th-8th grade level. For state certification, students must meet all the competency standards set by the Pennsylvania Department of Education. In addition to the required courses for the Middle Level Social Studies certification, students can complete nine more credits to receive a dual major with History. Students then elect to pursue secondary teaching certification (7th-12th grade) in History.

To complete a dual major with History and Middle Level Social Studies Certification, the following coursework is required:

- 48 credits of Major Requirements
- 47 credits of Education Requirements
- 40 CORE credits
- A minimum of 135 credits are required for degree, the last 30 of which must be earned at La Roche College

Education Requirements: 47 credits

**Nursing - Associate of Science**

The Associate of Science in Nursing (ASN) Program at La Roche College provides a pathway for students who want to become registered nurses. The Department of Nursing faculty have developed a curriculum that will give students the theoretical and practical knowledge they will need to work in a variety of health care settings, including hospitals, clinics, community health care sites and other facilities. Faculty believe that the curriculum of this nursing program will prepare graduates to serve as entry level staff nurses within the health care community.

**PURPOSE**

Nursing is a profession in evolution concerned with the health care of persons and their families within the larger context of community and society. Currently, nursing care needs are addressed by nurses at a variety of levels of educational preparation.

The purpose of this ASN program is to prepare graduates to sit for the NLCEX-RN and to perform as entry level nurse generalists in a variety of settings. Graduates are provided the knowledge base for continued professional growth.
1. ASN admission requirements for any student without prior college credits. Applicants would need to apply directly to Freshman Admissions. Applicants must meet the following eligibility criteria:

   a. An official high school transcript or proof of General Equivalency Diploma (GED) high school equivalency.

   b. Successful completion of a minimum of 16 Units including:

      • 4 units of English
      • 1 Unit in Biology with related laboratory
      • 3 Units in Social Science
      • 1 Unit in Chemistry with related laboratory
      • 2 Units in Mathematics
      • 5 Units in academic electives
      • 1 Unit must be in Algebra

   c. Applicants from high school must have a minimum 3.25 grade point average (on a 4.0 scale)

   d. Students who have graduated from high school within five years of application date must have an SAT minimum composite score of 1000 (a minimum SAT verbal of 500 preferred) or an ACT score of 22. A student who has graduated from high school over five years from the date of his/her La Roche College application will not be required to take the SAT or ACT.

   e. Completion of the TEAS exam (Test of Essential Academic Skills) with required score. Each applicant is permitted to take this exam only one time in order to be considered for admission. For an explanation of the TEAS exam and registration, [CLICK HERE](#)

   f. Mathematics and English classes will depend on placement testing scores and high school GPAs. Placement exams will be waived if the applicant has a bachelor's degree or associate's degree with a minimum GPA of 3.0

   g. Completion of chemistry is required prior to acceptance to the Nursing Program. Acceptable chemistry courses include one unit of high school chemistry with a grade of "B" or better or a grade of "C" or better in a four hour college chemistry course (CHEM1001/CHEM1003 or equivalent). Any chemistry course must have been taken within ten years of application date to La Roche College. If it has been more than ten years, a chemistry course must be taken prior to admission to the program. The prerequisite of chemistry may be waived for the applicant with a degree in science or health related fields, as determined by the Nursing Department.

2. ASN admission requirements for transfer and adult students. Applicants would need to apply directly to The Graduate Studies and Adult Education Office. Applicants must meet the following eligibility criteria:

   a. Transfer or adult students must have a minimum cumulative GPA of 3.0 from a transfer institution.
b. Applicants must have achieved a passing grade of a "C" or better in all related science courses.

c. Applicants must have achieved a grade of a "B" or better in a high school chemistry course or a grade of a "C" or better in a college chemistry course (within the last 10 years) or completion of ABC Chemistry with a grade of at least a "B".

d. Transfer credits taken in the sciences BIOL1023 and BIOL1024 (Anatomy and Physiology I and II), BIOL1015 (Microbiology for Health Sciences), and NSCI1025 (Normal and Clinical Nutrition) must be taken within the last five years at the time of application to meet the requirements for the Associate of Science in Nursing degree.

e. Completion of the TEAS (Test of Essential Academic Skills) with required score. Each applicant is permitted to take this exam only one time in order to be considered for admission. For an explanation of the TEAS exam and registration, CLICK HERE

**Nursing Courses from other programs will not be accepted as transfer credits.**

3. International Students: Applicants would need to apply directly to the Graduate Studies and Adult Education Office. Applicants must meet the following criteria:

a. Students are admitted as "Undeclared Major"

b. Completed college placement and ESL (confirmation in writing from ESL faculty that student has completed all ESL requirements).

c. Applicants must have achieved a grade of "B" or better in a high school chemistry course or a grade of "C" or better in a college chemistry course (within the last ten years) or completion of ABC Chemistry with a grade of at least a "B".

d. Completion of the TEAS exam (Test of Essential Academic Skills) with required score. Each applicant is permitted to take this exam only one time in order to be considered for admission. For an explanation of the TEAS exam and registration, CLICK HERE

Admissions Processes (For All Students)

Initial admission to the nursing program is in the Fall Semester only. All applications for the Nursing program must be received by May 1. Applications received after the deadline may be considered on an individual basis with exceptional circumstances.

The applicant must meet all admission requirements as stated and the following materials must be submitted for review:

- Completed La Roche College Application
- Application Fee
- High School/College/Nursing program transcripts (as applicable)
- Results of TEAS exam
Two letters of reference

Personal Essay: "Why I want to be a nurse?"

Applicants must meet specific admission requirements which include: a medical history and physical including current immunizations, FBI fingerprinting, PA criminal background, child abuse and drug screen. Applicants that do not meet these criteria will not be permitted to begin the program in nursing.

NOTE: A graduate of the Nursing program, who has been convicted of a felony, is or was involved in drug abuse or has violated other rules of the licensure body, may not be permitted to take the licensing examination regardless of the student’s ability to complete college educational requirements. The student is required to notify the Chair of the Nursing Department of any changes to the criminal record. The Nursing Program reserves the right to require appropriate documentation as requested regarding previous felonies or violations.

The health requirements include:

1. A physical examination is required. For patient safety, clinical facilities utilized by the Department of Nursing require proof of a satisfactory physical exam and current proof of immunizations. For assurance of patient safety, an initial drug screen is required and a random drug screen may be required at any point during the program.

2. An FBI and criminal background check are both required*

3. Child Abuse clearance is required*

4. Serum Drug Screening is required*

**Click here for link to background check instructions

Once all documentation is obtained, all forms should be returned to nursing department staff/faculty.

Students who fail to provide written documentation of the mandatory health requirements will not be permitted in any clinical area.

Faculty reserve the right to recommend a student's withdrawal from the program for reasons of health.
Each student is responsible for:

- Personal health insurance coverage
- Maintenance of good health practices and utilizing preventative care in common illnesses
- Reporting any health concern to the Department of Nursing (including pregnancy) that could affect personal or client health safety.

**Nursing - RN to BSN Degree Completion Program**

Materials:

- **BSN Handbook**
- **BSN Orientation**
The baccalaureate program is designed to offer registered nurse students (graduates from diploma and associate degree programs) the opportunity
to complete a professional degree that focuses on the scholarly approach to the discipline of nursing. This is an 18-month online program*. The
baccalaureate program provides a foundation for graduate education in nursing. The bachelor of science degree program for registered nurses is accredited by the Accreditation Commission for Education in Nursing, INC. (ACEN), formerly the National League of Nursing Accrediting Commission (NLNAC), 3343 Peachtree Road NE, Suite 500, Atlanta, GA 30326, 404-975-5000.

Students Admitted to the Current/Revised Curriculum

The program is open only to registered nurses and requires 120 credits for graduation. To complete the nursing major successfully, the following course work is required:

- 24 prerequisite credits which must include 12 science credits
- 36 credits Nursing Mobility Profile II (NCLEX)
- 30 liberal arts credits
- 30 nursing component credits (18 credits of which are required; 12 credits of nursing electives)

A minimum of 120 credits is required for graduation, the last 30 of which must be earned at La Roche College. Students must achieve a minimum of a "C" grade in each nursing course.

RN-MSN Program

The RN-MSN option provides an opportunity for associate degree and diploma prepared nurses to obtain the MSN. The program is entirely online and allows nurses interested in advance roles to move more directly into such positions as nurse administrator or nurse educator. All RN to MSN students must have a 3.0 GPA when entering the MSN segment of the program.

The advantage to enrolling in the RN-MSN is the credits required in the BSN are decreased and the transition to MSN is quicker. The BSN degree curriculum is reduced by two elective courses and the student is able to take two graduate courses at the undergraduate tuition rate. Students may take the first two graduate courses at the completion of the BSN requirements.

The Bachelor of Science in Nursing is awarded upon the successful completion of 6 credits of graduate level courses.

* International students must meet the on-campus component for this program.

**PreK-4 Teacher Education/Special Education**

A major in PreK-4th/Dual Certification is meant to prepare students for a career as a highly qualified PreK-4 Elementary Education teacher with dual certification in Special Education. For state certification, students must meet all the competency standards set by the Pennsylvania Department of Education.

To successfully complete the PreK-4/Dual Certification major, the following coursework is required:

- 15 credits of Major Requirements
- 83 credits of Education requirements
- 40 CORE credits
- A minimum of 138 credits are required for the degree, the last 30 of which must be completed at La Roche College. Developmental coursework does not count towards the minimum number of credits required for graduation.

**Education Requirements: 83 credits**

- Orientation to PreK-4 Education  EDEL2000
- Observation I (PreK)  EDEL2010
- Observation II (K-4)  EDEL2020
- Methods of Teaching Health & Physical Education PreK-4th Grade  EDEL2030
- Creative Thinking: Methods of Integrating Art & Music Throughout the PreK-4 Curriculum  EDEL3015
- Methods of Teaching Writing PreK-4th Grade  EDEL3025
- Methods of Teaching Reading PreK-4th Grade  EDEL3035
- Teaching Reading & Language Arts Practicum PreK-4th Grade  EDEL3045
- Methods of Teaching Social Studies PreK-4th Grade  EDEL3055
- Methods of Teaching Science PreK-4th Grade  EDEL4035
- Methods of Teaching Math PreK-4th Grade  EDEL4040
Major Requirements: 15 credits

- Life Science
- Geography & World Affairs
- U.S. History: The Foundation of a Republic (1600-1865)
- Mathematics for the Liberal Arts
- Family Relations

Advanced Studies in Autism Certificate

PURPOSE: To provide post baccalaureate students, without a PA state certification in Education, the opportunity to develop skills and competencies in working with Persons with Autism Spectrum Disorders (ASD) and their families.

REQUIREMENTS: To successfully complete the Autism Spectrum Disorder Certificate Program, the following coursework is required:

- 12 credits of required coursework

  Introduction to Education of Persons with Autism Spectrum Disorder
  Advanced Behavior Studies
  Communication & Social Skills Instruction for Persons with Autism Spectrum Disorder
  Advanced Topics for Persons with Autism Spectrum Disorder: Curriculum and Instruction

Autism Spectrum Disorder Endorsement Certification

THIS PROGRAM WILL BEGIN FALL 2014

Purpose: To Provide Pennsylvania certified teachers with the opportunity to add an endorsement focused on Autism Spectrum Disorders (ASD). Successful completion of the required 12 credits will allow Pennsylvania certified teachers to apply for the ASD endorsement from the Pennsylvania Department of Education after meeting all competency standards set by the PDE.

Nursing - Forensic Nursing Certificate Program

The Forensic Nurse Certificate program is open to registered nurses and is offered in conjunction with the Criminal Justice program. Forensic nursing is the application of nursing science combined with the bio-psycho-social education of the registered nurse in the scientific investigation and treatment of trauma and/or death of victims and perpetrators of abuse, violence, criminal activity and traumatic accidents. Forensic nurses practice in a variety of settings including but not limited to hospitals, clinics, legal affiliations, law enforcement agencies, and correctional facilities. This certificate will prepare the registered nurse to assume a novice role as a forensic nurse.
Forensic Nurse Certification

Each student must complete the admissions requirements for forensic nurse certification. The forensic nurse certificate will then be issued by the La Roche College. The program can be completed as part of the RN-BSN completion program with the addition of CRIM 1001, CRIM 3040, and NURU 4040. The program can also be completed by the student who already holds a BSN or MSN degree. The program may be completed in 10 credits (3 courses and one practicum experience).

Program Requirements

The courses for this program must be taken in sequence and can be completed in one semester. CRIM 3040 and NURU 4040 can be taken concurrently. A 30-hour practicum during the NURU 4040 course is required. All courses in the Forensic Nurse Certificate program must be taken at La Roche College.

Admission Requirements

Post BSN or Post MSN Students:

Applicants who have an earned BSN or MSN degree and see admission to the Forensic Nurse Certificate Program must:

- Submit completed application along with the $50 application fee
- Provide official transcripts from all colleges and universities attended
- Have a cumulative QPA of at least 2.5
- Obtain Criminal Background and Child Abuse Clearances (Act 33 and 34 clearance. Visit the La Roche College Cx background clearances website by CLICKING HERE. http://www.larochecollegecx.com/
- Submit copies of current PA RN license, CPR certification, professional liability insurance and completed Department of Nursing health requirements

Currently Enrolled BSN Students

Students who are currently enrolled in the RN-BSN Completion Program at La Roche College and who apply to the certificate program must:
• Submit completed application ($50 application fee waived)
• Have a cumulative QPA of at least 2.5
• Obtain Criminal Background and Child Abuse Clearances (Act 33 and 34 clearance. Visit the La Roche College Cx background clearances website by CLICKING HERE. http://www.larochecollegecx.com/
• Submit copies of current PA RN license, CPR certification, professional liability insurance and completed Department of Nursing health requirements

End of Program Outcomes Forensic Nurse Certificate

Upon completion of the Forensic Nurse Certificate Program, the student will be able to:

• Incorporate principles and standards of forensic nursing, law, and forensic science to professional practice role.
• Demonstrate the proper and legally acceptable methods of crime scene investigation, documentation, evidence collection, and proper submission to law enforcement forensic laboratory.
• Collaborate with professionals in the healthcare, investigative, criminal justice, correctional, and/or governmental systems.
• Utilize effective written, verbal, and nonverbal communication skills to the educational, investigative, and testimonial aspects of forensic nursing.

Required Courses: 10 credits

Nursing - School Nurse Certification Program

The School Nurse Certificate Program is open to registered nurses who have earned a BSN degree and to students who are currently enrolled in La Roche College's BSN Degree Completion Program. This program is offered by the Department of Nursing in conjunction with the Teacher Education Department at La Roche College. This program is designed for the professional nurse who desires to focus on the health care needs of children in the school setting. The school nurse may practice in school-based, school-linked or collaborative school health programs. This program is approved by the Pennsylvania Department of Education.

Certification as a School Nurse

Each student must complete the requirements for school nurse certification. The school nurse certificate will then be issued by the Pennsylvania Department of Education. The program can be completed as part of the BSN degree program with the addition of EDSP2015, EDSP3015, EDSP4015 and MLED2000. The program can also be completed by the student who already holds a BSN or MSN degree. The applicant's transcript will be evaluated and analyzed for congruence with the program objectives and standards set forth by the Pennsylvania Department of Education. If all prerequisites are met, the applicant may then be granted full admission to the program. The program may be completed in sixteen credits (five courses and one practicum experience). If additional course work is required, the applicant will be granted provisional status until prerequisites are met.

Program Requirements

The courses for the certificate program are to be taken in sequence. All courses in the School Nurse Certificate Program must be taken at La Roche College.
• EDSP2015 Introduction to High Incidence Disabilities (three credits)
• EDSP3015 Low Incidence Disabilities (three credits)
• EDSP4015 Developing the IEP (three credits)
• MLED2000 Meeting the Instructional Needs of English Language Learners (three credits)
• NURU4030 School Nurse: Child Health in an Inclusive Setting (four credits)

The State of Pennsylvania requires a 100-hour practicum with a certified school nurse. This practicum will be arranged during the NURU4030 Child Health and the School Nurse course. Practicum experiences are contracted with the school and preceptor by the Teacher Education Division. This experience enables the student to meet the standards set for the School Nurse Certificate Program by the Pennsylvania Department of Education.

PA Department of Education Requirements:
All candidates for school nurse certification must also complete the following requirements prior to admission to the program:

• 3 credits college level English Composition
• 3 credits college level English Literature
• 3 credits college level Math (college level algebra or higher)
• 3 credits college level math (higher than college level algebra)

Admission Requirements

Post BSN or Post MSN Students:
Applicants who have an earned BSN or MSN degree and seek admission to the School Nurse Certificate Program must:

• Submit completed application along with the $50 application fee
• Provide official transcripts from all colleges and universities attended
• Have a cumulative QPA of at least 3.0
• Obtain Criminal Background and Child Abuse Clearances (Act 33 and 34 clearance). Visit the La Roche College Cx background clearances website by CLICKING HERE.
• Submit a personal essay that addresses the reasons for seeking school nurse certification and a statement of future professional goals
• Have a minimum of one or two years nursing experience: pediatrics, maternal-child or trauma/ER nursing preferred
• Submit copies of current Pennsylvania RN license, CPR certification, professional liability insurance and completed Department of Nursing health requirements

Currently Enrolled BSN Students:
Students who are currently enrolled in the RN-BSN Completion Program at La Roche College and who apply to the Certificate Program must:

- Submit completed application ($50 application fee waived)
- Have a cumulative QPA of at least 3.0.
- Obtain Criminal Background and Child Abuse Clearances (Act 33 and 34 clearance). Visit the La Roche College Cx background clearances website by CLICKING HERE.
- Submit a personal essay that addresses the reasons for seeking school nurse certification and a statement of future professional goals
- Have a minimum of one or two years nursing experience: pediatric, maternal-child, or trauma/ER nursing preferred
- Complete all program prerequisites, liberal arts courses and all required nursing courses
- Submit copies of current Pennsylvania RN license, CPR certification, professional liability insurance and completed Department of Nursing health requirements

**Entrance Criteria:**

- Current PA RN License
- BSN transcript with cumulative QPA of 3.0
- Professional experience (1-2 years)
- Act 33 and 34 clearances (apply for)

After acceptance, before beginning coursework:

- Current Act 33 and 34 clearances
- Current CPR certification

For NURU4030 -- completion of Department of Nursing health requirements and RN student professional liability insurance.

**Exit Criteria**

- Successful completion of Education courses (minimum C grade)
- Successful completion of NURU4030 and the 100 hour practicum (minimum C grade)
- Satisfactory attainment of practicum objectives
- Successful achievement of school nurse end-of-program objectives.
- Cumulative GPA of 3.0
End of Program Objectives School Nurse Certificate Program

Upon completion of the School Nurse Certificate Program, the student will be able to:

- Utilize the knowledge base for critical thinking and decision making in nursing practice.
- Utilize a systematic approach to problem-solving in nursing practice.
- Assess, plan and provide appropriate nursing care for children and evaluate the identified outcomes of care.
- Utilize effective written, verbal, and nonverbal communication skills.
- Demonstrate the knowledge and skills necessary to establish and maintain a comprehensive school health program.
- Collaborate with other school professionals, parents and caregivers to meet the health, developmental and educational needs of clients.
- Collaborate with members of the community in the delivery of health and social services, and utilize knowledge of community health systems and resources to function as a school-community liaison.
- Assist students, families and the school community to achieve optimal levels of wellness through appropriately designed and delivered health education.
- Contribute to nursing and school health through innovations in practice and participation in research or research-related activities.
- Identify, delineate and clarify the nursing role, promote quality of care, pursue continued professional enhancement and demonstrate professional conduct.

Required Courses: 16 credits

Introduction to High Incidence Disabilities, Accommodations & Adaptations
Intro to Low Incidence Disabilities, Methods & Practicum
Development of the IEP & Inclusion in Least Restrictive Environment
English Language Learners in the Multicultural Classroom
School Nurse: Child Health in an Inclusive Setting

PreK-8 Special Education Certification

The Special Education Certificate provides teacher education candidates with the opportunity to seek dual certification in Special Education. Special Education Certification is embedded in the PreK-4 program at LaRoche, and is an add-on option for the Middle Level and English Education programs at LaRoche. For state certification, students must meet all the competency standards set by the Pennsylvania Department of Education.

To successfully complete the Special Education Certificate, 30 credits of coursework are required.

Required Courses:

Introduction to High Incidence Disabilities, Accommodations & Adaptations
Learning Environments, Classroom Behavior Management, Accommodations & Adaptations
Intro to Low Incidence Disabilities, Methods & Practicum
Effective Instructional Strategies for Students with Disabilities
Specialized Instructional Planning, Accommodations, Adaptations & Field Experience
Evaluation & Authentic Assessment within a Standards Aligned System
Development of the IEP & Inclusion in Least Restrictive Environment
Special Education Student Teaching & Seminar
English Language Learners in the Multicultural Classroom

Master of Education with Autism Spectrum Disorder Endorsement Certification
PURPOSE: The Master's Degree in Special Education is designed for candidates who currently hold a teaching certificate and a special education certificate. Candidates will earn a M.Ed. and an Autism Spectrum Disorder (ASD) endorsement. The curriculum is developed to provide graduates with the advanced skills and knowledge needed to successfully teach children with special needs and work effectively with their families and agencies.

30 credits are required for degree

OBJECTIVES:

1. Master's Degree Candidates (MDC) will demonstrate the knowledge and skills to foster academic, social, and emotional growth to maximize the abilities of individual students with diverse needs.
2. MDC will demonstrate competence in classroom management for diverse populations, with a focus on students in inclusive settings.
3. MDC will integrate evidence based practice (instructional strategies and assessment techniques) to meet the needs of students and families.
4. MDC will employ skills in facilitating the transition process of students with special needs.
5. MDC will collaborate with various community agencies to enhance educational opportunities for all stakeholders.
6. MDC will engage in research to actively promote the advancement of the profession.

Master of Education with PreK-8 Special Education Certification

PURPOSE: The Master's Degree in Special Education is designed for candidates who currently hold a teaching certificate. Candidates will become certified in PreK-8 Special Education and continue on to earn a M.Ed. in Special Education. The curriculum is designed to provide graduates with the advanced skills and knowledge needed to successfully teach children with special needs to work effectively with their families and community agencies.

48 credits are needed to complete the degree

OBJECTIVES:

1. Master's degree candidates (MDC) will demonstrate the knowledge and skills to foster academic, social, and emotional growth to maximize the abilities of individual students with diverse needs.
2. MDC will demonstrate competence in classroom management for diverse populations, with a focus on students in inclusive settings.
3. MDC will integrate evidence based practice (instructional strategies and assessment techniques) to meet the needs of students and families.
4. MDC will employ skills in facilitating the transition process of students with special needs.
5. MDC will collaborate with various community agencies to enhance educational opportunities for all stakeholders.

6. MDC will engage in research to actively promote the advancement of the profession.

Master of Science in Nursing

The Master of Science in Nursing (MSN) program builds on the knowledge and competencies of baccalaureate education. Graduate courses focus on the development of scholarly, critical thinkers and leaders who develop the skills necessary to transform knowledge into advanced practice. Two specialty areas are offered: Nursing Administration or Nursing Education.

ADMISSION REQUIREMENTS FOR MSN

All qualified candidates are invited to apply for admission to the graduate program in nursing. Applicants must show evidence of meeting the following minimum criteria:

- A baccalaureate degree in nursing from an ACEN/NLNAC- or AACN-accredited program, or proof of equivalent from an international institution.

- A minimum undergraduate QPA of 3.0 on a 4.0 scale or resume support.

- Current licensure to practice nursing in a state or territory of the U.S.

- 1 year of nursing practice experience is required.

- Two letters of reference attesting to the applicant’s potential for graduate study. At least one of these references should be from an academic source.

- A statement of personal goals demonstrating congruence with the purpose of the program and the specific area of study. The statement must demonstrate appropriate writing skills.

ADMISSION OF INTERNATIONAL CANDIDATES

International students with English as a second language may apply for admission to the La Roche College MSN Program after completing one-two years of clinical work experience in a U.S. healthcare agency prior to or concurrent with the educational program.

Master of Science in Nursing - Nursing Administration

Nursing Administration

The 36-credit on-line graduate program* in Nursing Administration prepares students for leadership positions in a variety of settings. The Nursing Administration specialization at La Roche College provides a unique opportunity for nurses to develop the specialized leadership skills required to be successful nurse leaders now and in the future. Today's health care environment requires strong leaders who can make a positive difference in organizational outcomes.

In the wake of a changing health care environment, the need for nursing leadership has continued to grow. Nursing roles are being redefined and expanded to include more managerial and administrative responsibilities. Leadership opportunities are extending beyond the traditional nursing setting. This specialty area prepares nurses to work effectively with other members of the health care team in the delivery of quality patient care. Students learn to analyze contemporary nursing leadership issues, to confidently participate in policy formation and decision making, and to gain valuable expertise in pertinent business disciplines. Courses required for the Nursing Administration Specialty are outlined below.

* International students must meet the on-campus component for this program.

Fall Semester Year One:

- Nursing Theory & Research  
  NURG5002
- Role Development of the Nurse Administrator & Nurse Educator  
  NURG5013
- Nursing Informatics for Nurse Administrators & Nurse Educators  
  NURG5033

Fall Semester Year Two:

- Health Care Finance  
  NADM5000
- Nursing Administration II  
  NADM5020
- Nursing Administration II: Seminar & Practicum  
  NADM5025

Spring Semester Year One:

- Nursing Administration I: Theory, Concepts & Principles  
  NADM5017
- Health Policy  
  NURG5020
- Human Diversity & Social Issues in Nursing Administration & Nursing Education  
  NURG5035

Spring Semester Year Two:
The 34-credit on-line graduate program* in Nursing Education prepares students for educational positions in healthcare, health-related, and academic settings. The Nursing Education specialization at La Roche College provides an opportunity for nurses to develop the knowledge and skills essential to the role of nurse educator.

Recent reports have indicated an increased demand throughout the country for masters prepared nurse educators in academic settings. Nurse educators are also utilized throughout healthcare and health related fields. Students learn the components of educational theory and practice, develop courses and curriculum for nursing students and staff, learn classroom and clinical strategies, and practice the nurse educator role. Courses required for Nursing Education are outlined below.

* International students must meet the on-campus component for this program.

**Fall Semester Year One:**
- Nursing Theory & Research
- Role Development of the Nurse Administrator & Nurse Educator
- Nursing Informatics for Nurse Administrators & Nurse Educators

**Fall Semester Year Two:**
- Teaching & Learning: Strategies for the Classroom & Clinical Nursing Education
- Curriculum Design I: Development of Curriculum
- Curriculum Design II: Evaluation & Revision of Curriculum

**Spring Semester Year One:**
- Assessment, Measurement & Evaluation of Learners
- Health Policy
- Human Diversity & Social Issues in Nursing Administration & Nursing Education

**Spring Semester Year Two:**
- Nursing Education Teaching Practicum
- Capstone Research Experience

Detail - Humanities Division

Communication, Media & Technology

The Communication, Media and Technology Department prepares students for positions with video, television, radio, internet and other media organizations. With a strong background in communication, technology, computers, writing and message design, students who want to be writers, directors and producers of mass media can get their start in the department of Communication, Media and Technology. The program also offers significant background and experience in understanding the structure of computer-mediated communication and the ways that people communicate through the internet. For those from developing countries, Communication, Media and Technology is especially relevant in preparing students to help organize, plan and provide programming for media such as radio, television, internet and cable.

To complete the Communication, Media and Technology major successfully, the following course work is required:

- 51 credits of Major Requirements
- 37 credits required in the core curriculum
- 32 credits of general electives

Basic Skills and Fundamental Knowledge Area: Select 9 credits

Marketing Management  ADMG2021
The Creative Process  
Fundamentals of Electronic Publishing  
Computer Graphics II  
Interactive I  
Introduction to Cyberspace  
Advertising & Public Relations  
Race, Class, Gender: An Introduction to Sociology  
Culture & Human Societies

**Capstone Requirements: 6 credits**
- Senior Capstone  
- Communication Internship I

**Communicating Effectively: Select 9 credits**
- Creative Writing I  
- Writing for Non-Profits  
- Modern Public Speaking  
- Creative Dramatics  
- Contemporary Communication Through Discussion

**Communication, Media and Technology Electives: Select 6 credits**
- Communication in Organizations  
- Message Design & Media  
- Special Topics in Communication, Media & Technology

**Required Coursework: 21 credits**
- Human Communication  
- Mass Media & Digital Communication  
- Communication Between Cultures  
- Communication Theory, Research & Criticism  
- New Media & Digital Communication Technology  
- Legal Issues of Media & Digital Communications  
- Broadcasting, Cable & New Media

**English Education - Language & Literature**

This program prepares the student for a career as a highly qualified English teacher at the secondary level (7th-12th grade). For state certification, students must meet all the competency standards set by the Pennsylvania Department of Education, including maintaining at 3.0 GPA.

To successfully complete the Secondary English Major, the following coursework is required:

- 33 English credits as listed under "Major Requirements"
- 18 Literacy Education Component credits
- 30 credits in Education
- 12 credits in Psychology and Mathematics coursework
- 34-37 CORE credits
- A minimum of 127 credits are required for a degree, the last 30 of which must be earned at La Roche College (developmental coursework does not count toward the minimum number of required credits for graduation.)

**Education Requirements: 30 credits**
- Introduction to High Incidence Disabilities, Accommodations & Adaptations  
- Learning Environments, Classroom Behavior Management, Accommodations & Adaptations  
- Evaluation & Authentic Assessment within a Standards Aligned System  
- Development of the IEP & Inclusion in Least Restrictive Environment
Introduction to Education  
Secondary Student Teaching  
English Language Learners in the Multicultural Classroom  

**Literacy Education Component: 18 credits**

Developing Reading Communities  
Reading & Writing Across the Disciplines  
Advanced Teaching Methods for Middle Level Teaching Certification  
Methods of Teaching and Evaluating English  
Adolescent Literature  
Methods of Teaching Writing: Composition  
Creative Dramatics  

**Major Requirements: 33 credits**

Introduction to Literary Study  
World Literature I  
Issues in American Literature I  
Issues in American Literature II  
Shakespeare  
Introduction to Literary Theory & Criticism  
American English: Its History & Development  
Senior Seminar  
British Literature Course  
Film or Drama Course  
Writing Course beyond ENGL1012  

**Mathematics Courses: 3 credits**

Mathematics for the Liberal Arts  

**Psychology Courses: 9 credits**

Introduction to Psychology  
Adolescence Psychology  
Educational Psychology  

**English Studies - Journalism and Professional Writing**

The writing curriculum is designed to prepare students for careers in public relations, business communications and publications, advertising, writing, journalism and technical writing. To complete the professional writing major successfully, the following course work is required:

- 30 credits of English Writing Component courses  
- 12 credits of Literature Component courses  
- 15 credits of Professional Companion courses  
- 15 Credits of Professional Focus credits selected in a discipline  
- 37 credits of CORE Curriculum courses  
- 12 credits of General Electives  

A minimum of 120 credits is required for graduation, the last 30 of which must be earned at La Roche College.

**Professional Focus: 15 Credits**

Consists of five courses chosen from the student's area of academic interest.
English Writing Component: 30 credits

- Business Communications ENGL2029
- Technical Writing ENGL2030
- Journalism I ENGL3031
- Journalism II ENGL3032
- American English: Its History & Development ENGL3033
- Advanced Exposition ENGL3037
- Writing for Non-Profits ENGL3042
- English Writing Internship ENGL4051
- Senior Seminar ENGL4055

Literature Component: 12 credits

- Introduction to Literary Study ENGL2010
- Literature Elective ENGL2XXX
- Literature Elective ENGL3XXX
- Literature Elective ENGL3XXX

Professional Companion: 15 credits

- New Media & Digital Communication Technology CMET3002
- Publication Design ENGL3051
- Fundamentals of Electronic Publishing GCDN1025
- Digital Photography GCDN2016
- Marketing Management MRKT2021

English Studies - Language & Literature

The English language and literature curriculum is designed to develop language skills and to teach analytical skills and research methods necessary in approaching English studies as a discipline. The program encourages an appreciation of cultural heritage through literary works and stimulates the imagination. This major prepares students for graduate school in English or library science, and for positions in government services and public relations.

To complete the Language & Literature major successfully, the following course work is required:

- 33 credits of Major Requirements
- 3 credits of Writing Skills Component
- 18-20 credits in either Literature, Language and Literature, or Literacy and Learning Focus Areas
- 34-37 credits of CORE Curriculum courses
- 32-35 credits of General Electives

A minimum of 120 credits is required for graduation, the last 30 of which must be earned at La Roche College.

Language and Literature Focus: includes 2 semesters of the same foreign language

- Literature Elective ENGL3XXX
- Literature Elective ENGL3XXX
- Writing Course beyond ENGL1012 ENGLXXXX
- Writing Course beyond ENGL1012 ENGLXXXX

Literacy and Learning Focus

- Developing Reading Communities EDML3010
- Methods of Teaching and Evaluating English ENED3010
- Adolescent Literature ENED3030
- Methods of Teaching Writing: Composition ENGL1050

**Performing Arts - Dance Studio**
La Roche College Dance Department Mission and Vision

MISSION STATEMENT

The mission of the La Roche College Dance Department is to prepare a competent, educated, and mature professional who is viable in the current creative work force. We are committed to nurturing our students through extensive technical training, a deep historical and kinesthetic knowledge of the art form, and an enriched artistic awareness that is developed through performance and practicum.

The La Roche College Dance Department is a ballet-based program offering a Bachelor of Arts Degree in professional performance and pedagogy. The concentration of the dance department is rooted in classical ballet; however the artists are to reach proficiency in multiple genres including: contemporary ballet, modern technique, jazz, Pilate’s technique, and dance composition.

Faculty:
Maria Caruso
Chair
Maria.Caruso@laroche.edu
412-536-1212

VISION

The La Roche College Dance Department strives to educate and coach our students in a nurturing and compassionate way, developing each of their individual talents through a comprehensive and cohesive academic and creative environment.

DEPARTMENTAL GOALS

The La Roche College Dance Department is committed to the development and enhancement of our artist’s abilities in an effort to articulate our pristine accelerated programmatic goals on a national level.

- Students study and train primarily with the Director of Dance for the duration of four years while receiving enrichment from company artists and esteemed guests of Bodiography Contemporary Ballet.
- Students are required to reach equal proficiency in both classical ballet technique and contemporary technique upon graduation.
- Students are required to demonstrate their competency and knowledge of all techniques through the production of a student guided senior thesis, which identifies their technical balance while highlighting their individual artistic strengths.

Dance Requirements: 66 credits
Performing Arts Academics - 30 credits

- Intro to the Human Body: Systems That Move You
- Nutrition
- Kinesiology
- Fundamentals of Music
- Dance History I
- Dance History II
- Dance Pedagogy I
- Dance Composition
- Dance Composition II
- Senior Seminar in Performing Arts/Dance

Political Science

A major in Political Science helps to prepare students for careers in politics, government, global service, legal studies, graduate studies, journalism, and diplomacy. To successfully complete the Political Science major, the following coursework is required:

- 9 credits of Political Science Requirements
- 24 credits of Political Science Major Electives:
- 34 credits of CORE Curriculum courses
- 53 credits of General Electives
- A minimum of 120 credits is required for degree, the last 30 of which must be taken at La Roche College.

Political Science Major - 9 credits required

- American Government
- History of Political Thought
- Comparative Government

Political Science Major Electives -- 24 credits selected from the following two sub-fields.

American Politics (no more than 15 credits from this sub-field)

- Media & Democracy
- U.S. History: The Emergence of a Mass Democracy (1865-1945)
- History & Culture of the American Indian
- History of Black Americans
- Public Policy
- History of European Diplomacy
- Constitutional Law
- Modern U.S. Diplomatic History
- American Foreign Policy
- History of American Political Values, Beliefs & Ideas
- The American Presidency

The academic and scientific study of religion has always held a prominent position in institutions of higher learning. The religious studies department at La Roche College continues in this tradition. The major in religious studies is concerned with the academic study of religion in its historical and cultural context. The courses introduce students to the variety of areas of academic pursuit in religious studies, demonstrate the interface of religious studies and theology with the social sciences and enable students to understand, analyze, apply and evaluate theological methodologies and theories as they relate to human experience and existence.

The Religious Studies major is meant to prepare students in the academic study of religion for careers in Pastoral Ministry or social services or for graduate study.

To successfully complete the Religious Studies major, the following coursework is required:

- 30 credits of Religious Studies Major Requirements
- 15 credits of Religious Studies Major Electives
- 34 credits of CORE Curriculum courses
- 41 credits of General Electives

**Major Requirements: 30 credits - Select either RELS4055 or RELS4056**

**Sociology**
Social justice and equality are the key elements to a peaceful and stable society. But our world is often plagued by the persistence of centuries-old problems such as racism, poverty, war, oppression, enslavement, political economic underdevelopment, crime, human exploitation, and environmental degradation. Sociology is a field of study that analyzes these social problems and phenomena, and how they continue to affect groups and societies. It also examines how social issues arise and how they have been addressed. Sociology allows us to discuss realistic solutions to these problems and issues, and why or how these options have failed or succeeded. Through the understanding of the dynamic relationships between social structure and human behavior, scholars of sociology have provided theories and approaches to explain social issues, social change, and social problems.

What can you do with a BA in Sociology? Employers look for people with the skills that an undergraduate education in sociology provides:

- As a broad discipline, sociology cuts across many areas of the social sciences. Thus a degree in sociology prepares students for a wide range of career opportunities in public administration, politics, social and health services, criminal justice, business, education, counseling, social research journalism, public relations, and various other needs, especially those that require analytical skills and working with people from all social backgrounds;
- Knowledge and skills in sociological theories and research methods provide sociology students with the preparation for wide option of post-graduate work. A BA in Sociology is an extremely useful major for the preparation of graduate studies in sociology and other social science disciplines, as well as for law school;
- Globalization has impacted nearly every aspect of people’s lives around the world. The growth of both business and non-profit organizations at the national and international levels requires the recruitment of personnel who understand world affairs and appreciate diversity. A BA in sociology that focuses on global affairs would prepare sociology students with the capabilities needed in such organizations.

At La Roche College, a minimum of 120 credits is required for degree, the last 30 of which must be earned at the College. To graduate with a Sociology major, the following course work is required:

- 12 credits of major requirements
- 24 credits of major electives, must include 15 credits at 3000 level. Sociology electives can also be taken in the form of individualized courses for juniors and seniors from the following: SOCL4051 and 4052, Sociology Internship I and II; SOCL4056, Directed Research; and/or SOCL4057, Independent Study.
- MATH1040, Probability and Statistics, is a prerequisite for the SOCL3011 Research Methods course. (3 credits).
- 44 General Elective credits, at least 11 credits of which must be taken outside of sociology.
- 37 College Core Curriculum credits (see http://www.laroche.edu/academics/core.asp to find out more).

A. Required Introductory Courses -- Select 6 credits

Ballet Performance Minor

Minors must be completed within the student's graduation timeline. A minimum GPA of 2.0 must be achieved in the following courses to qualify for the minor.
To complete the Ballet Performance Minor, a total of 29 credits must be completed.

Required Courses:

FR Performance PART1000

Communication, Media & Technology Minor

To fulfill the Communication, Media and Technology Minor, 18 credits are required.

Minor must be completed within the student's graduation timeline. Two academic years are estimated for minor completion due to course rotation and prerequisites.

Required Courses (A):

Human Communication CMET1001
Mass Media & Digital Communication CMET1002
Communication Theory, Research & Criticism CMET2005
New Media & Digital Communication Technology CMET3002

Required Courses (B): must take at least 6 credits of the following

Communication in Organizations CMET2001
Communication Between Cultures CMET2003
Legal Issues of Media & Digital Communications CMET4001

English Studies: Professional Writing Minor
To complete the English Studies Professional Writing Minor, 15 credits are required.

Minor must be completed within the student's graduation timeline. Two academic years are estimated to complete the minor due to course rotation and prerequisites.

**Required Courses -- choose five courses from the following:**

- Business Communications ENGL2029
- Technical Writing ENGL2030
- Creative Writing I ENGL2040
- Special Topics in Composition ENGL3012
- Journalism I ENGL3031
- Journalism II ENGL3032
- Advanced Exposition ENGL3037

**French Minor**

Approximately 2 1/2 academic years are estimated for French Minor completion with respect to fall/spring course rotation and prerequisites. Students interested in being tested for certification of oral proficiency should consult with the modern language Department Chair.

**Requirements: 18 credits.**

**Required Courses:**

- Intermediate French I MLFR2001
- Intermediate French II MLFR2002
- Advanced French Language & Culture I MLFR3001
- Advanced French Language & Culture II MLFR3002
- French Civilization & Culture I MLFR3005
- Independent Study in French Studies MLFR4057

**History Minor**

Three academic years are estimated for history minor completion with respect to Fall/Spring course rotation and prerequisites.

**Requirements: 15 credits**

**Required Courses: 3 Credits from the following**

- U.S. History: The Foundation of a Republic (1600-1865) HIST1010
- U.S. History: The Emergence of a Mass Democracy (1865-1945) HIST1011
- Western Civilization I HIST1013
- Western Civilization II HIST1014
- Multicultural History of the U.S. SLHS1002

**Required Electives: 12 Credits-Any History (HIST) 2000 or 3000 level course or any of the Political Science (POLI) courses listed below(6 credits must be in U.S. History & 6 credits in non-U.S. History)**

- History Elective HISTXXXX
- History Elective HISTXXXX
- History Elective HISTXXXX
- History Elective HISTXXXX
- History & Politics of Africa POLI3019
- History & Politics of the Middle East POLI3045

**Humanities Minor**

**Requirements: 21 credits**

3 academic years are estimated for humanities minor completion with respect to fall/spring course rotation and prerequisites. The following course work is required:

**Humanities Minor Required Courses: 15 credits-ENGL2021 or 2022 & ENGL2036 or 2039; Select any 2000 or 3000 level ENGL (Literature) and PHIL courses**
World Literature I ENGL2021
World Literature II ENGL2022
Issues in American Literature I ENGL2036
Issues in American Literature II ENGL2039
Literature Elective ENGL2XXX
Literature Elective ENGL3XXX
Introduction to Philosophy PHIL1021
Philosophy Elective PHIL2XXX
Philosophy Elective PHIL3XXX

Must take at least 3 credits of the following:

Old Testament RELS1001
New Testament RELS1002
World Religions RELS1003

Select at least 3 credits of the following:

Ethics PHIL2026
Christology RELS2014
Women & Religion RELS2020

International Affairs Minor

This is an opportunity for students to supplement their career or personal interests and/or to facilitate in-depth study in the field of International Studies. Eighteen credits are required for a minor in International Affairs, with 12 required credits and 6 credits of electives. Minor must be completed within the student's graduation timeline. It is estimated that two academic years will be needed to complete the required coursework due to course rotation and prerequisites.

International Political Economy INST3003
American Foreign Policy INST3033

International Affairs Minor Required Courses - 12 credits

Global Politics INST2001
International Legal Environment INST4048

Select two courses from the following - 6 credits

Geography Elective GEOGXXXX
International Business Management INMT3039
Comparative Government INST3021
Development: Political, Social & Economic Issues INST3025

Literature Minor

Requirements: 15 credits

Required coursework is available day and evening. Two academic years are estimated for minor completion because of the course rotation.

In addition to the following required course, students must take four (4) literature electives, at least two of which must be upper division courses.

Literature Minor Requirements: 15 credits (Select ENGL3021 or ENGL3023)

Shakespeare on Film ENGL3021
Shakespeare ENGL3023
Literature Elective ENGL3XXX
Literature Elective ENGL3XXX
Literature Elective ENGL3XXX
Literature Elective ENGL3XXX

Philosophy Minor
Three academic years are estimated for philosophy minor completion with respect to fall/spring course rotation and prerequisites. All coursework must be completed within the student's graduation timeline.

Requirements: 15 credits

Required Courses:

- Introduction to Philosophy
- Ethics
- Moral Theology
- World Views & Identity

Psychology Minor

To complete a minor in psychology, a student must take a minimum of 16 credits. Two academic years are estimated for psychology minor completion with respect to fall/spring course rotation and prerequisites. All coursework must be completed within the student's graduation timeline. NOTE: This minor is not available to students majoring in human service.

In addition to the two required courses shown below, students must select three psychology electives, at least one of which must be upper division (3000 level or above). Successful completion of MATH1040, Probability and Statistics, is a prerequisite for students completing this minor.

Critical Skills for Psychology Students

Required courses:

- Introduction to Psychology
- Research Methods in Psychology

Religious Studies Minor

3 academic years are estimated for religious studies minor completion with respect to fall/spring course rotation and prerequisites. 18 credits are required for completion.

Required Courses: 9 credits

- Old Testament
- New Testament
- World Religions

Select 9 credits from the following:

- Ethics
- Church History
- Moral Theology
- Sacramental Theology
- Survey of Catholic Doctrine
- Christology
- Women & Religion
- The Church: Institution/Community
- Special Topics in Religious Studies

Sociology Minor

Two academic years are estimated for sociology minor completion with respect to fall/spring course rotation and prerequisites. This minor is not available to students majoring in human services.

Fifteen (15) credits are required. In addition to the required courses shown below, students must select three sociology electives, at least one of which must be upper division (3000 level or higher).
Required courses:

Race, Class, Gender: An Introduction to Sociology   SOCL1021
Research Methods   SOCL3011

Spanish Minor

Students may choose a topic related to their major and Spanish culture issues relating to topic. 2-2 1/2 academic years are estimated for Spanish minor completion with respect to fall/spring course rotation and prerequisites. Students interested in being tested for certification of oral proficiency should consult with the Modern Language Department Chair.

Requirements: 18 credits

Intermediate Spanish I   MLSP2001
Intermediate Spanish II   MLSP2002
Advanced Spanish Language & Culture I   MLSP3001
Advanced Spanish Language & Culture II   MLSP3002
Research in Spanish Studies   MLSP4057

Select one of the following courses in history:

History of Latin America   HIST2035
Contemporary Central America   HIST3005
History of Spain   HIST3012

Women's / Gender Studies Minor

Women are the majority sex in the nation and comprise the majority of all students in higher education. The number of women in the paid work force exceeds that of men. As more women work, business and corporations find the need for more sensitivity to issues such as health care, sexual harassment, parental leave, pay equity and equal employment. There is a growing demand in the professions of law, medicine, social work, teaching, counseling, government services and international affairs for expertise in gender issues. Women are recognized and courted as powerful consumers. Women are an influential force in American society as they continue to question and restructure traditional norms, sex roles and cultural expectations.

The minor in Women’s / Gender Studies is designed to examine gender from a multidisciplinary perspective and prepare students for the challenges of our gendered world. Students will explore women’s roles and experiences in social, political and economic life; women’s history; women’s spirituality; feminist theory; women’s literature; women and the arts; the intersection of gender with other categories of difference such as race, ethnicity, class, sexuality, religion, physical and developmental ability, and age; the impact of globalization on women’s lives; and the ways in which gender stereotypes influence women’s and men’s ideas of themselves and each other.

Course work will provide key conceptual tools that women and men can use in educating themselves and others while in college and can later employ in achieving a personally and professionally successful life. Students will learn to recognize and challenge gender inequity and other types of oppression and will broaden their awareness of current societal expectations for both women and men, thereby increasing their effectiveness and sensitivity in a variety of interpersonal and professional settings. In almost any career a woman or man chooses, s/he will encounter multiple challenges that reflect our gendered world. The Minor would be appropriate and of significant future benefit to students pursuing majors in Management, Marketing, Literary Studies, Criminal Justice, Sociology, History, Psychology, Communications, International Studies, Education, Health Care and students interested in careers promoting peace and social justice. Students would be better prepared to work with advocacy groups, human rights organizations, environmental and consumer groups, health care, youth, elderly and social services, policy and lobbying organizations, trade and international associations and labor.

The Minor in Women’s / Gender Studies requires 15 credits, Students select four courses (12 credits) from the following and complete the capstone seminar, Special Topics in Feminist Theory, for an additional three credits

Minor must be completed within the student's graduation timeline. Three academic years are estimated for completion due to course rotation and prerequisites.

Select four courses (12 credits) from the following:

Women Across Cultures   GLBL4025
Women in U.S. History   HIST3030
Women & Religion   RELS2020
Modern Language Certificate Program

La Roche College offers a modern language certificate program in French and Spanish. It is designed to develop a working-level speaking ability in a foreign language as well as competency in the other language skills.

The program also provides intensive learning experiences in foreign cultures and customs. Through state-of-the-art methodologies, including computer assisted instruction, various technological aides and other support programs, students are provided with opportunities for individual pacing and reinforcement of language skills.

The department encourages interested students to participate in immersion programs, i.e. language programs in native speaking environments, in order to experience a full exposure to the target language and culture.

The program consists of a sequence of six courses aimed at developing the oral proficiency skills of the student as measured on the ACTFL/ETS national scale. Final testing to qualify for the certificate will take place after a student has completed the Language and Culture II course of the language cycle. Only an "Intermediate-Mid" or above level as measured on the ACTFL/ETS scale will appear on the student's transcript.

Requirements:

Completion of one of the following language cycles with a grade point of "B" or higher:

- French cycle:
  MLFR 1001, 1002, 2001, 2002, 3001, 3002
- Spanish cycle:
  MLSP1001, 1002, 2001, 2002, 3001, 3002
- Demonstration of oral proficiency at an intermediate or advanced level
- Successful completion of written examination following the fulfillment of the language cycle requirement

NOTE: The Modern Language Certificate Program is not a major. Students may elect to earn a certificate in addition to their major, core, and elective requirements.

French Cycle:

Elementary French I MLFR1001
Elementary French II MLFR1002
Intermediate French I MLFR2001
Intermediate French II MLFR2002
Advanced French Language & Culture I MLFR3001
Advanced French Language & Culture II MLFR3002

Spanish Cycle:

Elementary Spanish I MLSP1001
Elementary Spanish II MLSP1002
Intermediate Spanish I MLSP2001
Intermediate Spanish II MLSP2002
Advanced Spanish Language & Culture I MLSP3001
Advanced Spanish Language & Culture II MLSP3002
Parish Program Manager Certificate

This Certificate Program is designed to provide Parish Program Managers with basic courses in religious studies. As a Catholic college, La Roche College believes that all parish personnel committed to ministry should be prepared to engage the teachings of Christ and the tradition of the Church.

30 credits are required for completion of this certificate program.

Required Courses: 30 credits

Detail - Natural & Behavioral Sciences Division

Biochemistry
A major in Biochemistry is meant to prepare students for graduate studies in Chemistry or Biochemistry, for admission to a professional school such as medical school or pharmacy school, or employment in the biotechnology sector.

To successfully complete the Biochemistry major, the following coursework is required:

• 79 credits of Major Requirements (60 Chemistry/Biology credits; 2 seminar credits; and 19 Science credits)
• 34 Core credits
• 7 General electives credits
• A minimum of C grade in science courses, GPA minimum of 2.5
• A minimum of 120 credits are required for degree, the last 30 of which must be earned at La Roche College.

Biology (B.A.)

The bachelor of arts program in biology is designed to be merged with studies in a non-science area. The resulting program will retain the elements of biology necessary for the successful application of this science in another discipline. Students will be advised to choose a minor; some possibilities include management, pre-law, professional writing and computer information systems. Other combinations may be arranged to fit the needs of students.

To complete the biology (B.A.) major, a minimum of 120 credits is required, the last 30 of which must be earned at La Roche College.

The following course work is required for completion of degree:
33 credits in Major Requirements
22 credits in biology electives level 2000 or above
34 credits to satisfy remaining Core Curriculum requirements not covered above.
31 credits of general electives selected with the approval of the academic advisor

**Major Requirements Requirements: 33 credits (includes 22 credits of biology electives)**

**Biology (B.S.)**

The bachelor of science program in biology is planned to provide scientific training as part of a liberal education and to give the student a basic comprehension of the main areas of biology. The program is designed to prepare the student for graduate work, for admission to medical/dental/veterinary school, for a biologically oriented career, or for research in the biological sciences.

To complete the biology (B.S.) major, a minimum of 120 credits is required, the last 30 of which must be earned at La Roche College. The required course work consists of:

- 36 credits in biology (includes 8 credits of biology electives 200 level or above)
- 35 credits in other science and mathematics courses
- 34 credits to satisfy remaining Core Curriculum requirements not satisfied above.
- 15 credits of general electives selected with the approval of the academic advisor.

Note: Those students choosing this major as preparation for medical, dental or veterinary school are advised to take the courses listed below under that category as either biology or general electives.

**Biology Requirements: 36 credits (includes 8 credits of Biology electives)**

Biology with Forensics

This major prepares students for employment or graduate studies in biological sciences with forensic applications, including such professions as a crime lab scientist or a member of a criminal investigations team.

To successfully complete the biology major, the following course work is required:

- 36 credits in biology (2 of which must be in seminar)
- 43 credits in chemistry, mathematics and physics
- 13 credits in criminal justice
- 31 CORE curriculum credits.

A minimum of 123 credits is required for graduation, the last 30 of which must be completed at La Roche College.

Chemistry

This program is designed to provide the student with a strong foundation in chemistry, including a solid theoretical background as well as broad exposure to experimental techniques and current instrumentation. Upon successful completion of this program, a student will be prepared for entry level positions in chemistry-related industries and to pursue advanced degrees in a variety of scientific areas, such as medical/dental/veterinary school.

To complete the chemistry major, a minimum of 120 credits is required, the last 30 of which must be earned at La Roche College. The required course work consists of:

- 46 chemistry component credits (2 of which must be in seminar)
- 19 science component credits
- 34 CORE credits
- 21 general elective credits

NOTE: students choosing this major as preparation for medical/dental/veterinary school are advised to take the courses shown under that category below as chemistry or general electives.

Chemistry - Comprehensive

This major is designed for the student who wishes to study chemistry in more depth. It is particularly appropriate for students who wish to pursue a graduate degree in chemistry. Students preparing for careers in academic or industrial laboratories will also benefit from this major. This program is constructed using the guidelines prepared by the Committee on Professional Training of the American Chemical Society. This group of courses provides the 500 hours of laboratory instruction recommended by the A.C.S.

To complete the Comprehensive Chemistry major, a minimum of 120 credits is required, the last 30 of which must be completed at La Roche College. The required course work consists of:

- 50 credits Chemistry Required courses, which include a Chemistry elective at the 3000- or 4000-level
- 33 credits of other Science and Mathematics
- 34 credits of CORE Curriculum courses
- 3 credits of general electives selected with the approval of the academic advisor.

Chemistry - Forensic Science

This major will prepare students to work in a forensic chemistry laboratory, or for graduate study in chemistry. To successfully complete the chemistry major, the following course work must be completed:

- 42 chemistry component credits (2 of which must be in seminar)
- 31 natural science component credits
- 13 Criminal Justice credits
- 34 CORE/General Elective credits.

A minimum of 120 credits is required for graduation, the last 30 of which must be earned at La Roche College.

Child and Family Studies

Bachelor of Arts

The Child and Family Studies major focuses on human development within the context of families, communities, and the wider society, and an understanding of challenges and treatment options for families in distress. The major is interdisciplinary in nature, with a core foundation in psychology as well as perspectives from education and the social sciences. To successfully complete the Child and Family Studies major, the following coursework is required:

- 43 credits of Major Requirements
- 37 credits of Core Requirements
- 40 credits of General Electives

This major cannot be doubled with a major or minor in Psychology.

Critical Skills for Psychology Students

Computer Science

A major in Computer Science is meant to prepare students for jobs and careers in the computer industry or for further study at the graduate level in computer science, telecommunications, or related fields, or to provide students with a background in a fundamental science.

To complete the computer science degree major, a minimum of 120 credits is required, the last 30 of which must be earned at La Roche College. The required course work consists of:
• 34 credits in computer science core-components
• 9 credits in computer science electives
• 14 credits in mathematics
• 8 credits in physics
• 34 credits in core curriculum
• 21 credits in general electives

**Criminal Justice**

The major is designed to prepare students for career opportunities in the criminal justice field, to include law enforcement, courts and corrections, and private security, or for further study at the graduate level in criminal justice, criminology or law. To successfully complete the criminal justice major, the following coursework is required:

• 30 Criminal Justice core component credits
• 12 Criminal Justice elective credits
• 12 skills components credits
• 40 academic core credits

• 15 general elective credits: May be fulfilled through a second major, minor or certificate program. Recommended programs are: Criminalistics, Accounting, Computer Forensics and Security, Forensic Psychology, Pre-Law, Sociology, Modern Languages (Spanish or Arabic)

• 11 credits of a foreign language [Spanish or Arabic recommended].

A minimum of 120 credits is required for degree, the last 30 of which must be taken at La Roche College.

Criminal Justice Required Courses: 27 credits (Select CRIM3030 or CRIM3042; CRIM2016 is crosslisted with SOCL2016; CRIM3030 is crosslisted with SOCL3030)

Intro Criminal Justice
Intelligence Analysis & Presentation Techniques
Police & Society
Constitutional Law
Criminal Law
Theories of Criminal Deviance
Applied Criminology
Criminal Investigations
Senior Capstone Experience
Research Methods in Psychology
Police & Society

Elective Courses: select any 4 courses -12 credits (CRIM3063 is crosslisted with PSYC3063)

Intro to Corrections
Juvenile Delinquency
Correctional Counseling
Special Topics in Criminal Justice
Enterprise & Transnational Crime
Terrorism
Crime Scene Investigation & Forensics
Criminalistics
Computer Crime
Security Management & Loss Prevention
Administration of Criminal Justice Organizations
Law Enforcement Communications
Criminal Behavior: Law & Psychology
Emergency Preparedness & Crisis Management
Internship in Criminal Justice
Independent Study in Criminal Justice

Skills Component: 15 credits (students may select CRIM2012, Analysis of Criminal Justice Data OR MATH1040, Probability & Statistics; students may select CRIM2018, Professional Responsibility OR PHIL2026 Ethics)

Analysis of Criminal Justice Data
Professional Responsibility: Legal & Ethical Concepts
Technical Writing
Introduction to Cyberspace
Probability & Statistics
Logic
Ethics

Criminal Justice - Accelerated Program for Criminal Justice Professionals (APCJP)

Current or prior law enforcement officers with five years of experience in the criminal justice field will receive 48 advanced standing credits (15 based upon Act 120 Certification and 33 credits for work experience.) Most courses are offered in an 8-week accelerated format that is cohort based. Students may select from both on-line, classroom and blended courses. It is possible to graduate from the Accelerated Program with a BA in Criminal Justice and a minor in another academic field within four semesters and one summer session. The APCJP student will complete 72 academic credits at La Roche College. APCJP students with an associate degree and/or academic credit from other institutions will be evaluated on an individual basis. A student’s last thirty credits must be earned at La Roche College.
The following coursework is required for degree:

- 18 Credits of Criminal Justice Major Requirements
- 6 Credits of Criminal Justice Major Electives
- 9 Credits of Skills Components
- 36 Credits of CORE Curriculum courses
- 30 Credits of General Electives

**Academic Core Courses -- 24 Credits Required:**

APCJP students have been granted 16 credits for La Roche Experience (4) (W); Select Aesthetics (3) (W); Select Religion/Philosophy (3) (W); Select Literature (3) (W); and Select History (3) (W). The following core courses are required:

- ENGL1011 College Writing I
- ENGL1012 College Writing II
- MATH1010 College Algebra
- ISTC1005 Practical Computer Applications
- Select Science
- Select Social/Cultural Systems
- Community Integrative
- Global Integrative

**Language Requirement – No Credits Required.**

APCRP students do not have a modern language requirement but can take language courses as alternatives and may minor in Spanish.

**General Electives - 15 Credits**

APCJP students have been granted 11 credits (W) from the elective component based upon work experience and prior academic/training courses.

The elective requirement may be fulfilled through a minor or certificate program. Recommended programs are: Criminalistics, Modern Languages, Computer Science, Psychology, Sociology, Accounting, Pre Law, and Management.

Criminal Justice elective courses in excess of the required credit (6) may be taken and applied to the general elective component.

**Criminal Justice Required Courses: 12 credits are granted for**
- CRIM1001 Introduction to the Criminal Justice System (A)
- CRIM2016 Police and Society (W)
- CRIM3045 Criminal Investigations (A)
- CRIM2011 Intelligence Analysis and Presentation (A)
- CRIM3045 Law Enforcement Communications (A)
- CRIM4051 Internship (W)
- CRIM2018 Professional Responsibility or
- PHIL3026 Ethics

Criminal Justice Major Electives: Select 6 credits

Intro to Corrections
Correctional Counseling
Enterprise & Transnational Crime
Terrorism
Crime Scene Investigation & Forensics
Criminalistics
Computer Crime
Security Management & Loss Prevention
Administration of Criminal Justice Organizations
Independent Study in Criminal Justice

ISTC2008
MATH1040
PHIL1020

Health Science

A major in Health Science is meant to provide a bridge between study in the natural sciences and the application of science principles to diverse health-related professions.

The B.A. in Health Science is designed to meet the needs of two groups of students: 1) undergraduates preparing for post-baccalaureate study in a health profession; and 2) those already credentialed health professionals who are seeking to complete a Bachelor's degree. For both categories of students, the major in health science combines study in the natural sciences with liberal arts study through the Core Curriculum. The health science major also offers substantial general elective credits, which a student can use to add a second major or a minor, or to further one's background in the sciences or liberal arts.

Health Science Option 1 Major is meant to prepare students for health profession study in graduate school. For example, this option is suitable for undergraduates preparing to attend graduate programs in Occupational Therapy, Physical Therapy, Speech-Language Pathology, Clinical-Nutrition Dietetics, Health Information Management, and Physician Assistant at another institution.

To successfully complete the Health Science (Option 1) major the following coursework is required:
• 40 credits of Science and Mathematics Component
• 18 credits of Health Science Component
• 34 credits of CORE Curriculum courses
• 28 credits of General Electives

A minimum of 120 credits are required for degree, the last 30 of which must be earned at La Roche College.

Pharmacology for Health Science                  HSCU3045
Health Assessment in Health Science              HSCU3050

Physics for Health Science-Lab                    PHYS1010L

**Health Science - Degree Completion**

A major in Health Science is meant to provide a bridge between study in the natural sciences and the application of science principles to diverse health-related professions. Full-time faculty members in the Department of Health Science are also professors in the Departments of Biology, Chemistry and Physics.

As part of its continuing growth in Health Science education, La Roche College has established the BA in Health Science, beginning in the fall semester of 2008. The BA in Health Science is designed to meet the needs of those students already credentialed health professionals who are seeking to complete at Bachelor's degree. The major in Health Science combines study in natural and health sciences with liberal arts study through the Core Curriculum. The Health Science major also offers general elective credits, which a student can use to add a second major, or a minor, to further one's background in the sciences or liberal arts.

This program is for individuals who maintain active certification in one of the following health professions:

• Radiography[R.T.(R)from the American Registry of Radiologic Technologists]
To successfully complete the Health Science Degree Completion major, the following coursework is required:

- 18 credits of Health Science Requirements
- 30 credits of CORE Curriculum courses
- 15 credits for active Certification in one of the Health Science Areas
- 45 credits for science courses leading to certification - Associates Degree or Hospital Program
- General Elective credits are dependent on transfer credits

A minimum of 120 credits are required for degree, the last 30 of which must be earned at La Roche College.

Mathematics - BA

The major in Mathematics introduces students to a field whose origins date from the dawn of history and whose ever-increasing pervasiveness and importance in science, engineering, business and finance renders it a veritable master-key to our understanding of the world about us. The degree in mathematics opens many doors to students upon graduation, to a job in business, industry or government, to certification as a teacher, to graduate study in mathematics, statistics and computer science, among many other fields, or to a professional school such as in business or law. Moreover, the major in mathematics serves as a gateway not only to a job and career, but also to a world where logic and imagination combine to create timeless beauty and truth.

To complete the mathematics major, a minimum of 120 credits is required, the last 30 of which must be earned at La Roche College. The required course work consists of:

- 46 credits of Mathematics courses
- 8 credits of Physics courses
- 34 credits CORE Curriculum courses
- 32 credits of General Electives

**Mathematics Core: 46 credits**

Analytic Geometry & Calculus I MATH1032

Physics I-Lab PHYS1032L
Physics II PHYS1033
Physics II-Lab PHYS1033L

**Mathematics - BS**

The major in Mathematics introduces students to a field whose origins date from the dawn of history and whose ever-increasing pervasiveness and importance in science, engineering, business and finance renders it a veritable master-key to our understanding of the world about us. The degree in mathematics opens many doors to students upon graduation to a job in business, industry or government, to certification as a teacher, to graduate study in mathematics, statistics and computer science, among many other fields to a professional school in business or law. Moreover, the major in mathematics serves as a gateway not only to a job or career, but also to a world where logic and imagination combine to create timeless beauty and truth.

What distinguishes the BS from the BA in Mathematics is the requirement of 7 credits in Computer Science and that of 4 additional credits in Physics. Although the number of general-elective credits is thereby reduced by 11, the remaining 21 credits could still allow for a minor in many fields.

To complete the mathematics major, a minimum of 120 credits is required, the last 30 of which must be earned at La Roche College. The required course work consists of the following:

- 46 credits in the mathematics core
- 7 credits in Computer Science
- 12 credits in Physics
- 34 credits in CORE Curriculum courses
- 21 credits of General Electives

**Computer Science: 7 credits**

National Security Studies

The "National Security Studies" major is, of necessity, interdisciplinary in nature. It also requires a strong internship or co-op program to enhance the student's employment opportunities. The major has rigorous requirements and students are advised that their future employment will normally require the successful completion of a comprehensive background investigation.

A major in National Security Studies is meant to prepare students for career opportunities with federal and state agencies, that have as part of their mission the defense of the homeland or the implementation of U.S. Foreign Policy and strategic objectives; multinational corporations that require personnel with research, analytical and communication skills; and for further study at the graduate level.

Students must maintain a minimum QPA of 3.2 and need to earn a minimum of a "C" in all courses taken. The program requires that the graduate possess the following skills:

- A reading competency in one of the required foreign languages
- The ability to produce written reports based on research, correlation, and analysis
- Oral presentation skills, to include computer facilitated presentations
- Knowledge of statistical techniques
- Knowledge of computer applications and data management systems.

At the beginning of a student's junior and senior year, a committee composed of the department chairs, or their representative, of the Justice, Law, and Security, International Studies, History and Modern Language Departments will review the progress of all students enrolled in the program. Students whose QPA falls below 3.2, whose foreign language reading ability is inadequate, or who exhibit behavioral or academic deficiencies that would, in the judgment of the reviewers, make future employment in the national security field unlikely, will be placed on probation or disenrolled from the major.

A minimum of 120 credits is required for degree, the last 30 of which must be earned at La Roche College.
To complete the "National Security Studies" major, the following course work is required:

- 20 Arabic or Spanish language credits
- 18 "National Security Studies" major required credits
- 12 "National Security Studies" major elective credits
- 6 Foreign Area Studies credits
- 24 Skills Component credits
- 37 Core Curriculum credits
- 3 credit internship or co-op credits

**Major Requirements: 18 credits**

**Radiologic Technology**

The radiologic technologist, or radiographer, performs sophisticated diagnostic x-ray tests to uncover a wide range of medical conditions. Radiologic technology is offered through an affiliation with the Ohio Valley General Hospital School of Radiography (Kennedy Township, PA). Students successfully completing this program are awarded an Associate in Health Science degree and are then eligible to sit for the national certification examination given by the American Registry of Radiologic Technologists.

The radiologic technology program consists of a total of 66 required credits. Basic science and Core Curriculum courses (totaling 40 credits) are
Ohio Valley General Hospital/La Roche College Radiography Program Mission Statement:

The Ohio Valley General Hospital/La Roche College Radiography Program will meet the needs of the communities we serve by offering a radiologic technology program that provides an environment for the development of competent and professional future radiologic technologists by offering a solid clinical and theoretical background in the Radiologic Sciences.

Fundamental Goals:

- To provide a quality education in the radiologic sciences in accordance with the JRCERT Standards

- To provide a curriculum that enables students to successfully meet all Core Clinical Competency requirements established by the ARRT

- To prepare students for the ARRT’s national certification examination in radiography

- To equip students with entry-level diagnostic technologist skills

Admissions Criteria and Guidelines:

- 18 years of age by October 1st of first fall semester

- High school graduate or general equivalency diploma

- Minimum GPA of 2.5 in high school or in 12 credits from post-secondary institution

- Algebra II and Biology (high school or post-secondary) with a minimal grade of C

- Math and English proficiency as demonstrated by placing into MATH1010/1010A and ENGL1011
- Completion of 4 hours documented career shadowing with a registered radiologic technologist in a hospital setting

- Attendance records from high school or recent employer

- Two letters of recommendation from teachers or recent employers

- Completion of Technical Standards*

- Satisfactory results of a screening for illegal drug use**

- Willingness to submit to a criminal background check**

This is a specialized program. As such, merit scholarships previously awarded to students are not transferable to this program. Previously awarded La Roche Merit Scholarships are void upon acceptance to the Rad Tech Program.

Admission Guidelines:

- Nine students are accepted to the radiography program each year. Interviews for acceptance begin in January and continue until all nine positions are filled. Interested candidates are therefore encouraged to apply early.

- Interested candidates can apply to the radiography program by completing a La Roche College admission application. You can click here to download an application in PDF format.

- Career Shadowing appointments are conducted at Ohio Valley General Hospital Monday through Friday from 7:00 a.m. until approximately 11:30 a.m. Appointments may be scheduled by calling Ohio Valley General Hospital School of Radiography at 412-777-6210.

- ACCUPLACER placement testing appointments may be made by contacting La Roche College's Student Academic Support Services Office at 412-546-1231. A ten-dollar testing fee will apply.

* Technical Standards testing ensures that applicants have the ability to perform the basic physical tasks required for the profession of Radiologic Technology

** Drug screenings and background checks are conducted by Ohio Valley General Hospital at summer orientation before the first fall semester. Students who test positive for illegal drugs or refuse to grant permission for the criminal background check will forfeit their position in the radiography program and will lose their deposit.
Courses

**Biology Minor**

To complete a minor in biology, a minimum of 22 credits must be taken in biology. In addition to the 8 credits of required course work, students must take a minimum of 14 additional biology credits in 2000 level courses or above. The student can expect to take three academic years to complete the minor, because many upper level biology courses are offered on a two-year cycle.

**Computer Science Minor**

A minor in Computer Science is an opportunity for students to fulfill career or personal interests, and/or to facilitate in depth study in a field of secondary interest.

Minors must be completed within the student's graduation timeline. A minimum GPA of 2.0 must be achieved in the following courses to qualify for this minor.

To complete a minor in computer science, a minimum of 23 credits must be taken in computer science in accordance with the following schedule.

17 credits in Required Courses and a minimum of 6 additional 2000+ level computer-science credits.
Computer Security

Computer Science Minor Electives: Choose 6 Credits from the following 2000+ Level courses

- Computer Forensics Investigations
- Systems Programming
- Computer Organization & Design
- Database Systems Theory
- Operating Systems
- Compiler Design
- Introduction to Software Engineering
- Telecommunications I
- Telecommunications II
- Advanced Database Theory
- Introduction to Artificial Intelligence
- Discrete Mathematics II

Computer Security & Forensics Minor

As new technology continues to play an ever-increasing role in our society, so do the opportunities for its exploitation. Computer hackers now routinely threaten private citizens, businesses and governments. Effectively combating these threats will require a new type of professional who has expertise in both disciplines, criminal justice and technology. In law enforcement, there is a need for professionals that can join the fight against cyber crime, cyber terrorism, identity theft, and the exploitation of minors. In business, there is a need for professionals with the necessary technology skills for recognizing and mitigating the threats and vulnerabilities of computers and networks. The Computer Security and Forensics minor brings together the disciplines of technology and criminal justice to uniquely prepare students for careers at the intersection of these two fields.

To successfully complete the Computer Security and Forensics minor, a minimum of 24 credits are required.

**Mathematics Minor**

A minor in Mathematics would be advantageous to a student contemplating graduate study in many sciences, engineering, telecommunications or financial mathematics.

To complete a minor in mathematics, 7 courses (24 credits) must be taken in mathematics in accordance with the following schedule.

Minor courses must be completed within the student's graduation timeline. A minimum GPA of 2.0 must be achieved in the minor coursework.

Please note, with the exception of the three 4-credit Calculus courses, mathematics courses are worth 3 credits. Inasmuch as the required courses are sequential and ordinarily offered yearly, the student may complete the minor in mathematics in - to reckon from the commencement of the semester in which Analytical Geometry and Calculus I is taken (and passed) - as few as two and one-half academic years; it is more likely, however, that the completion of the minor will require at least three full academic years. Owing to the fundamental nature mathematics, several majors at La Roche entail either a minor in mathematics or a significant part thereof.

**Required Courses: 24 credits**

**Medical Technology Minor**

The Medical Technology Minor is meant to be paired with the B.A. in Biology major. Required coursework is offered during the day only; three academic years are needed to complete the minor coursework, followed by a senior year, 30 credit hour, externship at a hospital-based school of medical technology (accredited by the National Accrediting Agency for Clinical Laboratory Sciences-NAACLS). Students apply for acceptance at accredited medical technology programs-La Roche College does not place students into specific medical technology schools. Information on accredited programs can be obtained from the Coordinator of Health Science Programs.

To successfully complete the Medical Technology Minor, the following coursework is required:

- 38 credits of Medical Technology Requirements
- 22 credits of Biology Electives as preparation for the Medical Technology externship

**Biology Electives: 22 credits**

<table>

Biochemistry I-Lab

Molecular Biology Minor

To complete a minor in molecular biology, a minimum of 24 credits must be taken in biology. The student can expect to take three academic years to complete the minor because many upper level biology courses are offered on a two-year cycle.

Note: Prerequisites for Molecular Biology and Laboratory include General and Organic Chemistry (CHEM1001, CHEM1002, CHEM1003, CHEM1004, CHEM2015 or permission of instructor).

Required Courses: 12 credits

General Biology I
General Biology II
General Biology I-Lab
General Biology II-Lab
Molecular Biology
Molecular Biology-Lab

Select at least 12 additional credits from the following courses:

Microbiology
Genetics
Genetics-Lab
Cell Biology
Biochemistry I
Biochemistry I-Lab
Biochemistry II
Immunology
Immunology-Lab

Political Science Minor

The goal of the political science minor is to offer La Roche students exposure to the general study of political science, and to gain a basic understanding of the political science sub-fields of American Politics and Comparative Politics. Outcomes of the political science minor are: achievement of a general understanding of the American political system; achieving the ability to assess and analyze differing governments and political systems in various parts of the world; and understanding key concepts in political thought.

REQUIRED COURSES: 15 credits required for minor, divided among three (3) credit required courses and 2 (3)three credit advanced Political Science courses:

Political Science Major Electives -- 24 credits selected from the following two sub-fields.
American Politics (no more than 15 credits from this sub-field)

Internship in Political Science

Required Courses: 9 credits

American Government
History of Political Thought
Comparative Government

Required Electives: 6 credits-Any two 3000-level-Political Science- 3 credit courses:

Political Science 3000-level

Pre-law Minor
Law schools look for students with critical thinking skills and problem solving abilities, as well as strong writing and oral communication skills. The courses required for completion of a Pre-Law Minor should help students develop those types of skills.

Three academic years are estimated for the Pre-Law Minor with respect to fall/spring course rotation and prerequisites. Students interested in preparing for the LSAT examination should consult with the chair of the Justice, Law, and Security Department for assistance. Completion of this minor alone may not necessarily facilitate adequate preparation for this professional credential.

30 credits are required for completion of the Pre-Law Minor. In addition to the required courses shown below, students must take the following:

- One 2000-level English course
- Two upper-level courses selected from the following departments: Philosophy, Psychology, Sociology and Criminal Justice

**Required Courses (Select SPHC1001 or ADMG3024 or CRIM2011; Note CRIM2005 is crosslisted with POLI2005)**

**Criminalistics Certificate**

The Justice, Law & Security Department, in coordination with the departments of Biology and Chemistry, offers a Certificate in Forensic Arts and Sciences. This certificate will be awarded to those who have demonstrated proficiency in the forensic application of the sciences of Biology and Chemistry. This forensic application entails a basic understanding and demonstrated knowledge of selected subject matter areas of the Criminal Justice System. Students must be enrolled concurrently in one of the following majors: Biology with Forensics, Chemistry with Forensics, or Criminal Justice.

Requirements for completion of a Certificate in Forensic Arts and Sciences are as follows:

- **RESEARCH REQUIREMENT**
  
  During the Senior Seminar or Capstone course, the candidate will complete a research project on an area in forensic science. The proposed topic will be submitted in writing and approved by the coordinating committee, the members of which will ensure that the approval criteria and evaluation criteria are consistent for each project.

**Coordinating Committee:**

- Lawrence E. Likar, MA., JD
  
  Associate Professor and Chair, Department of Justice, Law, and Security

  Supervisory Special Agent FBI (Ret'd)

- Gail Rowe, Ph.D.
GRADE REQUIREMENT

All candidates must receive a minimum grade of "C" for each forensic component course and the research project. Criminal Justice majors must also receive a minimum grade of "C" in all required science courses.

Analysis of Criminal Justice Data CRIM2012
Theories of Criminal Deviance CRIM3030
Introduction to Psychology PSYC1021
Research Methods in Psychology PSYC3011
Abnormal Psychology PSYC3023
Forensic Psychology PSYC3065

Athletic Training- Duquesne

Athletic Training Program

Athletic training is an allied health profession that is recognized by the American Medical Association. Certified Athletic Trainers (ATC), under the supervision of a licensed physician, provide care for athletes and those who are physically active within these areas of clinical practice:

- prevention
- recognition, evaluation and assessment;
- treatment, rehabilitation, and reconditioning
- organization and administration; and
- professional development and responsibility.
Certified athletic trainers are specialists in the area of sports medicine, which is a general term that refers to a very broad scope of care and services that are necessary to maintain the overall health and performance of those who are physically active or who participate in sports.

**Employment and career opportunities**

Certified athletic trainers are employed by high schools, colleges and universities, professional athletic teams, private sports medicine centers, rehabilitation clinics, hospitals, health and fitness-related settings, the military, and corporations. Athletic trainers can also pursue career growth options in equipment development, corporate fitness, rehabilitation facilities, orthopedics, and nutrition and weight management.

**The La Roche College-Duquesne University Affiliation**

In this program, students majoring in athletic training complete a pre-professional program at La Roche College (designed to take a minimum of two years), and then transfer to Duquesne University to complete their professional phase in athletic training (designed to take another two years). Students who successfully complete this program earn a Bachelor of Science in Athletic Training from Duquesne University.

**The Duquesne Athletic Training Curriculum**

Student professional preparation at Duquesne is directed toward the development of specified competencies in the following domains: risk management and injury prevention, pathology of injury and illnesses, assessment and evaluation, acute care of injury and illness, pharmacology, therapeutic modalities, therapeutic exercise, general medical conditions and disabilities, nutrition, health care administration, psychosocial intervention and referral, and professional development and responsibilities.

**Accreditation and Certification**

Duquesne University's athletic training education program is accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP). The American Academy of Family Physicians, the American Academy of Pediatrics, the American Orthopedic Society for Sports Medicine, CAAHEP, and the National Athletic Trainers' Association cooperate to establish, maintain and promote the standards for the quality of CAAHEP-accredited educational programs in athletic training.

Graduates of the Duquesne program in athletic training will be eligible to sit for the National Athletic Trainers' Association Board of Certification Examination, as well as be eligible for Pennsylvania Athletic Trainer Certification.

**Admission to the Athletic Training Program**

**Freshman admission:** All students admitted to La Roche College who intend to major in athletic training will be initially designated as "Athletic Training candidates". Athletic Training candidates will be automatically considered for full admission to the athletic training major upon completion of the second semester of courses at La Roche College.

Prospective students to the program must have earned a minimum SAT score (Verbal and Math) of 1100, or a minimum ACT score of 24. Prospective students must have earned a minimum high school GPA of 2.75. The high school curriculum must have included at least:

- 4 Units of English
- 1 Unit in Social Studies or Foreign Language
- 7 Units in Math and Science
- 4 Electives
In addition, prospective students must demonstrate evidence of extracurricular activities during high school and have the ability to meet all of the medical and performance/technical standards of Duquesne University's program. The pre-professional phase is completed at La Roche College in two years. The La Roche College portion of this program requires three courses (with labs) to be taken at Duquesne University. Students are expected to provide their own transportation. This program will require the student to take summer classes.

Students then apply to Duquesne University for the professional phase. La Roche College is guaranteed an allotment of five students every year. In event that more than five have entered the program, only the top five will be allowed admission to Duquesne University. These students must have earned a minimum GPA of 3.0 overall, and a minimum GPA of 3.0 in Science/Math courses, with no course grade below a "C". Students must also be recommended by the pre-professional committee consisting of La Roche College Science Faculty.

**Transfer admission:** Students with prior college credits who are admitted as transfer students to La Roche College may express their intent to major in athletic training. Each student will be evaluated individually by the Coordinator of Health Science Programs.

**Admission to Duquesne University**

Through the Chairperson of the La Roche Pre-professional Health Committee, a La Roche athletic training major must submit a Duquesne University Application for Undergraduate Admissions by Dec 1st for consideration for the following fall semester at Duquesne, along with additional required documentation (which the student will be informed of during a health sciences orientation at La Roche College).

Academic requirements for admission to Duquesne University for the professional phase of the athletic training program include:

- successful completion of all professional course work with a 3.0 cumulative QPA at La Roche College, and a "C" or better in all courses
- a "B" or better in ATHTR 201 (Essential Concepts and Techniques in Athletic Training) and ATHTR 202 (Pre-Professional Practicum in AT)
- recommendation by the La Roche Pre-professional Health Committee
- Documentation of current C.P.R. Certification (including adult, infant, and child CPR)
- completion of a physical examination and other health requirements
- recommendation of the Department of Athletic Training upon completion of a personal interview.

**Curriculum**

The pre-professional phase at La Roche College consists of 67 credits to be completed over a two-year period, with course requirements outlined below.

The professional phase at Duquesne University consists of 63 credits completed over an additional two-year period. Students in this program also have an option to pursue a joint degree program leading to a Master of Science in Education, a Master of Occupational Therapy, or a Master of Physician Assistant.

**To complete the Pre-Professional Phase at La Roche College the following coursework is required:**

- 37 credits of Major Requirements (includes 5 credits of Athletic Training courses taken as PCHE courses)
- 30 credits of Additional courses (see program guide for specific courses that will meet Duquesne requirements) This will include a Theology, Creative Arts, Global Diversity and Social Justice course, not listed below.
**Additional Requirements: 30 credits**

- College Writing I ENGL1011
- College Writing I-Lab ENGL1011L
- College Writing II ENGL1012
- Introduction to Philosophy PHIL1021
- Biomedical Ethics PHIL3027
- Introduction to Psychology PSYC1021

**Bioengineering- Pitt**

Dual Degree: Any Bachelor of Arts or Science degree from La Roche with Bachelor of Science in Engineering from University of Pittsburgh.

To successfully complete the terms of the articulation agreement, the following is required:

- must be enrolled at LRC for at least the past 2 years
- must have a QPA of 3.5 or higher at time of application to University of Pittsburgh engineering program
- must receive favorable recommendation from the combined degree program liaison at LRC
- must successfully complete all science and math pre-requisite course requirements for their intended engineering major with a grade of C or better and a GPA of 3.0 or better
  - Foundations: 46 credits
  - Mathematics: 13 credits
  - Chemistry: 4-8 credits
  - Biological Sciences: 16 credits
  - Engineering: 3 credits (taken at University of Pittsburgh)
  - Technical/ Professional electives: 3 credits (choose one course from the list below)

- must have completed the major requirements prescribed by their LRC program prior to commencing study at the University of Pittsburgh or have a written plan in place to show how these requirements will be met at the University of Pittsburgh

Electrical Engineering- Pitt

Dual Degree: Any Bachelor of Arts or Science Degree from La Roche with Bachelor of Science in Engineering from University of Pittsburgh.

To successfully complete the terms of the articulation agreement, the following is required:

• must be enrolled at LRC for at least the past 2 years

• must have a QPA of 3.0 or higher at time of application to University of Pittsburgh engineering program

• must receive favorable recommendation from the combined degree program liaison at LRC

• must successfully complete all science and math pre-requisite course requirements for their intended engineering major with a grade of C or better and a GPA of 3.0 or better
  • Foundations: 46 credits
  • Mathematics: 13 credits
  • Communications: 3 credits (choose one course from the list below)
  • Technical/ Professional Electives: 6 credits (choose two courses from the list below)
  • General Electives: 6 credits

• must have completed the major requirements prescribed by their LRC program prior to commencing study at the University of Pittsburgh or have a written plan in place to show how these requirements will be met at the University of Pittsburgh
To successfully complete the terms of the articulation agreement, the following is required:

- must be enrolled at LRC for at least the past 2 years
- must have a QPA of 3.0 or higher at time of application to University of Pittsburgh engineering program
- must receive favorable recommendation from the combined degree program liaison at LRC
- must successfully complete all science and math pre-requisite course requirements for their intended engineering major with a grade of C or better and a GPA of 3.0 or better
  - Foundations: 46 credits
  - Mathematics: 16 credits
  - Chemistry: 9-11 credits (choose 3 courses from the list below)
    - Engineering: 3 credits (taken at Pitt)

- must have completed the major requirements prescribed by their LRC program prior to commencing study at the University of Pittsburgh or have a written plan in place to show how these requirements will be met at the University of Pittsburgh

Occupational Therapy- Duquesne

The Occupational Therapy Profession

Occupations are the essence of productive living. Occupational therapists focus on the occupations used by people to live full, independent, quality lives. Occupations or activities of daily living include work or education, self-care, play/leisure and the effect that rest has on these activities. The goal of this profession is to maximize a person's ability to perform culturally appropriate daily occupations, which is an important value in today's healthcare system.

Occupational therapists work with persons to promote an individualized, self-determined balance of occupations throughout the lifespan. Occupational performance is developed and enhanced by treating the "whole person" and attending to physical, psychological, emotional, sociocultural and spiritual issues, as influenced by the environment.

Occupational therapy direct and indirect service delivery contexts are exceedingly diverse. They include but are not limited to acute care, industrial rehabilitation, physical rehabilitation, mental health, long-term care, home care, case management, consultation, school systems, early intervention, community services, education, disease prevention and health promotion. Important related concepts such as quality of life, production function, independent living, full access, social-political integration, multiculturalism, and balanced lifestyles are central to occupational therapy practice. As a result, graduates of this program must be able to evaluate emerging information, anticipate new practice opportunities, develop new knowledge, participate in research, guide professional decisions, cooperate effectively with a variety of groups, and serve as professional leaders and community advocates.

Employment and Career Opportunities

Opportunities for employment can be found in healthcare centers, public and private schools, rehabilitation centers, psychiatric institutions, skilled nursing facilities, private practices, community agencies, independent living centers, hospitals, home healthcare and industry. Occupational therapists are increasingly assuming supervisory, case management and community-based roles.
The La Roche College-Duquesne University Affiliation

In this program, students majoring in occupational therapy complete a pre-professional program at La Roche College (designed to take a minimum of two years), and then transfer to Duquesne University to complete their professional phase in occupational therapy (designed to take another three years). Students who successfully complete this program earn a Bachelor of Science (BS) in Health Sciences after year four, and a Master of Occupational Therapy (MOT) at the end of the program. Both degrees are awarded by Duquesne University.

Accreditation and Certification

Duquesne University's occupational therapy program is accredited by the Accreditation Council for Occupational Therapy Education.

Graduates of the Duquesne program will be eligible to sit for the national certification examination administered by the National Board for Certification in Occupational Therapy and, if successful, will be certified as an Occupational Therapist, Registered (OTR) and can apply for state licensure, if required.

Admission to the Occupational Therapy Program

Freshman admission:

All students admitted to La Roche College who intend to major in occupational therapy will be initially designated as "Occupational Therapy candidates". Occupational Therapy candidates will be automatically considered for full admission to the occupational therapy major upon completion of the second semester of courses at La Roche College.

Prospective students to the program must have earned a minimum SAT score (Verbal and Math) of 1100, or a minimum ACT score of 24. Prospective students must have earned a minimum high school GPA 3.0. The high school curriculum must have included at least seven units in Math and Science.

In addition, prospective students must demonstrate evidence of extracurricular activities during high school and knowledge of the occupational therapy profession as evidenced by 60 hours of documented shadowing experiences with a licensed occupational therapist. An additional 60 hours of shadowing or community service must also be completed. Ideally, at least 30 hours of these shadowing experiences ought to be completed prior to starting the freshman year. All 120 hours must be completed prior to admission to the professional phase.

The pre-professional phase is completed at La Roche College in two years. Students then apply to Duquesne University for the professional phase. The completion of the La Roche College phase requires taking a minimum of two courses at Duquesne University in the sophomore year and-summer courses. Students are expected to provide their own transportation. La Roche College is guaranteed an allotment of five students every year. In the event that more than five students have entered the program, only the top five will be allowed admission to Duquesne University. These students must have earned a minimum GPA of 3.0 overall, and a minimum GPA of 3.0 in Science/Math courses, with no course grade below a "C". Students must also be recommended by the pre-professional committee consisting of La Roche College Science faculty.

Transfer admission:

Students with prior college credits who are admitted as transfer students to La Roche College may express their intent to major in occupational therapy. Each student will be evaluated individually by the Coordinator of Health Science Programs.

Admission to Duquesne University

Through the Chairperson of the La Roche Pre-professional Health Committee, a La Roche occupational therapy major must submit a Duquesne University Application for Undergraduate Admissions by Dec 1st for consideration for the following fall semester at Duquesne, along with additional required documentation (which the student will be informed of during a health sciences orientation at La Roche College).
Curriculum

The pre-professional phase at La Roche College consists of 68 credits to be completed over a two-year period, with the required coursework below. The professional phase at Duquesne University consists of 112 credits completed over a three-year period.

To complete the Pre-Professional Phase at La Roche College the following coursework is required:

- 35 credits of Science and Math (includes 7 credits of Occupational Therapy courses taken as PCHE courses)
- 33 credits of Additional courses (see program guide for courses that will fulfill Duquesne requirements) This includes a Theology, Creative Arts, Global Diversity and Social Justice course, not listed below.

Additional Courses: 33 credits

- College Writing I
- College Writing I-Lab
- College Writing II
- General Elective
- Introduction to Philosophy
- Biomedical Ethics
- Introduction to Psychology

Physical Therapy - Duquesne

The Physical Therapy Profession

Physical therapy is a dynamic profession with an established theoretical base and widespread clinical applications in the preservation, development and restoration of optimal physical function throughout the lifespan. The American Physical Therapy Association (APTA) has published the following vision statement: By 2020, physical therapy will be provided by physical therapists who are doctors of physical therapy, recognized by consumers and other health care professionals as the practitioners of choice to whom consumers have direct access for the diagnosis of, interventions for and prevention of impairments, functional limitations and disabilities related to movement, function and health.

Physical therapists engage in an examination process that includes taking the history, conducting a review of body systems, and administering tests and measures to identify potential and existing functional problems. Physical therapists develop treatment programs and conduct re-examinations to achieve anticipated goals and outcomes. Charges for physical therapy

Earning a License to Practice.

Students must graduate from an accredited physical therapy program in order to be permitted to sit for state licensing examinations. Graduates generally take the state licensing examination in the state or jurisdiction in which they wish to practice and must pass the exam in order to receive a license. Graduation from a physical therapy program alone does not permit the graduate to practice and it is illegal to practice physical therapy without a license.
Employment and Career Opportunities

Graduates have opportunities to specialize in areas like: pediatrics, sports medicine, rheumatology, orthopedics, cardiopulmonary rehabilitation, critical care, geriatrics, rehabilitation, community education, home care, management, and teaching. Graduates are in demand and are hired into hospitals, skilled nursing facilities, rehabilitation centers, outpatient facilities, public schools, and some graduates start their own private practices.

The La Roche College-Duquesne University Affiliation

In this program, students majoring in physical therapy complete a pre-professional program at La Roche College (designed to take a minimum of three years), and then transfer to Duquesne University to complete their professional phase in physical therapy (designed to take another three years). Students who successfully complete this program earn a Bachelor of Science in biology from La Roche College after year four, and a Doctor of Physical Therapy (D.P.T.) from Duquesne University at the end of year six.

Admission to the Physical Therapy Program

Freshman admission

All students admitted to La Roche College who intend to major in physical therapy will be initially designated as "Physical Therapy candidates". Physical Therapy candidates will be automatically considered for full admission to the physical therapy major upon completion of the second semester of courses at La Roche College.

Prospective students to the program must have earned a minimum SAT score (Verbal and Math) of 1100, or a minimum ACT score of 24. Prospective students must have earned a minimum high school GPA of 3.0. The high school curriculum must have included seven units in Math and Science.

In addition, prospective students must demonstrate evidence of extracurricular activities during high school and knowledge of the Physical Therapy profession as evidenced by 100 hours of documented shadowing experiences with a licensed Physical Therapist in various clinical settings. Students complete the 100 credits of the pre-professional phase at La Roche College in three years, then students apply to Duquesne University for the professional phase. La Roche College is guaranteed an allotment of three students every year. In event that more than three students have entered the program, only the top three will be allowed admission to Duquesne University. These students must have earned a minimum GPA of 3.0 overall, and a minimum GPA of 3.0 in Science/Math courses, with no course grade below a "C". Students must also be recommended by the pre-professional committee consisting of La Roche College Science faculty.

Transfer admission

Students with prior college credits who are admitted as transfer students to La Roche College may express their intent to major in physical therapy. Each student will be evaluated individually by the Coordinator of Health Science Programs.

Admission to Duquesne University

Through the Chairperson of the La Roche Pre-professional Health Committee, a La Roche physical therapy major must submit a Duquesne University Application for Undergraduate Admissions by December 1st of the year prior to anticipated transfer to Duquesne, along with additional required documentation (which the student will be informed of during a health sciences orientation at La Roche College).

Academic requirements for admission to Duquesne University for the professional phase of the physical therapy program include:
- successful completion of all pre-professional course work with a 3.0 cumulative QPA at La Roche College, and a "C" or better in all courses
- recommendation by the La Roche Pre-professional Health Committee
- documentation of current C.P.R. Certification (including adult, infant, and child CPR)
- documentation of a minimum of 100 hours of volunteer, paid, or shadowing experience in physical therapy at two separate clinical sites
- completion of a physical examination and other health requirements

Curriculum

The pre-professional phase at La Roche College consists of 97 credits to be completed over a three-year period, in the coursework detailed below.

To complete the Pre-Professional Phase at La Roche College the following coursework is required:

- 66 credits of Physical Therapy Major Requirements (includes 1 credit "Introduction to Physical Therapy" course taken as a PCHE course)
- 31 credits of CORE Curriculum courses

Major Requirements: 66 credits

Physician Assistant Studies- Duquesne
The Physician Assistant Profession

Physician assistants are health professionals licensed who practice medicine in collaboration with physicians. Physician assistants are qualified by graduation from an accredited physician assistant educational program and certification by the National Commission on Certification of Physician Assistants. Within the physician/physician assistant relationship, physician assistants exercise autonomy in medical decision-making and provide a broad range of diagnostic and therapeutic services. The clinical role of physician assistants includes primary and specialty care in both medical and surgical practice settings. Physician assistant practice is centered on patient care but may also include educational, research and administrative activities.

Employment and Career Opportunities

Physician assistants are employed by hospitals, ambulatory care clinics, managed care organizations, the military and many other settings.

Career options for master-degreed physician assistants include opportunities in clinical roles in primary care and clinical subspecialties, teaching in physician assistant educational programs, administrative roles in healthcare delivery systems, and research.

The La Roche College-Duquesne University Affiliation

In this program, students majoring in physician assistant complete a pre-professional program at La Roche College (designed to take a minimum of two years), and then transfer to Duquesne University to complete their professional phase in physician assistant (designed to take another three years). Students who successfully complete this program earn a Bachelor of Science in Health Sciences after successful completion of year four, and a Master of Physician Assistant Studies degree upon completion of the program; both degrees are awarded from Duquesne University.

Accreditation and Certification

The Duquesne University program in physician assistant is accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP). Graduates of this program are eligible to sit for the Physician Assistant National Certifying Examination, administered by the National Commission on Certification of Physician Assistants.

Admission to the Physician Assistant Studies Program

Freshman admission: All students admitted to La Roche College who intend to major in Physician Assistant Studies will be initially designated as "Physician Assistant Studies candidates". Physician Assistant Studies candidates will be automatically considered for full admission to the Physician Assistant Studies major upon completion of the second semester of courses at La Roche College.

Prospective students to the program must have earned a minimum SAT score (Verbal and Math) of 1100, or a minimum ACT score of 24. Prospective students must have earned a minimum high school GPA of 3.0. The high school curriculum must have included at least seven units in Math and Science.

In addition, prospective students must demonstrate evidence of extracurricular activities during high school and knowledge of the Physician Assistant profession as evidenced by documented shadowing experiences with a Physician Assistant in various clinical settings. Students complete 63 credits in the pre-professional phase at La Roche College in two years, then apply to Duquesne University for the professional phase. La Roche College is guaranteed an allotment of two students every year. In the event that more than two students have entered the program, only the top two will be allowed admission to Duquesne University. These students must have earned a minimum GPA of 3.0 overall, and a minimum GPA of 3.0 in Science/Math courses, with no course grade below a "C". Students must also be recommended by the pre-professional committee consisting of La Roche College Science faculty.

Transfer Admission

Students with prior college credits who are admitted as transfer students to La Roche College may express their intent to major in physician assistant studies. Each student will be evaluated individually by the Coordinator of Health Science Programs.

Admission to Duquesne University
Through the Chairperson of the La Roche Pre-professional Health Committee, a La Roche physician assistant studies major must submit a Duquesne University Application for Undergraduate Admissions by December 1st for consideration for the following fall semester at Duquesne, along with additional required documentation (which the student will be informed of during a health sciences orientation at La Roche College).

Academic requirements for admission to Duquesne University for the professional phase of the physician assistant program include:

- successful completion of all pre-professional course work with a 3.0 cumulative QPA at La Roche College, and a "C" or better in all courses
- recommendation by the La Roche Pre-professional Health Committee
- documentation of current C.P.R. Certification (including adult, infant, and child CPR)
- completion of a physical examination and other health requirements.

To complete the Pre-Professional phase at La Roche College the following coursework is required:

- 30 credits of Science and Math
- 33 credits of additional courses to fulfill most of the Duquesne University core curriculum. This will also include a Theology, Creative Arts, Global Diversity adn Social Justice course selected by the student (see the program guide for courses that will fill this requirement).

### Pre-Dental LECOM
To successfully enter this program, the following conditions must be met:

- Minimum SAT $\geq 1170$, ACT $\geq 26$
- High School GPA $\geq 3.5$
- US Citizen or lawful permanent resident
- Current La Roche College student not meeting minimum SAT/ACT or HS GPA but meeting overall QPA and science QPA after 1st year are eligible to apply to LECOM
- Must apply to LECOM prior to starting their 3rd year

This is an Early Acceptance Program and is provisional. Phase I consists of pursuing a La Roche College major.

To successfully enter Phase II, the following pre-requisites (in conjunction with the requirements of another LRC major) are required:

- 33 credits of required courses (27 Science and 6 English)
- No grade lower than a C allowed in the courses listed
- No CLEP or P/F credits allowed
- AP scores of 4 or 5 may be accepted but a replacement course applicable to the field of dental medicine or a course of similar academic rigor must be taken instead
- Summer courses may not be taken unless required for sequential scheduling and must be approved by LECOM
- Up to 2 courses + labs may be taken at another institution but cannot reduce course load
- Minimum of 14 credits must be taken per semester and semester GPA $\geq 3.2$
- DAT required. No minimum score specified, but typically $\geq 18$
- 100 hours of job shadowing in a dental setting is recommended

In addition, students must attend a minimum of 2 consecutive years at La Roche College. All students completing Phase I must be approved by the Pre-Professional faculty committee to enter Phase II. There are only 5 seats available each year. LECOM School of Dental Medicine is located in Erie, PA. Students apply using AADSAS application process.
Pre-Osteopathic Medicine LECOM

To successfully enter this program, the following conditions must be met:

- Minimum SAT >= 1170, ACT >= 26
- High School GPA >= 3.5
- US Citizen or lawful permanent resident
- Current La Roche College student not meeting minimum SAT/ACT or HS GPA but meeting overall QPA and science QPA after 1st year are eligible to apply to LECOM
- Must apply to LECOM prior to start of 2nd year for 3+4 track and 3rd year for 4+4 track

This is an Early Acceptance Program and is provisional. Phase I consists of pursuing a La Roche College major. There are two tracks for Phase I: a 3+4 and 4+4. Students in the 3+4 track only spend 3 years in Phase I and must complete at least 75% of their LRC major and have in place a plan for transferring back LECOM medical courses to complete their major prior to entering Phase II.

To successfully enter Phase II, the following pre-requisites (in conjunction with the requirements of another LRC major) are required:

- 44 credits (32 Science and 12 Humanities)
- No grade lower than a C allowed in the courses listed
• No CLEP or P/F credits allowed

• AP scores of 4 or 5 may be accepted for English and Behavioral science courses only, but a replacement course applicable to the field of medicine or course of similar academic rigor must be taken instead

• Summer courses may not be taken unless required for sequential scheduling and must be approved by LECOM

• Up to 2 courses + labs may be taken at another institution but cannot reduce course load

• Minimum course load of 14 credits must be taken per semester and semester GPA>=3.0 to remain in program

• Minimum overall QPA>=3.4 and minimum science QPA>=3.2

• MCAT is required, minimum score is TBD

• Shadowing a DO (Doctor of Osteopathic Medicine) is highly recommended

In addition, students must attend a minimum of 2 consecutive years at LRC. All students completing Phase I must be approved by the Pre-Professional faculty committee to enter Phase II. There are only 5 seats available each year. LECOM has 2 campuses for Phase II: Erie, PA (including Seton Hill, Greensburg) and Bradenton, FL. Students apply to either but not both using AAMCAS application.

Pre-Pharmacy LECOM

To successfully enter this program, the following conditions must be met:

• Minimum SAT>=1170, ACT>=26 (students in 3+ track without SAT/ACT scores must take PCAT)

• High School GPA>=3.5

• US Citizen or lawful permanent resident

• Current La Roche College student not meeting minimum SAT/ACT or HS GPA but meeting overall QPA and science QPA after 1st year are eligible to apply to LECOM

• Must apply to LECOM prior to start of 2nd year for 3+ track and 3rd year for 4+ track
This is an Early Acceptance Program and is provisional. Phase I consists of pursuing a La Roche College major. There are two tracks for Phase I: a 3+ and 4+. Students in the 3+ track only spend 3 years in Phase I and must complete at least 75% of their LRC major and have in place a plan for transferring back LECOM Pharmacy courses to complete their major prior to entering Phase II.

To successfully enter Phase II, the following pre-requisites (in conjunction with the requirements of another LRC major) are required:

- 62 credits (35 Science, 12 Humanities, and 15 General Electives)
- No grade lower than a C allowed in the courses listed
- No CLEP or P/F credits allowed
- AP scores of 4 or 5 may be accepted but a replacement course applicable to the field of Pharmacy or a course of similar academic rigor must be taken instead
- Summer courses may not be taken unless required for sequential scheduling and must be approved by LECOM
- Up to 2 courses + labs may be taken at another institution but cannot reduce course load
- Minimum course load of 14 credits must be taken per semester and semester GPA >=3.0 to remain in the program
- Minimum overall QPA >=3.4 and minimum science QPA >=3.2
- PCAT is optional but highly recommended. If taken, scores must be reported.

In addition, students must attend a minimum of 2 consecutive years at La Roche College. All students completing Phase I must be approved by the Pre-Professional faculty committee to enter Phase II. There are only 5 seats available each year. LECOM has 2 campuses for Phase II: Erie, PA (3 year program) and Bradenton, FL (4 year program). Students apply to either but not both using the PharmCAS application process.

Software Engineering- Gannon
The Software Engineering program is a dual degree program with Gannon University. Students will earn a degree in their chosen major at La Roche College along with a Bachelor of Science in Engineering from Gannon University.

To successfully complete the terms of the dual degree articulation agreement, the following is required:

- Must combine the requirements of this guide with a LRC major
- Must achieve an overall QPA of 3.0 or higher at time of articulation to Gannon University engineering program
- Must successfully complete all math, physics and computer science pre-requisite courses listed in this guide with a C grade or better and a GPA of 3.0 or better
- Must receive favorable recommendation from the LRC sciences faculty committee and Dean of Students to insure that all academic and conduct standards are met

### Courses

- Programming I: CSCI1010
- Programming I-Lab: CSCI1010L
- Programming II: CSCI2010
- Programming II-Lab: CSCI2010L
- Systems Programming: CSCI2025
- Systems Programming-Lab: CSCI2025L
- Analytic Geometry & Calculus I: MATH1032
- Analytic Geometry & Calculus II: MATH1033
- Analytic Geometry & Calculus III: MATH2030
- Discrete Mathematics I: MATH1032
- Probability & Statistics I: MATH2050
- Logic: PHIL1020
- Introduction to Philosophy: PHIL1021
- Ethics: PHIL2026
- Physics I: PHYS1032
- Physics I-Lab: PHYS1032L
- Physics II: PHYS1033
- Physics II-Lab: PHYS1033L
- New Testament: RELS1002
- World Religions: RELS1003
- History of the World: SLHS1003

### Speech-Language Pathology - Duquesne

#### The Speech-Language Pathology Profession

Speech and language disorders affect the way people talk and understand. These disorders may range from simple sound substitutions to not being able to use speech and language at all. Speech-language pathologists are specialists in human communication, its development, and its disorders. They are professionally educated to evaluate and treat persons with communication problems.

Speech-language pathologists provide many specialized professional services which include:

- helping people with articulation disorders learn proper production of speech sound;
- assisting people who stutter to increase the amount of fluent speech and to cope with this disorder;
- assisting people with aphasia to re-learn language and speech skills and sentence order to compensate for lost language and speech skills;
• counseling people with speech and language disorders and their families to understand their disorder to achieve normal communication in
education, social and vocational settings; and

• helping people understand the types and severity of communication disorders.

**Employment and Career Opportunities**

Speech-language pathologists are employed by public and private schools, hospitals, rehabilitation centers, nursing care facilities, community clinics, colleges and universities, private offices, state and local health departments, state and federal governmental agencies.

Career growth options are in specialty practice areas in gerontology and pediatrics, university instruction, program administration, and consulting.

**The La Roche College-Duquesne University Affiliation**

In this program, students majoring in speech-language pathology complete a pre-professional program at La Roche College (designed to take a minimum of four semesters), and then transfer to Duquesne University to complete their professional phase in speech-language pathology (designed to take another three half years). Students who successfully complete this program earn a Bachelor of Science in Health Sciences after successful completion of year four, and a Master of Speech-Language Pathology degree upon completion of the program; both degrees are awarded from Duquesne University.

Graduates of this program are eligible to sit for the certification examination leading to a Certificate of Clinical Competence (CCC) from the American Speech-Language-Hearing Association. In many states a license is also required. Specialized teacher certification may be required to work in public schools.

**Admission to the Speech-Language Pathology Program**

**Freshman Admission:**

All students admitted to La Roche College who intend to major in Speech-Language Pathology will be initially designated as "Speech-Language Pathology candidates". Speech-Language Pathology candidates will be automatically considered for full admission to the Speech-Language Pathology major upon completion of the second semester of courses at La Roche College.

Prospective students to the program must have earned a minimum SAT score (Verbal and Math) of 1100, or a minimum ACT score of 24. Prospective students must have earned a minimum high school GPA of 3.0 The high school curriculum must have included at least:

• 4 Units of English
• 1 Unit in Social Studies or Foreign Language
• 7 Units in Math and Science
• 4 Electives
In addition, prospective students must demonstrate evidence of extracurricular activities during high school. The pre-professional phase is completed at La Roche College in two years. The completion of the La Roche College phase requires taking a minimum of two courses at Duquesne University. Students are expected to provide their own transportation. Students then apply to Duquesne University for the professional phase. La Roche College is guaranteed an allotment of three students every year. In event that more than three students have entered the program, only the top three will be allowed admission to Duquesne University. These students must have earned a minimum GPA of 3.0 overall, and a minimum GPA of 3.0 in Science/Math courses, with no course grade below a "C". Students must also be recommended by the pre-professional committee consisting of La Roche College Science faculty.

Transfer Admission:

Students with prior college credits who are admitted as transfer students to La Roche College may express their intent to major in speech-language pathology. Each student will be evaluated individually by the Coordinator of Health Science Programs.

Admission to Duquesne University

Through the Chairperson of the La Roche Pre-professional Health Committee, a La Roche speech-language pathology major must submit a Duquesne University Application for Undergraduate Admissions by December 1st for consideration for the following fall semester at Duquesne, along with additional required documentation (which the student will be informed of during a health sciences orientation at La Roche College).

Academic requirements for admission to Duquesne University for the professional phase of the speech-language pathology program include:

- successful completion of all pre-professional course work with a 3.0 cumulative QPA at La Roche College, and a "C" or better in all courses
- recommendation by the La Roche Pre-professional Health Committee
- documentation of current C.P.R. Certification (including adult, infant, and child CPR)
- completion of a physical examination and other health requirements

Curriculum

To complete the Pre-Professional phase the following coursework is required:

- 28 credits of Science and Math courses
- 6 credits of Speech Language Pathology courses to be taken at Duquesne University
- 30 additional credits designed to fulfill most of Duquesne Core Curriculum. This will include a Theology and Global Diversity course to be selected by the student (see program guide for courses that will fill this requirement).

Additional Courses: 30 credits

Today's nurse anesthetists need advanced theoretical knowledge and extensive clinical experience to meet the critical demands of their profession. La Roche College's graduate program in health science offers an integrated approach to nurse anesthesia education: a valuable blend of theoretical classroom learning and clinical practice and research that's geared to a complex and rapidly changing field.

Baccalaureate-prepared registered nurses pursuing a master's degree full-time combine theoretical course work at La Roche College with clinical-based education and practicum at Allegheny School of Anesthesia (ASOA), located at Allegheny General Hospital, a Level I Trauma Center.

Current Certified Registered Nurse Anesthetists (CRNA) can supplement their clinical expertise and earn advanced degrees with part-time, graduate-level study.

By developing a broad base of knowledge in the biophysical sciences, both non-CRNA and CRNA students can gain the expertise necessary for comprehensive anesthesia management of patients. You'll learn to develop management strategies for patients of various age groups with different co-existing disease processes by applying the theoretical concepts studied in the classroom. You'll also develop the research skills necessary to solve complex problems on the job, and to evaluate current anesthesia literature. Development of leadership skills essential for managing patients within a multidisciplinary framework is an essential component of our program.

La Roche College has been a leader in nurse anesthesia education for over 25 years. After a decade of offering a bachelor's degree in the field, the College moved its curriculum to the graduate level in 1987, following a mandate by the American Association of Nurse Anesthetists (AANA) that anesthesia education be offered at the graduate level by the late 1990s.

The strong reputations of La Roche College's health science program and Pittsburgh's health care arena have attracted students from across the country and around the world to pursue advanced specialty education in nurse anesthesia. In turn, health science graduates are highly sought for positions nationwide.

One of the program's greatest strengths is its faculty. Dedicated, full-time professors hold doctorates and are recognized in their areas of expertise. Experienced adjunct faculty are highly respected professionals from La Roche College's affiliated school of anesthesia and Pittsburgh's health care community. Together, they provide a unique blend of theory and practical application leading to a challenging education that prepares qualified nurses to meet the changing demands of the anesthesia profession.
Graduate Health Science Curriculum

The graduate program in nurse anesthesia is a 24 month format, consisting of two parts: a La Roche College portion, and a clinical-based portion taught at ASOA. A student seeking to become a CRNA must complete both parts of the curriculum successfully in order to be granted the Master of Science in Health Science from La Roche College. Students who already possess the CRNA credential (but wish to earn the Master's degree) are required to complete only the La Roche College portion of the curriculum.

The graduate program is a full-time program. Incoming students officially begin in the fall semester, and take five consecutive semesters of courses at La Roche College. For first year students, La Roche courses are taught on Thursdays and Fridays, and professional preparation in the hospital is scheduled on Mondays, Tuesdays, and Wednesdays. Summer session classes at the end of year one are offered during the late afternoon and early evening. For second year students, the La Roche courses are taught on Mondays, with clinical work scheduled for the remainder of the week. The remaining time is spent entirely at the program's affiliated clinical sites: Allegheny General Hospital, The Western Pennsylvania Hospital, Forbes Regional Hospital, Alle-Kiski Medical Center, Butler Memorial Hospital, Passavant Hospital, Sewickley Valley Hospital, St. Clair Memorial Hospital and The Beaver Medical Center, and Wheeling Hospital.

The La Roche College portion of the graduate program consists of three components:

- The first component provides students with a broad base of knowledge in the biophysical sciences, through which they can develop expertise in the anesthesia management of patients in the perioperative, resuscitative and ventilatory support phases of care. This part of the curriculum includes courses in anatomy, physiology, pathophysiology; organic, medicinal and biological chemistry; pharmacology; and medical physics.

- The second component is designed to introduce students to the methodology of research including the nature of scientific thinking, selection of research techniques, analysis and interpretation of data and formulations of conclusions. As part of this component, students are required to design and present a project in anesthesia education or anesthesia research. The goal of the research component is to establish the critical thinking skills needed to evaluate medical research and to provide an understanding of research methodology. Students also have the option of writing and defending a Master's thesis.

- The third component consists of advanced theory courses in anesthesia. Students are presented with principles and techniques involved in anesthesia management of patients of varying ages and health conditions.

Curriculum Goals and Objectives:

- to prepare practitioners in the area of anesthesia
- to develop nurse anesthetists as consumers of and contributors to anesthesia research
- to prepare nurse anesthetists to serve as leaders, educators and role models in anesthesia and health care delivery systems
- to prepare specialists who are able to facilitate managerial improvement in the delivery of anesthesia service
- to provide nurse anesthesia students with a sound foundation for entry into doctoral study.

Upon completion of the master's level nurse anesthesia program, the students will be able to:

- demonstrate in-depth knowledge of the fundamental sciences to ensure greater competence in anesthesia practice, as well as teaching in a nurse anesthesia program
- engage in collateral reading in anatomy, physiology, chemistry, pharmacology, and clinical subjects related to the field of anesthesia
- conduct research and evaluate current literature in order to initiate and provide improved anesthesia and acute patient care
• assume a leadership role in collaboration with health care team members and serve as a role model for future health care providers
• function as a resource person for nursing staff/other learners
• apply principles of research to the clinical anesthesia setting
• design, implement, evaluate and revise an anesthetic care plan for assigned patients
• utilize appropriate scientific principles related to asepsis, anesthesia and respiratory techniques
• apply knowledge of nursing theories and models in advanced nursing and specialty areas of nurse anesthesia practice.

Course Sequence

The La Roche College requirements include 49 credits of courses, taken in the sequence shown below.

Note: courses in the summer of Year One are offered in six-week blocks. HSCG5012 is scheduled in session 6A (the first block) and HSCG5010 follows in the second block (session 6B).

In addition, all students are required to register for two additional 6-credit courses which are taught at Allegheny School of Anesthesia: HSCG5030 (Anesthesia Didactics I) and HSCG6030 (Anesthesia Didactics II).

Students at Allegheny School of Anesthesia take HSCG5030 (Didactics I) in Year One and HSCG6030 (Didactics II) in Year Two

The total credits for this graduate program, including HSCG5030 and 6030, is 49.

Note: students who already possess the CRNA credential are exempt from taking HSCG5030, 6030 and 6055. Your total credit requirement for the Master of Science degree is 33.

Course Descriptions

Detail
ACCT1001
ACCOUNTING CONCEPTS
Credits (Min/Max): 3/3
This course introduces the student to financial and management accounting in a business setting. Course materials are specifically designed to provide the non-Business major with a generalist's understanding of accounting procedures and principles and how those procedures and principles affect organizational operations and management planning. Topics include accounts and financial statements, evaluating operations, inventory systems, receivables, and depreciation methods. For NON-Business Majors Only

ACCT2003
ACCOUNTING I
Credits (Min/Max): 3/3
An introduction to accounting principles and bookkeeping methods, including the theory of debit and credit, financial statements and adjusting and closing entries. Topics also covered include: accounting for merchandising operations including inventory systems and cost flow assumption, internal control systems, bank reconciliations, and receivables.

ACCT2004
ACCOUNTING II
Credits (Min/Max): 3/3
This second semester of accounting principles emphasizes the analysis and use of equity accounts and the interpretation of financial information. Topics covered include short-term liabilities, the statement of cash flows, partnerships, corporate transactions, and long-term assets.
PreRequisites: ACCT2003 - ACCOUNTING I

ACCT2013
MANAGERIAL ACCOUNTING
Credits (Min/Max): 3/3
A study of a manager's use of financial reports and data in the controlling function. Analysis of financial statements, use of budgets and budgeting techniques for operations, and capital acquisitions will be treated. Costing methods will be explored.
PreRequisites: ACCT2003 - ACCOUNTING I

ACCT2025
ACCOUNTING WITH COMPUTERS
Credits (Min/Max): 3/3
This course provides hands-on experience of the integration of computers into the accounting field. The student will work through a complete accounting cycle using a full-featured commercial accounting software package. Other topics include sales and receivables, inventory, plant assets and depreciation, payables, payroll, and job costing. Emphasis will be placed on the preparation of accounting information and its subsequent uses, as well as the instruction of advanced skills needed to use spreadsheet software to prepare schedules commonly found in an accounting environment.
PreRequisites: ACCT2004 - ACCOUNTING II

ACCT3001
TAXATION I
Credits (Min/Max): 3/3
A study of the basic principles of federal taxation of individuals. Areas studied include types of returns, includable and excludable income, expense deductions, inventory methods, depreciation methods and accounting methods.
PreRequisites: ACCT2004 - ACCOUNTING II

ACCT3002
TAXATION II
Credits (Min/Max): 3/3
An advanced course expanding on the principles of tax law learned in Taxation I to include taxation of corporations, estates and trusts, partnerships, limited partnerships and foreign operations of various entities. Tax planning and research methodology are emphasized as solutions to complex tax questions arising from topical discussions.
PreRequisites: ACCT2004 - ACCOUNTING II

ACCT3011
INTERMEDIATE ACCOUNTING I
Credits (Min/Max): 3/3
A comprehensive study of accounting theory and practice related to cash, revenue recognition, receivables, inventories and long-lived assets. Students examine the nature, composition, valuation and balance sheet classification of these items.
ACCT3012
INTERMEDIATE ACCOUNTING II
Credits (Min/Max): 3/3
The second semester of intermediate accounting deals with accounting theory and practice related to intangibles, bonds, partnerships, corporations and the statement of cash flows. Discussion and applied practice supplement the study of the nature, composition, valuation and balance sheet classification of these items.
PreRequisites: ACCT2004 - ACCOUNTING II

ACCT3014
COST ACCOUNTING
Credits (Min/Max): 3/3
A continuation of the study of cost accounting theory and practice through its application to such advanced level topics as budgeting, standard costing, direct costing, variable costing and absorption costing, cost/profit volume analysis and strategic planning programs.
PreRequisites: ACCT2013 - MANAGERIAL ACCOUNTING

ACCT4001
ADVANCED ACCOUNTING
Credits (Min/Max): 3/3
An examination of current generally accepted accounting principles as they relate to special areas including business combinations, governmental, not-for-profit organizations and foreign currency conversion. All topics are presented from the prospective of the CPA Exam.
PreRequisites: ACCT3012 - INTERMEDIATE ACCT. II

ACCT4002
AUDITING
Credits (Min/Max): 3/3
This course provides a thorough knowledge of auditing through the application of auditing principles and an understanding of auditing standards.
PreRequisites: ACCT3012 - INTERMEDIATE ACCT. II

ACCT4040
SPECIAL TOPICS IN ACCOUNTING
Credits (Min/Max): 3/3
A customized study of selected topics in the field of accounting. Students will be guided by a department faculty member to acquaint them with current issues in the profession.

ACCT4051
ACCOUNTING-INTERNSHIP I
Credits (Min/Max): 1/6
A field experience in an accounting position, supervised by field instructor as well as college faculty. The internship is designed to increase understanding of accounting and the accounting-related issues and perspectives as they relate to the business and social environment.

ACCT4052
ACCOUNTING-INTERNSHIP II
Credits (Min/Max): 1/3
A field experience in an accounting position, supervised by field instructor as well as college faculty. The internship is designed to increase understanding of accounting and the accounting-related issues and perspectives as they relate to the business and social environment.

ACCT4057
ACCOUNTING-INDEPENDENT STUDY
Credits (Min/Max): 1/3
The independent study is intended to give an opportunity to students with superior ability to pursue an area of study in accounting that is very specific in focus and/or not covered in existing offerings.

ACCT5020
ETHICS & PROFESSIONAL RESPONSIBILITIES IN ACCOUNTING
Credits (Min/Max): 3/3
This course addresses the accountant's ethical and professional responsibilities when dealing with clients, perspective clients, field work, fellow employees, and within society itself. The student will be presented with numerous situations or case studies where an individual's ethical standards are challenged. Also addressed in the course is how a business's work environment can affect the ethical decision making of its employees.
ACCT5035
MODERN ACCOUNTING INFORMATION SYSTEMS
Credits (Min/Max): 3/3
This course examines the risk and control issues specific to the use of information systems in an organization and how these issues affect presentations on the financial statements. Students will analyze and evaluate accounting information systems that support business processes as well as management control and decision-making. Students will learn to determine and document user requirements, communicate results, and support decision-making. Also, students will develop the ability to identify key issues, analyze information, and formulate appropriate and feasible recommendations in regard to accounting information systems.

ACCT5040
THE BUSINESS OF READING & WRITING
Credits (Min/Max): 3/3
This course introduces the student to writings from books and journals that will impact the manner in which students perceive their careers, supervisors, and subordinates. While many of the readings are authored by people from the business world, writings from other fields relevant to the course topics may be used.

ACCT5050
FRAUD EXAMINATION
Credits (Min/Max): 3/3
This course highlights controls that prevent fraud and abuse, explores the most common asset theft fraud schemes and teaches the skills needed to determine if inappropriate actions have occurred. It explores the prevailing theories of criminal behavior related to white collar crime, as well as the basics of the regulatory, criminal justice and civil justice systems, relevant federal and state statutes and regulations related to fraud. It also covers fraud prevention and investigation tools related to asset misappropriation.

ACCT6020
ADVANCED FORENSIC ACCOUNTING
Credits (Min/Max): 3/3
This course focuses on detailed financial analysis of various corporate reports to determine if unusual trends appear. Bank fraud, money laundering and bankruptcy proceedings will be studied. Students will study the provisions of the Sarbanes-Oxley Act and distinguish the procedures of fraud investigation from the regular auditing process. This course would be intended to provide students with extended practical guidance and enhance an auditor's abilities to recognize, prevent, and detect financial frauds in organizations. Through case studies, this course will increase students' knowledge about fraud and help students develop the skills to conduct fraud investigations.

ACCT6050
WEALTH MANAGEMENT
Credits (Min/Max): 3/3
Wealth management is an investment advisory discipline that incorporates financial planning, investment portfolio management and a number of aggregated financial services. Wealthy individuals, small business owners, and families who desire the assistance of a credentialed financial advisory specialist call upon wealth managers to coordinate retail banking, estate planning, legal resources, tax professionals and investment management. This course introduces the student these areas of asset management by identifying various strategies and practices that best fit the aforementioned groups who need the skills of a professional financial manager.

ACCT6060
ACCOUNTING FOR NOT-FOR-PROFIT ENTITIES
Credits (Min/Max): 3/3
This course will cover aspects of accounting that are unique to governmental and not-for-profit organizations. Financial reporting for state and local governments will be covered along with accounting for non-profit entities conducting business-type activities. In addition, regulatory, taxation and performance issues will be discussed. Reference is made to pronouncements of the AICPA, FASB, GASB and other authoritative sources.

ACCT6080
CONTEMPORARY ISSUES IN TAXATION
Credits (Min/Max): 3/3
This course will enlighten the student about current tax topics being discussed in Congress or in the court system. An additional focus will be tax planning and compliance.

ACCT6085
INTERNATIONAL ACCOUNTING
Credits (Min/Max): 3/3
This course examines major international dimensions of financial accounting. Discussion will ensue in regard to national and cultural influences on accounting and on the accounting profession. This course investigates financial regulation and varying financial reporting standards in selected foreign countries. It also introduces students to managerial accounting issues raised by international businesses. Analysis and use of the International Accounting Standards are the focus. This course will enable students to acquire skills and perspectives for dealing with international accounting and business issues.
ACCT6099
APPLIED RESEARCH
Credits (Min/Max): 3/3
This course requires the masters students to apply their knowledge to a field work assignment assisting a business or businesses in solving accounting problems that the company is experiencing. Students will identify the organizations for their project and have them approved by the instructor. Their efforts will culminate in a written report and class presentation outlining the issues identified and the steps taken to solve each problem.

ADMG1001
INTRO TO ADMINISTRATION & MANAGEMENT
Credits (Min/Max): 3/3
An introduction to the field of administration and management, focusing specifically on the area of business administration. The functional areas of business such as marketing, finance, personnel and production will be reviewed together with subjects such as economics, accounting and computers. This course is for non-business majors only.

ADMG1005
MACROECONOMICS
Credits (Min/Max): 3/3
An introductory economics course focusing on the field of macroeconomics, including government spending, money, inflation, unemployment and taxes. Also included are brief sections on microeconomic and economic systems.

ADMG1006
MICROECONOMICS
Credits (Min/Max): 3/3
An introductory economics course focusing on the field of microeconomics. Price, cost and production theory are covered in relation to competitive, monopolistic and oligopolistic industry structure. The field of labor economics is treated in some detail. Some advanced macroeconomics topics are also covered.

ADMG1018
FUNDAMENTALS OF MANAGEMENT
Credits (Min/Max): 3/3
An introduction to the three major schools of management thought: the classical, the behavioral and the management science schools. The major emphasis is on the fundamentals of each school of thought and also on the integrative approach to management, drawing on the systems and contingency approaches.

ADMG2007
ADVERTISING & PUBLIC RELATIONS (MRKT2007)
Credits (Min/Max): 3/3
A comprehensive study of advertising, detailing its relationship to marketing practice. Topics such as advertising preparation, media evaluation, market research, pricing and retailing problems are included. The role of public relations in an organizational communication program is also explained. Cross-listed with MRKT2007

ADMG2009
BUSINESS LAW I
Credits (Min/Max): 3/3
This course is an introduction to law and legal procedure. Contracts, their nature and requisites formation, operations, interpretation, discharge and remedies are discussed.

ADMG2010
BUSINESS LAW II
Credits (Min/Max): 3/3
Study of sales: Article 2 of the Uniform Commercial Code, transfer of title, warranties, rights and remedies of buyer and seller; Commercial paper; Article 3 of the Uniform Commercial Code and Article 4 of the Uniform Commercial Code: Bank Deposits.
PreRequisites: ADMG2009 - BUSINESS LAW I

ADMG2018
ORGANIZATIONAL BEHAVIOR
Credits (Min/Max): 3/3
This course provides an in-depth examination of organizational behavior from a macro-perspective. This course includes a review of the research on organizational structure, technology and the environment, as well as their relationship and the implications for effective organizational design. Also included in the course are discussions of organizational goals and effectiveness, organizational culture, organizational conflict and politics, and alternative organizational structure in the U.S. and abroad.
ADMG2021
MARKETING MANAGEMENT (MRKT2021)
Credits (Min/Max): 3/3
A basic study of marketing systems in the American economy. This course includes, identifying the activities involved in the flow of goods among manufacturers, brokers, wholesalers, retailers and consumers. The nature of demand, buyer behavior, costs and pricing, sales strategies, promotions and techniques are presented. Cross-listed with MRKT2021

ADMG2025
HUMAN RESOURCES ADMINISTRATION
Credits (Min/Max): 3/3
A study of the basics of human resources management including planning, recruitment selection, motivation and performance appraisal. Also treated are salary benefits systems and an introduction to EEOC and OSHA law.

ADMG2040
INNOVATION & ENTREPRENEURSHIP
Credits (Min/Max): 3/3
This course will focus on the entrepreneurial process-from ideation to the implementation of a new business venture. Will concentrate on the behavioral aspects of entrepreneurs, the identification and assessment of opportunities and the marshalling of resources and skills necessary to implement the identified opportunity.

ADMG3003
INTERNATIONAL POLITICAL ECONOMY (INST3003)
Credits (Min/Max): 3/3
An overview of the major theories of international political economy. Topics include the increasingly important role of global factors in the American economy, the international financial environment, international trade relations and economic development. Cross-listed with INST3003
PreRequisites: ADMG1005 - MACROECONOMICS

ADMG3008
BUSINESS & SOCIETY
Credits (Min/Max): 3/3
This policy-oriented course provides discussion and analysis of current issues and problems of an environmental nature confronting private corporate enterprise. Major areas analyzed are comparative economic systems, the political process, corporate social responsibility, the legal environment, human value systems and the person in management.

ADMG3010
BUSINESS ORGANIZATION & REGULATION
Credits (Min/Max): 3/3
This course studies the concepts of Unincorporated Business Association and Corporations. It also provides an overview of the issues relating to the Regulation of Business.
PreRequisites: ADMG2009 - BUSINESS LAW I

ADMG3015
PROJECT MANAGEMENT
Credits (Min/Max): 3/3
This course presents a comprehensive introduction to Project Management. The task of managing projects and the challenges facing project workers are examined in the context of new realities, requirements, opportunities and problems developing in the business environment. In addition to the traditional concerns of project management involving time, budget and specifications management, quality management, contract/procurement management and communication management as they affect the management of projects in the modern work place.

ADMG3024
PROFESSIONAL PRESENTATION
Credits (Min/Max): 3/3
This course is designed to provide students in the professional areas with training in preparing and giving professional presentations. Students will develop skills in audience/client assessment, research, presentation design and development, using presentation tools and presentation evaluation.

ADMG4019
SPORTS ADMINISTRATION & MANAGEMENT (MRKT4019)
Credits (Min/Max): 3/3
This course will provide a comprehensive, current and concise introduction to sports management and administration principles and practices. Functional overviews of industry skills are presented and exposure to organizational theory, law and sports governance, facilities and venues, sports marketing, ethical applications, broadcasting, sales, event management, agency, advertising, sponsorship, international sport, collegiate and amateur sport will be addressed in detail. Cross-listed with MRKT4019

ADMG4020
OPERATIONS MANAGEMENT
Credits (Min/Max): 3/3
Study is given to the basic operations, functions and procedures. An analytical approach is utilized with emphasis on problem solving. Modern management science techniques such as linear programming, PERT and inventory control models are presented.

ADMG4036
ORGANIZATION THEORY
Credits (Min/Max): 3/3
This course is intended to provide the graduating administration and management student with a forum for exploring and comparing different theoretical approaches to the organizational aspects of modern institutions, both public and private. The participant would have the opportunity to acquire an understanding of the different ways in which organization theory is approached by scholars in different disciplines, i.e., sociologists, political scientists and public and business administrators.

ADMG4040
BUSINESS ETHICS: TOPICS & ISSUES IN A&M
Credits (Min/Max): 3/3
This course will provide an in-depth examination of selected topics and issues in the field of administration and management. Topics to be examined on a rotating basis to include: ethics in business, history of business, government regulation and business, theory and process of decision-making and current issues in human resource management.

ADMG4051
ADMINIST & MGMT-INTERNSHIP I
Credits (Min/Max): 1/6
A field experience in an administrative or managerial position, supervised by a field instructor as well as college faculty.

ADMG4052
ADMINIS & MGMT-INTERNSHIP II
Credits (Min/Max): 1/3
A field experience in an administrative or managerial position, supervised by a field instructor as well as college faculty.

ADMG4055
SEMINAR-BUSINESS POLICY
Credits (Min/Max): 3/3
An intensive culmination and synthesis of the study of administration and management consisting of readings, case study and class discussion. The primary emphasis is on the development of the skills of strategic analysis from the viewpoint of the general manager.

ADMG4057
ADMINISTRATIVE & MANAGEMENT- INDEPENDENT STUDY
Credits (Min/Max): 1/3
Independent study is intended to allow a student to pursue studies in advanced or special topics.

ARTH1017
HISTORY OF ART I: PREHISTORIC TO GOTHIC
Credits (Min/Max): 3/3
A survey of world art from prehistoric to late Gothic eras as well as an examination of the interaction of the social, political and economic forces that effected the production and appearance of such arts as painting, sculpture, architecture and the minor arts. Lectures, slides, discussion and field trips are utilized.

ARTH1018
HISTORY OF ART II: RENAISSANCE TO MODERN
Credits (Min/Max): 3/3
This course will provide a survey of world art from early Renaissance to the present day. Emphasis is on cause and effect in the various historical and technological developments of art. Lecture, discussion, slides, film strips and field trips are part of the course.

ARTH2002
HISTORY OF GRAPHIC DESIGN
Credits (Min/Max): 3/3
A survey of the history of graphic design from the invention of writing to the twentieth century. Emphasis will be given to the evolution of graphic communication and will include the origins of printing and typography. The impact of the industry on visual communication and the development of modern graphic design will also be presented.

ARTH3016
HISTORY OF FILM (GCDN3016)
Credits (Min/Max): 3/3
The course attempts to make the student more aware of the medium as well as its place in the development of our culture. While the approach is historical, emphasis is placed upon development of the student's visual literacy. Additionally, important topics such as censorship and film propaganda are discussed. Cross-listed with GCDN3016

ARTH3020
HISTORY OF CONTEMPORARY ART
Credits (Min/Max): 3/3
A survey of modern art from the 19th century to the present day. This course explores the revolutionary forms, methods and media invented by contemporary artists to continually defy our expectations of what art should be.

BIOL1000
LIFE SCIENCE-LAB
Credits (Min/Max): 1/1
The laboratory course will conduct experiments that demonstrate the underlying principles associated with topics presented in BIOL1001, Life Science. This course is designed for students majoring in Radiologic Technology, or consent of instructor and is not open to science majors.

BIOL1001
LIFE SCIENCE (SLSC1011)
Credits (Min/Max): 3/3
An introductory course directed toward the development of an answer to the question: What is life? The course explores various life processes and the human person's position in the total scheme. Emphasis is placed on current scientific discoveries. This course is not open to science majors. Cross-listed with SLSC1011

BIOL1002
INTRO TO THE HUMAN BODY: SYSTEMS THAT MOVE YOU
Credits (Min/Max): 3/3
This course will explore the basic concepts of human anatomy and physiology of the body systems responsible for movement. Specifically, the structure, function, interrelationships, and control of the skeletal muscle, and nervous systems will be studied. This course is designed for students majoring in dance.

BIOL1003
GENERAL BIOLOGY I
Credits (Min/Max): 3/3
A presentation of a comprehensive survey of the major area within modern biology with emphasis placed on unsolved problems and the nature of scientific evidence. The course explores the properties of living matter on the molecular, cellular and organismic level. Open to all science majors and non-science majors with a strong interest in biology or a professional need.

BIOL1004
GENERAL BIOLOGY II
Credits (Min/Max): 3/3
A presentation of a comprehensive survey of the major area within modern biology with emphasis placed on unsolved problems and the nature of scientific evidence. The course explores the properties of living matter on the molecular, cellular and organismic level. Open to all science majors and non-science majors with a strong interest in biology or a professional need.
PreRequisites: BIOL1003 - GENERAL BIOLOGY I

BIOL1005
GENERAL BIOLOGY I-LAB
Credits (Min/Max): 1/1
Selected experiments chosen to emphasize principles presented in the General Biology lecture courses.

BIOL1006
GENERAL BIOLOGY II-LAB
Credits (Min/Max): 1/1
Selected experiments chosen to emphasize principles presented in the General Biology lecture courses.
BIOL1015
MICROBIOLOGY FOR HEALTH SCIENCES
Credits (Min/Max): 4/4
The primary effort of this course will be to provide the student with practical and clinically relevant information about microbes through lectures and laboratory exercises. Students will be introduced to basic facts about the structure and life processes of microbes. Major emphasis will be placed on relationships between microbes and humans, causes and diagnosis of microbial diseases, common sources of infections, disease transmission, and the prevention and treatment of infectious diseases. The tools and techniques for handling and identifying microorganisms will be introduced in the laboratory exercises.

BIOL1015L
MICROBIOLOGY FOR HEALTH SCIENCES -LAB
Credits (Min/Max): 0/0
Lab for BIOL1015: Microbiology for Health Sciences

BIOL1020
MEDICAL TERMINOLOGY
Credits (Min/Max): 3/3
This course will introduce the language of medicine through the analysis of medical terminology structure and the understanding of the definition, spelling and pronunciation of medical terms.

BIOL1023
HUMAN ANATOMY & PHYSIOLOGY I
Credits (Min/Max): 4/4
A basic course concerned with the structural and physiological processes of the human body. Interdependence of structure and function is stressed to promote better understanding of the entire body environment.

BIOL1023L
HUMAN ANATOMY & PHYSIOLOGY I-LAB
Credits (Min/Max): 0/0
Laboratory for BIOL1023: Anatomy & Physiology I

BIOL1024
HUMAN ANATOMY & PHYSIOLOGY II
Credits (Min/Max): 4/4
The second of two basic courses concerned with the structural and physiological processes of the human body. Interdependence of structure and function is stressed to promote better understanding of the entire body environment. Lecture and laboratory courses.
PreRequisites: BIOL1023 - ANATOMY & PHYSIOLOGY I

BIOL1024L
HUMAN ANATOMY & PHYSIOLOGY II- LAB
Credits (Min/Max): 0/0
Laboratory for BIOL1024: Anatomy and Physiology II.

BIOL1030
BIOLOGY OF AGING
Credits (Min/Max): 3/3
Focusing on adulthood and later life, this course explores the physiological changes, which occur with human aging, adaptation to those changes and the impact of biological changes on psychosocial functioning.

BIOL2021
COMPARATIVE VERTEBRATE A&P I
Credits (Min/Max): 4/4
A comparative study of the structural and functional characteristics of vertebrates tracing the evolution of animals from primitive chordates to mammals. Emphasis is placed on the physical and chemical operations of vertebrates and how these operations contribute to homeostasis. Structural/functional relationships are discussed. Lecture and laboratory courses.
PreRequisites: BIOL1003 - GENERAL BIOLOGY I

BIOL2021L
COMPARATIVE VERTEBRAE A&P I-LAB
Credits (Min/Max): 0/0
Laboratory for BIOL2021: Comparative Vertebrate Anatomy and Physiology I
BIOL2022  
COMPARATIVE VERTEBRATE A&P II  
Credits (Min/Max): 4/4  
A comparative study of the structural and functional characteristics of vertebrates tracing the evolution of animals from primitive chordates to mammals. Emphasis is placed on the physical and chemical operations of vertebrates and how these operations contribute to homeostasis. Structural/functional relationships are discussed. Lecture and laboratory courses.

BIOL2022L  
COMPARATIVE VERTEBRATE A&P II-LAB  
Credits (Min/Max): 0/0  
Laboratory for BIOL2022: Comparative Vertebrate Anatomy and Physiology II

BIOL2025  
MICROBIOLOGY  
Credits (Min/Max): 4/4  
An examination of the morphology and physiology of microorganisms with emphasis on their relationship to their environment. Topics include food, water, soil, industrial, and medical microbiology, microbial genetics, and microbial diversity. The laboratory work introduces the student to both the organisms and the techniques necessary to study them. Lecture and laboratory course.

PreRequisites: BIOL1004 - GENERAL BIOLOGY II

BIOL2025L  
MICROBIOLOGY-LAB  
Credits (Min/Max): 0/0  
Laboratory for BIOL2025 Microbiology

BIOL3013  
GENETICS  
Credits (Min/Max): 3/3  
A study of the basic principles of heredity including Mendelian, molecular and population genetics. Topics will include the cellular functions that give rise to inherited traits, the genetic basis for evolution, the role of genetics in biotechnology, and the statistical basis for predicting the probability of inheriting certain traits.  
PreRequisites: BIOL1004 - GENERAL BIOLOGY II

BIOL3014  
GENETICS-LAB  
Credits (Min/Max): 1/1  
Selected experiments will emphasize the principles presented in the lecture course.

BIOL3015  
GENERAL ECOLOGY  
Credits (Min/Max): 4/4  
A general ecology course studying ecosystem and population dynamics. Application of these concepts is made to aquatic and terrestrial ecosystems including current environmental problems. Fieldwork is an integral part of this course. Lecture and laboratory course.

BIOL3015L  
GENERAL ECOLOGY-LAB  
Credits (Min/Max): 0/0  
Laboratory for BIOL3015 General Ecology

BIOL3026  
CELL BIOLOGY  
Credits (Min/Max): 3/3  
A survey course in cell biology. The ultra structure of the Eukaryotic plant and animal cell are examined and related to cell function. Special emphasis is placed on membrane structure and functions.  
PreRequisites: BIOL1003 - GENERAL BIOLOGY I

BIOL3028  
SPECIAL TOPICS IN BIOLOGY:  
Credits (Min/Max): 2/2
SP15 - BIOL3028 Immunology II: Immune Responses - Special Topics

Immunology II: Immune Responses builds upon a foundational understanding of components of the immune system, modes of immune responses and an overview of complex immune responses. In this more advanced course, will delve more deeply into the complexities and interactions of immune responses including defenses against microbial infections and cancers, autoimmune diseases, immunological tolerance and tissue rejection, and allergies and other hypersensitivity reactions. BIOL4019 Immunology, or an equivalent introductory immunology course, is a prerequisite for this course.

BIOL3028A
SPECIAL TOPICS:
Credits (Min/Max): 3/3
This course is a study of the development of Darwinian evolution from a historical and scientific perspective. An emphasis is placed on the significance of Darwin's discoveries on the Galapagos Islands, a small island chain off of the coast of Ecuador. Darwin's five week visit to the Galapagos Island in the 1830s was pivotal to the ultimate development of his evolutionary views. This course provides an intensive exploration of the islands, through the eyes of Darwin. Students will be accompanied by the instructor and a local guide in an exploration of flora, fauna, and geology of the various islands and how these wonders contributed to the development of modern evolutionary theory.
PreRequisites: BIOL1004 - GENERAL BIOLOGY II

BIOL3029
CLINICAL SCIENCE(CHEM3029)
Credits (Min/Max): 3/3
This non-laboratory course provides the background needed to test for increases and decreases in various body enzymes, proteins, electrolytes, cell types, etc. which occur in the body during the disease process. The course deals with the causes of false positives and negatives in various clinical tests. It also provides for basis for interpretation of test results and for indicators of additional testing. Cross-listed with CHEM3029

BIOL3032
VERTEBRATE EMBRYOLOGY
Credits (Min/Max): 4/4
Topics include gametogenesis, fertilization, cleavage, gastrulation and the early development of organ systems in vertebrates. Lecture and laboratory course.

BIOL3032L
VERTEBRATE EMBRYOLOGY-LAB
Credits (Min/Max): 0/0
Laboratory for BIOL3032 Vertebrate Embryology

BIOL3036
BIOCHEMISTRY I(CHEM3036)
Credits (Min/Max): 3/3
An introduction to the biochemical metabolism of the living cell. Cellular structure, macromolecules, metabolic pathways, energy transformations, regulatory mechanisms and molecular genetics are discussed. Cross-listed with CHEM3036
PreRequisites: CHEM2015 - ORGANIC CHEMISTRY I

BIOL3037
BIOCHEMISTRY I-LAB(CHEM3037)
Credits (Min/Max): 1/1
An introduction to current biochemical techniques including thin layer and column and gas chromatography, electrophoresis, spectrophotometry, and DNA technology. Cross-listed with CHEM3037

BIOL3038
BIOCHEMISTRY II(CHEM3038)
Credits (Min/Max): 3/3
A continuation of BIOL3036. The course covers advanced aspects of macromolecular structure, regulatory enzymes, intermediary metabolism (to include photosynthesis, biological oxidation and the chemosmotic theory, metabolic control mechanisms), signal transduction and hormonal regulation of metabolism, and molecular aspects of the nucleic acids and genetic engineering. Cross-listed with CHEM3038

BIOL3045
PATHOGENIC MICROBIOLOGY
Credits (Min/Max): 2/2
This course is an examination of how microbes cause disease, particularly in humans. The course focuses on the basic principles of pathogenesis and provides examples of the disease process caused by certain bacteria, viruses, fungi and protozoa.
PreRequisites: BIOL2025 - MICROBIOLOGY
BIOL4017
BIOSOLVE I
Credits (Min/Max): 4/4
BioSOLVE (Biology Student Operated Laboratory Venture) is based on a business model where students will collaborate as contractors with service-oriented individuals or institutions to perform specific, applied laboratory research services. In addition, students will participate in community service associated with the organization or project to which BioSOLVE is Contracted. BioSOLVE is organized as a two-semester course, where BioSOLVE I is analogous to the training period of a new employee in a research laboratory. In this course, students will participate in community service associated with the contracted work, study the role of biologists in providing solutions to community and global problems, study and experience the nature of scientific collaborations, learn the theory behind the relevant laboratory methods, develop proficiency in the laboratory techniques needed to perform the specific contracted work, and learn the skills of complete and accurate note-keeping, data processing and scientific writing.
PreRequisites: BIOL1004 - GENERAL BIOLOGY II

BIOL4017L
BIOSOLVE I-LAB
Credits (Min/Max): 0/0
Laboratory for BIOL4017 BioSOLVE I

BIOL4018
BIOSOLVE II
Credits (Min/Max): 2/2
BioSOLVE (Biology Student Operated Laboratory Venture) is based on a business model where students collaborate as contractors with service-oriented individuals or institutions to perform specific, applied laboratory research services. In addition, students participate in community service associated with the organization or project to which BioSOLVE is contracted. BioSOLVE is organized as a two-semester course, where BioSOLVE I is analogous to the training period of a new employee in a research laboratory and BioSOLVE II mimics the continued work of the trained employee. In BioSOLVE II, students continue to participate in community service associated with the contracted work, study the role of biologists in providing solutions to community and global problems, and study and experience the nature of scientific collaborations begun in BioSOLVE I. However, the major effort of BioSOLVE II will be dedicated to performing the specific contracted laboratory research for which students were trained in BioSOLVE I.
PreRequisites: BIOL4017 - BIOSOLVE I

BIOL4018L
BIOSOLVE II-LAB
Credits (Min/Max): 0/0
Laboratory for BIOL4018 BioSolve II

BIOL4019
IMMUNOLOGY
Credits (Min/Max): 3/3
This course involves the description and development of the immune system, which includes the chemical, molecular, and cellular basis of immune reactions. The genetic and chemical control of the immune response is a recurrent theme of the course. Major topics covered in the course include specific immunities, types of hypersensitivity, autoimmunity, transplantation and rejection and immune disorders and deficiencies.
PreRequisites: BIOL1004 - GENERAL BIOLOGY II

BIOL4020
IMMUNOLOGY-LAB
Credits (Min/Max): 1/1
This course introduces laboratory techniques in immunology.
PreRequisites: BIOL1004 - GENERAL BIOLOGY II

BIOL4030
MOLECULAR BIOLOGY
Credits (Min/Max): 3/3
Molecular Biology is an introduction to the study of selected biological processes from a molecular perspective. Both eukaryotes and prokaryotes will be included. The molecular basis of the biosynthesis of macromolecules, intercellular and intracellular communication, genetics, immunology, infectious diseases and cancer will be discussed.
PreRequisites: BIOL1004 - GENERAL BIOLOGY II

BIOL4031
MOLECULAR BIOLOGY-LAB
Credits (Min/Max): 1/1
Molecular Biology Laboratory is an introduction to current molecular biology techniques including DNA and RNA extraction from cells, recombinant DNA cloning, electrophoresis and nucleic acid hybridizations (Southern blots and Northern blots), polymerase chain reaction and DNA sequencing. A project-based approach will be used. Both eukaryotes and prokaryotes will be studied.

**BIOL4051**  
**BIOLOGY-INTERNSHIP I**  
**Credits (Min/Max): 1/4**  
A field experience in which the student works under the direction of a professional in an area related to biology. The student must select a faculty member from the Division of Sciences to serve as the academic supervisor. Students are required to complete 45 hours of field/academic work for each credit hour. The academic supervisor will determine the proportion of fieldwork and academic work requirements. A maximum of 4 credit hours may be used as biology elective credit.

**BIOL4052**  
**BIOLOGY-INTERNSHIP II**  
**Credits (Min/Max): 1/3**  
A field experience in which the student works under the direction of a professional in an area related to biology. The student must select a faculty member from the Division of Sciences to serve as the academic supervisor. Students are required to complete 45 hours of field/academic work for each credit hour. The academic supervisor will determine the proportion of fieldwork and academic work requirements. A maximum of 4 credit hours may be used as biology elective credit.

**BIOL4055**  
**SEMINAR IN BIOLOGY I**  
**Credits (Min/Max): 1/1**  
The course consists of meetings for discussion of special topics selected from various areas of scientific investigation of recent or historical origin. Reports are given on results of literature studies.

**BIOL4056**  
**RESEARCH IN BIOLOGY**  
**Credits (Min/Max): 1/4**  
An individual investigation in the student's field of interest carried out under the supervision of a faculty member in the Division of Sciences. The student is responsible for defining a problem, planning a course of investigation and reporting his/her results in a scientific paper. A maximum of 4 credit hours may be used as biology elective credit.

**BIOL4057**  
**BIOLOGY-INDEPENDENT STUDY**  
**Credits (Min/Max): 1/4**  
This course is designed to allow students to pursue advanced topics in biology or to study an area of biology in more depth. A member of the Division of Sciences must serve as the mentor for the study, and will, together with the student, outline a course of study. Regularly scheduled biology courses may not be taken as Independent Study. A maximum of 4 credit hours may be used as biology elective credit.

**BIOL4059**  
**SEMINAR IN BIOLOGY**  
**Credits (Min/Max): 2/2**  
The course consists of meetings for discussion of special topics selected from various areas of scientific investigation of recent or historical origin. Reports are given on results of literature studies.  
**PreRequisites:** BIOL1004 - GENERAL BIOLOGY II

**CFST2010**  
**SURVEY OF HELPING PROFESSIONS & FAMILY POLICY**  
**Credits (Min/Max): 3/3**  
This course will provide an overview of policies and legislation that directly impact the functioning of parents and their children in the U.S. Some of the topics to be covered include changes in the welfare system, aid to dependent children, immigration policies, and availability of health care.  
**PreRequisites:** PSYC1021 - INTRO TO PSYCHOLOGY

**CFST3025**  
**CONTEMPORARY FAMILY STYLES**  
**Credits (Min/Max): 3/3**  
This course examines marriage and family systems across the lifespan from the perspective of human development. It introduces students to historical perspectives on families, as well as the diversity of emergent family styles, including single parenthood, cohabitation, divorce, and remarriage in the context of the latest psychological research.  
**PreRequisites:** PSYC1021 - INTRO TO PSYCHOLOGY
CFST4055
SENIOR SEMINAR
Credits (Min/Max): 3/3
This seminar will be conducted during the student's semester of field experience. Students will explore intervention approaches and techniques in working with families and children, along with strategies for identifying one's values and ethics in working with those in need. Students will conduct critical assessments of the functioning of the agencies in which they are placed, as well as increasing their awareness of professional roles and responsibilities in the helping profession.
PreRequisites: PSYC3011 - RESEARCH METHODS IN PSYCHOLOGY

CHEM1001
GENERAL CHEMISTRY I
Credits (Min/Max): 3/3
A study of the basic principles governing matter, energy and matter-energy interaction. Topics include atomic structure, bonding theory, aggregated states of matter, stoichiometry, thermodynamics, chemical kinetics, chemical equilibrium and electrochemistry.

CHEM1002
GENERAL CHEMISTRY II
Credits (Min/Max): 3/3
A study of the basic principles governing matter, energy and matter-energy interaction. Topics include atomic structure, bonding theory, aggregated states of matter, stoichiometry, thermodynamics, chemical kinetics, chemical equilibrium and electrochemistry.
PreRequisites: CHEM1001 - GENERAL CHEMISTRY I

CHEM1003
GENERAL CHEMISTRY I-LAB
Credits (Min/Max): 1/1
A series of experiments related to the content of CHEM1001 emphasizing laboratory techniques and familiarization with basic laboratory equipment. Open to all science majors and non-science majors with a strong interest in chemistry or a professional need.

CHEM1004
GENERAL CHEMISTRY II-LAB
Credits (Min/Max): 1/1
A series of experiments related to the content of CHEM1002, emphasizing laboratory techniques and familiarization with basic laboratory equipment. Open to all science majors and non-science majors with a strong interest in chemistry or a professional need.
PreRequisites: CHEM1003 - GENERAL CHEMISTRY I-LAB

CHEM1007
PRINCIPLES OF CHEM I(SLSC1008)
Credits (Min/Max): 3/3
An introduction to the basic principles of general, organic and biochemistry. The principles are related to living systems including the properties and metabolism of proteins, carbohydrates, lipids and nucleic acids. Lecture and laboratory course. Cross-listed with SLSC1008

CHEM1008
PRINCIPLES OF CHEM I-LAB
Credits (Min/Max): 1/1
Laboratory for CHEM1007 Principles of Chemistry I

CHEM1017
PRINCIPLES OF CHEMISTRY II
Credits (Min/Max): 3/3
This course provides an introductory survey of biochemistry, along with biomedical applications. Important biomolecules such as hemoglobin will be discussed, with an emphasis on correlating structure with function. A discussion of intermediary metabolism follows, including an introduction to inborn errors of metabolism. The course concludes with a discussion of molecular including potential biomedical application.
PreRequisites: CHEM1007 - PRINCIPLES OF CHEM I(SLSC1008)

CHEM1018
PRINCIPLES OF CHEMISTRY II-LAB
Credits (Min/Max): 1/1
Laboratory for CHEM1017 Principles of Chemistry II
PreRequisites: CHEM1008 - PRINCIPLES OF CHEM I-LAB
CHEM2013
INTRO TO RESEARCH IN CHEMISTRY
Credits (Min/Max): 1/4
This course provides an opportunity for a student to gain a high degree of proficiency with a particular laboratory procedure or instrument. The student will learn to optimize experimental parameters, refine existing laboratory procedures, and/or develop new applications. A maximum of 4 credit hours may be used as chemistry electives.

CHEM2015
ORGANIC CHEMISTRY I
Credits (Min/Max): 3/3
A study of the classification and characterization of organic compounds, their preparation, properties and reactions. The application of modern organic theories to these subjects is stressed. Topics include nomenclature, bond theory, stereochemistry, synthesis, mechanisms, and structure determination by instrumental methods. Lecture and laboratory course.
PreRequisites: CHEM1002 - GENERAL CHEMISTRY II

CHEM2015L
ORGANIC CHEMISTRY I-LAB
Credits (Min/Max): 1/1
Laboratory for CHEM2015

CHEM2016
ORGANIC CHEMISTRY II
Credits (Min/Max): 3/3
A study of the classification and characterization of organic compounds, their preparation, properties and reactions. The application of modern organic theories to these subjects is stressed. Topics include nomenclature, bond theory, stereochemistry, synthesis, mechanisms, and structure determination by instrumental methods. Lecture and laboratory course.
PreRequisites: CHEM2015 - ORGANIC CHEMISTRY I

CHEM2016L
ORGANIC CHEMISTRY II-LAB
Credits (Min/Max): 1/1
Lab for CHEM2016 Organic Chemistry
PreRequisites: CHEM2015L - ORGANIC CHEMISTRY I-LAB

CHEM3011
ANALYTICAL CHEMISTRY I
Credits (Min/Max): 3/3
A study of the application of theoretical principles to quantitative analysis. The concept of chemical equilibrium is thoroughly discussed. Current analytical techniques are presented both in lecture and laboratory. Topics include the theory and practice of gravimetric analysis, volumetric analysis, spectrophotometric analysis and gas chromatography. Lecture and laboratory course.
PreRequisites: CHEM1002 - GENERAL CHEMISTRY II

CHEM3011L
ANALYTICAL CHEMISTRY I-LAB
Credits (Min/Max): 1/1
Laboratory for CHEM3011 Analytical Chemistry I

CHEM3012
ANALYTICAL CHEMISTRY II: INSTRUMENTAL METHODS OF ANALYSIS
Credits (Min/Max): 3/3
The fundamental principles and instrumentation used in optical spectroscopy, chromatography, nuclear magnetic resonance spectrometry, mass spectrometry, and electroanalytical chemistry are explored. Practical aspects such as data acquisition and analysis, operating characteristics, sensitivity and selectivity of instrumentation used by physical and biological scientists are examined. Lecture and laboratory course.
PreRequisites: CHEM3011 - ANALYTICAL CHEMISTRY I

CHEM3012L
ANALYTICAL CHEMISTRY II-LAB
Credits (Min/Max): 1/1
Laboratory for CHEM3012 Analytical Chemistry II
PreRequisites: CHEM3011L - ANALYTICAL CHEMISTRY I-LAB
CHEM3015
POLYMER CHEMISTRY
Credits (Min/Max): 3/3
A lecture course designed as an introduction to the field of polymer science from its origins to its place in current chemical research. Content will include the synthesis and physical chemistry of the important polymer types, key concepts of macromolecular science, and the role of the journal and patent literature in polymer related research and engineering.
PreRequisites: CHEM2016 - ORGANIC CHEMISTRY II

CHEM3024
ENVIRONMENTAL CHEMISTRY
Credits (Min/Max): 3/3
Environmental chemistry is a study of the principles of chemistry as applied to evaluating, understanding, modeling, predicting, and assisting in the correction of adverse anthropologic environmental interactions. Aspects to be considered include sources, reactions, transport, effects and fates of selected chemical species in various environmental media (water, oil, air, etc.) and the effects of both natural and anthropologic interactions.

CHEM3026
INORGANIC CHEMISTRY
Credits (Min/Max): 3/3
This course addresses structure and bonding in inorganic compounds, with an emphasis on the transition metals. It includes an introduction to group theory and related symmetry studies. The spectroscopy of inorganic compounds is also explored. A discussion of semiconductors is included.
PreRequisites: CHEM2016 - ORGANIC CHEMISTRY II

CHEM3028
SPECIAL TOPICS IN CHEMISTRY:
Credits (Min/Max): 1/3
A collection of courses covering a broad range of subjects of special interest. Topics may include: computer applications, environmental topics, ecological applications, optics, photochemistry and photophysics, laboratory instrumentation, and other topics as needed.

CHEM3029
CLINICAL SCIENCE (BIOL3029)
Credits (Min/Max): 3/3
This non-laboratory course provides the background needed to test for increases and decreases in various body enzymes, proteins, electrolytes, cell types, etc. which occur in the body during the disease process. The course deals with the causes of false positives and negatives in various clinical tests. It also provides for basis of interpretation of test results and for indicators of additional testing. Cross-listed with BIOL3029

CHEM3036
BIOCHEMISTRY I (BIOL3036)
Credits (Min/Max): 3/3
An introduction to the biochemical metabolism of the living cell. Cellular structure, macromolecules, metabolic pathways, energy transformations, regulatory mechanisms and molecular genetics are discussed. Cross-listed with BIOL3036
PreRequisites: CHEM2015 - ORGANIC CHEMISTRY I

CHEM3036H
BIOCHEMISTRY I-HONORS
Credits (Min/Max): 3/3
An introduction to the biochemical metabolism of the living cell. Cellular structure, macromolecules, metabolic pathways, energy transformations, regulatory mechanisms and molecular genetics are discussed.

CHEM3037
BIOCHEMISTRY I-LAB (BIOL3037)
Credits (Min/Max): 1/1
An introduction to current biochemical techniques including thin layer and column and gas chromatography, electrophoresis, spectrophotometry, and DNA technology.
PreRequisites: CHEM2015L - ORGANIC CHEMISTRY I-LAB

CHEM3038
BIOCHEMISTRY II (BIOL3038)
Credits (Min/Max): 3/3
An introduction to current biochemical techniques including thin layer and column and gas chromatography, electrophoresis, spectrophotometry, and DNA technology. Cross-listed with BIOL3038
PreRequisites: BIOL3036 - BIOCHEMISTRY I (CHEM3036)

**CHEM3050**  
**FLUORESCENCE THEORY & APPLICATIONS**  
Credits (Min/Max): 2/2  
This course will introduce the principal theories of fluorescence as well as encompass theory and application of topics utilized in research laboratories through lecture and hands-on experimentation.  
PreRequisites: CHEM2016 - ORGANIC CHEMISTRY II

**CHEM4032**  
**PHYSICAL CHEMISTRY I**  
Credits (Min/Max): 3/3  
A study of the physical properties of matter, the structure of matter and the theories of chemical interactions. Topics include ideal and real gases, liquids, solids, thermodynamics, chemical equilibria, phase equilibria, chemical kinetics, quantum mechanics, atomic and molecular structure and spectroscopic methods. Lecture and laboratory course.  
PreRequisites: CHEM2016 - ORGANIC CHEMISTRY II

**CHEM4032L**  
**PHYSICAL CHEMISTRY I-LAB**  
Credits (Min/Max): 1/1  
Laboratory for CHEM4032 Physical Chemistry I

**CHEM4033**  
**PHYSICAL CHEMISTRY II**  
Credits (Min/Max): 3/3  
A study of the physical properties of matter, the structure of matter and the theories of chemical interactions. Topics include ideal and real gases, liquids, solids, thermodynamics, chemical equilibria, phase equilibria, chemical kinetics, quantum mechanics, atomic and molecular structure and spectroscopic methods. Lecture and laboratory course.  
PreRequisites: CHEM4032 - PHYSICAL CHEMISTRY I

**CHEM4033L**  
**PHYSICAL CHEMISTRY II-LAB**  
Credits (Min/Max): 1/1  
Laboratory for CHEM4033 Physical Chemistry  
PreRequisites: CHEM4032L - PHYSICAL CHEMISTRY I-LAB

**CHEM4051**  
**CHEMISTRY-INTERNSHIP I**  
Credits (Min/Max): 1/6  
A field experience in which the student works under the direction of a professional in an area related to chemistry. The student must select a faculty member from the Division of Sciences to serve as the academic supervisor. Students are required to complete 45 hours of field/academic work for each credit. The academic supervisor will determine the proportion of fieldwork and academic work requirements. A maximum of 4 credit hours may be used as chemistry electives.

**CHEM4055**  
**SEMINAR IN CHEMISTRY I**  
Credits (Min/Max): 1/1  
The course consists of meetings for discussion of special topics selected from various areas of scientific investigation of recent or historical origin. Reports are given on results of literature studies. One hour per week.

**CHEM4056**  
**RESEARCH IN CHEMISTRY**  
Credits (Min/Max): 1/4  
A research project designed to explore an unanswered question and to contribute to the existing body of knowledge in the field. The student will plan and carry out the project with the assistance of a faculty supervisor. A maximum of 4 credit hours may be used as chemistry elective credit.

**CHEM4057**  
**CHEMISTRY-INDEPENDENT STUDY**  
Credits (Min/Max): 0/4  
This course is designed to allow students to study advanced topics in chemistry. A member of the chemistry department must serve as the mentor for the study and will, together with the student, outline a course of study. Regularly scheduled chemistry courses may not be taken as Independent Study. A maximum of 4 credit hours may be used as chemistry elective credit.
CHEM4059
SEMINAR IN CHEMISTRY II
Credits (Min/Max): 1/1
The course consists of meetings for discussion of special topics selected from various areas of scientific investigation of recent or historical origin. Reports are given on results of literature studies. One hour per week.

CHEM4060
FORENSIC CHEMISTRY
Credits (Min/Max): 3/3
This course focuses on the use of analytical instrumentation to examine materials related to criminal and other investigations. Methods of analyzing trace metals, accelerants, explosives, drugs, alcohol, and other toxic materials will be presented. Sample preparation and analysis according to currently accepted methods will be included. The course will include both a lecture and a laboratory component.
PreRequisites: CRIM3041 - CRIMINALISTICS

CHEM4060L
FORENSIC CHEMISTRY-LAB
Credits (Min/Max): 1/1
Laboratory for CHEM4060 Forensic Chemistry

CMET1001
HUMAN COMMUNICATION(SLSO1008)
Credits (Min/Max): 3/3
In this course the student examines human, verbal, non-verbal and visual communication. Through an interactive classroom the student will combine the theory and definitions of the text with their experience to clarify and understand the concepts that make up human communication. In the classroom, writing, making presentations, working in groups, solving problems and applying creativity to the concepts of communication will be some of the ways the students learn and reinforce the subject matter. Written papers, research and computer-mediated-communication further reinforce the concepts of the course and serve as a means of evaluation of the student's understanding and absorption of the material. Cross-listed with SLSOC1008

CMET1002
MASS MEDIA & DIGITAL COMMUNICATION
Credits (Min/Max): 3/3
The subject matter of this course is the history and development of mass communication. The course will include examining the origin, economics, technology, mode of communication, communication effectiveness, social role and future of a variety of communication media including: newspapers, magazines, books, radio, television, film and computer-mediated-communication.
PreRequisites: CMET1001 - HUMAN COMMUNICATION(SLSO1008)

CMET2001
COMMUNICATION IN ORGANIZATIONS
Credits (Min/Max): 3/3
This course provides an overview of the interaction of structure, culture, technology, and communication in organizations. Classes will focus on case studies of the structures and culture of new technology organizations and the dynamic encountered when new technology meets old economy culture. Within this course the student will also practice specific communication skills such as preparation for job interviews, performance appraisals, professional presentations, and negotiation.

CMET2003
COMMUNICATION BETWEEN CULTURES
Credits (Min/Max): 3/3
This course begins with a focus study on communication factors which affect any cross-cultural interpersonal interaction. The students then survey specific differences between U.S. cultural customs and those of countries presently involved in La Roche's Pacem In Terris Institute. Finally, the role of the media in intercultural relations is discussed.

CMET2004
FUND OF COMMUNICATION FOR DESIGN PROFESSIONALS
Credits (Min/Max): 3/3
The goal of this course is to introduce graphic design majors to career-relevant theories and practices of interpersonal and related mediated communication. Emphasis will be on designer-client and creative-team communication. Course content will include basic communication theory, the roles of non-verbal communication and language in professional communication, building professional relationships, teamwork and brainstorming, conflict management strategies, and cultural influences in design concepts and process. Students will integrate these concepts through class projects, which include writing, speaking, problem-solving and presentations.
CMET2005
COMMUNICATION THEORY, RESEARCH & CRITICISM
Credits (Min/Max): 3/3
This course is an introduction to the application of theory and research to mass communication including Internet communication. In addition, the course provides a starting point for students in understanding and creating a critical perspective on mass communication through the lens of specific theoretical perspectives.
PreRequisites: CMET1001 - HUMAN COMMUNICATION(SLSO1008)

CMET2012
COMMUNICATION, SPORTS & CULTURE
Credits (Min/Max): 3/3
Sports is a global, highly influential industry that ranges from sporting goods to professional and amateur sports organizations and effects populations across national boundaries and cultures. This class focuses on the ways that sport is a communication phenomena which influences how we see and interact within our own cultures and other cultures. In using communication theories, the class will focus on how people enact, produce, consume and organize sport as a primarily communicative activity. This will mean focusing on the ways the mass media discusses and influences the importance of sports within cultures; the ways various myths, metaphors, and narratives influence participants, fans, and media views on the role of sport; the ways small group and organizational communication theories can highlight and analyze relational issues in sport; and how our own language choices influence and reinforce the interaction between sport and culture.

CMET2050
DIRECTED STUDY
Credits (Min/Max): 1/3
This directed study opportunity meets the needs of students who require individual help with specific aspects of their major that cannot be sufficiently addressed by an existing course.

CMET3002
NEW MEDIA & DIGITAL COMMUNICATION TECHNOLOGY
Credits (Min/Max): 3/3
This course deals with the evolution of technology and the use of communications technology for business, entertainment and information. Through readings, discussion, group work and hands-on experience the class examines the social, cultural and economic aspects of communication technology.

CMET3005
MESSAGE DESIGN & MEDIA
Credits (Min/Max): 3/3
This course is a broad examination of mass media as message design with an emphasis on understanding the visual, aural and contextual aspects of a variety of communications media such as: film, video, print media, outdoor advertising and web pages. Elements of control in message design, as well as conceptual frameworks in popular culture, will be addressed from still and moving images, to sound, color, texture and text. Message Design will prepare students entering fields of media production to understand the inherent meaning of every element of mass media construction.

CMET3029
SOCIAL PSYCHOLOGY(PSYC/SOCL3029)
Credits (Min/Max): 3/3
Social psychology is the study of human behavior as it is shaped by the psychosocial environment. Topics include person perception, small group interaction, theories and methods of attitude change, interpersonal attraction, conformity, aggression, prejudice, persuasion, altruism and prosocial behavior. Cross-listed with PSYC/SOCL3029.
PreRequisites: PSYC1021 - INTRO TO PSYCHOLOGY

CMET3040
SPECIAL TOPICS IN COMMUNICATION, MEDIA & TECHNOLOGY:
Credits (Min/Max): 3/3
Social Media Networking: Internet social networking has become, in just a few years, a major form of communication, a marketing tool and a social centerpiece for the lives of millions of people around the world. In this class we will examine this important communication and technology phenomenon from a variety of perspectives including, cultural, economic, political, social and technological.
PreRequisites: ENGL1012 - COLLEGE WRITING II

CMET4001
LEGAL ISSUES OF MEDIA & DIGITAL COMMUNICATIONS
Credits (Min/Max): 3/3
This course will examine the of laws and rules affecting various types of mass communication industries in the United States, i.e., broadcasting, cable communication, the Internet, advertising and journalism. The roles of the public, political leaders, research groups, the Federal Communication Commission (FCC), the Federal Trade Commission (FTC), the First Amendment and the Supreme Court will be examined.
CMET4002  
**BROADCASTING, CABLE & NEW MEDIA**  
Credits (Min/Max): 3/3  
This course overviews the television, radio and cable television industries and the economic, regulatory, technological and legal forces on them. The course also deals with aspects of production in television, radio and cable programming such as newscasts, interviews, advertising, entertainment and public service programming.

CMET4040  
**BROADCAST NEWS MEDIA**  
Credits (Min/Max): 3/3  
This course is an overview of television news and the role it plays in society. The course will look at the skills necessary for making anew production successful. It will also examine how a production is structured - maintaining that delicate balancing act of substance versus style.  
PreRequisites: ENGL1012 - COLLEGE WRITING II

CMET4050  
**SENIOR CAPSTONE**  
Credits (Min/Max): 3/6  
As a part of each Communication, Media, and Technology student's program, they are required to design and complete a focus project in the specific area of their choice. Similar to a Senior Thesis, the focus project should be a capstone for study in Communication, Media, and Technology and bring multiple elements together into a substantial research and/or production project. Individual project design requires faculty approval. Successful evaluation includes the participation of a local professional in the students chosen area.

CMET4051  
**COMMUNICATION-INTERNSHIP I**  
Credits (Min/Max): 1/6  
A practical work experience in a field setting which deals with communication. The student is given the opportunity to integrate his/her theoretical and practical knowledge under the supervision of professionals in the field of communication. This internship must be taken in the student's track specialization.

CMET4052  
**COMMUNICATION-INTERNSHIP II**  
Credits (Min/Max): 1/6  
A practical work experience in a field setting which deals with communication. The student is given the opportunity to integrate his/her theoretical and practical knowledge under the supervision of professionals in the field of communication. This internship must be taken in the student's track specialization.

COMGDPFM  
**PITTSBURGH FILMMAKERS TOPICS**  
Credits (Min/Max): 3/3  
Pittsburgh Filmmakers' courses such as Filmmaking, Video Production II, Digital Non-Linear Editing, Web Page Design, Screenwriting, etc., are available to La Roche College students in Fall, Spring and Summer semesters. Courses are listed in the Pittsburgh Filmmakers Catalog that is available through academic advisors.

COMM4009  
**MEDIA & DEMOCRACY**  
Credits (Min/Max): 3/3  
The concept of community, including individual responsibilities, will be the centerpiece of this course as democracy is ultimately the recognition of individual rights as well as commitment to the intrinsic equality of everyone in a community. Understanding current events, the evolving news process, and critical media concepts such as agenda setting and institutional bias will be an important part of the class. In learning the history and development of both democracy and media, we will examine and debate significant issues and their impact through primary documents such as Supreme Court decisions, the Constitution, FCC orders and regulations, and the commentary and analysis on each.

COMM4013  
**RULE OF LAW**  
Credits (Min/Max): 3/3  
This course, through the integration of legal, historical and political concepts, introduces students to the rule of law one of the current governing principles of Western civilization and the historical foundation of that civilization's rights and liberties and its role in the American community. By using the rule of law as a guiding principle, this course insures that students develop a perspective on the community and its relationship to the individual that includes an historical knowledge of both the American and international legal systems, the political and social reasons for making a commitment to be governed by the rule of law, and an understanding of law as an essential pillar of American and Global Communities. Students will be introduced to the sometimes conflicting rights and duties of individuals and communities through an examination of selected appellate court cases, which will demonstrate the difficulty in resolving societal issues involving conflict between individuals and communities.
COMM4018
THE ARTS & COMMUNITY IDENTITY
Credits (Min/Max): 3/3
In this course, the theatrical and fine arts are used as a lens through which students will gain insight into how the identity of a community is impacted by and reflected in its cultural arts. Moving chronologically from the game-changing decade of the 1960's, the course provides insight into key events, led by the arts, and influenced by the arts, that resulted in vast changes in community politics, social structures & behaviors, economics, and spiritual practices. By studying the impact of the arts on communities, students gain a greater understanding of how a society forms its identity, and how its artistic culture becomes the vehicle through which to pass that identity to future generations.

COMM4020
SOCIAL COMMUNITIES IN 20TH CENTURY AMERICA
Credits (Min/Max): 3/3
SOCIAL COMMUNITIES IN 20TH CENTURY AMERICA: What role have social communities played in defining the evolution of the United States? This course explores the nature and power of social communities as sources of social change and of activism in 20th century America. Using social analysis, reading of original documents, 'thick description' of social communities, as well as film and videos, we will examine ways in which ordinary Americans-united by shared dreams, common experiences, social class, ideologies, common adherence to a social movement, created various types of social communities that responded to challenges but also shaped major political and economic changes in the past century.

COMM4021
LAND & COMMUNITY IN NATIVE AMERICA
Credits (Min/Max): 3/3
Since the arrival of Columbus, Native American and Euro-American communities have struggled over the meaning, value, and use of the land. In this course, we will study the origins of these conflicts, the differing beliefs about the land held by Native and Euro-American peoples, and the ways in which Native and Euro-American communities have affected and adapted to each other. The course utilizes the life and writings of conservationist Aldo Leopold, famous for his essay "The Land Ethic" (1949), as a lens through which to examine these issues.

COMM4021H
LAND & COMMUNITY IN NATIVE AMERICA-HONORS
Credits (Min/Max): 3/3
Since the arrival of Columbus, Native American and Euro-American communities have struggled over the meaning, value, and use of the land. In this course, we will study the origins of these conflicts, the differing beliefs about the land held by Native and Euro-American peoples, and the ways in which Native and Euro-American communities have affected and adapted to each other. The course utilizes the life and writings of conservationist Aldo Leopold, famous for his essay "The Land Ethic" (1949), as a lens through which to examine these issues. Historical records, from treaties to sacred stories to philosophical reflections, will be studied in depth.

COMM4025
BUILDING HEALTHY COMMUNITIES
Credits (Min/Max): 3/3
Utilizing the Healthy People 2020 framework this course will explore concepts of health and how different communities respond to the challenges facing them as they confront health care issues, strive to maintain wellness, and fight disease.

COMM4036
VIRTUAL COMMUNITIES & SOCIAL MEDIA
Credits (Min/Max): 3/3
This course will assist the student in examining virtual communities from the perspective of issues related to social media tools. Some areas that will be examined include ethical values, regulations/laws, free speech, content controls, intellectual properties, privacy, security, and safety in virtual communities. We will discuss what we mean by "virtual community" and how we encourage, discuss, analyze, understand, design, and participate in healthy communities in the age of many-to-many social media. Students will need the willingness to immerse in social media practices and develop a notion of how these practices affect self and community.

COMM4038
THE CREATIVE PROCESS
Credits (Min/Max): 3/3
The creative process is the process of change, of development, of evolution in the organization of subjective life - whether individually or within a community/society. Through identification, investigation, application, comparison and analysis of various creative thinking techniques, students will gain the knowledge and confidence required to address and question the ever-changing concept of "community".

COMM4040
SURVIVING ECONOMICALLY IN THE COMMUNITY
Credits (Min/Max): 3/3
This course is open to all students regardless of their major. It will provide participants an overview of personal and family financial planning; reviewing financial recordkeeping; planning your spending; planning giving including financial and time doing community service; tax planning; uses of consumer credit; making buying decisions, insurances, selecting investments, and retirement and estate planning. By the end of the course students should have a better understanding of personal finances so that they can be a positive participant in the local community and the global economy.

COMM4042
CORPORATIONS, COMMUNITIES & RESPONSIBLE CITIZENSHIP
Credits (Min/Max): 3/3
Utilizing community and ethical theory, this course explores different ways of understanding ethics, values and morality in the relationship between individuals, corporation and community. The course examines the complex and often controversial concept of corporate social responsibility and sustainability, positioning corporations as responsible "citizens" of the local, national and international community. Students will also explore U.S. and international legal and regulatory requirements and specific cases and issues.

CRIM1001
INTRODUCTION TO CRIMINAL JUSTICE
Credits (Min/Max): 3/3
This introductory course will introduce criminal justice as a system that is an institutional agent of American society. The components of police, courts, and corrections are discussed with the goal of defining their function and purpose and interdependence on one another. The patterns of crime and the processes of the American Criminal Justice System, law enforcement, judicial process, and corrections will be examined. Students will learn the terminology of the field, examine the methods of inquiry used in the field, and learn the objectives, policies and procedures of probation, parole, and prisons as well as some of the issues and problems.

CRIM2005
CONSTITUTIONAL LAW(POLI2005)
Credits (Min/Max): 3/3
This course will explore the difficulty in interpreting the meaning of constitutional language. The interpretive role of the U.S. Supreme Court will be studied through an examination of landmark constitutional decisions. The major schools of thought that guide interpretation will also be studied. Cross-listed with POLI2005. Effective within the UG14 catalog his course was revised to a 3000 level.

CRIM2010
INTRODUCTION TO CORRECTIONS
Credits (Min/Max): 3/3
Examines contemporary American correctional policies, and their relationship to the American criminal justice system. The nature of correctional institutions, correctional processes and policies will be presented. Current theories, trends and practices in the treatment of offenders, alternatives to traditional modes of incarceration, and problems and innovations in correctional administration will be discussed. Theories of correctional institutions as centers of rehabilitation or punishment will be examined along with public influences on correctional practices and policy development.

CRIM2011
INTELLIGENCE ANALYSIS & PRESENTATION TECHNIQUES (NSCS2011)
Credits (Min/Max): 3/3
This course examines the process used by analysts to develop strategic intelligence. Students will participate throughout the course as a member of a group tasked to complete an estimative project. Students will learn to apply strategic theory to critical national security problems. Cross-listed with NSCS2011
PreRequisites: CRIM1001 - INTRODUCTION TO CRIMINAL JUSTICE

CRIM2012
ANALYSIS OF CRIMINAL JUSTICE DATA
Credits (Min/Max): 3/3
This course is primarily concerned with the ways and means of understanding drawing conclusions from criminal justice data. Students will learn to develop, use and evaluate studies of criminal justice data, and use their work to evaluate the effectiveness of criminal justice activities. Covered will be policy implications of various law enforcement techniques vis-a-vis their effectiveness in both short and long term. Students will work with and critique published criminological research and explore the use of data of a more local nature.
PreRequisites: MATH1010 - COLLEGE ALGEBRA

CRIM2016
POLICE & SOCIETY(SOCL2016)
Credits (Min/Max): 3/3
This course reviews current issues and problems in law enforcement and interrelations with the society-at-large and cultural/ethnic sub-groups. It examines informal exercise of police authority or force, governmental/agency policies, legal requirements, role demands, and conflicts experienced by police officers, and the norms of the police sub-culture. Cross-listed with SOCL2016
PreRequisites: CRIM1001 - INTRODUCTION TO CRIMINAL JUSTICE
CRIM2018
PROFESSIONAL RESPONSIBILITY: LEGAL & ETHICAL CONCEPTS
Credits (Min/Max): 3/3
This course examines the existent standards, codes, and laws pertaining to the legal and ethical conduct required of professionals working in the criminal justice and national security fields. Theoretical concepts will be explored, but the course will focus on the application of legal and ethical constructs to the everyday behavior of justice system professionals.
PreRequisites: CRIM1001 - INTRODUCTION TO CRIMINAL JUSTICE

CRIM2030
JUVENILE DELINQUENCY(SOCL2030)
Credits (Min/Max): 3/3
This course will offer an analysis of Juvenile Delinquency and the juvenile justice system. It will examine the theories of the causes of juvenile crime and the processes of the juvenile justice system. Cross-listed with SOCL2030

CRIM3005
CONSTITUTIONAL LAW(POLI3005)
Credits (Min/Max): 3/3
This course will explore the difficulty in interpreting the meaning of constitutional language. The interpretive role of the U.S. Supreme Court will be studied through an examination of landmark constitutional decisions. The major schools of thought that guide interpretation will also be studied. Cross-listed with POLI3005.(Previously CRIM2005)

CRIM3010
CRIMINAL LAW
Credits (Min/Max): 3/3
The basic principles of substantive criminal law will be illustrated. Concepts and patterns of criminal law and procedure will be discussed. The elements of specific crimes will be analyzed through case study. Public policy and the legal principles for determining criminal and civil liability will be considered.

CRIM3011
RESEARCH METHODS FOR JUSTICE, LAW & SECURITY
Credits (Min/Max): 3/3
An introduction to research techniques. Students will learn to form research questions, to select and carry out appropriate research strategies, and to present findings in a logical, clear and concise way.

CRIM3020
SPECIAL TOPICS IN CRIMINAL JUSTICE:
Credits (Min/Max): 3/3
Crime analysis is the systematic examination of multi-faceted crime data. The identification, collection, storage, modification and dissemination of crime data enables law enforcement agencies to identify crime trends, patterns, and modus operandi; advise law enforcement administrators about emerging tactical trends; determine long term strategic trends; and improve operational and administrative effectiveness. Criminal analyst should master the ability to write, brief and disseminate findings to law enforcement stakeholders clearly and concisely. This course will provide an overview of these processes. The course will involve basic familiarization of a GIS (Geographic Information System) that is designed for graphical presentation and analytical discernment.
PreRequisites: CRIM1001 - INTRODUCTION TO CRIMINAL JUSTICE

CRIM3020D
SPECIAL TOPICS IN CRIMINAL JUSTICE:
Credits (Min/Max): 3/3
A collection of selected topics in the field of criminal justice. These will be topics of special interest to practitioners in this field. Possible topics include: Advanced Investigations, Crime Scene Photography, Forensic Accounting and White Collar Crime Correction, as well as other topics of special interest.
PreRequisites: CRIM3040 - CRIME SCENE INVESTIGATION & FORENSICS

CRIM3020E
VIOLENT OFFENDERS & PRISON COUNSELING:SPECIAL TOPICS IN CRIMINAL JUSTICE
Credits (Min/Max): 3/3
A collection of selected topics in the field of criminal justice. These will be topics of special interest to practitioners in this field. Possible topics include: Advanced Investigations, Crime Scene Photography, Forensic Accounting and White Collar Crime Correction, as well as other topics of special interest.
PreRequisites: CRIM1001 - INTRODUCTION TO CRIMINAL JUSTICE
THEORIES OF CRIMINAL DEVIANCE (SOCL3030)
Credits (Min/Max): 3/3
An examination of the etiology and major theories of criminality, with special reference to the rational choice, routine activity, biological and psychosocial theories of deviance. This course will examine criminal deviance by analyzing both criminal and victim populations, with particular emphasis on crime typology and the analysis of criminal behavior. The responses of the Criminal Justice System and private security experts to criminal behavior from situational crime prevention techniques to correctional treatment methods are explored and discussed. Cross-listed with SOCL3030
PreRequisites: ENGL1012 - COLLEGE WRITING II

COMMUNITY CORRECTIONS
Credits (Min/Max): 3/3
This course is a study of intermediate punishments conducted in a community environment as alternatives to incarceration. It will examine alternatives to incarceration by means of community-based adult and juvenile programs. Mission, structure and operation of probation and parole agencies as well as the role of the courts and prosecutors are examined. The probation, parole and pardon options are also reviewed. Other options will be examined, including work release programs, halfway houses, prerelease, and restitution-based programs.

ENTERPRISE & TRANSNATIONAL CRIME
Credits (Min/Max): 3/3
The course addresses organized crime in the United States and internationally. It presents organized crime as criminal business ventures that meet the demand of its consumer base and/or engages in activities that provide profits both legal and illicit into the organization. International crime is introduced, demonstrating how organized crime networks transcend national borders, and how individual criminals have learned to use the ease of travel and identity falsification to operate in or conceal themselves from national law enforcement. Law enforcement strategies and their effectiveness are covered.
PreRequisites: CRIM1001 - INTRODUCTION TO CRIMINAL JUSTICE

TERRORISM
Credits (Min/Max): 3/3
This course addresses the historical and current-day development and spread of terrorism. The class investigates the goals of terrorism and the social, political and ideological reasons for the use of terrorism. Counter-terrorist activities and preventive measures are explored. The course will address law enforcement responses to incidents of terrorism.
PreRequisites: ENGL1012 - COLLEGE WRITING II

CRIME SCENE INVESTIGATION & FORENSICS
Credits (Min/Max): 3/3
This course introduces the student to basic and advanced procedures employed by crime scene investigators, with the emphasis on the detection, collection, processing and presentation of physical and testimonial evidence. The course also identifies items commonly found at crime scenes and examines their significance as trace and physical evidence used to link a suspect with a crime. Many aspects of the legal and scientific processing, preserving and documenting a crime scene for court presentation will be examined. Theories of information, observation and interrogation as they relate to crime scene investigation will be examined, as well as the ethics of current investigative procedures utilized by modern law enforcement agencies.
PreRequisites: CRIM1001 - INTRODUCTION TO CRIMINAL JUSTICE

CRIMINALISTICS
Credits (Min/Max): 4/4
A comprehensive examination of the application of science to the physical evidence of a crime. Crime scene processing procedures will be linked to the laboratory analysis of physical evidence. The course will also include training in scientific report writing and courtroom testimony, to include a moot court exercise.
PreRequisites: BIOL1004 - GENERAL BIOLOGY II

APPLIED CRIMINOLOGY
Credits (Min/Max): 3/3
This course is designed to examine crime and offender typologies and the investigative and legal methods that can be applied to prevent, resolve, or solve crimes committed by career offenders. An overview of the major theories or crime causation is furnished. An emphasis is placed on choice theory, routine activities theory, routine activities theory and their applied model-situational crime prevention. The topics of crisis negotiation, interpersonal conflict resolution, crime prevention, and informant development are explored and practical exercises are employed to enhance student understanding.
CRIM3043
COMPUTER CRIME
Credits (Min/Max): 3/3
A comprehensive examination of computer crime, information systems security and cyber law. The investigative process as applied to the cyber criminal will be emphasized. Statutes specific to cyber crime will be studied. Crime prevention strategies and techniques will be presented and applied using the case study method.

CRIM3045
CRIMINAL INVESTIGATIONS
Credits (Min/Max): 3/3
This course covers the fundamentals of criminal investigation. It concentrates on the essentials of securing a crime scene, modus operandi of perpetrators, sources of information, principles of careful observation and recording interview/interrogation and case preparation.
PreRequisites: CRIM1001 - INTRODUCTION TO CRIMINAL JUSTICE

CRIM3046
SECURITY MANAGEMENT & LOSS PREVENTION
Credits (Min/Max): 3/3
This course features an overview of public and private security, including history of private security and asset protection, the role of security in American society, and current industry practices. The course covers the security role in industry, business and government and includes loss prevention, control and risk management. The legal foundations of private security are covered, as is interaction with government law enforcement. Specialization and career opportunities are discussed.

CRIM3052
ADMINISTRATION OF CRIMINAL JUSTICE ORGANIZATIONS
Credits (Min/Max): 3/3
This course examines the principles of management and leadership as they relate to criminal justice organizations. Leadership, planning, and legal concepts are emphasized, and the case study method is employed as an applied learning tool.

CRIM3054
LAW ENFORCEMENT COMMUNICATIONS
Credits (Min/Max): 3/3
This course instructs students in the proper methodology of law enforcement communications. Students will be required to conduct interviews, effectively compile investigative notes, and reduce this information to a series of written and oral reports.
PreRequisites: CRIM1001 - INTRODUCTION TO CRIMINAL JUSTICE

CRIM3063
CRIMINAL BEHAVIOR: LAW & PSYCHOLOGY(PSYC3063)
Credits (Min/Max): 3/3
This course, through an integration of psychology, criminology, political science and law, examines the role of the outlaw in both our community and global society. Elements of the course include psychological explanations of individual personality development, choice, both rational and thrill-motivated theories of criminality, examination of the role that powerful outlaws have played in our communities, and the rise of deviant individuals who have gained enormous power by capitalizing on the forces of globalization. The course also intertwines the legal means that society has employed to restrict the power of the outlaw in our society and the capacity of individuals to overcome attempts at domination.
Cross-listed with PSYC3063

CRIM4012
EMERGENCY PREPAREDNESS & CRISIS MANAGEMENT(NSCS4012)
Credits (Min/Max): 3/3
This course examines the issues and processes associated with the most critical domains of security management. In particular, the course will focus on risk analysis, security surveys, response planning, and the principles of the all-hazards approach to risk management. Cross-listed with NSCS4012

CRIM4030
COMPUTER FORENSICS INVESTIGATIONS
Credits (Min/Max): 3/3
This course provides a comprehensive examination of the application of computer security techniques to the physical evidence of a crime. Crime scene processing procedures will be utilized in the analysis of physical digital evidence. The course will also include training in report writing and courtroom testimony, to include a moot court exercise.
PreRequisites: CRIM3043 - COMPUTER CRIME

CRIM4051
CRIMINAL JUSTICE-INTERNSHIP I
Credits (Min/Max): 1/6
A field course in which the student is actively involved in working with a criminal justice agency or a private security force. The student will meet periodically with a faculty mentor to examine the relationships between theoretical concepts and the field experience. A strong leadership and service-learning component will be integrated into the course.

CRIM4055
SENIOR CAPSTONE EXPERIENCE
Credits (Min/Max): 3/3
The Senior Capstone course is the final correlating experience of the educational process for all criminal justice majors. Students will apply criminal justice theories and concepts in analyzing the published research concerning a critical issue in criminal justice and writing a comprehensive literature review of the selected issue. The student will also demonstrate, through test performance, the knowledge they have gained from the required courses of the criminal justice curriculum. Students will also participate in a variety of educational activities designed to assist them in obtaining employment in the criminal justice career field.
PreRequisites: CRIM2012 - ANALYSIS OF CRIM JUSTICE DATA

CRIM4057
CRIMINAL JUSTICE-INDEPENDENT STUDY
Credits (Min/Max): 1/3
This course is limited to those few students who have demonstrated an unusual level of ability and an intense commitment to a particular area of study.

CSCI1002
INTRO TO COMPUTER SCIENCE (SLSC1012)
Credits (Min/Max): 3/3
This course is an introduction to the field of computer science. A scientific foundation of many aspects of CS will be developed upon which more advanced CS courses will build. Topics include: computer design, computer programming, information processing, algorithm design, operating systems, software engineering, and artificial intelligence. Cross-listed with SLSC1012

CSCI1010
PROGRAMMING I
Credits (Min/Max): 3/3
This course introduces the art of algorithm design and problem solving in the context of computer programming. The basic structure and logic of the Java language is presented. Topics covered include data types and operators, control flow, repetition and loop statements, arrays and pointers. Good programming practices will be taught and encouraged.
PreRequisites: CSCI1002 - INTRO TO COMPUTER SCIENCE (SLSC1012)

CSCI1010L
PROGRAMMING I-LAB
Credits (Min/Max): 1/1
Lab work for CSCI1010 Programming I.

CSCI1015
VISUAL BASIC PROGRAMMING
Credits (Min/Max): 3/3
This course introduces computer programming in general, and the Visual Basic programming language in particular. Topics covered include data types and operators, control flow, repetition and loop statements, arrays, and structures. The intent is to familiarize the student with the MS Windows Programming environment using Visual Studio and graphical user interfaces using frames, windows, dialog boxes, and common controls. Good programming practices will be taught and encouraged.

CSCI2010
PROGRAMMING II
Credits (Min/Max): 3/3
This course is a follow-on to Programming I. Topics covered include; data structures, file input and output, and other advanced object-oriented programming concepts found in Java.
PreRequisites: CSCI1010 - PROGRAMMING I

CSCI2010L
PROGRAMMING II-LAB
Credits (Min/Max): 1/1
Lab work for CSCI2010 Programming II
PreRequisites: CSCI1010 - PROGRAMMING I
CSCI2020
ALGORITHM ANALYSIS
Credits (Min/Max): 3/3
This course teaches techniques of programming utilizing data structures such as lists, stacks, and queues and algorithmic approaches such as recursion, searching and sorting. These techniques are learned through programming exercises as well as classroom study. 

PreRequisites: CSCI2010 - PROGRAMMING II

CSCI2025
SYSTEMS PROGRAMMING
Credits (Min/Max): 3/3
This course will introduce the students to the important systems language, C, and to several topics related to the hardware and software environment. These are issues related to system interfaces and software synchronization provided by operating systems, the linkage of operating system services to application software, and the fundamental mechanisms for computer communications.

PreRequisites: CSCI2010 - PROGRAMMING II

CSCI2025L
SYSTEMS PROGRAMMING-LAB
Credits (Min/Max): 1/1
This course will provide the hands-on laboratory component to the Systems Programming course which will introduce the students to the important systems language, C, and to several topics related to the hardware and software environment. These are issues related to system interfaces and software synchronization provided by the operating system, the linkage of operating system services to application software, and the fundamental mechanisms for computer communications.

CSCI2030
ANALOG ELECTRONICS
Credits (Min/Max): 3/3
This is an introductory course of electronics. Students will learn the fundamental principles of electronics circuit chips. Topics to be studied include basic circuit theory, diode applications, Bipolar and Field Effect transistors, operational amplifiers, and basic TTL gates. This course will provide students with both theoretical and practical knowledge necessary to start an understanding of computers and data communication devices.

CSCI2035
COMPUTER ORGANIZATION & DESIGN
Credits (Min/Max): 3/3
This course will introduce students to the function and design of digital computers. Topics covered include: Value representation, ALU structure and operation, simple digital electronics, basic assembly language programming, I/O and bus architectures, and complex processor architectures including virtual memory.

PreRequisites: CSCI2025 - SYSTEMS PROGRAMMING

CSCI2035L
COMPUTER ORGANIZATION & DESIGN-LAB
Credits (Min/Max): 1/1
This course will provide the hands-on laboratory component to the Computer Organization & Design course which will introduce the students to digital design and assembly language programming.

CSCI2055
DATABASE-SYSTEMS THEORY
Credits (Min/Max): 3/3
This course is designed to present the essential concepts, principles, techniques, and mechanisms for the design, analysis, use, and implementation of computerized database systems. Key information management concepts and techniques are examined: database modeling and representation, information interfaces - access, query, and manipulation, implementation structures, and issues of distribution. The database and information management system technology examined in this course represents the state-of-the-art, including traditional approaches as well as recent research developments. The course should allow the student to understand, use, and build practical database systems. The course is intended to provide a basic understanding of the issues and problems involved in database systems, a knowledge of current practical techniques for satisfying the needs of such a system, and an indication of the current research approaches that are likely to provide a basis for tomorrow's solutions.

PreRequisites: CSCI1010 - PROGRAMMING I

CSCI3028
SPECIAL TOPICS:
Credits (Min/Max): 1/1
This course is designed to prepare interested students for the emerging global standard for entry level software developers, the Software Developer Certification (SDC). The SDC is being created at Carnegie Mellon University, is funded by Kenya through money made available by the World Bank. A number of major international software companies are using the SDC to help in selecting the right people to bring into the employment onboarding process.

CSCI3032
ELECTRONIC COMMUNICATION
Credits (Min/Max): 3/3
This course will present the fundamental technology of wireless and cable telecommunications. Students will become familiar with modulation/demodulation and noise reduction for high-fidelity electronic and data communications. They will also learn advanced data communication technologies such as digital broadband technology. Transition from electronics (applications of electrons) to photonics (applications of light and photons) is also presented. Hands-on laboratory projects will be conducted in connection with the basic hardware of telecommunication not covered in CSCI2030 and CSCI3030.

CSCI3040
OPERATING SYSTEMS
Credits (Min/Max): 3/3
This course is an in-depth study of modern operating systems. Students will learn about the services provided by an operating system, how to use these services and how the services are implemented. Topics covered include: Initialization (boot), Processes, Controlling shared resources, Memory, Bulk storage systems, and Network Communications (TCP/IP) as they relate to the computer operating system.
PreRequisites: CSCI2035 - COMPUTER ORGANIZATION & DESIGN

CSCI3042
COMPUTER SECURITY
Credits (Min/Max): 3/3
This course covers fundamental issues and first principles of security and information assurance. The course will look at the security policies, models and mechanisms related to confidentiality, integrity, authentication, identification, and availability issues related to information and information systems. Other topics covered include basics of cryptography (e.g., digital signatures) and network security (e.g., intrusion detection and prevention), risk management, security assurance and secure design principles, as well as e-commerce security. Issues such as organizational security policy, legal and ethical issues in security, standards and methodologies for security evaluation and certification will also be covered.
PreRequisites: CSCI1010 - PROGRAMMING I

CSCI4010
COMPILER DESIGN
Credits (Min/Max): 3/3
Compiler Design is an area of computer science where students learn formal language definitions and grammars. They will ultimately learn how to translate one language into another. This subject has many applications besides just the creation of language compilers!

CSCI4020
INTRO TO SOFTWARE ENGINEERING
Credits (Min/Max): 3/3
This course is an introduction to field of software engineering. It will combine a range of topics integral to the design, implementation, and testing of a medium-scale software system with the practical experience of implementing such a project as a member of a programmer team.

CSCI4045
TELECOMMUNICATIONS I
Credits (Min/Max): 3/3
This is the first of a two-semester introduction to telecommunications, one of the most important and rapidly growing fields of current technology. The topics covered in this first part include an overview of telecommunications, digital transmission fundamentals, and introduction to networks, physical layer protocols and medium access control.
PreRequisites: CSCI2010 - PROGRAMMING II

CSCI4046
TELECOMMUNICATIONS II
Credits (Min/Max): 3/3
This is the second of a two-semester introduction to telecommunications, one of the most important and rapidly growing fields of current technology. The major topics to be covered in this second part are: coding theory and cryptography; routing in packet-switching networks and shortest-path algorithms; data compression and information theory.

CSCI4050
NUMERICAL COMPUTING I
Credits (Min/Max): 3/3
A survey of numerical techniques for numerically solving a variety of mathematical problems with an emphasis on application as opposed to theory. Topics to be covered include: sources of error in numerical computations, solving non-linear equations, solving sets of simultaneous equations, interpolating polynomials, numerical integration and numerical differentiation.

CSCI4051
NUMERICAL COMPUTING II
Credits (Min/Max): 3/3
Second semester of a survey course in numerical techniques for the numerical solution of a variety of mathematical problems with an emphasis on application as opposed to theory. Topics to be covered include: initial-value problems, partial differential equations, curve fitting and approximation of functions.

CSCI4055
ADVANCED DATABASE THEORY
Credits (Min/Max): 3/3
This course is a continuation of Database-Systems Theory. It concentrates on object-oriented database design, object relational design, data warehousing, data marts, and data mining. Emphasis will be placed on modeling languages such as UML, ODMG, as well as ODL and SQL3 standards. Also, Online Analytical Processing and its relationship to data warehousing, data mining, and decision support systems will be discussed.
PreRequisites: CSCI2055 - DATABASE-SYSTEMS THEORY

CSCI4070
INTRO TO ARTIFICIAL INTELLIGENCE
Credits (Min/Max): 3/3
This course will provide an introduction to the fundamental concepts and techniques underlying the construction of intelligent computer systems. Topics covered in the course include: problem solving and search; logic and knowledge representation; planning; uncertain knowledge and reasoning; and machine learning. Formal approaches will support implementation, both through available tools and student-written functions.

CSCI4098
CS CAPSTONE EXPERIENCE I
Credits (Min/Max): 3/3
Software engineering is the discipline concerned with the application of theory, knowledge, and practice for effectively and efficiently building software systems that satisfy the requirements of users and customers. This is the first semester of a year long experience designed to present software engineering theory in context with a medium-size software project for an actual customer.

CSCI4099
CS CAPSTONE EXPERIENCE II
Credits (Min/Max): 3/3
This is the second semester of a year long experience. Software engineering is the discipline concerned with the application of theory, knowledge, and practice for effectively and efficiently building software systems that satisfy the requirements of users and customers. This is the first semester of a year long experience designed to present software engineering theory in context with a medium-size software project for an actual customer.
PreRequisites: CSCI4098 - CS CAPSTONE EXPERIENCE I

EDEL2000
ORIENTATION TO PreK-4 EDUCATION
Credits (Min/Max): 3/3
This course will focus on the historical development of PreK-4 education and explore the different learning environments that are optimal for student learning of all ability ranges and from different cultures. The student will gain insights into the philosophy and objectives of the PreK-4 curriculum and be introduced to various instructional strategies that can be used in teaching the various subject areas. It will examine and analyze the various curriculum components of the different educational designs for educating students from when students are teachable through grade four. This class should be taken in conjunction with Observation I so that students can relate theory to practice in the classroom.
PreRequisites: EDUC1010 - INTRO TO EDUCATION & FIELD EXPERIENCE

EDEL2010
OBSERVATION 1 (PreK)
Credits (Min/Max): 2/2
This class will provide the student with the opportunity to work with a teacher in a pre-school setting/classroom. This field work will coincide with the classes of Child Development, Educational Psychology, and Orientation to PreK-4 Education. This will allow the student to connect the theory gained in these classes to practice in the early childhood classroom according to PA learning standards. Field Experience: 36 total hours (6 hours Stage 2 and 30 hours Stage 3 field experience).
EDEL2020
OBSERVATION II (K-4)
Credits (Min/Max): 2/2
This course will provide the student with the opportunity to work with a teacher in a kindergarten to fourth grade classroom. This field work will allow the student to connect the theory gained in Child Development, Educational Psychology, and Orientation to PreK-4 Education classes to practice in the classroom according to PA learning standards. Seminars will be an integral part of the class to discuss what the student is observing, provide additional support, and theory to the student. Field Experience: 36 total hours (6 hours Stage 2 and 30 hours Stage 3 field experience).
PreRequisites: EDEL2000 - ORIENTATION TO PreK-4 EDUCATION

EDEL2030
METHODS OF TEACHING HEALTH & PHYSICAL EDUCATION-PREK-4TH GRADE
Credits (Min/Max): 2/2
The course will focus on the importance of proper health and physical activities, according to the Pennsylvania early learning standards, for PreK-4th grade students of all ability ranges and from different cultures in an inclusive classroom. Students will be provided with introductory experiences in physical education, health, and assessment of student performance. Students will design and practice teaching methods for physical education/health activities for the PreK-4 grades. An integral part of this course will be a field experience in a variety of classrooms across the PreK-4 grade span to observe teachers presenting physical education/health lessons. Field Experience: 4 hours of Stage 1 Field Experience.
PreRequisites: EDEL2000 - ORIENTATION TO PreK-4 EDUCATION

EDEL3015
CREATIVE THINKING: METHODS OF INTEGRATING ART/MUSIC THROUGHOUT THE PREK-4 CURRICULUM
Credits (Min/Max): 2/2
This class will present strategies and teaching techniques for integrating art and music across the curriculum, aligned with the Pennsylvania early learning standards, for students in the PreK-4 grades of all ability ranges and from different cultures in an inclusive classroom. Students will be provided with introductory experiences in art and music and assessment of student performance. Students will design and practice teaching methods to incorporate art and music into content areas across the PreK-4 curriculum. An integral part of this course will be a field experience in a variety of classrooms across the PreK-4 grade span to observe teachers who incorporate art and music into their lessons. Field Experience: 4 hours of Stage 1 Field Experience.
PreRequisites: EDEL2000 - ORIENTATION TO PreK-4 EDUCATION

EDEL3025
METHODS OF TEACHING WRITING PREK-4
Credits (Min/Max): 2/2
This course will provide opportunities for you to learn how to teach PreK-4 students to learn to write for a variety of purposes, based on the Pennsylvania academic standards and assessment anchors. You will learn how to use backwards-design to create lessons that focus on student growth areas, and how to assess writing samples to inform further instruction. In this process you will also learn how to improve your own writing so that you can serve as a model for your students. You will be expected to demonstrate model handwriting for printing and cursive.
PreRequisites: EDEL2000 - ORIENTATION TO PreK-4 EDUCATION

EDEL3035
METHODS OF TEACHING READING PREK-4
Credits (Min/Max): 3/3
This course provides the foundation for teaching reading according to PA academic standards and assessment anchors for PreK through grade 4, for students with a broad range of abilities and diverse cultural backgrounds. The focus is on research-based instruction around the Five Big Ideas of Reading: fluency, comprehension, vocabulary, phonemic awareness and the alphabetic principle. Strategies for dealing with struggling readers will be emphasized, and you will learn to differentiate your reading instruction for students reading above-, on-, and below-level. This will be exciting, intense, hands-on work that will teach you to understand reading in a whole new way.
PreRequisites: EDUC1010 - INTRO TO EDUCATION & FIELD

EDEL3045
TEACHING READING & LANGUAGE ARTS PRACTICUM PREK-4
Credits (Min/Max): 2/2
This course provides a weekly supervised practicum and seminar. This offers a supportive, scaffolded, first step into teaching. Students will be teaching reading and language arts in a PreK-4th grade level classroom. Instructional topics will be assigned by classroom mentor teachers. Topics will address the grade-level standards for reading, writing, speaking and listening. Practicum students will use assessment information to design lessons, and differentiate instruction to meet student needs. Throughout the practicum, students will be able to demonstrate effective reading and language arts instruction, and promote skill development in early elementary students. The primary objective of this course is for students to practice planning and implementing standards-based reading and language arts instruction that is very interactive, and differentiated for student strengths and needs. Field Experience: 15 hours of Stage 3 Field Experience
PreRequisites: EDEL3035 - METHODS OF TEACHING READING PREK-4
EDEL3055
METHODS OF TEACHING SOCIAL STUDIES PREK-4
 Credits (Min/Max): 3/3
This class will provide the pre-service PreK-4 teacher with strategies and techniques for teaching social studies in a heterogeneous inclusive classroom according to PA early learning standards and the National Council for the Social Studies thematic strands, which include the disciplines of geography, history, economics, and civics and government. Emphasis will be on organizing subject matter and translating it to children through a variety of methods which address different learning styles. An integral part of the course will be a field placement experience in a PreK-4 classroom. This field placement will allow the student to connect theory to practice and provide an experience of working with children. Field Experience: 10 hours of Stage 3 field experience (teaching Junior Achievement)

EDEL4035
METHODS OF TEACHING SCIENCE PREK-4
 Credits (Min/Max): 3/3
This class will provide the pre-service PreK-4 teacher with strategies and techniques for teaching science in a heterogeneous inclusive classroom according to PA learning standards and the National Science Teachers Association utilizing a 'hands-on' approach. Emphasis will be on organizing subject matter including environment and ecology, life sciences, physical sciences, and earth and space science, and translating it to children through the students' participation in various methods of learning. The student will present a demonstration lesson utilizing the inquiry lesson plan format to his/her peers. An integral part of this course will be a field experience in a PreK-4 classroom. This field placement will allow the student to connect theory to practice and provide an experience of working with children. Field Experience: 10 hours of Stage 3 field experience
PreRequisites: EDUC1010 - INTRO TO EDUCATION & FIELD

EDEL4040
METHODS OF TEACHING MATH PREK-4
 Credits (Min/Max): 3/3
This course provides the theoretical base of principles for teaching math according to PA learning standards and the National Council of Teachers of Mathematics to students from infancy through grade 4, inclusive of special needs and gifted children. It will enable the student to learn mathematical concepts, skills, and problem solving methods through the use of manipulatives and be able to demonstrate this knowledge through demonstration lessons to his/her peers. Through the experiences provided, the student will gain knowledge in the various strategies for the use of these manipulatives, the selection of effective materials and techniques, and diagnostic procedures.
PreRequisites: EDEL2000 - ORIENTATION TO PreK-4 EDUCATION

EDEL4045
TEACHING MATH PRACTICUM PREK-4
 Credits (Min/Max): 2/2
This course provides a weekly supervised practicum and seminar based on the Methods of Teaching Math course. The student will be assigned a class or a small group of students where he/she will diagnose the students' needs and then create and implement lessons weekly according to PA learning standards that focus on the diagnosis found. The student will be able to demonstrate and promote effective strategies for teaching children of all ability ranges in his/her lessons plans and teaching. The student will spend one period a week in a classroom teaching and this will be accompanied with a seminar focusing on the plans and teaching that is implemented weekly. Field Experience: 15 hours of Stage 3 Field Experience
PreRequisites: EDEL4040 - METHODS OF TEACHING MATH PREK-4

EDEL4060
INTEGRATING CURRICULUM & INSTRUCTION
 Credits (Min/Max): 3/3
In the final stages of preparing participants to enter the teaching profession, this class acts as the capstone of the program prior to student teaching. This course will offer the participants opportunities to connect the various methods courses and strategies learned. Participants will learn and practice ways to integrate different subject areas into a cohesive unit using projects, and to provide cognitively engaging instruction for students of many ability levels and learning styles in an inclusive setting. As always, instruction will be planned according to PA learning standards. The course will also address the duties of the teaching profession that extend beyond daily instruction, which includes providing opportunities to learn and practice strategies for working with families and keeping them engaged in their children's education. Participants will invest significant professional development hours in preparing the assignments of this course, including some materials useful during student teaching.
PreRequisites: EDEL2000 - ORIENTATION TO PreK-4 EDUCATION

EDEL4064
STUDENT TEACHING & SEMINAR (PREK-1)
 Credits (Min/Max): 6/6
This course provides teacher candidates with the opportunity to incorporate the various strategies and techniques learned from the methods courses to implement effective instruction for all learners at the PreK-1st grade level. Under the direct supervision of a cooperating teacher and a college supervisor, the student teacher will have the opportunity to teach in all the subject areas and demonstrate the instructional practices and methods related to the developmental level of their students, based on a standards aligned system. The student teacher will return to the college for additional support on topics such as creating a positive learning environment, encouraging parent involvement, and using community resources as part of the student teaching seminars.
EDML2010
ML TEACHING SCIENCE METHODS-LAB
Credits (Min/Max): 1/1
This course is required for all middle level education majors. The course will focus on how to use an inquiry approach to teach science in the 4th-6th grade levels, with an emphasis on how to address the Pennsylvania Academic Standards and Assessment Anchors for Science & Technology and Environment & Ecology. A field experience is a required component of this course.
PreRequisites: EDUC1010 - INTRO TO EDUCATION & FIELD

EDML2023
ML TEACHING MATHEMATICS METHODS -LAB
Credits (Min/Max): 1/1
This course is required for all middle level education majors. The course will focus on how to use a learner based approach to teach math in the 4th-6th grade levels, with an emphasis on how to address the Pennsylvania Academic Standards and Assessment Anchors for Mathematics. A field experience is a required component of this course.
PreRequisites: EDUC1010 - INTRO TO EDUCATION & FIELD

EDML3010
DEVELOPING READING COMMUNITIES
Credits (Min/Max): 3/3
This course engages students in a study of the relationship between literacy and community by examining a range of "reading communities," including historical, school-based, professional, neighborhood, workplace, and recreational communities. Key issues will include: how communities use literacy and literacy practices, how literacy practices define and shape communities, how literacy practices draw and transcend boundaries between communities, and how new literacies transform older communities and create new kinds of communities.

EDML3013
ML TEACHING SOCIAL STUDIES METHODS-LAB
Credits (Min/Max): 1/1
This course is required for all middle level education majors. The course will focus on how to present social studies concepts in a hands-on manner to 4th-6th grade students, with an emphasis on how to address the Pennsylvania Academic Standards for Geography, History, Economics, and Civics & Government. A field experience is a required component of this course.
PreRequisites: EDUC1010 - INTRO TO EDUCATION & FIELD

EDML3050
READING & WRITING ACROSS THE DISCIPLINES
Credits (Min/Max): 3/3
Reading and Writing Across the Disciplines introduces a wide variety of effective instructional methods for middle level and secondary teachers to present reading and writing skills in any content area.
PreRequisites: ENGL1012 - COLLEGE WRITING II

EDML4010
ADVANCED TEACHING METHODS FOR MIDDLE LEVEL TEACHING CERTIFICATION
Credits (Min/Max): 2/2
This course is required for all middle level education majors, in order to prepare for student teaching. Future middle level teachers will explore ways to engage students in the learning process, with a focus in the content areas at the 7th and 8th grade level. Future teachers will plan lessons and units based on content standards and assessment anchors. The use of technology will also be explored as a way to enhance instruction and assessment. A field experience is a required component of this course.
PreRequisites: EDUC1010 - INTRO TO EDUCATION & FIELD

EDML4050
ML STUDENT TEACHING (GRADES 4-6)
Credits (Min/Max): 6/6
During this portion of student teaching, middle level education majors will be placed in a 4th-6th grade setting, and may be expected to teach any subject area (science, mathematics, language arts, or social studies) for approximately seven weeks. Student teachers will be expected to demonstrate instructional strategies that capitalize on the developmental characteristics of young adolescents and to design successful interventions responsive to the needs of individual middle level students. Student teachers will be supervised by a cooperating teacher and a college supervisor, and will be expected to participate in collaborative team building opportunities. Part of the student teaching experience will also include an on campus student teaching seminar, where topics such as certification requirements, school law, and interviewing strategies will be presented.

PreRequisites: EDML4010 - ADVANCED TEACHING METHODS FOR MIDDLE LEVEL TEACHING CERTIFICATION

EDML4055
ML STUDENT TEACHING (GRADES 7-8)
Credits (Min/Max): 6/6
During this portion of student teaching, middle level education majors will be placed in a 7th-8th grade setting within their content specialty (science, mathematics, language arts, or social studies) for approximately seven weeks. Student teachers will be expected to demonstrate their deep content knowledge as they apply instructional strategies that capitalize on the developmental characteristics of young adolescents and to design successful interventions responsive to the needs of individual middle level students. Student teachers will be supervised by a cooperating teacher and a college supervisor, and will be expected to participate in collaborative team building opportunities. Part of the student teaching experience will also include an on campus student teaching seminar, where topics such as certification requirements, school law, and interviewing strategies will be presented.

PreRequisites: EDML4010 - ADVANCED TEACHING METHODS FOR MIDDLE LEVEL TEACHING CERTIFICATION

EDSP2015
INTRO TO HIGH INCIDENCE DISABILITIES, ACCOMMODATIONS, & ADAPTATIONS
Credits (Min/Max): 3/3
This course provides students an opportunity to explore foundations of special education in the United States including: characteristics of each disability category, legislation, over-representation of diverse students, academic and functional needs of students with disabilities, individual learning differences, least restrictive environment, implications for a Standards Aligned System, collaboration and transition. Students will develop an understanding of Accommodations and Adaptations for inclusive environments.

EDSP2025
LEARNING ENVIRONMENTS, CLASSROOM & BEHAVIOR MANAGEMENT, ACCOMMODATIONS & ADAPTATIONS
Credits (Min/Max): 3/3
This course will introduce students to behavior and misbehaviors of students in the school setting, types of misbehavior roles, establish a classroom management plan that will reflect their consideration of students with disabilities, problem solving, conflict resolution, assessing appropriate and problematic behaviors while establishing opportunities for students with diverse backgrounds to interact and share in cooperative learning groups, problem solving to achieve common goals. "Application Models" will be the framework used to demonstrate the approaches used by pioneers as well as 21st century researchers and educators.

PreRequisites: EDSP2015 - INTRO TO HIGH INCIDENCE DISABILITIES, ACCOMMODATIONS, & ADAPTATIONS

EDSP3015
INTRO TO LOW INCIDENCE DISABILITIES, METHODS & PRACTICUM
Credits (Min/Max): 3/3
This course is designed to prepare students with the skills necessary to effectively teach individuals with severe disabilities, identify the relationships of organizations to school systems, laws and policies that are related to the implementation of specialized health care in the educational setting, and demonstrate the knowledge and understanding of individuals so as to develop effective instructional plans that will contribute to effective programs.

EDSP3025
EFFECTIVE INSTRUCTIONAL STRATEGIES FOR STUDENTS WITH DISABILITIES
Credits (Min/Max): 3/3
The Instructional Strategies Course identifies and implements instructional strategies for all individuals with disabilities by evidenced-based methods, specialized resources, multiple instructional approaches, appropriate adaptations and technology, integrating student initiated learning opportunities and experiences into ongoing instruction. Teach learning strategies and modify the pace of instruction within and across curricula, demonstrate efficient differentiated instruction, efficient planning, coordination, and delivery for effective instruction required for inclusive settings.

PreRequisites: EDSP2015 - INTRO TO HIGH INCIDENCE DISABILITIES, ACCOMMODATIONS, & ADAPTATIONS

EDSP3035
SPECIALIZED INSTRUCTIONAL PLANNING, ACCOMMODATIONS, ADAPTATIONS & FIELD EXPERIENCE
Credits (Min/Max): 3/3
The focus of this field experience course is to prepare the perspective student teacher with an authentic encounter of teaching special education prior to their actual placement. The student will participate in a special education classroom for eight (8) - five (5) hour sessions, create a weekly journal, develop meaningful lessons plans, prepare an observational case study, create a summative portfolio, and be responsible for the various forms. The major emphasis of the class will concentrate on providing the student with a realistic experiential comprehension of special education in the school age setting.
EDSP3040
EVALUATION & AUTHENTIC ASSESSMENT WITHIN A STANDARDS ALIGNED SYSTEM
Credits (Min/Max): 3/3
This required course for all education majors will explore the instructional purposes for a variety of assessment strategies, such as: authentic, screening, diagnostic, formative, benchmark, and summative assessments. Future teachers will learn how to interpret assessment data, such as standardized test scores and norms, and will practice how to communicate assessment results to educational stakeholders, while considering legal and ethical issues related to assessment data, such as maintaining confidentiality. Future teachers will also create sample assessments that target academic standards and assessment anchors within subject areas, in order to measure mastery of the curriculum in more than one way.
PreRequisites: EDUC1010 - INTRO TO EDUCATION & FIELD

EDSP4015
DEVELOPMENT OF THE IEP & INCLUSION IN LEAST RESTRICTIVE ENVIRONMENT
Credits (Min/Max): 3/3
The focus of this culminating course is to prepare the student teacher with a realistic overview of teaching special education in Pennsylvania. The student will create an IEP, become familiar with Inclusion and collaboration, write reflections based on current issues/trends in special education, participate in discussions, create useful artifacts, discuss significant court cases, and understand Transition. The student will also comprehend the special education continuum of services available to the identified student.
PreRequisites: EDSP2015 - INTRO TO HIGH INCIDENCE DISABILITIES, ACCOMODATIONS, & ADAPTATIONS

EDSP4065
SPECIAL ED STUDENT TEACHING & SEMINAR
Credits (Min/Max): 6/6
The Special Education Student Teaching Course is designed to allow teacher candidates an opportunity to apply skills learned in professional practice, human development, learning environments, instructional strategies, instructional planning, diversity, adaptations and accommodations, collaboration, behavior management, assessment and transition in a PreK-8th grade special education placement. Under the supervision of a school district cooperating teacher(s) and a La Roche College supervisor, the teacher candidate will design, implement and evaluate lessons that appropriately address the IEP goals and meet the PA Academic Standards and Assessment Anchors. Student teachers will demonstrate skills that include, but are not be limited to: differentiated instruction, universal design, collaborative teaching, transition planning and research based data driven instruction to meet the needs of all students.
PreRequisites: EDSP4015 - DEVELOPMENT OF THE IEP & INCLUSION IN LEAST 3

EDSP5015
CONTEMPORARY ISSUES IN SPECIAL EDUCATION & INTRO TO RESEARCH
Credits (Min/Max): 3/3
The purpose of this graduate level course is to prepare Masters Degree candidates to be well-informed special educators by investigating current trends and issues in special education, and some of their historical roots. A core set of topics will be explored in depth that could build toward leadership in the field, including developments in curriculum and instruction, legal policies, new technology, ethical principles, and standards for practice. Additional content may be added in response to new issues or student-expressed interests. Students will prepare to become informed consumers of educational research by learning to evaluate the strength of the research articles describing trends and issues. Students will learn to analyze research and trends to identify effective practices for working with individuals with exceptionalities and their families.

EDSP5025
COLLABORATING WITH FAMILIES & COMMUNITY AGENCIES
Credits (Min/Max): 3/3
The purpose of this graduate level course is to prepare Master's Degree Candidates to collaborate with all stakeholders to enhance educational opportunities for students with special needs. This course will focus on effective communication skills and culturally responsive practices that can be used to interact in a professional and ethical manner with families and community agencies.

EDSP5030
READING INSTRUCTION FOR STUDENTS WITH HIGH INCIDENCE EXCEPTIONALITIES
Credits (Min/Max): 3/3
The purpose of this graduate level course is to prepare Masters Degree candidates to understand how processing differences effect reading, and how to provide the explicit, systematic instruction needed by students with high-incidence exceptionalities. The course will provide research-based recommendations for both instruction in the five essential skill areas of reading and measures to assess and monitor students' progress. Participants will also learn how to evaluate instructional effectiveness and adapt instruction, differentiate instruction for diverse groups of students, and provide differentiated instruction through a Response to Intervention and Instruction (RTII) model. Practice opportunities will be provided for application of course concepts. The course will maintain a strong emphasis on helping participants to establish best practices for effective reading instruction for students with exceptionalities.

EDSP5035
RESEARCH METHODS
Credits (Min/Max): 3/3
The purpose of this graduate level course is to prepare Masters Degree candidates to become critical consumers of educational research, and to conduct research projects. The course is highly interactive, designed to help participants apply many of the examined quantitative and qualitative practices by analyzing research reports and planning research projects. Emphasis will be placed on exposure to the breadth of research possible in the educational field.

PreRequisites: EDSP5015 - CONTEMPORARY ISSUES IN SPECIAL EDUCATION & INTRO TO RESEARCH

EDSP5040
INTRO TO EDUCATION OF PERSONS WITH AUTISM SPECTRUM DISORDER
Credits (Min/Max): 3/3
This introductory course fulfills part of the requirements for those wishing to obtain an ASD Endorsement from the Pennsylvania Department of Education. It is designed to provide students with an overview of characteristics and learning traits, classification systems, assessment strategies/issuses, approaches, and interventions related to individuals with autism spectrum disorders (ASD). Special emphasis is placed on collaboration, adapting instruction and use of evidence based interventions. Specific attention will be devoted to review of the Comprehensive Autism Assessment Planning System and principles of Applied Behavior Analysis. Field experiences are embedded in this course.

PreRequisites: EDSP5040 - INTRO TO EDUCATION OF PERSONS WITH AUTISM SPECTRUM DISORDER

EDSP5045
ADVANCED STUDIES IN BEHAVIOR
Credits (Min/Max): 3/3
This course fulfills part of the requirements for those wishing to obtain an ASD Endorsement from the Pennsylvania Department of Education. This course provides an in-depth review of applied behavior analytic techniques including: conducting behavioral assessments, completing environmental assessments and making adaptations, designing effective behavior change programs, and applying behavioral procedures consonant with ethical standards. Teachers will learn to apply behavior analytic principles toward the improvement of socially significant behaviors in a wide range of settings as well as to evaluate the effects of behavioral procedures. Functional Behavior Assessments (FBA), behavior supports, antecedent management, and encouraging positive alternative behaviors and crisis management will be addressed. Evidence-based prevention and intervention strategies will be emphasized. This course will equip teachers to design instruction and supports in order to encourage positive changes in classroom behavior. Field Experiences are embedded in this course.

PreRequisites: EDSP5040 - INTRO TO EDUCATION OF PERSONS WITH AUTISM SPECTRUM DISORDER

EDSP5050
COMMUNICATION & SOCIAL SKILLS INSTRUCTION FOR PERSONS WITH AUTISM SPECTRUM DISORDER
Credits (Min/Max): 3/3
This course on communication and social skills instruction fulfills part of the requirements for those wishing to obtain an ASD Endorsement from the Pennsylvania Department of Education. It addresses normal language and communication development and the language development of students with Autism Spectrum Disorder. Teachers will examine the language-behavior connection, how language delays can lead to social incompetence, and how language can be supplemented with augmentative and alternative interventions. Specific research validated instructional strategies focusing on the assessment and development of social and academic language skills are emphasized. This course explores assistive technology as a research supported tool to improve access to and participation in the general education curriculum. In addition, students will integrate assistive technology in lesson planning to meet students' individual needs. Field experiences are embedded in this course.

PreRequisites: EDSP5040 - INTRO TO EDUCATION OF PERSONS WITH AUTISM SPECTRUM DISORDER

EDSP5055
ADVANCED TOPICS FOR PERSONS WITH AUTISM SPECTRUM DISORDER: CURRICULUM & INSTRUCTION
Credits (Min/Max): 3/3
This course on advanced issues related to autism fulfills part of the requirements for those wishing to obtain an ASD Endorsement from the Pennsylvania Department of Education. In addition to completing a field experience upon completion of this course students will be able to demonstrate knowledge of the variety of programming options available to children and families, discuss non-traditional methods and interventions related to past and present etiologies and treatments of autism including efficacy research; complete research on social skills programs for students with an ASD in order to be able to advocate for social skills programming; complete an intervention assessment tool and create specially designed instruction for a student on the spectrum, and additionally reflect on issues that affect both children with the diagnosis and their families. Field experiences are embedded in this course.

PreRequisites: EDSP5045 - ADVANCED STUDIES IN BEHAVIOR

EDSP6020
ADVANCED INSTRUCTIONAL STRATEGIES & ASSISTIVE TECHNOLOGY
Credits (Min/Max): 3/3
The purpose of this graduate level course is to prepare Master's Degree Candidates to provide evidenced-based instructional techniques to students with disabilities in inclusion settings. An emphasis is placed on results of research and proven methods of instruction including: modifications and adaptations of materials, co-teaching models, learning strategies, lesson planning, assessment, and transitioning. The purpose and use of assistive technology will also be highlighted.

EDSP6025
RESEARCH BASED ASSESSMENT METHODS & SEMINAR
Credits (Min/Max): 3/3
The purpose of this graduate level course is to prepare Master's Degree Candidates to use valid and reliable assessment practices to improve their instruction and to minimize bias. This course will focus on designing and implementing assessments to evaluate the effectiveness of practices and programs for individuals with exceptionalities. In addition, this is the capstone course for the Master's Degree in Special Education program, so Master's Degree Candidates will present their original research projects as a culminating activity.

PreRequisites: EDSP5035 - RESEARCH METHODS

EDUC1010
INTRO TO EDUCATION & FIELD EXPERIENCE
Credits (Min/Max): 3/3
The purpose of this course is to serve as an introduction to the teaching profession. Students will explore the qualifications for becoming an effective teacher, and will observe classroom teachers across grade levels. Current trends and conditions of education will also be studied. A field experience is a required component of the course.

EDUC4057
EDUCATION-INDEPENDENT STUDY
Credits (Min/Max): 1/12
An independent study is an in-depth examination of a particular topic, under the supervision of a qualified instructor. Independent study is not a substitute for a formal course or graduation requirement. The course is limited to those few students who have demonstrated an unusual level of ability and an intense commitment to a particular area.

ELED4040B
TEACHING MATH PRACTICUM
Credits (Min/Max): 2/2
This course provides a weekly-supervised field placement practicum and seminar based on the Methods of Teaching Math Course. The student will be assigned a small group of children in which the college student will be required to diagnose the childrens needs and then create and implement plans that focus on the diagnosis found.

PreRequisites: ELED4040 - METHODS OF TEACHING MATH

ENED3010
METHODS OF TEACHING & EVALUATING ENGLISH
Credits (Min/Max): 3/3
This course is designed to give the student a broad background in literature for children from pre-school through seventh grade, to explore assumptions that form the basis of what is the best literature for children, to practice creative projects designed to encourage and enrich reading, and to evaluate children's literature as an image-maker and means of transmitting values.

PRERequisites: ENGL1011 - COLLEGE WRITING I

ENED3013
CHILDREN'S LITERATURE
Credits (Min/Max): 3/3
This course is designed to give the student a broad background in literature for children from pre-school through 7th grade, to explore assumptions that form the basis of what is the best literature for children, to practice creative projects designed to encourage and enrich reading, and to evaluate children's literature as an image maker and means of transmitting values.

PreRequisites: ENGL1012 - COLLEGE WRITING II

ENED3030
LITERATURE OF ADOLESCENTS & YOUNG ADULTS
Credits (Min/Max): 3/3
This course is designed to give the prospective middle and/or high school English teacher a familiarity with the literature adolescents choose to read, enjoy, and find relevant to their lives. It will present the reasons why teenage readers make the choices that they do and review sources of materials teenagers will read with pleasure. It is also presented to help the prospective professional educator develop a positive attitude toward this kind of literature.

PreRequisites: ENGL1012 - COLLEGE WRITING II

ENED3051
ADVANCED FIELD EXPERIENCE
Credits (Min/Max): 3/3
In this course, you will learn and apply the definition, components, principles, and strategies of effective classroom management. In addition, you will explore the topics that contribute to developing a positive learning environment for students. These topics include: diversity, motivation theories and strategies, brain-based learning, planning physical spaces, instructional strategies, and assessment. A data and reflection driven 25 hour field experience will be completed in local district classrooms. The final project includes the development of a portfolio reflecting the range of campus and field-based experiences. A rubric will guide you through this process.
ENGL1010
PRACTICUM: COLLEGE READING & WRITING
Credits (Min/Max): 6/6
This course is designed to prepare college freshmen for reading and writing at the college level.

ENGL1011
COLLEGE WRITING I
Credits (Min/Max): 3/3
This course engages students in the reading and writing practices essential to academic life by requiring students to read both with and against the grain of complex texts and to write in response to them.

ENGL1011H
COLLEGE WRITING I-HONORS
Credits (Min/Max): 3/3
This course engages students in the reading and writing practices essential to academic life by requiring students to read both with and against the grain of complex texts and to write in response to them. As this is an Honors course, the schedule of reading and writing assignments is more challenging than the standard composition course in terms of both pace and content. In keeping with the Honors curriculum guidelines, this course also integrates one or more elements of the La Roche College mission (Global, Intercultural, or Social Justice focus) into its core reading and writing objectives.

ENGL1011L
COLLEGE WRITING-LAB
Credits (Min/Max): 0/0
This mandatory course supports College Writing I, emphasizing on-demand timed writing, revision, and control of error.

ENGL1012
COLLEGE WRITING II
Credits (Min/Max): 3/3
This course is designed to teach concise and effective expository writing, focusing on various aspects of critical analysis and the documented research paper.
PreRequisites: ENGL1011 - COLLEGE WRITING I

ENGL1012H
COLLEGE WRITING II-HONORS
Credits (Min/Max): 3/3
This course engages students in the reading and writing practices essential to academic life by requiring students to read both with and against the grain of complex texts and to write in response to them. As this is an Honors course, the schedule of reading and writing assignments is more challenging than the standard composition course in terms of both pace and content. In keeping with the Honors curriculum guidelines, this course also integrates one or more elements of the La Roche College mission (Global, Intercultural, or Social Justice focus) into its core reading and writing objectives.
PreRequisites: ENGL1011 - COLLEGE WRITING I

ENGL1050
METHODS OF TEACHING WRITING: COMPOSITION
Credits (Min/Max): 1/1
This is the first in a series of four one-credit courses designed to prepare students to teach academic writing at the secondary or post-secondary levels and/or to work in a secondary or college writers center.

ENGL2010
INTRO TO LITERARY STUDY
Credits (Min/Max): 3/3
This seminar introduces students majoring in each of the three English programs to the study of literature as an academic discipline. Key literary terms and concepts (genre, style, figurative language, poetics, etc.), central tenets of literary-critical analysis (multiple interpretive strategies, schools of theory, etc.), and basic methodologies of literary study (research techniques, MLA-style documentation, etc.) will be covered. The course will thus prepare English majors at an early point in their careers to enter into the habits of thought and practice characteristic of their chosen field.
PreRequisites: ENGL1011 - COLLEGE WRITING I

ENGL2012
AMERICAN ETHNIC LITERATURE
Credits (Min/Max): 3/3
A study of writing about American ethnicity. Readings usually include essays, poems, plays and prose fiction.
ENGL2021
WORLD LITERATURE I (SLLT1002)
Credits (Min/Max): 3/3
A study of selected works in a variety of genres centered primarily around major literary movements from antiquity through the Renaissance.
Cross-listed with SLLT1002

ENGL2022
WORLD LITERATURE II (SLLT1010)
Credits (Min/Max): 3/3
A study of selected works in a variety of genres centered primarily around major literary movements from the Renaissance through contemporary literature. Cross-listed with SLLT1010

ENGL2029
BUSINESS COMMUNICATIONS
Credits (Min/Max): 3/3
A study of and practice in writing of business reports and letters of various types, including resumes and letters of application. The course includes practice in oral reports, conferences, job interviews and other situations, both written and oral, in which effective communication is required.
PreRequisites: ENGL1012 - COLLEGE WRITING II

ENGL2030
TECHNICAL WRITING
Credits (Min/Max): 3/3
Designed to apply the basic principles of communication to technical information so that the student can learn to present complex technical messages in the clearest possible way.
PreRequisites: ENGL1012 - COLLEGE WRITING II

ENGL2036
ISSUES IN AMERICAN LIT I (SLLT1013)
Credits (Min/Max): 3/3
Literature from Puritan times up to the Civil War will be examined as it portrays such issues as responses to a new environment, ecology, ethnic and sexual stereotyping, literature as didactic message or entertainment, ethical choice, pessimistic and optimistic views of human nature. The course will also introduce basic technical elements for each genre used by American authors. Cross-listed with SLLT1013

ENGL2039
ISSUES IN AMERICAN LIT II (SLLT1011)
Credits (Min/Max): 3/3
Literature from the time of the Civil War to Post World War II will be examined as it portrays such issues as our pluralistic society, war, death, characters caught in a limiting environment, responses to the age of anxiety, protest, evolving attitudes toward male and female identity and relationships, ethical responsibility, disenchantment, reconciliation and the celebration of the human potential. The course will also introduce basic technical elements of each genre used by American authors. Cross-listed with SLLT1011

ENGL2040
CREATIVE WRITING I
Credits (Min/Max): 3/3
A course designed to stimulate creative writing in prose and poetry with emphasis upon the short story.

ENGL2043
FILM ANALYSIS: FORM, HIST, IDEOLOGY
Credits (Min/Max): 3/3
This course will introduce students to the terminology, methodologies, and practice of cinematic analysis. We will approach films as complex, multi-layered texts that can be viewed through diverse, intersecting lenses; beginning with an examination of the form principles of film, we will progress to a consideration of film as historical, cultural, and ideological product, one that both shapes and is shaped by the beliefs and practices of the cultures in which it is generated. Class time will be divided between film viewing and film analysis, the ultimate purpose of the course being to prepare students to become active, critical viewers of film.
PreRequisites: ENGL1012 - COLLEGE WRITING II

ENGL2045
NATIVE AMERICAN LITERATURE
Credits (Min/Max): 3/3
In this class, we will read selected works of Native American literature (including political writing, oral literature, autobiography, and contemporary fiction), as well as selected critical works that raise questions about the primary texts: questions of form, definition, and so on. The course is not a survey; though we'll be reading a good number of texts, I've made no attempt to cover the "whole" range of Native American literatures. Not only is that impossible, but the very idea of wholeness is problematic in my eyes, particularly (as we will see) when discussing texts that fall under a heading so historically and theoretically troublesome as that of "Native American literatures". What we will do in the class, instead, is employ particular texts as occasions for reflection, discussion, and debate. In this way, each student will have experienced enough of the range, complexity, and significance of Native American literatures to explore the field independently after the class comes to an end.

ENGL2050
WRITER'S CENTER; METHODS OF TEACHING WRITING
Credits (Min/Max): 1/1
This is the second in a series of four one-credit courses designed to prepare students to teach academic writing at the secondary or post-secondary levels and/or to work in a secondary or college writers' center. This course addresses one-on-one and small group tutorial work in a writers' center.

ENGL3011
READINGS IN CONTEMPORARY NON-FICTION
Credits (Min/Max): 3/3
This course will introduce you to the genre of creative contemporary American nonfiction, sometimes called literary journalism. This course will engage you in reading and responding to an array of creative nonfiction works, ranging from newspaper articles, to magazine pieces, to book-length works. This course will provide you with a broad understanding and practical exposure to the craft of contemporary American creative nonfiction. The course is intended as the first step in a two-step sequence that will provide students with the skills needed to produce their own creative nonfiction works, with publication of those works as their ultimate goal. The intent of this course is to support, complement and augment other established courses in the curriculum, primarily Journalism I and II, Advanced Exposition, Writing Creative Contemporary Nonfiction, and Creative Writing.
PreRequisites: ENGL1012 - COLLEGE WRITING II

ENGL3012
SPECIAL TOPICS IN COMPOSITION
Credits (Min/Max): 3/3
These topics courses are writing workshops designed to allow students to write in a particular genre and/or for a designated audience with the support of a publishing writer and the other members of the workshop.

ENGL3014
WORLD MYTHOLOGY
Credits (Min/Max): 3/3
A study of myths and mythic patterns in literature from a variety of cultures. Because of the vast quantity of literature involving mythology, the course emphasizes certain themes or patterns, for example, the journey of the hero or heroine, patterns of transformation and mythic motifs.

ENGL3015
STUDIES IN LITERATURE(SLLT1015):
THEATER IN THE CITY: Theater in the City is a six-week summer course, which meets on Tuesdays on campus and sees a play on Thursday at one of the city's many theaters. Summer 2012 the planned selections are Noel Coward's "Private Lives" (Pittsburgh Public Theater); Lee Hall's "The Pitman Painters" (Irish and Classical Theater); Maggie Kate Coleman's "Pop" (City Theater); Frank Floyd Hightower's "The House That Carol Built" (Kuntu Repertory Theater); and August Wilson's "Gem of the Ocean" (Pittsburgh Playwrights at the August Wilson Theater). Cross-listed with SLLT1015 WOMEN IN LITERATURE: This course explores the novel as it has been practiced by women writers and examines specific contributions they have made to the novel. It is particularly appropriate to study women writers in the context of the novel form, since historically the rise of the novel occurs concurrently with the emergence of women writers. Each novel will be considered individually as well as in relation to its larger cultural context and to the other novels under study. Authors generally include Mary Wollstonecraft, Virginia Woolf, Kate Chopin, Charlotte Perkins Gilman, Jean Rhys, Alice Walker, Toni Morrison, Amy Tan, Sue Monk Kidd, Linda Hogan, and Katherine Stockett. Cross-listed with SLLT1015 Topics from world literature involving various literary genres and themes. Possible semester topics include: Black Literature, Contemporary Literature, Women in Literature, and Biblical Themes in Literature.
PreRequisites: ENGL1012 - COLLEGE WRITING II

ENGL3017
IRISH LITERATURE
Credits (Min/Max): 3/3
A study of Irish literature from Ancient Gaelic times, through the Irish Renaissance and up to contemporary times. Readings, in English, involve a variety of genres: myths, sagas, lyric poems, plays and short stories. Specific authors include Synge, Yeats, Lady Gregory, Joyce, O'Casey, and Kate O'Brien.
PreRequisites: ENGL1012 - COLLEGE WRITING II
ENGL3018
DRAMATIC LITERATURE
Credits (Min/Max): 3/3
A study of the principal types of drama consisting of plays selected from ancient to contemporary times and representing a variety of cultures, usually Greek, English, American, Irish, Russian, and Spanish. Dramatic theory and criticism will be examined and critical writing about drama will be taught.

ENGL3019
MODERN AMERICAN DRAMA
Credits (Min/Max): 3/3
A study of selected plays of 20th century American dramatists, from the 1920's to the present. Plays studied include those of O'Neill, Williams, Albee, Miller, Hellman, Kushner, Wilson & Hansberry. The plays are studied as drama and as literature.
PreRequisites: ENGL1012 - COLLEGE WRITING II

ENGL3020
MODERN AMERICAN NOVEL
Credits (Min/Max): 3/3
A study of major novels from the rise of realism to the present. The course focuses on the work of such established writers as Fitzgerald, Faulkner and Steinbeck, but may include some fiction by contemporary writers.

ENGL3021
SHAKESPEARE ON FILM(SLLT1003)
Credits (Min/Max): 3/3
This course is designed to introduce non-majors to literary study through viewing film adaptations of Shakespeare and reading the printed texts. By examining the relationship between the texts of the play and their film interpretations, students will examine and analyze dramatic genres central to literary study, including tragedies, comedies, histories and romances. Cross-listed with SLLT1003
PreRequisites: ENGL1012 - COLLEGE WRITING II

ENGL3022
DEVELOPMENT OF ENGLISH NOVEL
Credits (Min/Max): 3/3
A study of the novel from its beginnings: selected writings demonstrate the development of the novel as an art form, usually including works of Fielding, Austen, Thackeray, C. Bronte, E. Bronte, Dickens, Hardy, Lawrence and Joyce.

ENGL3023
SHAKESPEARE
Credits (Min/Max): 3/3
The reading and analysis of Shakespearean drama. Plays studied usually include: A Midsummer Night's Dream, Richard II, Measure for Measure, Henry IV, Much Ado About Nothing, As You Like It, Twelfth Night, Othello, King Lear, Macbeth and The Winter's Tale.
PreRequisites: ENGL1012 - COLLEGE WRITING II

ENGL3024
LOVE&WAR OLD&MEDIEVAL ENG LIT
Credits (Min/Max): 3/3
Literary works are selected from the genres of epic, romance, lyric and ballad. Selections may vary but usually include: Beowulf, Troilus and Cressida, Tristan and Isolde, Sir Gawain and the Green Knight, and The Canterbury Tales.
PreRequisites: ENGL1012 - COLLEGE WRITING II

ENGL3025
RENAISSANCE ENGLISH POETRY
Credits (Min/Max): 3/3
A study of the non-dramatic poetry of Sidney, Spenser, Shakespeare, Marlowe, Donne, Jonson, Herbert, Marvell, Vaughan and short poems of Milton.
PreRequisites: ENGL1012 - COLLEGE WRITING II

ENGL3027
NINETEENTH CENTURY BRITISH POETRY
Credits (Min/Max): 3/3
A survey of the romantic poetry of Burns, Blake, Wordsworth, Coleridge, Byron, Shelley and Keats; and of the Victorian poetry of Tennyson, Browning, Arnold, the Rossettis, Clough, Hopkins and Hardy.
ENGL3028
EARLY 20th CENTURY BRITISH LIT
Credits (Min/Max): 3/3
A study of British literature written during the first half of the twentieth century. Novels and poems studied usually include the works of Conrad, Forster, Woolf, Bowen, Yeats, Eliot, Joyce, Owens and Thomas.

ENGL3029
LITERARY THEORY & CRITICISM
Credits (Min/Max): 3/3
This course will introduce advanced students to literary theory and contemporary methods of literary criticism and research.
PreRequisites: ENGL1012 - COLLEGE WRITING II

ENGL3031
JOURNALISM I
Credits (Min/Max): 3/3
An introductory course in journalistic style and a variety of formats. Students learn editing, interviewing and reporting skills.
PreRequisites: ENGL1012 - COLLEGE WRITING II

ENGL3032
JOURNALISM II
Credits (Min/Max): 3/3
An advanced study of diverse journalistic formats: feature writing, broadcast writing and specialized reporting, e.g., business, sports, government. Emphasis is placed on journalistic ethics, responsibility and the law.
PreRequisites: ENGL1012 - COLLEGE WRITING II

ENGL3033
AMERICAN ENG:ITS HIST&DEVELOPMT
Credits (Min/Max): 3/3
A study of the linguistic evolution of the American English language from the older stages of English to current usage in the United States.
PreRequisites: ENGL1012 - COLLEGE WRITING II

ENGL3034
WRITING FOR ADVERTISING
Credits (Min/Max): 3/3
A course designed to sharpen the student's writing skills in the context of copy writing for advertising. It will provide extensive practice in writing copy that appeals to a variety of audiences.
PreRequisites: ENGL1012 - COLLEGE WRITING II

ENGL3035
WRITING FOR TV & RADIO
Credits (Min/Max): 3/3
A course designed to give students practice in the writing of copy for the broadcast media. Included is the writing of news and sports reports, commercials, features and documentaries, interview techniques, and mini-dramas.

ENGL3037
ADVANCED EXPOSITION
Credits (Min/Max): 3/3
An advanced course in essay writing with emphasis on improving writing style. Methods include an examination of professional writings, frequent written assignments, detailed criticism of student's papers and evaluation of revisions to increase writing flexibility and precision.

ENGL3040
TEACHING LITERATURE I: METHODS OF TEACHING
Credits (Min/Max): 1/1
This first in a two-part sequence of one-credit courses begins the process of preparing students to teach literature at the secondary school level. Students enrolled in these courses will simultaneously be enrolled in a 200-level literature survey; the courses will provide occasion for reflection on and work with the materials and methodologies of the teaching of literature. The sequence thus provides a foundation for theoretical and practical fluency that will be enhanced throughout the English Education curriculum, culminating in Methods of Teaching English and in the Student Teaching experience.

ENGL3041
TEACHING LITERATURE II: METHODS OF TEACHING ENGLISH
Credits (Min/Max): 1/1
This second in a two-part sequence of one-credit courses begins the process of preparing students to teach literature at the secondary school level. Students enrolled in these courses will simultaneously be enrolled in a 200-level literature survey; the courses will provide occasion for reflection on and work with the material and methodologies of the teaching of literature. The sequence thus provides a foundation for theoretical and practical fluency that will be enhanced throughout the English Education curriculum, culminating in Methods of Teaching English and in the Student Teaching experience.

ENGL3042
WRITING FOR NON-PROFITS
Credits (Min/Max): 3/3
This course is designed to teach the basic principles of public relations and grant writing for non-profit organizations. It will combine theory and practice, discussing all the key public relations vehicles, including news releases, press kits, brochures, newsletters, annual reports, direct mail, advertising, the Internet, fund raising, and special events planning.
PreRequisites: ENGL1012 - COLLEGE WRITING II

ENGL3045
FICTION WRITING WORKSHOP
Credits (Min/Max): 3/3
This special topics course enables students to develop the craft of fiction-writing. Subjects to be covered include audience, point of view, characterization, world-building, story arc, dialogue, editing/revising, and publication. Students will develop works of fiction with the support of a publishing writer and the other members of the workshop, and will be provided guidance in submitting polished works for possible publication.

ENGL3047
THEATER IN THE CITY (SLLT1029)
Credits (Min/Max): 3/3
This course is designed to teach students the basic components of theater, and to experience various plays being performed in Pittsburgh. It will also examine the history of many of the local theaters in the city. Cross-listed with SLLT1029

ENGL3050
GENRE; METHODS OF TEACHING
Credits (Min/Max): 1/1
This is the third in a series of four one-credit courses designed to prepare students to teach academic writing at the secondary or post-secondary levels and/or to work in a secondary or college writers' center.

ENGL3051
PUBLICATION DESIGN(GCDN3051)
Credits (Min/Max): 3/3
Intended for prospective designers as well as writers, the course will educate students in newspaper graphics and design. Hands-on experience will require participation in the La Roche Courier. Students will review and redesign the existing paper, and regularly participate with editorial illustration and photography, ad layout, design and production. Students will achieve an understanding of print production, including the utilization of four-color process and offset printing. Cross-listed with GCDN3051
PreRequisites: ENGL1012 - COLLEGE WRITING II

ENGL3062
CONTEMPORARY LITERATURE (SLLT1008)
Credits (Min/Max): 3/3
This course is designed to introduce non-majors to the principles of literary and cultural criticism through the study of a range of prose fiction from the last thirty years of the 20th Century. The focus of the course is to identify and interpret the thematic and stylistic interests of Western and non-Western contemporary fictions from the period, paying special attention to the various ways of understanding or seeing (cultural, political, and psychological) which different cultures bring to the production of literature. By examining, discussing, and writing about these works, students will gain specific insight into a rapidly globalizing literary aesthetic as well as an understanding of modern critical literary analysis. Cross-listed with SLLT1008
PreRequisites: ENGL1011 - COLLEGE WRITING I

ENGL4040
SPECIAL TOPIC IN LITERATURE (SLLT1012)
Credits (Min/Max): 3/3
The "Select Literature" designation covers a range of courses with varying content or "subject" matter but with the common objective of providing non-majors with an opportunity to learn the fundamental principles of literary analysis. Cross-listed with SLLT1012
PreRequisites: ENGL1011 - COLLEGE WRITING I

ENGL4050
SEQUENCING & ASSESSMENT; METHODS OF TEACHING WRITING
Credits (Min/Max): 1/1
This is the fourth in a series of four one-credit courses designed to prepare students to teach academic writing at the secondary or post-secondary levels and/or to work in a secondary or college writers' center.

ENGL4051
ENGLISH-INTERNSHIP I
Credits (Min/Max): 1/6
A field experience in selected professional environments. The student is given the opportunity to integrate theoretical knowledge with practical application under the guidance of professionals at the particular institution to which the student is assigned.

ENGL4052
ENGLISH-INTERNSHIP II
Credits (Min/Max): 1/6
A field experience in selected professional environments. The student is given the opportunity to integrate theoretical knowledge with practical application under the guidance of professionals at the particular institution to which the student is assigned.

ENGL4055
SENIOR SEMINAR
Credits (Min/Max): 3/3
A review of methods of research, documentation and critical practice employed in literary scholarship, appropriate selected readings, oral and written presentation of a seminar paper and class evaluation of each paper presented. Students should have completed 18 English credits beyond ENGL1012 to be eligible.
PreRequisites: ENGL1012 - COLLEGE WRITING II

ENGL4056
RESEARCH IN ENGLISH STUDIES
Credits (Min/Max): 2/4
Individual investigation in the student's field of interest carried out under the supervision of a faculty member. The student is responsible for defining a problem, planning a course of investigation and reporting the results in a critical paper accompanied by an annotated bibliography.

ENGL4057
ENGLISH-INDEPENDENT STUDY
Credits (Min/Max): 0/6
Individual study course that is supervised by a full-time faculty member.

ESLN0070
GENERAL ENGLISH-READING+++ 
Credits (Min/Max): 4/4
Courses in the General English track are designed for adult English language learners who need to improve their English language abilities in everyday, social, academic, and professional situations within U.S. cultural framework. Students will also practice and engage in reading and writing using different genres and experiences, using general and academic vocabulary. These courses will help students to develop strategies to extend their language learning outside of the classroom through fun but challenging theme based information.

ESLN0071
GENERAL ENGLISH-WRITING+++ 
Credits (Min/Max): 4/4
Courses in the General English track are designed for adult English language learners who need to improve their English language abilities in everyday, social, academic, and professional situations within U.S. cultural framework. Students will also practice and engage in reading and writing using different genres and experiences, using general and academic vocabulary. These courses will help students to develop strategies to extend their language learning outside of the classroom through fun but challenging theme based information.

ESLN0072
GENERAL ENGLISH-SPEAKING+++ 
Credits (Min/Max): 4/4
Courses in the General English track are designed for adult English language learners who need to improve their English language abilities in everyday, social, academic, and professional situations within U.S. cultural framework. Students will improve their fluency in speaking and increase their listening comprehension of conversational interactions and extended discourse. Classroom activities will simulate authentic communicative tasks relevant to students' lives. These courses will help students to develop strategies to extend their language learning outside of the classroom through fun but challenging theme based information.

ESLN0073
GENERAL ENGLISH-GRAMMAR+++ 
Credits (Min/Max): 4/4
Courses in the General English track are designed for adult English language learners who need to improve their English language abilities in everyday, social, academic, and professional situations within U.S. cultural framework. These courses will help students to develop strategies to extend their language learning outside of the classroom through fun but challenging theme based information.

ESLN0074
GENERAL ENGLISH-LISTENING+++  
Credits (Min/Max): 4/4  
Courses in the General English track are designed for adult English language learners who need to improve their English language abilities in everyday, social, academic, and professional situations within U.S. cultural framework. Students will improve their fluency in speaking and increase their listening comprehension of conversational interactions and extended discourse. Classroom activities will simulate authentic communicative tasks relevant to students' lives. These courses will help students to develop strategies to extend their language learning outside of the classroom through fun but challenging theme based information.

ESLN0085
LOW BEGINNER LISTENING+++  
Credits (Min/Max): 4/4  
This course is part of a proficiency-based language program designed to provide maximum opportunities for students to acquire listening skills in English as a Second Language at the "Novice-High" level on the national scale as established by the American Council on the Teaching of Foreign Languages (ACTFL) and the Educational Testing Service (ETS). The course does not apply toward college graduation credit requirements.

ESLN0086
LOW BEGINNING READING++  
Credits (Min/Max): 4/4  
This course is part of a proficiency-based language program designed to provide maximum opportunities for students to acquire reading skills in English as a Second Language at the "Novice-High" level on the national scale as established by the American Council on the Teaching of Foreign Languages (ACTFL) and the Educational Testing Service (ETS). The course does not apply toward college graduation credit requirements.

ESLN0087
LOW BEGINNING WRITING++  
Credits (Min/Max): 4/4  
This course is part of a proficiency-based language program designed to provide maximum opportunities for students to acquire writing skills in English as a Second Language at the "Novice-High" level on the national scale as established by the American Council on the Teaching of Foreign Languages (ACTFL) and the Educational Testing Service (ETS). The course does not apply toward college graduation credit requirements.

ESLN0088
LOW BEGINNING SPEAKING++  
Credits (Min/Max): 4/4  
This course is part of a proficiency-based language program designed to provide maximum opportunities for students to acquire speaking skills in English as a Second Language at the "Novice-High" level on the national scale as established by the American Council on the Teaching of Foreign Languages (ACTFL) and the Educational Testing Service (ETS). The course does not apply toward college graduation credit requirements.

ESLN0089
LOW BEGINNING GRAMMAR++  
Credits (Min/Max): 4/4  
This course is a part of a proficiency-based language program designed to provide maximum opportunities for students to acquire the grammar skills necessary to read, write, and speak and understand English as a Second Language at the "Novice-High" level on the national scale as established by the American Council on the Teaching of Foreign Languages (ACTFL) and the Educational Testing Service (ETS). The course does not apply toward college graduation credit requirements.

ESLN0090
HIGH BEGINNER READING++  
Credits (Min/Max): 4/4  
This course is part of a proficiency-based language program designed to provide maximum opportunities for students to acquire reading skills in English as a Second Language at the "Intermediate-Low" to "Intermediate-Mid" levels on the national scale as established by the American Council on the Teaching of Foreign Languages (ACTFL) and the Educational Testing Service (ETS). The course does not apply toward college graduation credit requirements.

ESLN0091
HIGH BEGINNER WRITING++  
Credits (Min/Max): 4/4
This course is part of a proficiency-based language program designed to provide maximum opportunities for students to acquire writing skills in English as a Second Language at the "Intermediate-Low" to "Intermediate-Mid" levels on the national scale as established by the American Council on the Teaching of Foreign Languages (ACTFL) and the Educational Testing Service (ETS). The course does not apply toward college graduation credit requirements.

ESLN0092
HIGH BEGINNER SPEAKING++
Credits (Min/Max): 4/4
This course is part of a proficiency-based language program designed to provide maximum opportunities for students to acquire speaking skills in English as a Second Language at the "Intermediate-Low" to "Intermediate-Mid" levels on the national scale as established by the American Council on the Teaching of Foreign Languages (ACTFL) and the Educational Testing Service (ETS). The course does not apply toward college graduation credit requirements.

ESLN0093
HIGH BEGINNER GRAMMAR++
Credits (Min/Max): 4/4
This course is part of a proficiency-based language program designed to provide maximum opportunities for students to acquire grammar skills in English as a Second Language at the "Intermediate-Low" to "Intermediate-Mid" levels on the national scale as established by the American Council on the Teaching of Foreign Languages (ACTFL) and the Educational Testing Service (ETS). The course does not apply toward college graduation credit requirements.

ESLN0094
HIGH BEGINNER LISTENING++
Credits (Min/Max): 4/4
This course is part of a proficiency-based language program designed to provide maximum opportunities for students to acquire listening skills in English as a Second Language at the "Intermediate-Low" to "Intermediate-Mid" levels on the national scale as established by the American Council on the Teaching of Foreign Languages (ACTFL) and the Educational Testing Service (ETS). The course does not apply toward college graduation credit requirements.

ESLN0100
INTERMEDIATE READING++
Credits (Min/Max): 4/4
This course is part of a proficiency-based language program designed to provide maximum opportunities for students to acquire reading skills in English as a Second Language at the "Intermediate-Mid" to "Intermediate-High" levels on the national scale as established by the American Council on the Teaching of Foreign Languages (ACTFL) and the Educational Testing Service (ETS). This goal will be realized through maximum exposure to authentic target-language readings, intensive study of vocabulary, and the development of reading skills.

ESLN0101
INTERMEDIATE WRITING++
Credits (Min/Max): 4/4
This course is part of a proficiency-based language program designed to provide maximum opportunities for students to acquire writing skills in English as a Second Language at the "Intermediate-Mid" to "Intermediate-High" levels on the national scale as established by the American Council on the Teaching of Foreign Languages (ACTFL) and the Educational Testing Service (ETS). This goal will be realized through maximum exposure to authentic target-language readings, intensive study of vocabulary, and the development of reading skills.

ESLN0102
INTERMEDIATE SPEAKING++
Credits (Min/Max): 4/4
This course is part of a proficiency-based language program designed to provide maximum opportunities for students to acquire speaking skills in English as a Second Language at the "Intermediate-Mid" to "Intermediate-High" levels on the national scale as established by the American Council on the Teaching of Foreign Languages (ACTFL) and the Educational Testing Service (ETS). This goal will be realized through maximum exposure to authentic target-language readings, intensive study of vocabulary, and the development of reading skills.

ESLN0103
INTERMEDIATE GRAMMAR++
Credits (Min/Max): 4/4
This course is part of a proficiency-based language program designed to provide maximum opportunities for students to acquire grammar skills in English as a Second Language at the "Intermediate-Mid" to "Intermediate-High" levels on the national scale as established by the American Council on the Teaching of Foreign Languages (ACTFL) and the Educational Testing Service (ETS). This goal will be realized through maximum exposure to authentic target-language readings, intensive study of vocabulary, and the development of reading skills.

ESLN0104
INTERMEDIATE LISTENING++
Credits (Min/Max): 4/4
This course is part of a proficiency-based language program designed to provide maximum opportunities for students to develop listening skills in English as a Second Language at the "Intermediate-Mid" to "Intermediate-High" levels on the national scale as established by the American Council on the Teaching of Foreign Languages (ACTFL) and the Educational Testing Services (ETS). Students will increase their listening skills through practice with prepared listening texts, dialogs, discussions on related topics, experiences with native English speaking guest speakers and internet and multimedia resources.

ESLN0105
HIGH INTERMEDIATE READING++
Credits (Min/Max): 4/4
This course is a proficiency-based language program designed to provide maximum opportunities for students to develop listening skills in English as a Second Language at the "Intermediate-Mid" to "Intermediate-High" levels on the national scale as established by the American Council on the Teaching of Foreign Languages (ACTFL) and the Educational Testing Service (ETS). This goal will be realized through maximum exposure to authentic target-language readings, intensive study of vocabulary, and the development of the following reading skills: (1) using context clues to guess word meanings; (2) understanding the main ideas of paragraphs and essays with some structural complexity; (3) skimming for main ideas; (4) scanning for specific information; (5) understanding inference and restatement; (6) reading paragraphs and essays for detailed understanding.

ESLN0106
HIGH INTERMEDIATE WRITING++
Credits (Min/Max): 4/4
This course is a proficiency-based language program designed to provide maximum opportunities for students to acquire writing skills in English as a Second Language at the "Intermediate-High" to "Advanced" levels on the national scale as established by the American Council on the Teaching of Foreign Languages (ACTFL) and the Educational Testing Service (ETS). This goal will be realized through maximum exposure to authentic target-language readings, intensive study of vocabulary, and the development of the following reading skills: (1) using context clues to guess word meanings; (2) understanding the main ideas of paragraphs and essays with some structural complexity; (3) skimming for main ideas; (4) scanning for specific information; (5) understanding inference and restatement; (6) reading paragraphs and essays for detailed understanding.

ESLN0107
HIGH INTERMEDIATE SPEAKING++
Credits (Min/Max): 4/4
This course is a proficiency-based language program designed to provide maximum opportunities for students to acquire speaking skills in English as a Second Language at the "Intermediate-High" to "Advanced" levels on the national scale as established by the American Council on the Teaching of Foreign Languages (ACTFL) and the Educational Testing Service (ETS). This goal will be realized through maximum exposure to authentic target-language readings, intensive study of vocabulary, and the development of the following reading skills: (1) using context clues to guess word meanings; (2) understanding the main ideas of paragraphs and essays with some structural complexity; (3) skimming for main ideas; (4) scanning for specific information; (5) understanding inference and restatement; (6) reading paragraphs and essays for detailed understanding.

ESLN0108
HIGH INTERMEDIATE GRAMMAR++
Credits (Min/Max): 4/4
This course is a proficiency-based language program designed to provide maximum opportunities for students to acquire grammar skills in English as a Second Language at the "Intermediate-High" to "Advanced" levels on the national scale as established by the American Council on the Teaching of Foreign Languages (ACTFL) and the Educational Testing Service (ETS). This goal will be realized through maximum exposure to authentic target-language readings, intensive study of vocabulary, and the development of the following reading skills: (1) using context clues to guess word meanings; (2) understanding the main ideas of paragraphs and essays with some structural complexity; (3) skimming for main ideas; (4) scanning for specific information; (5) understanding inference and restatement; (6) reading paragraphs and essays for detailed understanding.

ESLN0120
HIGH INTERMEDIATE LISTENING++
Credits (Min/Max): 4/4
This course is part of a proficiency-based language program designed to provide maximum opportunities for students to develop listening skills in English as a Second Language at the "Intermediate-High" to "Advanced-Plus" levels on the national scale as established by the American Council on the Teaching of Foreign Languages (ACTFL) and the Educational Testing Service (ETS). Students will increase their listening skills through practice with prepared and authentic listening texts, dialogs, discussions on related topics, listening and note taking activities, experiences with native English speaking guest speakers and internet and multimedia resources.

ESLN1009
ADVANCED READING
Credits (Min/Max): 4/4
This course is part of a proficiency-based language program designed to provide maximum opportunities for students to acquire reading skills in English as a Second Language at the "Advanced" to "Advanced-Plus" levels on the national scale as established by the American Council on the Teaching of Foreign Languages (ACTFL) and the Educational Testing Service (ETS).
ESLN1010
ADVANCED WRITING
Credits (Min/Max): 4/4
This course is part of a proficiency-based language program designed to provide maximum opportunities for students to acquire writing skills in English as a Second Language at the "Advanced" to "Advanced-Plus" levels on the national scale as established by the American Council on the Teaching of Foreign Languages (ACTFL) and the Educational Testing Service (ETS).

ESLN1011
ADVANCED SPEAKING
Credits (Min/Max): 4/4
This course is part of a proficiency-based language program designed to provide maximum opportunities for students to acquire speaking skills in English as a Second Language at the "Advanced" to "Advanced-Plus" levels on the national scale as established by the American Council on the Teaching of Foreign Languages (ACTFL) and the Educational Testing Service (ETS).

ESLN1012
ADVANCED STRUCTURES OF ACADEMIC ENGLISH
Credits (Min/Max): 4/4
This course is part of a proficiency-based language program designed to provide maximum opportunities for students to acquire grammar skills in English as a Second Language at the "Advanced" to "Advanced-Plus" levels on the national scale as established by the American Council on the Teaching of Foreign Languages (ACTFL) and the Educational Testing Service (ETS).

ESLN1013
INTENSIVE READING
Credits (Min/Max): 4/4
This course is part of a proficiency-based language program designed to provide maximum opportunities for students to acquire reading skills in English as a Second Language at the "Advanced-Plus" to "Superior" levels on the national scale as established by the American Council on the Teaching of Foreign Languages (ACTFL) and the Educational Testing Service (ETS).

ESLN1014
INTENSIVE WRITING
Credits (Min/Max): 4/4
This course is part of a proficiency-based language program designed to provide maximum opportunities for students to acquire reading skills in English as a Second Language at the "Advanced-Plus" to "Superior" levels on the national scale as established by the American Council on the Teaching of Foreign Languages (ACTFL) and the Educational Testing Service (ETS).

ESLN1015
INTENSIVE SPEAKING
Credits (Min/Max): 4/4
This course is part of a proficiency-based language program designed to provide maximum opportunities for students to acquire reading skills in English as a Second Language at the "Advanced-Plus" to "Superior" levels on the national scale as established by the American Council on the Teaching of Foreign Languages (ACTFL) and the Educational Testing Service (ETS).

ESLN1030
ADVANCED LISTENING
Credits (Min/Max): 4/4
This course is part of a proficiency-based language program designed to provide maximum opportunities for students to develop listening skills in English as a Second Language at the "Advanced" to "Advanced Plus" levels on the national scale as established by the American Council on the Teaching of Foreign Languages (ACTFL) and the Educational Testing Services (ETS). Students will increase their listening skills through practice with prepared and authentic listening texts, discussions on related topics, academic listening and note taking activities, experiences with native English speaking guest speakers and internet and multimedia resources.

ESLN4057
ENGLISH SECOND LANG INDEP STUDY
Credits (Min/Max): 1/4
Independent study for non-native speakers of English who have demonstrated a commitment to further study of English writing skills and techniques and/or English reading skills and vocabulary. The student will complete independent study in conjunction with the appropriate ESL faculty.

FINC3031
INVESTMENTS
Credits (Min/Max): 3/3
An analysis of securities and a study of principles of governing the management of investment assets in light of relevant economic factors.
PreRequisites: ACCT2004 - ACCOUNTING II
FINC3032  
FINANCIAL MANAGEMENT  
Credits (Min/Max): 3/3  
An analytical study of external sources and processes of financing. Financial analysis tools, short-and long-term financing, dividend policy and capital budgeting are examined.

PreRequisites: ACCT2004 - ACCOUNTING II

FINC3034  
COMMERCIAL BANK MANAGEMENT  
Credits (Min/Max): 3/3  
This course incorporates a financial framework for students to view banking as a participant in the evolving financial services industry.

PreRequisites: FINC3032 - FINANCIAL MANAGEMENT

FINC3036  
FINANCIAL INSTITUTIONS  
Credits (Min/Max): 3/3  
This course will provide for an understanding of the various types of financial institutions that exist and operate in the American economy. Their relationship and activities in the international environment will also be addressed.

PreRequisites: ADMG1018 - FUNDAMENTALS OF MANAGEMENT

FINC3040  
RISK MANAGEMENT & INSURANCE  
Credits (Min/Max): 3/3  
Identifying and analyzing risk and managing it through insurance and alternative tools are integral to the overall risk management plans of individuals and firms.

PreRequisites: FINC3032 - FINANCIAL MANAGEMENT

FINC4033  
MANAGERIAL FINANCE  
Credits (Min/Max): 3/3  
An advanced course in corporate finance. Case studies utilized to describe a series of decisions facing the corporate managers of domestic and multinational firms as they assess the value of various investment and financial strategies. Practical and conceptual issues facing managers in large and small firms are addressed.

A field experience in a finance position, supervised by a field instructor as well as college faculty. The internship is designed to increase understanding of finance and the finance-related issues and perspectives as they relate to the business environment.

FINC4052  
FINANCE-INTERNSHIP II  
Credits (Min/Max): 1/3  
A field experience in a finance position, supervised by a field instructor as well as college faculty. The internship is designed to increase understanding of finance and the finance-related issues and perspectives as they relate to the business environment.

FVMA1001  
MOTION PICTURE FUNDAMENTALS (PITTSBURGH FILMMAKERS-FLM101)  
Credits (Min/Max): 3/3
Motion Picture Fundamentals is a hands-on introduction to key photographic concepts and the core concepts of self-expression with moving images. Students shoot photographs, digital video and motion picture film to learn the basic principles and techniques of light, composition, camerawork, editing and storytelling. All equipment is provided, including 35mm still cameras, mini-DV video cameras, super 8-film cameras and digital works stations with Apple's Final Cut Express editing program. Those unfamiliar with MAC OS should consider taking "Introduction to Digital" prior to or concurrent with this course. Students pay for film, videotape, and lab costs. Grading is based on student projects and written exams. In addition to tuition, a $70 course fee is charged by PFM. Please note that there are three variations on this course, each with a slightly different emphasis. Motion Picture Fundamentals: Film and Digital Video gives equal weight to filmmaking and to digital video. In the Filmmaking Emphasis section, students work more film than digital video and the Digital Video Emphasis section, students work with more digital video than film. However, students are exposed to all media in all sections.

FVMA1004
INTERNATIONAL FILM HISTORY (PITTSBURGH FILMMAKERS-FLM104)
Credits (Min/Max): 3/3
This course puts into perspective the birth, development, and evolution of the foreign film, concentrating on the influence of political, literary and theatrical traditions, culture and Hollywood on film art from individual nations. Topics covered will include technical and stylistic advances in the German and French silent cinemas, the theory and practice of montage in Soviet films, French cinema of the 1930's, Italian neo-realism, the auteur theory, films of the new wave and contemporary European, Asian and third world cinemas. Grading is based on written exams, class participation and attendance at screenings. In addition to tuition, a $35 course fee is charged.

FVMA1006
FILM PRODUCTION I (PITTSBURGH FILMMAKERS-FLM106)
Credits (Min/Max): 3/3
This course is designed to develop proficiency in the standard procedures of filmmaking and the use if equipment. Students participate in shooting two 16mm films, editing and building soundtracks. Basic aspects of cinematography, lighting, sound and editing are covered, including the use if 16mm camera, sound equipment and digital editing software (Final Cut Pro). Student projects are viewed and critiqued in class. Outside work is necessary for planning shooting, and editing. All equipment is provided, but students pay for their own film and lab expenses. Grading is based on each student's films, exams on technical basics and class participation. In addition to tuition, a $70 course fee is charged.

FVMA1007
ELEMENTS OF FILM (PITTSBURGH FILMMAKERS-FLM107)
Credits (Min/Max): 3/3
This course is an introduction to the critical viewing and understanding of film as an art form. Students learn the vocabulary necessary to analyze film. The function of various film elements is discussed and examples are shown in class from narrative feature films, animation, documentaries and experimental films. Students develop the skills necessary to view, appreciate, understand and discuss film as a complex art, capable of multiple modes of expression and meaning. Grading is based on written exams, homework, and attendance. Outside viewing may be required. In addition to tuition, a $35 course fee is charged.

FVMA1010
INTRO TO FILM THEORY & CRITICISM (PITTSBURGH FILMMAKERS-FLM110)
Credits (Min/Max): 3/3
This course examines the major aesthetic and theoretical issues encountered in film theory and practice. In this introduction to film criticism, students will examine aesthetic and cultural issues as a background to film theory, study the major figures and issues in the field and make connections to related media and cultural analysis. The course will be organized as a reading and lecture experience. Readings should be done in advance and brought to class. The lectures will provide a broad background for the reading, discussing some particular points from the readings in detail. Grading is based on one written exam, one written analysis and class participation. In addition to tuition, a $35 course fee is charged by PFM.

FVMA1015
LIGHTING FUNDAMENTALS (PITTSBURGH FILMMAKERS-FLM/PHT 130)
Credits (Min/Max): 3/3
This course in lighting basics is designed for aspiring photographers, filmmakers & video makers. This complex subject is introduced by concentrating first on learning to see how lighting works in paintings, photographs and motion pictures, deconstructing a variety of images and scenes. Then, students will participate in lighting & shooting projects using still cameras, video cameras & 16mm cameras. Many acclaimed artists are known for their exquisite use of light. Students will discuss & Experience some of these lighting techniques. Students start with simple lighting set-ups & advance to more complex situations. Grading is based on written exams, practical exercises & participation. In addition to tuition, a $70 course fee is charged.

FVMA1020
WRITE-ACT-PRODUCE-DIRECT (PITTSBURGH FILMMAKERS-FLM120)
Credits (Min/Max): 3/3
No matter what your goals are in film, you'll work in a collaborative art form. Understanding inter-related disciplines is crucial to making a successful film. Writers need to know what it takes to produce a particular sequence; directors need to know how to talk to actors; producers need to be able to stay true to a script while maintaining their budget; actors must be able to read scripts for actions, and they need to understand the psychology of directors. Students will experience a little bit of every discipline in this course, spending three weeks dedicated to each area and the final two weeks of the term pulling it all together. Grading is based on assignments and class participation. In addition to tuition, a $35 course fee is charged.

**FVMA1025**
INTRO TO DIGITAL EDITING (PITTSBURGH FILMMAKERS-DIG112)
Credits (Min/Max): 3/3
This course is designed to familiarize students with the possibilities that digital technology offers for the manipulation of still images, sound and motion pictures. After introducing beginners to the Macintosh Operation System, the course allows students to use Final Cut Pro to edit video and sound and Photoshop to manipulate still images and text. Access to Macintosh computers with the necessary software is provided. Grading is based on assignments, a written exam and class participation. In addition to tuition, a $70 course fee is charged by PFM.

**FVMA1035**
ACTING FOR THE CAMERA (PITTSBURGH FILMMAKERS-FLM241)
Credits (Min/Max): 3/3
This course is designed for actors who would like to improve their craft by better understanding the differences between acting for the state and acting for the camera, and for film and television directors who would like to work more effectively with actors. Contrasts between stage and screen acting in specific shooting scripts are examined and followed with appropriate script study, character analysis and practical experience in working before a camera. Course requirements include outside reading, preparation and rehearsal of scenes for taping in class, outside viewing of film and television programs and written analyses of performances. Grading is based on performance, effort and written analysis. In addition to tuition, a $35 course fee is charged.

**FVMA1042**
BASIC DIGITAL PHOTOGRAPHY (PITTSBURGH FILMMAKERS-PHT120)
Credits (Min/Max): 3/3
This class introduces students to the fundamentals of photographic art using digital imaging techniques. Working with digital cameras, Macintosh computers and Epson ink-jet printers, students will complete a number of assignments that emphasize camera controls, print quality, composition and subject matter. Class lectures and demonstrations will cover exposure, quality of light, the use of Light Room for digital file management, image manipulation and digital printing. The class will also be exposed to the work of contemporary and historical photographers. Students should have their own camera; a few digital SLRs will be available for use during the semester. Grading is based on assignments, written exams and a final portfolio. In addition to tuition, a $70 course fee is charged by PFM.

**FVMA1045**
FILM AESTHETICS (PITTSBURGH FILMMAKERS-PHT116)
Credits (Min/Max): 3/3
Taught form the director's perspective, this course considers the myriad decisions that contribute to the look and feel of a movie. Key aspects such as set design, costuming, lighting, composition, makeup, character placement and film stock or video format will be considered. Students will demonstrate an understanding of concepts with written analysis and hands-on video exercises Additional course fee $35.00

**FVMA2014**
SOUND FOR FILM & VIDEO (PITTSBURGH FILMMAKERS-FLM235)
Credits (Min/Max): 3/3
Students in this class create quality soundtracks that complement the visual tracks of a film or video. Lectures and in-class exercises help students' record clear, high-quality location audio by increasing their understanding of microphone characteristics and techniques, audio recorders and the recording process. Post-production techniques, including digital audio editing and mixing, are also covered. Grading is based on written exams, practical exercises, assignments and class participation. In addition to tuition, a $70 course fee is charged by PFM.

**FVMA2025**
TECHNICAL DIRECTING (PITTSBURGH FILMMAKERS-FLM225)
Credits (Min/Max): 3/3
Basics of designing and directing scenes for motion pictures are addressed in this course. Some of the problems discussed include the relationship of film to reality, the meaning of cinematic techniques, continuity, shot selection, cut selection and visualization techniques. The format is a combination of lecture, screening, and interactive group exercises. Students participate in analyzing and reworking scenes from well-known films. Extensive outside work is necessary, including attending current films, to discuss directorial issues. Grading is based on written exams, practical exercises, homework and class participation. In addition to tuition, a $35 course fee is charged. PreRequisites: FVMA1001 - MOTION PICTURE FUNDAMENTALS (PITTSBURGH FILMMAKERS-FLM101)

**FVMA2028**
INTRO TO SCREENWRITING (PITTSBURGH FILMMAKERS-FLM228)
Credits (Min/Max): 3/3
As an introduction to writing for film and video, this course combines theory, analysis and practical exercise. Screenwriting basics are covered including story, structure, scene, character, dialogue and action. Students develop stories, scenes and characters and examine the ways in which these elements can be combines in a screenplay. Writing for documentaries is also discussed. Students are required to see selected current films for discussion. Considerable outside work is necessary. Grading is based on the quality of the writing assignments and class participation. In addition to tuition, a $35 course fee is charged by PFM.

FVMA2030
VIDEO PRODUCTION I (PITTSBURGH FILMMAKERS-VID115)
Credits (Min/Max): 3/3
In this hands-on course students acquire the skills to design, shoot and edit video. The class combines demonstrations, lecture, exercise, projects and critiques. Emphasis is placed on visual and aural expression through technical mastery of the video medium. Topics include digital camera operations, lighting, audio recording, scripting, non-linear editing, special effects and audio mixing. Students are expected to focus on designing and producing an effective final project. Grading is based on written exams. All necessary equipment is provided but students must supply videotape. In addition to tuition, a $70 course fee is charged by PFM.
PreRequisites: FVMA1001 - MOTION PICTURE FUNDAMENTALS (PITTSBURGH FILMMAKERS-FLM101)

FVMA2035
ANIMATION PRODUCTION (PITTSBURGH FILMMAKERS-FLM204)
Credits (Min/Max): 3/3
This comprehensive class in frame-by-frame animation is designed for both beginners and seasoned animators. Students are exposed to a wide variety of media and approaches, such as digital 2D, hand-drawn 2D, clay cutouts, puppets, time-lapse and pixilation. With an overview of animation history and technique, students will gain an understanding of the principles of animation along with foundations of production planning. This includes storyboarding, character development, acting and story elements. While drawing is one approach to animation, this is not a cartooning class, and drawing skills are not required in order to succeed. Students may work together as a production team or as individual producers. Considerable outside work is necessary for preparation of production elements, shooting an editing. All equipment is provided but students pay for their own art supplies and media expenses. Grading is based on assignments, participation, exercises and final films. In addition to tuition, a $70 course fee is charged by PFM.
PreRequisites: FVMA1001 - MOTION PICTURE FUNDAMENTALS (PITTSBURGH FILMMAKERS-FLM101)

FVMA2040
PHOTOSHOP FOUNDATIONS (PITTSBURGH FILMMAKERS-PHT220)
Credits (Min/Max): 3/3
An introduction to the Macintosh Operating System and Adobe Photoshop, this class helps students explore digital imaging as a method for manipulating and presenting their work. Techniques covered include scanning, image retouching, correction and manipulation, printing and creative use of layers, selections, and masks. Assignments include restoration, digital colorizing of black and white imagery and digital color printing. Grading is based on class participation, assignments and individual projects. In addition to tuition, a $70 course fee is charged by PFM.

FVMA2045
ELECTRONIC CINEMATOGRAPHY (PITTSBURGH FILMMAKERS-VID317)
Credits (Min/Max): 3/3
This course will cover advanced video technology and professional techniques of videography. Emphasis will be placed on image quality, meeting and broadcast specifications for video and audio, and double-system audio recording. Professional-quality video cameras will be covered extensively. Grading will be based on written exams, in-class production exercises, and an oral presentation. Though students will be asked to shoot video in class, this is not a production course; the cost of materials will be included in the $70 course fee is charged by PFM.
PreRequisites: FVMA2030 - VIDEO PRODUCTION I (PITTSBURGH FILMMAKERS-VID115)

FVMA2048
WRITING & PRODUCING THE SHORT SCRIPT (PITTSBURGH FILMMAKERS-FLM308)
Credits (Min/Max): 3/3
This course is designed to take students through the process of writing and planning a short film. Students will produce a film treatment and then multiple drafts of a script for a film, as well as work through critical phases of pre-production such as budgeting, creating a shooting script, storyboarding, casting, securing locations and acquiring necessary permissions and clearances. Students are expected to participate in critiquing and responding to the written work of others in the class. Significant outside work is required. Grading is based on the quality of the script, the quality of the pre-production work and materials, and class participation. In addition to tuition, a $35 course fee is charged by PFM.
PreRequisites: FVMA2028 - INTRO TO SCREENWRITING (PITTSBURGH FILMMAKERS-FLM228)

FVMA2050
FILM GENRE: TELEVISION HORRORS (PITTSBURGH FILMMAKERS-FLM270)
Credits (Min/Max): 3/3
This course serves as a critical examination of the aesthetics and history of the horror genre as a television phenomenon. The course samples key examples of television horror, drawing from early broadcast shows like Alfred Hitchcock Presents and The Twilight Zone, examining more overtly horrific offerings such as Tales From The Crypt and tracking the genre's evolution into more contemporary series like the groundbreaking Buffy the Vampire Slayer and current cable offerings True Blood and The Walking Dead. Students analyze the style and forms of narrative particular to television while considering the historical and industrial changes in televiral horror that have resulted in strong female-centered series and provocative representations of race, gender and sexuality. The course will be a combination of lecture and discussion with required reading and in-class screenings of excerpts and episodes. Grading is based on two written exams, one analytical paper and participations. In addition to tuition a $35 course fee is charged by PFM.

FVMA2051
FILM GENRE: VIOLENCE IN AMERICAN CINEMA (PITTSBURGH FILMMAKERS-FLM270)
Credits (Min/Max): 3/3
This course will consider the multi-faceted implications of onscreen violence for American popular culture. Through close examinations of recent films such as The Girl with the Dragon Tattoo and Django Unchained, students will explore perennial controversies regarding the influence of movie violence on behavior. The class will consider the ways in which these pervasive violent images shape our understanding of social issues like race, gender and sexuality. Much of our focus will be on American films of the past 10 years, but we will also study significant global and historical trends in depictions of screen violence and spectators' reactions to that violence, from disgust to pleasure. Topics will include Surrealist cinema, genre films (horror, westerns, etc.) and video games. Grading is based on class participation, weekly writing assignments and a final paper. In additions to tuition, a $35 course fee is charged by PFM.

FVMA2056
SCRIPT DEVELOPMENT (PITTSBURGH FILMMAKERS-FLM307)
Credits (Min/Max): 3/3
Geared for those who have an understanding of basic screenwriting principles, this class helps students develop an original idea into a full treatment. Weekly discussions and assignments focus on creating the plot, sub plots, character biographies and back story. Other elements examined extensively in this class are the scene, sequences and the setting of the story. Students are required to complete a 5 page scene-by-scene treatment of their original work. Considerable outside work is required. Grading is based on weekly assignments, the quality of the written treatment and class participation. In addition to tuition, a $35 course fee is charged by PFM.

PreRequisites: FVMA2028 - INTRO TO SCREENWRITING (PITTSBURGH FILMMAKERS-FLM228)

FVMA2065
LIGHTING FOR FILM & VIDEO (PITTSBURGH FILMMAKERS-FLM234)
Credits (Min/Max): 3/3
In order to demystify the problems involved in lighting for motion pictures, students participate in a variety of lighting and shooting situations. Among the topics covered are: the differences between lighting for film and for video, light sources, light metering, lighting styles and tools. Excerpts from classic and contemporary films and videotapes are viewed and discussed. Students are encouraged to show their current or previous work in class for the purpose of addressing lighting issues. Grading is based on written exams, homework and participation. In addition to tuition, a $70 course fee is charged.

FVMA2070
DIGITAL EFFECTS & COMPOSITING (PITTSBURGH FILMMAKERS-DIG345)
Credits (Min/Max): 3/3
This course covers digital methods of combining video, photographs, graphics, text and other visual elements and manipulation of those elements to tell a story. Most work will be done using Adobe AfterEffects, but the course will include other software such as Adobe Photoshop and Illustrator. Topics include gaining an understanding of the structure of digital images, transparency and masking, chroma keying, using layers and depth, keyframe animation, image processing, effects and their use, formats, input and output of imagery and workflow methods. Grading is based on assignments, exam and class participation. In additional to tuition, a $70 course fee is charged by PFM.

PreRequisites: FVMA2030 - VIDEO PRODUCTION I (PITTSBURGH FILMMAKERS-VID115)

FVMA2080
BLACK & WHITE PHOTOGRAPHY I (PITTSBURGH FILMMAKERS-PHT111)
Credits (Min/Max): 3/3
Designed to give an awareness and understanding of the technical and aesthetic aspects of photography as a fine art, this is a practical and theoretical course. Through a series of lectures and labs, students learn the process of seeing (making an exposure) and craftsmanship (making a photographic print). Some shooting assignments include using depth of field, light as subject, the self portrait and portraiture. 35mm cameras for this class are available for checkout at the equipment office. Students are expected to purchase their own film and photographic paper. Grading is based on assignments, written exams and a final portfolio. In addition to tuition, a $70 course fee is charged by PFM.

FVMA2130
CINEMATOGRAPHY (PITTSBURGH FILMMAKERS-FLM233)
Credits (Min/Max): 3/3
This course examines the tools and technology of the cinematographer. Cameras, lenses, light meters, sensitometry, emulsions, light sources, color, printing and the film laboratory are among the topics covered. The format is a combination of lecture, screening and hands-on exercise. Students participate in group shooting sessions, and are encouraged to show their current and previous work in class for the purpose of addressing issues of cinematography. Grading is based on written exams, shooting exercises and participation. In addition to tuition, a $70 course fee is charged for PFM.

FVMA2250
PORTRAIT PHOTOGRAPHY (PITTSBURGH FILMMAKERS-PHT210)
Credits (Min/Max): 3/3
This class explores the emotional and visual process of collaboration between subject and photographer that create a photographic portrait. Student use a variety of cameras and formats in both the studio and on location. Available light and the use of artificial light are explored to complete each student's vision, along with a wide range of processing strategies to support and add richness to the final work. Through film and video the class is introduced to some of the masters of this form like Diane Arbus, Arnold Newman, Richard Avedon and Irving Penn. Through field trips to exhibitions and photographer's studios, students are introduced to original work and local photographers. Grading is based on assignments, class participation and the final portfolio. In addition to tuition, a $70 course fee is charged by PFM.
PreRequisites: FVMA1042 - BASIC DIGITAL PHOTOGRAPHY (PITTSBURGH FILMMAKERS-PHT120)

FVMA3015
DOCUMENTARY PRODUCTION (PITTSBURGH FILMMAKERS-VID320)
Credits (Min/Max): 3/3
This course guides students through the planning, shooting, and editing of a documentary. The course builds on production skills common to all video and filmmaking by introducing techniques unique to non-fiction film, such as verite (observational) shooting, interviewing and using archival material. The class will confront the ethical issues that arise when real people are presented on screen. Throughout the course, we will view and analyze recent documentaries, with the aim of understanding how reality can be captured and shaped in cinematically powerful ways. Students have the option of working with the news outlet PublicSource to produce research-based video for the website publicsource.org or may choose any form of documentary for their final projects. Grading is based on practical exercises, a written exam, a final project and class participation. In addition to tuition, a $70 course fee is charged.

FVMA3020
ADVANCED DIGITAL EDITING TECHNIQUES (PITTSBURGH FILMMAKERS-DIG315A)
Credits (Min/Max): 3/3
In this course, students will explore the possibilities of digital post-production. Lectures will discuss a variety of editing styles and examples from short and feature-length films. Students will work with advanced digital editing software to develop proficiency in editing techniques, simple effects, color corrections, sound design, as well as output options for variety of platforms. Grading is based on assigned editing projects, student presentations, and participation. In addition to tuition a $70 course fee is charged.

FVMA3025
THE ART & BUSINESS OF VOICE-OVER NARRATION (PITTSBURGH FILMMAKERS-FLM130)
Credits (Min/Max): 3/3
This intensive course is designed for people who would like to pursue a career as a trained voice actor. The class covers all the aspects of creating professional voice recordings as well as creating a successful business plan and marketing yourself as a voice talent. Initially, students analyze existing voice-over narrations, finding material best suited for their own voice and recording a finished demo. Class demos involve vocal warm-ups, microphone techniques and beaking down scripts in order to make the copy suit each individual student. Other topics include picking a studio, an engineer and an agent, packaging your demo and finding work. Grading is based on assignments, class participation and the finished demo. In addition to tuition a $35 course fee is charged by PFM.

FVMA3030
VIDEO PRODUCTION II (PITTSBURGH FILMMAKERS-VID212)
Credits (Min/Max): 3/3
This course challenges students to explore video language while producing a more ambitious work through improved technical skills, including digital modes of post-production. It integrates hands-on demonstrations, lecture, exercises, projects and critiques. Students use digital video camra along with Final Cut Pro to produce a final project. Topics include advanced lighting and audio recording, digitizing, non-linear editing, time code, digital auto mixing, and final output. Grading is based on the quality of work produced and performance on written exams. All necessary equipment is provided but students must supply videotape. In addition to tuition, a $70 course fee is charged.
PreRequisites: FVMA2030 - VIDEO PRODUCTION I (PITTSBURGH FILMMAKERS-VID115)

FVMA3034
PRODUCING FOR FILM & VIDEO (PITTSBURGH FILMMAKERS-FLM334)
Credits (Min/Max): 3/3
This course explores sound, sound recording and the production of short works of audio of radio broadcast and podcast. Sound productions can be experimental pieces, NPR-type documentaries, enhanced readings, personal profiles, radio drama or comedy. Each production will have the qualities of a "soundscape": a rich, multi-layered work that provides the listener with a powerful, evocative experience. The course begins with a thorough exploration of sound itself—what it is, how it behaves, and how humans perceive it. Students will then learn how to make high quality digital sound recordings in a variety of environments. Finally, extensive work will be devoted to managing, editing and manipulating sound files using Audacity and Apple's Soundtrack Pro. The finished product will be a podcast ready file and an original CD. All final productions meeting baseline standards will be broadcast on local radio. Grading is based on assignments, one exam and class participation. In addition to tuition, a $70 course fee is charged.

FVMA4051
FILM, VIDEO & MEDIA-INTERNSHIP I
Credits (Min/Max): 1/6
Advanced students wishing to pursue careers in media production are encouraged to seek internships through Pittsburgh Filmmakers. The program is designed to give students valuable work experience in their chosen field outside of the classroom environment. Film and video students have interned with local production companies, television stations, feature films and media artists; photography students have been placed with freelance photographers, agencies, publications and curators. Students work with the internship Coordinator to find a suitable position before registering for the internship course.

FVMA4057
FILM/VIDEO/MEDIA-INDEPENDENT STUDY
Credits (Min/Max): 1/3
Advanced students may elect to study film or video production, photography, or digital media on an independent basis by: 1) securing the permission of the instructor with whom you wish to study; 2) writing a preliminary proposal for your independent study; 3) discussing your proposal with your instructor and finalizing it by completing an independent study contract. In addition to tuition, a $70 course fee is charged.

GCDN1023
DRAWING I(IDSN1023)
Credits (Min/Max): 3/3
A study-workshop in the language of drawing, including practice in expression and communication in various media utilizing principles of line, tone, gesture, exaggeration and lighting. Cross-listed with IDSN1023

GCDN1025
FUND. OF ELECTRONIC PUBLISHING
Credits (Min/Max): 3/3
This course will prepare students not majoring in graphic design to work in a creative team environment toward the production of digital communication materials and graphics, and will introduce students to the web as a design vehicle for publishing and advertising.

GCDN1060
FOUNDATION DESIGN I(IDSN1060)
Credits (Min/Max): 3/3
An introductory course in the creative process, the principles of design and elements of art, which are fundamental to all two and three dimensional design pursuits. Studio projects will explore the relationship between concept and execution, with emphasis on the principles of design and the elements of line, shape, value, texture, form and space. This course will emphasize the link between foundation design and digital technology by requiring at least one project using the computer and appropriate software. Cross-listed with IDSN1060

GCDN1062
FOUNDATION DESIGN II(IDSN1062)
Credits (Min/Max): 3/3
An extension of the study of issues initiated in GCDN1060 Foundation Design I, with the addition of new areas of inquiry. Student skills will be expanded and refined in such formal visual concerns as color systems, historical style conventions, spatial systems, optical illusions, and manipulation of form. Cross-listed with IDSN1062
PreRequisites: GCDN1060 - FOUNDATION DESIGN I(IDSN1060)

GCDN1070
COMPUTER GRAPHICS I
Credits (Min/Max): 3/3
This course will explore the theories and techniques presented in Foundation Design I, build upon that knowledge, and apply it to traditional graphic design projects. The course will be an introduction to raster image creation, manipulation and production using professional, industry-standard software. Students will use the computer as a tool to render and create original imagery. The projects will introduce students to the process and professional practice of graphic design.

GCDN1071
COMPUTER GRAPHICS II
Credits (Min/Max): 3/3
This course will explore the theories and techniques presented in Foundation Design II, build upon that knowledge, and apply it to traditional graphic design projects. The course will be an introduction to vector image creation, manipulation and production using professional, industry-standard software. Students will use the computer as a tool to render and create original imagery. The projects will introduce students to the process and professional practice of graphic design.

PreRequisites: GCDN1070 - COMPUTER GRAPHICS I

GCDN1080
WEB GRAPHICS I
Credits (Min/Max): 3/3
This course will prepare students not majoring in Graphic & Communication Design to understand, create and edit correct image types that can be used for websites. The class will explore design theories specific to web design while introducing software applications specific to creating still images for web sites.

GCDN2005
DIGITAL FINE ARTS(SLAE1003)
Credits (Min/Max): 3/3
This course is intended to provide an opportunity to explore Mac computer art. The students will experience the computer studio process of creating art in relevant software, using a digital camera to manipulate images and final image animation. The effect of styles, techniques and art movements on computer images will be explored. Attention will be given to archival inks and paper. Lecture and video will provide an introduction to the new and brief history of electronic images. Cross-Listed with SLAE1003

GCDN2008
DIGITAL PUBLISHING
Credits (Min/Max): 3/3
The study of image and type layout, utilizing professional industry software. This course will focus on the integration of type and image through various page layout solutions and will build upon previous studies in image generation.
PreRequisites: GCDN1060 - FOUNDATION DESIGN I(IDSN1060)

GCDN2010
GRAPHIC DESIGN METHODOLOGIES
Credits (Min/Max): 3/3
This course will explore, define and analyze the thinking strategies utilized in the profession of graphic design. Creative exercises, brainstorming and ideation models, information gathering, research projects and collaborative work will help students to understand and practice the processes and problem-solving strategies by which intelligent design solutions are reached.
PreRequisites: GCDN1060 - FOUNDATION DESIGN I(IDSN1060)

GCDN2011
PAINTING-PASTELS & WATERCOLORS
Credits (Min/Max): 3/3
This class will introduce the student to the techniques and methods of watercolor & pastel. The course places primary emphasis on the handling of the media.

GCDN2012
TYPOGRAPHY I
Credits (Min/Max): 3/3
This course introduces students to the basics of typography as the backbone of Graphic Design. By studying the anatomy of a letterform, typographic history, classifications, typeface recognition, hierarchy and terminology, students learn to organize typographic compositions and systems in order to communicate intellectual and expressive meaning. Students explore the typographic form through both hand-rendered and digital mediums using industry standard software.
PreRequisites: GCDN1060 - FOUNDATION DESIGN I(IDSN1060)

GCDN2016
DIGITAL PHOTOGRAPHY
Credits (Min/Max): 3/3
This course will explore digital capture and handling of photographs enabling the student to master the technical aspects of digital image capture. Students will learn techniques for editing and enhancing photographs, become familiar with photographys various roles: art form, journalism, advertising and will produce a portfolio of quality color and black and white prints from digital files.

GCDN2021
GRAPHIC DESIGN I
Credits (Min/Max): 3/3
This course investigates design principles and concepts, incorporating them into the foundations of graphic design. The student is introduced to the language and processes used to achieve effective graphic design. Through investigation of core graphic design principles, concept development, language and processes; students explore both formal and expressive techniques for successful and effective integration of image and type.

PreRequisites: GCDN1062 - FOUNDATION DESIGN II(IDSN1062)

GCDN2029
INTERACTIVE I
Credits (Min/Max): 3/3
Students will be introduced to design fundamentals and practices as they relate to digital mediums. This course will focus on HTML/CSS standards-based design. Students will learn to separate content (using Hypertext markup language) from appearance (using Cascading Style Sheets) in order to design effective communication that enhances the user experience. Importance will be placed on evolving technologies and languages, site compatibility on a variety of devices and browsers and effective design fundamentals for digital mediums.

PreRequisites: GCDN1070 - COMPUTER GRAPHICS I

GCDN2038
ILLUSTRATION
Credits (Min/Max): 3/3
This course places an emphasis on thorough experimentation of image-making techniques including hand, digital and a combination of those. It will provide students with an in-depth knowledge of current and past illustrators and give them skills to create concept-based imagery. Emphasis is placed on communicating specific messages to targeted audiences in order to understand the relationship between Illustration and Graphic Design.

PreRequisites: GCDN1023 - DRAWING I(IDSN1023)

GCDN2040
WORD & IMAGE
Credits (Min/Max): 3/3
An in-depth study of the symbiotic relationship between words and images and the importance of integrating text with visual information to achieve professional results. Emphasis will be placed on the juxtaposition of image and text in order to produce coherent design. Problems will focus on concept generation and problem solving.

GCDN2047
PHOTOGRAPHIC LIGHTING TECHNIQUES
Credits (Min/Max): 3/3
This course will explore various aspects of portrait and product photography, making extensive use of lighting technique and equipment in an examination of both natural and artificial lighting environments. The course is intended to provide additional tools, techniques and insights into image production and development for the Graphic Design and Communication Design major.

PreRequisites: GCDN2016 - DIGITAL PHOTOGRAPHY

GCDN2080
WEB GRAPHICS II
Credits (Min/Max): 3/3
This course will prepare students not majoring in Graphic & Communication Design to understand, create and edit correct advanced image and animations that can be used for web sites. The class will explore design theories specific to web design while introducing software applications specific to creating motion images for web sites.

GCDN3010
WRITING & PRESENTING FOR DESIGNERS(IDSN3010)
Credits (Min/Max): 3/3
This course will explore various writing techniques that are specific to the fields of Graphic & Communication Design and Interior Design and will include: copy and headlines, press releases, web page texts, television & radio commercial messages, design briefs and presentation notes. Students will learn effective ways to make presentations to clients in both individual and creative team situations, as well as practice their ability to articulate design concepts to an audience. In addition to being beneficial to Graphic Design and Interior Design students, the course could be offered to marketing, information systems technology and other programs beginning in the fall of 2010. Cross-listed with IDSN3010

PreRequisites: ENGL1012 - COLLEGE WRITING II

GCDN3016
HISTORY OF FILM(ARTH3016)
Credits (Min/Max): 3/3
The course attempts to make the student more aware of the medium as well as its place in the development of our culture. While the approach is historical, emphasis is placed upon development of the student's visual literacy. Additionally, important topics such as censorship and film propaganda are discussed. Cross-listed with ARTH3016
GCDN3022
TYPOGRAPHY II
Credits (Min/Max): 3/3
Further development of the ideas, techniques and principles studied in GCDN2012. Emphasis is placed on polishing and advancing basic typography skills through the study of typography in publication design, i.e., multiple page design as it relates to layouts for books, booklets, brochures and magazines. Format and design for continuity is stressed.
PreRequisites: GCDN2021 - GRAPHIC DESIGN I

GCDN3024
PROFESSIONAL PRESENTATION
Credits (Min/Max): 3/3
This course is designed to provide students in the professional areas with training in preparing and giving professional presentations. Students will develop skills in audience/client assessment, research, presentation design and development, using presentation tools and presentation evaluation.

GCDN3026
DIGITAL PREPRESS & PRINTING
Credits (Min/Max): 3/3
This course investigates the electronic preparation of images and files for print publications.
PreRequisites: GCDN3031 - GRAPHIC DESIGN II

GCDN3029
ADVANCED WEB DESIGN
Credits (Min/Max): 3/3
Advanced Web Design continues to concentrate on the principles of design, development, and implementation of web-based solutions. Students in this class will focus primarily on the strategic efforts of constructing entire websites from the ground up - working individually and as part of a team.

GCDN3031
GRAPHIC DESIGN II
Credits (Min/Max): 3/3
This course will focus on information organization and complex hierarchies, in order to reach conceptually and aesthetically sophisticated design solutions. Particular emphasis will be placed on research, investigation, rigorous brainstorming and organizing a large quantity of information in order to reach content-heavy, visually-engaging solutions. Prereq: Successful completion of Mid-Collegiate Review.
PreRequisites: GCDN2021 - GRAPHIC DESIGN I

GCDN3041
GRAPHIC DESIGN III
Credits (Min/Max): 3/3
With an emphasis on communication and advanced design problems, this course will focus on the development of clear, appropriate, dynamic and efficient branding through a systems approach to design. It will begin with the detailed study of the brand and brand identity, and culminate in the development of an integrated branding program. A high degree of conceptual, aesthetic and technical ability will be required for successful completion of this course.
PreRequisites: GCDN3031 - GRAPHIC DESIGN II

GCDN3043
PACKAGING DESIGN
Credits (Min/Max): 3/3
The course is an introduction to the elements and principles of design for packaging, retail display and branded environments, with an emphasis on visual communication for three-dimensional design.
PreRequisites: GCDN2021 - GRAPHIC DESIGN I

GCDN3045
INTERACTIVE II
Credits (Min/Max): 3/3
An in-depth study of multimedia design, theory and application for upper-level Graphic Design students. This course covers advanced web design using CMS(Content Management System), animation, interactivity, online advertising as well as an introduction of mobile application design. Class assignments may be related to Graphic Design II which will be taken concurrently during the first semester of the Junior year. The class will explore design theories pertaining to interactivity, animation, online advertising and layout that will be interrelated to producing final solutions.Prereq: Successful completion of Mid-Collegiate Review.
PreRequisites: GCDN2021 - GRAPHIC DESIGN I
This course is an advanced study of multimedia and video design, theory and application for upper level Design students. Taught primarily on a MAC platform, this course utilizes software for digital video production. Class assignments will be closely related to GCDN3041 Graphic Design III, which will be taken concurrently during the second semester of the Junior year. The courses will be interrelated in terms of theory as well as outcome assessment.

PreRequisites: GCDN3045 - MULTIMEDIA II

Intended for prospective designers as well as writers, the course will educate students in newspaper graphics and design. Hands-on experience will require participation in the La Roche Courier. Students will review and redesign the existing paper, and regularly participate with editorial illustration and photography, ad layout, design and production. Students will achieve an understanding of print production, including the utilization of four-color process and offset printing. Cross-listed with ENGL3051

PreRequisites: ENGL1012 - COLLEGE WRITING II

Introduction to the study and practice of Environmental Graphic Design (EGD) with an emphasis on understanding visual communication and information systems for navigating and experiencing the built environment. The course will cover theory and practical application of topics related to EGD including: principles of wayfinding, study of three-dimensional design and exploration of typography, symbols, identity and information design in the public space. Cross-listed with IDSN3053

PreRequisites: GCDN2008 - DIGITAL PUBLISHING

The design studio class is a full-service, student-run communications/design agency that solely creates work for legitimate, real-time clients. Students who work in the design studio will gain an appreciation and an in-depth understanding of the business of design. To gain acceptance into this course, students must fill out an application and undergo a portfolio review and interview by GCD faculty.

This capstone-level course centers on the development of a semester long independent project. In consultation with faculty and peers, students will focus on creating multi-component, content-driven projects that demonstrate their ability to completely identify, research, self-author and implement in-depth solutions. The course will culminate with a final professional presentation.

PreRequisites: GCDN4055 - GRAPHIC DESIGN IV: SENIOR DESIGN SEMINAR

Publication Design for Print & Web-SP14 This course will concentrate on contemporary magazine design for print and web. The course will enable students to analyze varying types and formats of information, to consider the needs of the intended audience and to design appropriate print and interactive components. Various methodologies will be explored in order to visualize information for clarity, readability and an editorial voice that remain consistent across both mediums.

PreRequisites: GCDN2008 - DIGITAL PUBLISHING

A practical work experience in a field setting. The student receives credits for work performed.

An open-ended senior seminar dealing with various aesthetic questions and team efforts in which students act as art director, designer, illustrator, writer, or photographer. Emphasis is placed on educational experiences that enable the student to move from hypothetical design problems to the challenge of working with clients on real jobs. Communication Design majors play a significant role on creative teams.

PreRequisites: GCDN3031 - GRAPHIC DESIGN II
GCDN4057
GRAPHIC & COMMUNICATION- INDEPENDENT STUDY
Credits (Min/Max): 1/3
This course is limited to those few students who have demonstrated an unusual level of ability and an intense commitment to a particular area.

GCDN4058
PORTFOLIO PREPARATION
Credits (Min/Max): 3/3
This course involves the exploration of self-promotion strategies necessary for success in the graphic design profession. In consultation with faculty and peers, students will revise and improve upon prior and current projects in order to develop a strong senior portfolio. Through instruction and research, students will learn techniques for effective verbal and visual presentation of their work. This course will prepare graduates for the job market and continued education. The course will culminate with the annual Senior Portfolio Show.

GEOG2011
WORLD GEOGRAPHY(INST2011)
Credits (Min/Max): 3/3
A study of the interactions between human beings and the land, and the influence of geography in shaping work and culture throughout the world. Cross-listed with INST2011

GEOG2012
EUROPEAN GEOGRAPHY
Credits (Min/Max): 3/3
A study of the continent of Europe as a whole with an emphasis on its diversity of peoples, its resources, its advanced culture and its relatedness to the rest of the world.

GEOG3010
CULTURAL GEOGRAPHY & THE HUMAN MOSAIC(INST3010)
Credits (Min/Max): 3/3
The many ways in which humans have changed the face of the earth in response to culture is known as the human mosaic. The course applies the major themes of cultural geography to population, language, religion, agriculture and urbanism. A basic knowledge of world geography is assumed. Cross-listed with INST3010

GEOG3013
GEOGRAPHY & WORLD AFFAIRS (INST3013)
Credits (Min/Max): 3/3
An overview of various regions of the world and the environmental conditions to which people adapt. Racial, linguistic, religious and economic groupings of people will be stressed. Current world events are examined to develop knowledge about historical, geographic, climatic, political and religious environments which people inhabit. Cross-listed with INST3013

GLBL4007
INTERNET, COMMUNICATION & DEVELOPMENT
Credits (Min/Max): 3/3
This course explores the issues of global communication, technology and development primarily by examining how internet and communication technologies are being used to improve development. From the least developed countries, to the pockets of poverty and deprivation in the richest countries, information and communication technologies are being used in innovative ways to improve lives. The uses of ICTs for health, education, business, government and agriculture will be studied.

GLBL4009
GLOBAL HEALTH CARE
Credits (Min/Max): 3/3
This course will introduce students to global health matters and the increasing complex challenges of the health of populations in the 21st century from persisting problems to new and emerging public health threats.

GLBL4011
CRIME & TERROR: A GLOBAL PERSPECTIVE
Credits (Min/Max): 3/3
This course, through the integration of the disciplines of criminal justice, national security studies, history, political science, and environmental studies will examine the concept of globalization by focusing on its key components. Elements such as technology, trade, financial networks, reduction of the power of national governments, and the creation and opening of new markets will be explored by looking at their effect on the individual and the community. The course will demonstrate how the global influences on individuals and communities affect both legitimate and illegitimate institutions and organizations. The ultimate focus will be on the increasing power and danger of global crime and terror organizations and how they operate. An appreciation of their everyday social and economic effects on individuals and communities will be developed through case studies of selected deviant organizations. The topics of differing criminal justice and political systems; environmental crime and terrorism; the increasing power of fundamentalist religious groups and their influence on terrorism; and international sharing of information will be presented and problems and solutions will be explored.

GLBL4011H
CRIME, TERROR & THE ENVIRONMENT: A GLOBAL PERSPECTIVE-HONORS
Credits (Min/Max): 3/3
This honors Global course integrates the disciplines of criminal justice, national security studies, political science, and the natural sciences in a study of globalization's influence on international crime and terrorism that is linked to the natural environment. Subjects such as resource scarcity, pollution, desertification, species elimination, and climate change will be explored by examining their effects on the individuals and communities that are linked to the world's ecosystems. The main focus will be on the increasing power and danger of global crime and terror organizations and how they use the natural environment as a target for their illegal activities. An appreciation of their everyday social and economic effects on individuals and communities will be developed through case studies of selected deviant organizations.

GLBL4015
EARLY CANADIAN HISTORY & TALES
Credits (Min/Max): 3/3
An integrated study of the early history of Canada, up to the late 1800s, and the literature and films both from and about those times. Students will begin this study with the times of the first explorers, from Champlains books, to the colonization of the land and native people by the French, especially its Catholic missionaries. The course will then transition to the arrival of the British, beginning with the war that expelled French rule but not its colonists in the east, the impact of wars with America (both the Revolution and of 1812), and the push west to the edge of the Prairies. Finally, we will explore the great Arctic explorers stories, such as Franklins epic and tragic history, the Métis rebellion in the country's heartland, and the literal nation building accomplished by the cross continental railroad reaching Vancouver, 1871-1885, soon after the nations Confederation in 1867.
PreRequisites: ENGL1012 - COLLEGE WRITING II

GLBL4017
DISEASES THAT CHANGED THE WORLD
Credits (Min/Max): 3/3
The history of the world has been and continues to be significantly impacted by infectious diseases. Examples include changes in ethnic diversity in the U.S. due to European potato blights, the outcome of world wars where more soldiers died of influenza or cholera than battle wounds, the destruction and contamination of the natural environment in attempts to control malaria- and yellow fever-carrying mosquitoes, and prejudices against various national and ethnic groups as carriers of disease. At the same time that infectious diseases have altered human politics, economics and culture, human behaviors and technological advances have caused the global spread of once-isolated diseases and the emergence of new plagues. However, history has also shown that, with the right combination of scientific knowledge and global political, financial and social commitment, even the oldest and most feared microbial plagues can be controlled and possibly even eradicated. This course is a study of the history of various infectious diseases including the biological, social, economic and political factors that affect and are affected by these diseases.

GLBL4020
GLOBALIZATION: FRIENDS & FOES
Credits (Min/Max): 3/3
This course offers an educational experience that enhances students' awareness of the global dimensions of their life experiences. The theme of globalization is explored, examining both positive and negative implications for social, economic, cultural, and political processes and identities at all levels. Global environmental issues that arise out of globalization will also be studied. Students are encouraged to relate their knowledge about the "global Village" to their own personal and community experiences. Note: A previous course in economics is highly recommended.

GLBL4025
WOMEN ACROSS CULTURES
Credits (Min/Max): 3/3
This course will explore the varying roles, positions & statuses of women in the developing world. Among the topics covered are the roots of patriarchy; women's health; women & work; women & development; the similarities & differences in women's experiences across diverse regions; the dynamics & creativity of women's activities & their importance in various cultures; gender roles & relationships; the historical & cultural roots & consequences of subordination & oppression; roles of women in agriculture, religion, politics, the arts & other arenas; the impact of globalization on women's lives; and, the global struggle for women's rights.

GLBL4027
GLOBAL JUSTICE & HUMAN RIGHTS Historical,Political,& Social- Economic Perspectives
Credits (Min/Max): 3/3
This global integrative course, combining a number of elements from the social sciences, will focus on issues of human rights in the modern world - linking compelling problems of issues of today with their historical roots and with implications for tomorrow's world.

GLBL4029
GLOBAL ADORNMENT
Credits (Min/Max): 3/3
This global core curriculum course presents an interdisciplinary exploration of adornment - jewelry, body art, ornamentation and the like - as an essential component of global cultures, ritual and individual and collective identity formation and expression. The course will explore the general role of adornment in identity formation and cultural process. Students will examine the form and role of adornment has assumed in several specific cultures, exploring both differences and similarities, and the impact that globalization has had on cultural adornment in terms of preservation, alteration, and destruction. Students will also experience the process of creating cultural adornments of various types through applied design and art activities. Through the travel component (which initially may be offered separately), students will learn firsthand about adornment in a specific culture, studying the cultural, economic, and operational aspects of adornment production, sale and use.

GLBL4033
LITERACY, CULTURE & EDUCATION
Credits (Min/Max): 3/3
This course is designed to place education in a global context by examining the complex networks that link a culture's ideas of and uses for literacy to the formal educational structures created and sustained by those ideas. Students will examine how "schooled literacy" is defined in different cultures, investigate how schools in U.S. culture literacy, and examine the cultural and social uses imagined for literacy and schooling.

GLBL4045
MORAL OF THE STORY
Credits (Min/Max): 3/3
This course addresses prominent global issues and problems through the dual lens of philosophical ethics and literature. The nature of the course is global in its attention to a wide range of issues stemming from globalization, including those pertaining to the environment, society, religion, and politics; it is also interdisciplinary in its employment of both Ethics and World Literature as vehicles for the analysis of such global concerns. Students read selections of classic and contemporary literature by renowned authors and investigate issues of global ethics evoked within the texts. This is accompanied by an examination of basic philosophical theories and principles in moral reasoning as they pertain to the relevant ethical issues.

GLBL4050
CONSUMPTION & SUSTAINABILITY
Credits (Min/Max): 3/3
This course will introduce students to concepts of globalization, consumption economies and cultural trends in historical and modern contexts. Sustainability and social responsibility will provide a framework for the study of cultural, commercial and aesthetic factors influencing the selection and usage of consumer products and services that create and express social identity. This course will present information for students to understand how our buying and consumptive habits affect the environment and will explore the self, first. Students will understand by the end of the course that there are more than monetary costs for the products we consume.
PreRequisites: ENGL1012 - COLLEGE WRITING II

HIST1010
US HIST 1607-1865 FOUNDATIONS OF A REPUBLIC
Credits (Min/Max): 3/3
A study of the history of the United States from 1607 to 1865. This course traces the development of the United States from the earliest European settlers to the formation of a republic, noting the events, people and ideas involved in the struggle to achieve that end. Particular emphasis is given to colonial America, the American Revolution, the constitutional process of 1789, Native Americans and slavery.

HIST1011
US HIST:EMERG OF MASS DEMOCRACY (1865-1945)
Credits (Min/Max): 3/3
A study of the history of the United States from 1865 to 1945. This course traces the development of the United States from the aftermath of the Civil War to its emergence as a world superpower, noting the events, people and ideas involved in that development. Particular emphasis is given to Reconstruction, industrial development and World War II. Cross-listed with SLHS1006

HIST1011H
US HIST:EMERG OF MASS DEMOCRACY (1865-1945)-HONORS(SLHS1006H)
Credits (Min/Max): 3/3
A study of the history of the United States from 1865 to 1945. This course traces the development of the United States from the aftermath of the Civil War to its emergence as a world superpower, noting the events, people and ideas involved in that development. Particular emphasis is given to Reconstruction, industrial development and World War II. Cross-listed with SLHS1006H
HIST1012
US HIST: CONTEMP TIMES (1945-PRES)
Credits (Min/Max): 3/3
A study of the United States since World War II as it struggles with its role in being a superpower in the world and its role in fulfilling the American dream at home. Special emphasis is placed on the Cold War, the Great Society and Vietnam, the Civil Rights Movement, and the Reagan, Bush, Clinton & Obama presidencies, and post 9/11 American Society.

HIST1013
WESTERN CIVILIZATION I (SLHS1004)
Credits (Min/Max): 3/3
This course focuses on Western civilization from its origin in the Near East up through the Protestant Reformation. Special emphasis is given to the social, economic, religious, and political institutions that shaped the roots of Western Civilization. Attention is also concentrated on the place of the individual within this society.

HIST1014
WESTERN CIVILIZATION II
Credits (Min/Max): 3/3
This course focuses on Western civilization from the Reformation to contemporary times. Special emphasis is given to the characteristics which define Western civilization as it emerged from the Middle Ages into modern times including science, faith, reason, capitalism, communism, the growth of institutions and the arts.

HIST2000
BRITAIN & ITS EMPIRE
Credits (Min/Max): 3/3
This course covers the early history of Britain from pre-Roman times up through and beyond the Middle Ages and explores the political, social and economic origins of the British Empire. The empire is then examined in depth at its zenith in the 19th century as it became entrenched in different world areas; we explore the impact on local peoples and nations. The course concludes with attention to the decline of the British Empire.

HIST2023
THE HISTORY OF ENGLAND
Credits (Min/Max): 3/3
A study of England from Roman times to the Revolution of 1688 with special emphasis on the rise of Parliament and on the growth of Common Law. This course traces the transition of England from a part of Mediterranean culture to a part of French Catholic Europe to becoming a distinctive culture of its own.

HIST2035
HISTORY OF LATIN AMERICA
Credits (Min/Max): 3/3
A study of the growth and development of Hispano- and Luso-America from the European Conquest to the present. Emphasis is given to the interrelationships between the Church, the Military and the State, political and economic development, and social changes throughout Latin America.

HIST2040
THE HISTORY OF WESTERN PENNSYLVANIA
Credits (Min/Max): 3/3
The course covers the history of Western Pennsylvania from prehistoric times to the present. Special emphasis is given to the history of Pittsburgh and Southwestern Pennsylvania; the Indian cultures; the colonial and revolutionary periods; the impact of industrialization; religion and immigration, local culture and the renaissance.

HIST2045
ISLAM IN THE WORLD (POLI/SOCL2045)
Credits (Min/Max): 3/3
In this course, the basic beliefs of Islam are reviewed, along with a brief history of Islam's overall development and its impact on the world and on various civilizations in different global regions. Islam's internal sects are analyzed, and its political impact on current politics in the world is explored. The role of U.S. foreign policy in dealing with the recent rise of Islam is also analyzed. Cross-listed with POLI/SOCL2045

HIST3000
HISTORY & CULTURE OF AMER INDIAN
Credits (Min/Max): 3/3
A study of the Native Americans from prehistoric time to the present with emphasis on the uniqueness of Native American culture, and the impact of Euro-American contact on native American societies.
HIST3002
HISTORY OF EUROPEAN DIPLOMACY (POLI3002)
Credits (Min/Max): 3/3
The internationally accepted style of diplomacy had its origins in Italy in the late 1400's. Emphasis is placed on the mechanisms of diplomacy as well as its use by European powers: classical diplomacy in the 19th century and the impact of that system on other areas of the globe. The decline of European style diplomacy in the World War/Cold War era is described. Cross-listed with POLI3002

HIST3005
CONTEMPORARY CENTRAL AMERICA
Credits (Min/Max): 3/3
Through class lectures, discussions, essay tests, a term paper, assigned readings, and slide and video presentations, this class shall review the history of the five Central American nations and their relationships, political, economic, and social, with the United States. Such concepts as economic dependency, neocolonialism, developmentalism, free market economic theory, grassroots democracy, militarism, liberation theology, and socialism will be discussed in depth, along with the general history of the five countries. The problems of indigenous peoples, human rights abuses, class stratification, and recent changes in religion, including phenomenal growth of Pentecostalism, shall be emphasized. By so doing, it is hoped that the student will come to a sophisticated understanding of the contemporary crises in Central America.

HIST3008
THE GREEK WORLD
Credits (Min/Max): 3/3
The course will cover the Minoan, Hellenic and Hellenistic periods, including the study of Achaean civilization, the Classic period, Alexander's empire and the successor states. Special emphasis is placed on those aspects of Greek history and culture that are considered the foundation of Western civilization.

HIST3010
THE ROMAN WORLD
Credits (Min/Max): 3/3
A study of the Roman Republic and Empire from 776 B.C. to 476 A.D. Special emphasis is placed on republican institutions, the expansion of the Empire, the collapse of the Republic, the development of the reasons for the fall of the Empire.

HIST3015
HISTORY/POLITICAL THOUGHT (POLI3015)
Credits (Min/Max): 3/3
In this course we inquire into the origins, evolution and development of political philosophies, focusing on the theories that have shaped Western political thought from ancient times to the present day. Analyze key concepts in Western political thought such as liberty, justice, morality, political rights, and democracy. Students will also be asked to create their own political theories. Students will learn the genesis of political thought over the past 2,000 years, how to critically assess these theories, and how to create their own theories. Cross-listed with POLI3015

HIST3017
THE MIDDLE AGES
Credits (Min/Max): 3/3
A study of the political, economic, social, religious, and intellectual developments of Europe from the fourth through the fourteenth centuries. Special emphasis will be placed on the Germanic invasions, the growth and development of Western Christianity, feudalism, the origins and growth of medieval commerce and urban life, and the development of centralized monarchies and nationalism.

HIST3018
HISTORY OF AFRICA
Credits (Min/Max): 3/3
In this course we investigate the origins of pre-colonial African civilizations; analyze the spread of global trade within and beyond Africa; explore the colonial period in terms of British, French and Portuguese empire-building; and examine resistance to colonialism, the independence movements, and post-colonial (contemporary) politics in Africa.

HIST3019
HISTORY OF JAPAN
Credits (Min/Max): 3/3
A study of Japan from its first contact with Western civilization in the 17th century to the present including the period of isolation, the opening of Japan, the rise of militarism, World War II and Japan in the modern world.

HIST3020
RUSSIA & THE SOVIET WORLD
Credits (Min/Max): 3/3
A study of the emergence of imperial Russia as a European power, its expansion and industrialization, the forces which blended to bring about the Revolution of 1917, the growth and development of the Soviet Union under Lenin and Stalin, and the fall of communism. Special emphasis is given to Marxism as it has been put into practice in the Soviet system.
HIST3023
MODERN U.S. DIPLOMATIC HISTORY (INST/POLI3023)
Credits (Min/Max): 3/3
This course presents a study of the major developments in American diplomatic history. Special emphasis is placed on the years from World War II until the present. Major international developments and their effects on American diplomacy are discussed along with the impact of various presidents and the influence of the United Nations. The interrelation between foreign policy and domestic opinion is also examined. Cross-listed with INST/POLI3023

HIST3025
SPECIAL TOPIC IN HISTORY:
Credits (Min/Max): 3/3
Ghosts and Witches of Pennsylvania (offered in fall 2014) examines the social, cultural and religious history of Pennsylvania through the lens of the state's supernatural folklore and legends. Emphasis is placed on the various cultural meanings of Pennsylvania's legends and how they reflect change in society as well as the non-traditional community history that is carried in their retelling. The course also provides insight into the uses of oral history. The U.S. Civil War (offered in summer 2014) course covers the principal causes of the war, crises in political leadership, and then focuses on the main military strategies of the North and South, including the key battles and implications of the main battles, as well as the factors determining the ultimate outcome of this war.

HIST3026
HISTORY OF MODERN GERMANY
Credits (Min/Max): 3/3
A study of the impact of the French Revolution on German political and cultural life; of the growth of liberalism and nationalism; of the wars of unification, Bismarckian Germany and World War I; of the rise and fall of National Socialism and of the recovery and post-war problems.

HIST3027
HISTORY OF MODERN EUROPE (INST3027)
Credits (Min/Max): 3/3
A survey of the past two centuries of European history that is intended to provide global awareness and an appreciation of the accomplishments European civilization. Cross-listed with INST3027

HIST3028
EAST ASIAN HISTORY(INST3028)
Credits (Min/Max): 3/3
An overview of the history of Korea, Japan, China, Singapore, Taiwan, Hong Kong, and Malaysia. The domestic, political, social, and economic bases of the historical development of these nations will be considered. Political influences of other world powers will be considered. Cross-listed with INST3028

HIST3029
HISTORY & POLITICS-MIDDLE EAST :SPECIAL TOPIC IN HISTORY
Credits (Min/Max): 3/3
The history of the Arab-Israeli conflict from the Palestinians' first encounter with Zionism through the current peace process of the 1990s. The history of the Jewish Enlightenment (Haskala) in 19th Century Europe and the development of Zionism through the current peace process between the state of Israel and the Arab states and the Palestinian national movement will be explored, as will the impact of colonialism and the development of nationalism in the Arab world. These various factors will be related to salient global developments of the 20th century.

HIST3030
WOMEN IN AMERICAN HISTORY
Credits (Min/Max): 3/3
This course examines through women's eyes the images and realities of women's social, political, and economic lives in America from the 1600's to the present day. We analyze women in relation to legal, religious, and social restrictions, women's roles in 19th century moral reform movements, the birth of the women's rights movement, and the immigrant experience. An important component of the course will be women's activism and women's roles in social movements in the latter half of the 20th century, including civil rights, women's liberation, and gay and lesbian rights. The course concludes with an assessment of feminism in the present day.

HIST3034
HISTORY OF PENNSYLVANIA
Credits (Min/Max): 3/3
"The History of Pennsylvania will track the political, economic, and social developments of Pennsylvania from early colonial times up through to the present. Emphasis will be placed on colonial-era history (when Pennsylvania was a British colony), as well as the 18th, 19th and 20th century rise of industry, immigration and ethnicity, religious diversity, and cultural forms of popular expression."
HIST3036
HIST OF AMERICAN VALUES, BELIEFS (POLI3036)
Credits (Min/Max): 3/3
In this course we explore the central values, beliefs and ideas that have helped to both shape and reflect the changing history of the United States. Special attention is paid to how particularly important values and ideas reflected certain time periods in American history, and helped to make this country unique. America's values and beliefs evolved both from social changes and grassroots political movements as well as from its leaders and influential thinkers. Contemorary ideas and values in America are provided considerable attention. Cross listed with POLI3036

HIST3037
RELIG INFUSUS DVMT(RELS3037)
Credits (Min/Max): 3/3
An examination and interpretation of the religious forces that were influential in shaping American social structures, mores, law and popular opinion from the time of the first Spanish missionaries to the present. Special emphasis is placed on religious liberty in the American ideal and on religious pluralism. Cross-listed with RELS3037

HIST3038
HISTORY OF BLACK AMERICANS
Credits (Min/Max): 3/3
A history of the experience of Black Americans from their origins in West Africa to contemporary times. Emphasis is given to the various systems of slavery in America; the impact of slavery on American society; emancipation and reconstruction; contributions of Black Americans and self-help; Black Americans in war and the Civil Rights Movement of the 1960's and 1970's.

HIST3040
VARIETIES OF EARLY CHRISTIANITY (RELS3040)
Credits (Min/Max): 3/3
This course treats Christianity from its origins through the medieval period. Special attention is given to internal issues and external forces, which caused conflict, adjustment, development, and finally varieties within the Christian world. For instance, it explores how dissident movements, the conversion of Constantine, the Germanic invasions, and the rise of Islam, feudalism, and papal power affected Christianity. The course also attempts to analyze how tensions between the institutional church and popular religious movements influenced society. Cross-listed with RELS3040

HIST3045
HISTORY & POLITICS OF MID EAST (POLI3045)
Credits (Min/Max): 3/3
This course explores the peoples and history of the Middle East, from ancient times, including a procession of impressive empires, until their eventual domination by the Ottomans and finally, by British Empire. We investigate the accommodation of the British to Middle Eastern kingships and the impact of colonial state-building. We proceed to examine the establishment of the state of Israel and the evolution of Palestinian-Israeli relations over past half a century. Cross-listed with POLI3045

HIST3050
HISTORY METHODOLOGY
Credits (Min/Max): 3/3
This is an introductory historical methods seminar involving students in identifying, understanding, and utilizing conceptual building-blocks of comparative historical analysis. Comparative History is rooted in a larger scholarly discipline whose elements, methodologies, and divergent philosophies will be touched on. Notions of historical stages, social classes and power structures, ideology, and identities (such as race, class, gender, nationality, etc.) will be examined. There will be an identification of different areas in the discipline such as political history, intellectual history, cultural history, economic history, social history.

HIST3051
DEVELOPMENT IN SOUTHEAST ASIA (POLI/SOCL3051)
Credits (Min/Max): 3/3
This course looks at the history of social, political and economic development of Southeast Asia, excluding Indochina, and focusing primarily on Indonesia, Malaysia, and the Philippines. It will discuss the contingent and dependent nature of development of these countries under the larger framework of global capitalism, and how such development affects the national historical experiences of these countries. Cross-listed with POLI/SOCL3051

HIST3052
EXPERIENCE OF MODERN WAR (POLI3052)
Credits (Min/Max): 3/3
In this course, the experience of modern war is analyzed as a contemporary political phenomenon with broad political implications for the understanding the relationship between national and international politics, on the one hand, and the actual experience of war, on the other. Contemporary and modern wars are studied from the perspective of the soldier in the field, as well as from the broader perspective of commander decision-making, generals' war strategies, and the global context of war-making. Also taken into account is the impact of war on the inhabitants of war-affected countries; on military veterans; and on the national political system of the countries involved in a war. Cross-listed with POLI3052
HIST4055
SENIOR SEMINAR
Credits (Min/Max): 3/3
A research course acquainting students with historical research methods through the writing of a seminar paper and through group discussion of the research process.

HIST4056
DIRECTED RESEARCH
Credits (Min/Max): 2/4
Individual research in history supervised by a faculty member. The student defines a problem, constructs and carries out a research program and reports on the findings of the research in a critical and analytical paper.

HIST4057
HISTORY-INDEPENDENT STUDY
Credits (Min/Max): 1/3
Individual study supervised by a full-time faculty member.

HRMT5011
CONCEPTS OF FIN ANAL & BUDGET
Credits (Min/Max): 3/3
This course will survey the basic principles, terminology and uses of budgeting and accounting techniques as they relate to the Human Resource function. The course will explore frameworks for understanding the interdependence between the Human Resource and Finance functions including assessing the general costs of HR and such specifics as turnover, absenteeism, EAP, technology, compensation and benefits planning, and HR budgeting.

HRMT5012
LEGAL ASPECTS OF HRM
Credits (Min/Max): 3/3
This course provides an introduction to the laws, regulations and court decisions covering the HRM function and the employment relationship, including labor-management, OSHA, FMLA, EEOC, ERISA, ADA, employment-at-will and other HRM-related laws. Compliance programs will also be reviewed.

HRMT5013
QUANT. RES. METHODS IN HRM
Credits (Min/Max): 3/3
This course is designed to provide the student with an overview of the principles of quantitative and qualitative research as it relates to the HR discipline. Various research methods and techniques are explored with the purpose of developing the student's ability to critically evaluate HR research studies and enable effective conduct of their own HR research. Specific examples include survey design, attitude research, communication, assessment and program evaluation.

PreRequisites:

HRMT5020
ORGANIZATIONAL BEHAVIOR
Credits (Min/Max): 3/3
This course is designed to provide the student with the background and skills to augment the student's managerial effectiveness. The course emphasizes theories of micro- meso- and macro-organizational behavior as they relate to the workplace. Human Resource topics include motivation and individual behavior, interpersonal and group behavior, job satisfaction, work stress, leadership, organizational structures and culture.

HRMT5023
ORGANIZATIONAL THEORY
Credits (Min/Max): 3/3
This course provides the student with a forum to explore different theoretical ways of thinking about organizations. Students will be introduced to traditional, modern, and post-modern organizational theories from different disciplines. Students will also come to understand how these theories impact the way in which we view, comprehend and act in organizations.

HRMT5025A
INTEGRATIVE SEMINAR
Credits (Min/Max): 3/3
This 2-term seminar provides the student with a capstone experience, designed to integrate the disciplinary knowledge gained in the program and prepare the student for effective HR practice. Students will learn how to develop and use HR strategy, how to initiate and manage HR consulting relationships, and how to use HR assessment and evaluation tools. As part of the seminar, students will design, implement and evaluate an HR consulting project in their area of concentration.

PreRequisites: HRMT5013 - QUANT. RES. METHODS IN HRM

HRMT5025B
INTEGRATIVE SEMINAR
Credits (Min/Max): 3/3
This 2-term seminar provides the student with a capstone experience, designed to integrate the disciplinary knowledge gained in the program and prepare the student for effective HR practice. Students will learn how to develop and use HR strategy, how to initiate and manage HR consulting relationships, and how to use HR assessment and evaluation tools. As part of the seminar, students will design, implement and evaluate an HR consulting project in their area of concentration.

HRMT6000
HUMAN RESOURCES INFORMATION SYSTEMS
Credits (Min/Max): 3/3
Through this course, you will learn to recognize and appreciate the management of information systems as an integral part of the HR function. The course will present major technological advancements and a review of available software, which supports HR. Emphasis is on the accessibility and availability of information. Familiarity with spreadsheets and relational database management is helpful, but not required.

HRMT6001
COMPUTER & WEB BASED TRAINING
Credits (Min/Max): 3/3
Computer and Web-based Training is an introductory course designed to provide students with a practical approach to the theory, principles, and application skills relevant to the design of computer and web-based training courseware. This course additionally focuses on the advantages and disadvantages of electronic educational communications and the variances in the audience characteristics that warrant its success. Students will be given preliminary resources and strategies that will help in the development of instructional plans and future professional courseware design.

HRMT6002
WORKFORCE DIVERSITY: LOCAL & GLOBAL PERSPECTIVES
Credits (Min/Max): 3/3
This course examines the strategic management of workforce diversity from both a local and a global perspective. The course begins with a study of historical and contemporary forms of prejudice and discrimination, in the U.S. and abroad, followed by an exploration of the local and global legislation related to equal opportunity in the workforce. Students will learn about different approaches to diversity management and how to handle diversity metrics. They will also study the issues that affect specific identity groups, defined by such factors as religion, disability, age, gender, sexual orientation, and race/ethnicity.

HRMT6006
TOPICS IN HRM:
Credits (Min/Max): 3/3
This course offers students a comprehensive foundation in International Human Resource Management (IHRM). The course reviews the contextual and strategic elements of IHRM, including the internationalization of business and HRM, aligning corporate strategy and structure at the global level, the international legal context, and international culture. Students will also learn about specific HRM applications in the international context, such as global talent management and staffing, international training and development, global compensation management, and international performance management.

HRMT6011
ADV. TOPICS IN LEGAL ASPECTS
Credits (Min/Max): 3/3
A study of the practical application of legal theory (excluding traditional labor law) to human resources management, from the development of job descriptions for use in recruiting through post-termination proceedings. Special emphasis is placed on equal employment and wage hour matters and other selected topics.

HRMT6012
TRAINING AND DEVELOPMENT
Credits (Min/Max): 3/3
This course deals with the overall training and development process, including the design of training programs, identification of training needs, selection of training techniques, development of presentation skills and evaluation of program effectiveness. Techniques and theories of training and development of people in organizational settings are also explored.

HRMT6013
COMPENSATION MANAGEMENT
Credits (Min/Max): 3/3
This course examines the various direct financial, indirect financial and non-financial reward systems that are used to achieve the organizational goals of attracting, retaining, and motivating the employee. Both the employer and the employee perspectives are reviewed. Also covered are the various performance appraisal systems and their relationship to organizational reward systems.

**HRMT6015**  
**EMPLOYEE BENEFITS ADMINISTRATION**  
Credits (Min/Max): 3/3  
This course presents an overview of employee benefits, planning total benefits programs, issues in the design and selection of benefits programs, costing employee benefits, different type of benefits flexible programs communicating benefits programs and selecting and using benefits consultants.

**HRMT6016**  
**EMPLOYEE HEALTH & SAFETY**  
Credits (Min/Max): 3/3  
This course presents an overview of relevant and current information regarding health/mental health, safety, and security issues affecting the 21st-century workplace and the develop of services by the human resources team to respond to these issues. Through this course students will explore employee assistance programs and other related services. Topics will also include compliance with legislation and regulations related to the health and safety of the American worker.

**HRMT6017**  
**RECRUITMENT AND PLACEMENT**  
Credits (Min/Max): 3/3  
A survey of the basic techniques for the recruitment, selection and placement of people. Topics include the preparation of job specification, the development of a recruiting strategy, methods and procedures of recruiting and selecting candidates, and the need for proper new employee orientation.

**HRMT6018**  
**LEADERSHIP**  
Credits (Min/Max): 3/3  
This course will provide the student with the opportunity to engage in contemporary discussions of leadership, theory and personal leadership effectiveness. Course topics include what leaders do, how leaders think, and how leadership is developed and learned.

**HRMT6020**  
**INTERVENTION & ORGANIZATIONAL CHANGE**  
Credits (Min/Max): 3/3  
This course explores methods of organizational diagnosis, planned change and intervention, and various concepts and methods of planned organizational change. These concepts and methods will be applied to an organizational setting selected by the student.

**HRMT6021**  
**LABOR RELATIONS & COLLECTIVE BARGAINING**  
Credits (Min/Max): 3/3  
A survey of the organizational and economic aspects of management/employee relationships. The main topics include a historical review of the American labor movement, an overview of the social, instructional and organizational frameworks within which the collective bargaining process occurs, and techniques of labor/management dispute management. Theories and principles of collective bargaining will be covered, and a mock bargaining session will be held to provide a "hands on" approach to bargaining.

**HRMT6028**  
**INTERNET & TECH RECRUITING**  
Credits (Min/Max): 3/3  
This course introduces the student to the field of recruiting technical employees. Course materials are specifically designed to provide the student with an understanding of how to use online recruiting techniques to find technical employees. Topics include: the strategic role of HR, writing ads and advertising for jobs, selecting an online service, the future of recruiting, ethical issues in online recruiting, and technical recruiting. This is an online class.

**HRMT6034**  
**MANAGING INFORMATION TECHNOLOGY & CHANGE**  
Credits (Min/Max): 3/3  
This course will cover various types of information technology, the elements of project management, implementing and evaluating the technology, managing knowledge workers and managing the change process. Students will learn that managing information technology includes more than managing a "computer." As a result, classroom discussion and student learning will include processes and procedures necessary to improve productivity and efficiency within the organization.
HRMT6035  
SHRM LEARNING SYSTEM  
Credits (Min/Max): 3/3  
This course provides an overview of key areas in human resource management corresponding to the six functional areas as defined by the Human Resource Certification Institute (HRCI) and covered in the PHR and SPHR exams. These six modules are Strategic Management, Workforce Planning and Employment, Human Resource Development, Compensation and Benefits, Employee and Labor Relations, and Safety and Environment. The course is offered in cooperation with the Society for Human Resource Management (SHRM) and uses SHRM student learning materials which prepare students to take the Professional in Human Resources (PHR) and Senior Professional in Human Resources (SPHR) certification examinations administered by HRCI. Students are required to use the most current version of the SHRM Learning System Materials.

HRMT6036  
PERFORMANCE MANAGEMENT  
Credits (Min/Max): 3/3  
Performance Management is the process through which managers ensure that employee's activities and outputs contribute to the organization's goals. The student will learn how to design and use performance management systems to help the organization meet business objectives, link employee behaviors to organizational goals, and create administrative systems that provide information for day-to-day decisions such as salary and benefits administration, the development of training programs, and decisions regarding retention and termination.

HSCG0001  
PROFESSIONAL ASPECTS OF ANESTH  
Credits (Min/Max): 0/1  
This course includes an introduction to the ethics, legal aspects, psychology, and professional adjustments associated with a career in anesthesia. The history of anesthesia and nurse anesthesia is presented, as well as a discussion of the role of the CRNA in department management and organization.

HSCG5000  
ADVANCED PHARMACOLOGY I  
Credits (Min/Max): 3/3  
This course introduces the basic principles of pharmacology. Topics include the pharmacokinetics of drug absorption, distribution, metabolism and excretion; the mechanisms of drug action; drugs affecting the central nervous system and the autonomic nervous system; inhaled anesthetics; and neuromuscular blocking agents and reversal.

HSCG5001  
ADVANCED PHARMACOLOGY II  
Credits (Min/Max): 3/3  
This course is a continuation of Advanced Pharmacology I. It is an intensive and comprehensive study of drugs and adjuvant agents currently utilized in the practice of anesthesia and therapeutics. The course will include a review of local and intravenous anesthetics; narcotic agonists and antagonists; other psychotropic agents; anti-inflammatory drugs; and drugs that act on the cardiovascular, respiratory, renal, hepatic, gastrointestinal and hematological systems.

HSCG5003  
ORGANIC & MEDICINAL CHEMISTRY  
Credits (Min/Max): 3/3  
This is a one-semester survey course in organic chemistry organized around the functional groups of compounds. Aspects of organic chemistry pertinent to health, environment, and biochemistry are stressed. Time permitting, classes of drug molecules will also be examined. Because concepts such as spatial orientation and geometric, optical and conformational isomerism are essential to an understanding of drug action, these concepts are essential to the course.

HSCG5004  
BIOCHEMISTRY  
Credits (Min/Max): 4/4  
This course is an introduction to the chemistry of living organisms. It includes a discussion of cellular macromolecules, metabolic pathways, energy transformation and respiratory mechanisms. The composition of body fluids is also considered. The effects of anesthesia on body fluids, on the function of major organs, and on the activity of specialized molecules will be described. The major theories of narcosis and their biochemical implications will be examined.

HSCG5010  
RESEARCH METHODOLOGY  
Credits (Min/Max): 3/3  
This course is designed to explore the nature, value, and utility of nursing research. An overview of the process by which research is conceived and conducted is presented, with emphasis on varying approaches and methodologies, conceptual consistency, and ethical considerations. Critical appraisal of published research affords the student the opportunity to become a more discriminating consumer of research and a better-informed participant in the research process. The relationships among research, theory, and practice are presented and linked to the student's arena of practice.
HSCG5012
MEDICAL PHYSICS
Credits (Min/Max): 4/4
This is a survey course in physics, which will cover topics of importance to anesthetic applications. Essential concepts related to atomic structure, pressure, hydrostatics, hydrodynamics, the ideal gas laws, diffusion, heat and vaporization will be presented. The physics of fire and explosions as well as safety issues will be discussed. The development of problem solving skills will be emphasized.

HSCG5021
ADVANCED ANATOMY, PHYSIOLOGY & PATHOPHYSIOLOGY I
Credits (Min/Max): 5/5
This course is a study of the structure and function of the human body. Emphasis is placed on the nervous, muscle and cardiovascular systems. Selected pathophysiology of each of the above systems will be examined.

HSCG5022
ADVANCED ANATOMY, PHYSIOLOGY & PATHOPHYSIOLOGY II
Credits (Min/Max): 5/5
This course is a continuation of Advanced Anatomy, Physiology, and Pathophysiology I. The course will cover the cardiovascular, respiratory, renal, hepatic and endocrine systems. Selected pathophysiology of each of the above systems will be discussed.

HSCG5030
ANESTHESIA DIDACTICS I
Credits (Min/Max): 6/6
This course is an introduction to anesthesia practice and techniques. It includes topics which deal with pre-operative evaluation and interview of patients, anesthetic drugs, anesthesia selection and care plans, patient positioning, fire safety, postoperative visits, monitoring, anesthesia machines, airway management, venipuncture, and other principles of anesthetic management.

HSCG5101
CLINICAL PRACTICUM I
Credits (Min/Max): 0/0
An orientation to the perioperative clinical area, providing the SRNA with hands-on experience in the basic skills of anesthesia delivery, including equipment check, basic drug set-up, preoperative patient assessment, initiating IV therapy, patient positioning, airway management, anesthesia induction, mask/LMA/intubation techniques, anesthesia maintenance, fluid and drug calculations, emergence techniques, extubation techniques, and safe transfer of patient care to PACU personnel. SRNAs will be expected to bring the classroom to the OR, by correlating theory to practice. SRNAs will also gain an appreciation of the role of the CRNA, as part of a multidisciplinary team, in the delivery of anesthesia care. They will deliver anesthesia to patients with a variety of comorbidities, presenting to the OR for a wide variety of surgical procedures. Each SRNA will be assigned by the Program Director to one of the program's affiliating clinical sites, either alone, or in groups, depending on the clinical site. During this clinical practicum, SRNAs will be assigned to a CRNA preceptor, who will provide direct clinical supervision, guidance and evaluation.

HSCG5102
CLINICAL PRACTICUM II
Credits (Min/Max): 0/0
An orientation to the perioperative clinical area, providing the SRNA with hands-on experience in the basic skills of anesthesia delivery, including equipment check, basic drug set-up, preoperative patient assessment, initiating IV therapy, patient positioning, airway management, anesthesia induction, mask/LMA/intubation techniques, anesthesia maintenance, fluid and drug calculations, emergence techniques, extubation techniques, and safe transfer of patient care to PACU personnel. SRNAs will be expected to bring the classroom to the OR, by correlating theory to practice. SRNAs will also gain an appreciation of the role of the CRNA, as part of a multidisciplinary team, in the delivery of anesthesia care. They will deliver anesthesia to patients with a variety of comorbidities, presenting to the OR for a wide variety of surgical procedures. Each SRNA will be assigned by the Program Director to one of the program's affiliating clinical sites, either alone, or in groups, depending on the clinical site. During this clinical practicum, SRNAs will be assigned to a CRNA preceptor, who will provide direct clinical supervision, guidance and evaluation.

HSCG6012
NURSING RESEARCH II: EVIDENCE-BASED NURSING PRACTICE
Credits (Min/Max): 3/3
This course is designed to provide the opportunity for continued investigation into the role of research in nursing practice. Through a variety of research activities students will be invited to apply the concepts of research and the research process that were presented in Nursing Research I to an independent exploration of a selected area of interest in nursing.

HSCG6030
ANESTHESIA DIDACTICS II
Credits (Min/Max): 6/6
This course examines specific anesthetic techniques used for surgery involving pediatric, neurosurgical, obstetric, thoracic, dental, endoscopic, vascular, cardiac, abdominal, emergency, diagnostic and outpatient procedures. Conferences will be an integral part of this course and will include a review of journal articles and case discussions.

**HSCG6055**  
ADVANCED THEORY & HEALTH ASSESSMENT  
Credits (Min/Max): 4/4  
This course is designed to build upon the student's basic knowledge and skills. It will encompass and integrate a variety of input for medical and anesthetic management. It will focus on a greater depth of understanding and the ability to analyze concurrent problems that can arise in patient care and propose an appropriate course of management.

**HSCG6101**  
CLINICAL PRACTICUM III  
Credits (Min/Max): 0/0  
This clinical practicum will be a continuation of Clinical practicum I and II, however, will provide the SRNA with hands-on experience with more advanced anesthesia techniques, such as central and peripheral regional blocks and central line placement. SRNAs will be assigned specialty rotations, including cardiac, regional, trauma, pediatric and neuro.

**HSCG6102**  
CLINICAL PRACTICUM IV  
Credits (Min/Max): 0/0  
This clinical practicum will be a continuation of Clinical practicum I and II, however, will provide the SRNA with hands-on experience with more advanced anesthesia techniques, such as central and peripheral regional blocks and central line placement. SRNAs will be assigned specialty rotations, including cardiac, regional, trauma, pediatric and neuro.

**HSCG6103**  
CLINICAL PRACTICUM V  
Credits (Min/Max): 0/0  
This clinical practicum will be a continuation of Clinical practicum I and II, however, will provide the SRNA with hands-on experience with more advanced anesthesia techniques, such as central and peripheral regional blocks and central line placement. SRNAs will be assigned specialty rotations, including cardiac, regional, trauma, pediatric and neuro.

**HSCG6104**  
CLINICAL PRACTICUM VI  
Credits (Min/Max): 0/0  
This clinical practicum will be a continuation of Clinical practicum I and II, however, will provide the SRNA with hands-on experience with more advanced anesthesia techniques, such as central and peripheral regional blocks and central line placement. SRNAs will be assigned specialty rotations, including cardiac, regional, trauma, pediatric and neuro.

**HSCU1005**  
INTRO TO HEALTH PROFESSIONS  
Credits (Min/Max): 1/1  
This elective course for health science majors introduces undergraduates to varied allied health careers through direct discussions with certified health professionals from each field. Weekly discussions touch on every major facet of a field, such as training requirements, job responsibilities, and salary ranges. The course also provides an increased perspective of the United States healthcare system.

**HSCU2001**  
RADIOLOGIC TECHNOLOGY I  
Credits (Min/Max): 2/2  
This introductory course will lay the groundwork for successive radiography courses. The course provides information on radiographic anatomy of the upper and lower extremities, the history of imaging and an introduction to radiation, an introduction to radiation protection, and professionalism. Extensive orientation and certification in CPR are also included in this course.

**HSCU2002**  
CLINICAL EDUCATION I  
Credits (Min/Max): 2/2  
This course provides orientation to radiographic equipment, procedures, department policies, and patient care and safety. Competency based clinical instruction is provided in examination of upper and lower extremities.

**HSCU2003**  
RADIOLOGIC TECHNOLOGY II  
Credits (Min/Max): 2/2
This course provides information on the formation and recording of the radiographic image including film processing and darkroom design and function. Patient care components, such as vital signs, oxygen administration, infection control, and patient assessment are presented. Radiographic anatomy of the chest thoracic and abdominal cavities is included.

HSCU2004
CLINICAL EDUCATION II
Credits (Min/Max): 2/2
This course provides competency based clinical instruction in examination of the chest, abdomen, shoulder girdle, and bony thorax.

HSCU2005
RADIOLOGIC TECHNOLOGY III
Credits (Min/Max): 2/2
This course provides instruction and investigation into Medical Ethics & Law as well as Radiographic Technique. Information is provided on the controlling and influencing factors of radiographic technique formation, comparison, and conversion. An introduction to radiographic physics is included in this course.

HSCU2006
CLINICAL EDUCATION III
Credits (Min/Max): 2/2
This course provides competency based clinical instruction in examination of the pelvis, hips and spine.

HSCU2007
RADIOLOGIC TECHNOLOGY IV
Credits (Min/Max): 2/2
The biologic hazards of radiation are emphasized in the Radiobiology portion of this course. The Radiation Protection segment provides in-depth information on the concepts of radiation detection, measurement, patient and radiographer protection, agencies, and regulations. The Patient Care portion of the course focuses on contrast media, radiographic pharmacology, medical emergencies, and venipuncture instruction and certification.

HSCU2008
CLINICAL EDUCATION IV
Credits (Min/Max): 2/2
This course provides competency based clinical instruction in examination of the skull, facial bones, and paranasal sinuses.

HSCU2009
RADIOLOGIC TECHNOLOGY V
Credits (Min/Max): 2/2
This course provides information on the equipment and physics of x-ray production, and quality control requirements. Special imaging methods and alternate imaging modality equipment will be presented.

HSCU2010
CLINICAL EDUCATION V
Credits (Min/Max): 2/2
This course provides competency based clinical instruction in radiographic examinations of the digestive, urinary, hepatobiliary, and respiratory systems as well as the soft tissues of the neck. Formal film critique is also presented.

HSCU2011
RADIOLOGIC TECHNOLOGY VI
Credits (Min/Max): 2/2
Information on various pathologic conditions and their impact on the radiographic process is presented in this summer session.

HSCU2012
CLINICAL EDUCATION VI
Credits (Min/Max): 2/2
This course provides competency based clinical instruction in radiographic examinations of the endocrine, circulatory, nervous, and reproductive system, as well as on arthrography.

HSCU2013
RADIOLOGIC TECHNOLOGY VII
Credits (Min/Max): 2/2
Students in the A.S. program in radiologic technology enroll for 26 credits in radiologic technology principles and clinical practice. Portions of this internship are taught each semester, for six consecutive semesters (fall, spring and summer of years 1 and 2). This is the final culminating course.

**HSCU2014**  
**INTRO TO KINESIOLOGY**  
**Credits (Min/Max): 3/3**  
Intro to Kinesiology is an introductory course for students pursuing a clinical or non-clinical health science major. The course also introduces students to the four sub-disciplines of Kinesiology comprises 1) physiology, 2) psychology, 3) motor learning, and 4) biomechanics. The course is intended for students with career interests in human movement as it relates to motor performance, activities of daily living, physical fitness, and sports related activities.  
PreRequisites: BIOL1024 - HUMAN ANATOMY & PHYSIOLOGY II

**HSCU3015**  
**BIOLOGY OF AGING**  
**Credits (Min/Max): 3/3**  
This course explores the anatomical and physiological changes associated with human aging. What is aging, lifespan, theories of aging, and evolution and aging will also be discussed.  
PreRequisites: BIOL1023 - ANATOMY & PHYSIOLOGY I

**HSCU3018**  
**PATHOLOGY OF INFECTIOUS DISEASES**  
**Credits (Min/Max): 3/3**  
This course is an examination of how microbial infections cause damage, symptoms and disease in the human body. We will focus on the impact of pathogenic microbes and microbial products on various human body cells, tissues, organs and systems. The course expands on basic principles of pathogenesis introduced in the prerequisite microbiology course and will relate those principles to human pathophysiology.  
PreRequisites: BIOL1015 - MICROBIOLOGY FOR HEALTH SCIENCES

**HSCU3021**  
**HUMAN PATHOPHYSIOLOGY I**  
**Credits (Min/Max): 3/3**  
The course will examine the causes, evolution, morphological changes, clinical manifestations, and diagnosis of diseases. Representative disorders of the integument, musculoskeletal, nervous, and endocrine systems will be studied.  
PreRequisites: BIOL1024 - HUMAN ANATOMY & PHYSIOLOGY II

**HSCU3025**  
**EXERCISE PHYSIOLOGY & SPORTS NUTRITION**  
**Credits (Min/Max): 3/3**  
This course is designed to introduce students to the basic principles Sports Nutrition and Exercise Physiology with an emphasis on wellness promotion throughout life.  
PreRequisites: BIOL1024 - HUMAN ANATOMY & PHYSIOLOGY II

**HSCU3028**  
**SPECIAL TOPIC IN HEALTH SCIENCE:**  
**Credits (Min/Max): 3/3**  
FA14: Stress Management/Wellness is an introductory understanding of the fundamental principles of stress management and wellness. This course will provide pertinent information the student needs to understand, organize, plan, and implement a preliminary stress management program. The course will follow physiological concepts of stress management and wellness that encourages the student to identify the factors that contribute to their stress and to develop strategies that will allow the student to manage these factors more effectively. The course is taught through a variety of teaching methods which include lecture, workbook activities, and the repeated use of stress techniques demonstrated by the instructor and practiced by the students in class.

**HSCU3030**  
**MANAGEMENT & LEADERSHIP FOR THE HEALTH SCIENCES**  
**Credits (Min/Max): 3/3**  
This course is designed to provide students an opportunity to develop knowledge of management and leadership skills. Management and leadership roles in a variety of health care settings will be examined. Relevant research as it relates to the management and leadership role in healthcare will be explored. (Pending Senate Approval)

**HSCU3035**  
**HEALTH POLICY FOR THE HEALTH SCIENCES**  
**Credits (Min/Max): 3/3**
This course is designed to provide the student with an overview of the current context of health care including the organization and financing of patient services, reimbursement, and the scope and role of regulatory agencies that define health care practice. Health policy issues and the political process addressing those issues will be examined. Strategies for influencing the political process by health professionals, lay and special advocacy groups will be explored. (Pending Senate Approval)

HSCU3041
HUMAN PATHOPHYSIOLOGY II
Credits (Min/Max): 3/3
This course is a continuation of the study of human pathophysiology. It will examine the causes, evolution, morphological changes, clinical manifestations, and diagnosis of representative diseases of the endocrine, cardiovascular, respiratory, renal, digestive, and reproductive systems.
PreRequisites: BIOL1024 - HUMAN ANATOMY & PHYSIOLOGY II

HSCU3045
PHARMACOLOGY FOR HEALTH SCIENCE
Credits (Min/Max): 3/3
This course is designed to introduce the student to the pharmacokinetics and pharmacodynamics of drug therapy with emphasis on the actions, interactions, adverse effects and care implications of each classification of drugs used to treat clients and patients with diseases of body systems. The organization of the central nervous system and autonomic nervous system will be described. Drug metabolism and elimination will also be discussed. Related topics includes lifespan considerations, economics, legal and ethical aspects of drug administration and client/patient education.
PreRequisites: BIOL1015 - MICROBIOLOGY FOR HEALTH SCIENCES

HSCU3050
HEALTH ASSESSMENT IN HEALTH SCIENCES
Credits (Min/Max): 3/3
This course focuses on health assessment, health promotion, and disease prevention for major health concerns of individuals throughout the life span. Emphasis will be on developing the student's ability to create an in-depth health history and health risk profile, and to perform physical assessment of clients of varying ages. Evidence-based screening tests for early detection of disease, immunizations and prophylaxis to prevent disease and counseling to modify risk factors that lead to disease will be explored.
PreRequisites: BIOL1024 - HUMAN ANATOMY & PHYSIOLOGY II

IDSN1011
INTERIOR GRAPHICS I
Credits (Min/Max): 3/3
An introduction to the drafting techniques that are used by the interior designers to represent built environments, as well as the components found in them, with scale drawings. Instruction focuses on understanding concepts and developing the skills needed to produce manually-generated and computer-generated drawings, architectural lettering, and drawing composition.

IDSN1020
INTERIOR DESIGN I
Credits (Min/Max): 3/3
An introductory course in interior design theory, principles, and processes, which are applied to spaces with simple design programs where people live and work.
PreRequisites: IDSN1011 - INTERIOR GRAPHICS I

IDSN1021
INTERIOR DESIGN GRAPHICS II
Credits (Min/Max): 3/3
A continuation of Interior Design Graphics I. This course focuses on three-dimensional drawing techniques using both manual and computer methods. Course content includes perspective construction, freehand sketching, drawing delineation, introduction to rendering, and presentation graphics (e.g., board compositions and layout, reproduction methods).
PreRequisites: IDSN1011 - INTERIOR GRAPHICS I

IDSN1023
DRAWING I(GCDN1023)
Credits (Min/Max): 3/3
A study-workshop in the language of drawing including practice in expression and communication in various media utilizing principles of line, tone gesture, exaggeration and lighting. Cross-listed with GCDN1023

IDSN1060
FOUNDATION DESIGN I(GCDN1060)
Credits (Min/Max): 3/3
An introductory course in the creative process, the principles of design and elements of art, which are fundamental to all two and three dimensional design pursuits. Studio projects will explore the relationship between concept and execution, with emphasis on the principles of design and the elements of line, shape, value, texture, form and space. This course will emphasize the link between foundation design and digital technology by requiring at least one project using the computer and appropriate software. Cross-listed with GCDN1060

**IDSN1062**  
FOUNDATION DESIGN II (GCDN1062)  
Credits (Min/Max): 3/3  
An extension of the study of issues initiated in IDSN1060 Foundation Design I, with the addition of new areas of inquiry. Student skills will be expanded and refined in such formal visual concerns as color systems, historical style conventions, special systems, optical illusions, and manipulation of form. Cross-listed with GCDN1062  
PreRequisites: IDSN1060 - FOUNDATION DESIGN I (GCDN1060)

**IDSN2015**  
COMPUTER GRAPHICS FOR ID  
Credits (Min/Max): 3/3  
An advanced skills course in computer-aided design (CAD) and other computer graphic software programs. This course builds upon principles, concepts, and techniques learned in IDSN1011-Interior Graphics I and IDSN1021-Interior Graphics II for designing with two-and-three dimensional computer-aided drafting software. Students are provided with extensive hands-on experience to familiarize themselves with the capabilities of the computer and the graphic programs that are commonly used in interior design practice.  
PreRequisites: IDSN1021 - INTERIOR DESIGN GRAPHICS II

**IDSN2032**  
HISTORY OF ID & ARCHITECTURE I  
Credits (Min/Max): 3/3  
A survey of interiors and architecture from the ancient world through the gothic period. Emphasis is on understanding the development of our consciousness of space and the relationship between plan development, structural concepts, technology and materials.

**IDSN2035**  
INTERIOR PHOTOGRAPHY  
Credits (Min/Max): 3/3  
An investigation into the special concerns of architectural photography and the use of the camera as a design tool. Students photograph existing interiors, work in progress and design projects in model and drawing form.  
PreRequisites: IDSN1060 - FOUNDATION DESIGN I (GCDN1060)

**IDSN2037**  
TEXTILES FOR INTERIORS  
Credits (Min/Max): 3/3  
A thorough investigation into the history, manufacture, application and installation of fibers and fiber-based products used in interior spaces. Criteria for evaluating performance, compliance with fire and building codes, and impact on the environment are discussed. Prereq: IDSN2046, none for 3-yr acc., IDSN1020 for 5-yr  
PreRequisites: IDSN2046 - BUILDING TECH II: FINISH MATERIAL

**IDSN2038A**  
INTERIOR DESIGN II (A)  
Credits (Min/Max): 3/3  
An investigation of the design process with emphasis on basic programming tools, concept development and the relationship between form, function and place-making. Design projects, emphasizing commercial with at least one residential, range in size up to 6000 square feet. Project organization is from simple to complex in each semester.

**IDSN2038B**  
INTERIOR DESIGN II (B)  
Credits (Min/Max): 3/3  
An investigation of the design process with emphasis on basic programming tools, concept development and the relationship between form, function and place-making. Design projects, emphasizing commercial with at least one residential, range in size up to 6000 square feet. Project organization is from simple to complex in each semester.  
PreRequisites: IDSN2038A - INTERIOR DESIGN II (A)

**IDSN2038C**  
INTERIOR DESIGN II (C)  
Credits (Min/Max): 3/3
An investigation of the design process with emphasis on basic programming tools, concept development and the relationship between form, function and place-making. Design projects, emphasizing commercial with at least one residential, range in size up to 6000 square feet. Project organization is from simple to complex in each semester.

IDSN2039
HISTORY OF ID & ARCHITECTURE II
Credits (Min/Max): 3/3
A survey of interiors and architecture from the Renaissance through the 18th century, with special emphasis on styles and furniture.
PreRequisites: ENGL1012 - COLLEGE WRITING II

IDSN2044
BUILDING TECH I: CONSTRUCTION
Credits (Min/Max): 3/3
An overview of architectural building systems that affect the responsibilities and decisions of interior designers and facility managers. Emphasis is placed on structural systems and architectural components of buildings (e.g., floors, walls, ceilings, doors, windows, moisture protection, etc.) as well as relevant vocabulary, codes, and environmental concerns.
PreRequisites: IDSN1021 - INTERIOR DESIGN GRAPHICS II

IDSN2045
ARCHITECTURAL RENDERING
Credits (Min/Max): 3/3
An advanced course in the delineation of the interior space. Emphasis is on the development of individual style and expanded technical rendering knowledge.
PreRequisites: IDSN1021 - INTERIOR DESIGN GRAPHICS II

IDSN2046
BUILDING TECH II: FINISH MATERIAL
Credits (Min/Max): 3/3
The study of finish materials as they pertain to interior spaces. Materials are investigated in relation to their installation on floors, walls, and ceilings. Criteria for evaluating performance under differing conditions, compliance with fire and building codes, and impact on the environment are discussed. Conventional and innovative uses of finish materials to enhance design concepts are explored.
PreRequisites: IDSN1021 - INTERIOR DESIGN GRAPHICS II

IDSN2048
FURNITURE & CUSTOM DETAILING
Credits (Min/Max): 3/3
A studio course that provides instruction and hands-on experiences related to the materials, design, and construction techniques of furniture, cabinetry, and millwork detailing.
PreRequisites: IDSN2038A - INTERIOR DESIGN II(A)

IDSN2050
DIRECTED STUDY
Credits (Min/Max): 1/3
This directed study opportunity meets the needs of students who require individual help with specific aspects of their major that cannot be sufficiently addressed by an existing course.

IDSN3010
WRITING & PRESENTING FOR DESIGNERS(GCDN3010)
Credits (Min/Max): 3/3
This course will explore various writing techniques that are specific to the fields of Graphic & Communication Design and Interior Design and will include: copy and headlines, press releases, web page texts, television & radio commercial messages, design briefs and presentation notes. Students will learn effective ways to make presentations to clients in both individual and creative team situations, as well as practice their ability to articulate design concepts to an audience. In addition to being beneficial to Graphic Design and Interior Design students, the course could be offered to marketing, information systems technology and other programs beginning in the fall of 2010. Cross-listed with GCDN3010
PreRequisites: ENGL1012 - COLLEGE WRITING II

IDSN3015
STUDY OF GREAT AMERICAN HOUSES
Credits (Min/Max): 3/3
A study of great houses in the United States from early salt boxes to Mies' Farnsworth House. Emphasis is placed on historic context and each structure's contribution to contemporary residential design.
An investigation into the development of complex interior spaces. Students are encouraged to develop a holistic approach to the design process as they learn to integrate design, technical, regulatory, and budgetary issues. Design projects that emphasize commercial and adaptive reuse, and one residential project, range in size from 5,000 to 10,000 square feet.

PreRequisites: IDSN2038B - INTERIOR DESIGN II(B)

An investigation into the development of complex interior spaces. Students are encouraged to develop a holistic approach to the design process as they learn to integrate design, technical, regulatory, and budgetary issues. Design projects that emphasize commercial and adaptive reuse, and one residential project, range in size from 5,000 to 10,000 square feet.

PreRequisites: IDSN3028A - INTERIOR DESIGN III(A)

An investigation into the development of complex interior spaces. Students are encouraged to develop a holistic approach to the design process as they learn to integrate design, technical, regulatory, and budgetary issues. Design projects that emphasize commercial and adaptive reuse, and one residential project, range in size from 5,000 to 10,000 square feet.

PreRequisites: ENGL1012 - COLLEGE WRITING II

Fundamentals of lighting design and an overview of power distribution and communications systems pertinent to interior spaces. Technical aspects of lighting, its effect on behavior and perceptions of space, color, and finish materials, and environmental concerns specific to lighting are examined. Current issues relative to power distribution and telecommunication systems are incorporated. Emphasis is on the application of technical knowledge to design projects and the management of the workplace.

PreRequisites: IDSN2038A - INTERIOR DESIGN II(A)

An overview of mechanical (HVAC), plumbing, fire detection and suppression, acoustic, security, and transportation systems as they relate to the design and management of interior spaces. Emphasis is given to the application of technical knowledge to indoor air quality and the design of interior environments.

PreRequisites: IDSN2038B - INTERIOR DESIGN II(B)

An introduction to the study and practice of Environmental Graphic Design (EGD) with an emphasis on understanding visual communication and information systems for navigating and experiencing the built environment. The course will cover theory and practical application of topics related to EGD including: principles of wayfinding, study of three-dimensional design and exploration of typography, symbols, identity and information design in the public space. Cross-listed with GCDN3053

PreRequisites: GCDN1071 - COMPUTER GRAPHICS II

An elective interior design course that provides the opportunity for studying the fundamentals of kitchen and bath design. Aspects of technology, accessibility and applicable building codes will be examined. Material, equipment and finish selection, cabinetry detailing and the integrations of lighting, electrical and mechanical systems will be explored.

PreRequisites: IDSN2038A - INTERIOR DESIGN II(A)

An open-ended seminar dealing with various aesthetic questions pertinent to the student's needs. Occasional field trips and guest speakers are included in the course activities.
IDSN3062
ADVANCED COMPUTER MODELING & RENDERING I
Credits (Min/Max): 2/2
An advanced course in 3-D computer generated models, renderings, and walk-throughs as they are used in the practice of Interior Design.
PreRequisites: IDSN2045 - ARCHITECTURAL RENDERING

IDSN3064
ADVANCED COMPUTER MODELING & RENDERING II
Credits (Min/Max): 2/2
An advanced course in 3-D computer generated models, renderings, and walk-throughs as they are used in the practice of Interior Design.
PreRequisites: IDSN2045 - ARCHITECTURAL RENDERING

IDSN4041
BUSINESS PRACTICES FOR ID
Credits (Min/Max): 3/3
Professional aspects concerning the practice of interior design including such topics as estimation, trade relations, contracts and office procedures and organization.
PreRequisites: IDSN2038B - INTERIOR DESIGN II(B)

IDSN4042
CONTRACT DOCUMENTS
Credits (Min/Max): 3/3
A basic course in working drawings and their development in conjunction with specifications. Students examine conventions, techniques and layout by producing a full set of architectural drawings for a small design project. Specifications are written to support the drawings.
PreRequisites: IDSN2044 - BUILDING TECH I: CONSTRUCTION

IDSN4051
INTERIOR DESIGN-INTERNSHIP I
Credits (Min/Max): 1/6
A practical work experience in a field setting. The student receives credit for work performed in the area of interior design.

IDSN4052
INTERIOR DESIGN-INTERNSHIP II
Credits (Min/Max): 1/3
A practical work experience in a field setting. The student receives credit for work performed in the area of interior design.
PreRequisites: IDSN4051 - INTERIOR DESIGN-INTERNSHIP I

IDSN4057
INTERIOR DESIGN-INDEPENDENT STUDY
Credits (Min/Max): 1/3
This course is limited to those few students who have demonstrated an unusual level of ability and an intense commitment to a particular area of interior design.

IDSN4058
PORTFOLIO PREPARATION
Credits (Min/Max): 3/3
Instruction and guidance in the preparation of a professional portfolio. Prerequisite: senior status in interior design major.
PreRequisites: IDSN3028A - INTERIOR DESIGN III(A)

IDSN4059
SENIOR DESIGN SEMINAR I
Credits (Min/Max): 3/3
Principles and techniques of interior design research are applied to a design issue that is selected by a student and approved by interior design faculty. Students present oral and visual documentation of their research to design practitioners. In the last several weeks, students apply the semester's research to a design program and site identification that provide the basis for the design project realized in IDSN4060 Senior Design Seminar II.
PreRequisites: IDSN2044 - BUILDING TECH I: CONSTRUCTION
IDSN4060
SENIOR DESIGN SEMINAR II
Credits (Min/Max): 3/3
Building on the research knowledge and design program evolved in IDSN40459 Senior Design Seminar I, as well as all previous experiences in the interior design curriculum, a student generates a fully developed design solution that is documented with drawings and/or models. Students present their work at the end of the semester to a design jury.
PreRequisites: IDSN4059 - SENIOR DESIGN SEMINAR I

INMT3039
INTERNATIONAL BUSINESS MGMT
Credits (Min/Max): 3/3
An introduction to international business management with particular emphasis on the field of international finance and economics. In addition, the course deals with problems in the area of finance, marketing, production and organization, both from the perspective of the multinational corporation and the domestic corporation trading in international markets.

INMT3049
INT'L MKT & EXPORT MGMT (MRKT3049)
Credits (Min/Max): 3/3
An upper level course focusing on key management functions in international marketing: entry strategies, product and pricing politics, financing, promotion and distribution. The course will also concentrate on export management that is the major international activity of most small and medium-sized companies. Cross-listed with MRKT3049
PreRequisites: ADMG2021 - MARKETING MANAGEMENT(MRKT2021)

INMT4040
TOPICS & ISSUES IN INTERNATIONAL MANAGEMENT
Credits (Min/Max): 3/3
This course will provide an in-depth examination of selected topics and issues in the field of international management.

INMT4046
INTERNATIONAL FINANCE
Credits (Min/Max): 3/3
A growing number of firms engage in various types of international financial transactions. This course focuses on international financial management issues such as foreign exchange markets, international capital markets such as Eurobond markets and international banks, international banking and international risk analysis.
PreRequisites: FINC3032 - FINANCIAL MANAGEMENT

INMT4048
INTERNATIONAL LEGAL ENVIRONMENT (INST4048)
Credits (Min/Max): 3/3
This course introduces concepts of international laws of contracts, sales and negotiable instruments. It also provides an overview of problems related to dispute settlement in international business and governmental administrative conflicts that restrict commerce between residents of different nations. Cross-listed with INST4048
PreRequisites: ADMG2009 - BUSINESS LAW I

INMT4051
INTERNATIONAL MANAGEMENT- INTERNSHIP I
Credits (Min/Max): 1/6
A field experience in an international management position under the direction of a field supervisor and a faculty member. The internship is designed to offer the student an opportunity to acquire work experience in an international business environment.
PreRequisites: INMT3039 - INTERNATIONAL BUSINESS MGMT

INMT4052
INTERNATIONAL MANAGEMENT- INTERNSHIP II
Credits (Min/Max): 3/3
A field experience in an international management position under the direction of a field supervisor and a faculty member. The internship is designed to offer the student an opportunity to acquire work experience in an international business environment.
PreRequisites: INMT3039 - INTERNATIONAL BUSINESS MGMT

INMT4057
INTERNATIONAL MGMT-INDEPENDENT STUDY
Credits (Min/Max): 3/3
The independent study is intended to give an opportunity to students with superior ability to pursue an area of study in international management that is very specific in focus and/or not covered in existing offerings.

**INST2001**
**GLOBAL POLITICS (POLI2001)**
Credits (Min/Max): 3/3
This is an introductory course in the field of international relations, providing an overview of major theories and concepts of international relations and an historical background for contemporary world politics. Major topics include the contemporary international system, economic development, foreign policy behavior, international conflicts and international institutions. Cross-listed with POLI2001

**INST2011**
**WORLD GEOGRAPHY (GEOG2011)**
Credits (Min/Max): 3/3
A study of the interactions between human beings and the land, and the influence of geography in shaping work and culture throughout the world. Cross-listed with GEOG2011

**INST3001**
**INTERNATIONAL ORG & THE LEGAL FRAMEWORK OF INTERNATIONAL AFFAIRS**
Credits (Min/Max): 3/3
An overview of major theories of international political economy including a more detailed understanding of the fast growing economic and institutional infrastructure of the international system. Topics include the development of intergovernmental and non-governmental international organizations (IGOs and NGOs), international treaties and laws governing trade and business practices, and mechanisms for the resolutions of international disputes.

**INST3003**
**INTL POLITICAL ECONOMY (ADMG3003)**
Credits (Min/Max): 3/3
An overview of major theories of international political economy including a more detailed understanding of the fast growing economic and institutional infrastructure of the international system. Topics include the development of intergovernmental and non-governmental international organizations (IGOs and NGOs), international treaties and laws governing trade and business practices, and mechanisms for the resolutions of international disputes. Cross-listed with ADMG3003
PreRequisites: ADMG1005 - MACROECONOMICS

**INST3010**
**CULTURAL GEOGRAPHY AND THE HUMAN MOSAIC (GEOG3010)**
Credits (Min/Max): 3/3
The many ways in which humans have changed the face of the earth in response to culture is known as the human mosaic. This course applies the major themes of cultural geography to population, language, religion, agriculture and urbanism. A basic knowledge of world geography is assumed. Cross-listed with GEOG3010

**INST3011**
**RESEARCH METHODS (SOCL3011)**
Credits (Min/Max): 3/3
This course introduces the student to the design of explanatory models in the field of international relations, methods for literature surveys and more commonly used quantitative and qualitative analytical techniques. Cross-listed with SOCL3011
PreRequisites: MATH1040 - PROBABILITY & STATISTICS

**INST3013**
**GEOGRAPHY & WORLD AFFAIRS (GEOG3013)**
Credits (Min/Max): 3/3
An overview of various regions of the world and the environmental conditions to which people adapt. Racial, linguistic, religious and economic groupings of people will be stressed. Current world events are examined to develop knowledge about historical, geographic, climatic, political and religious environments which people inhabit. Cross-listed with GEOG3013

**INST3021**
**COMPARATIVE GOVERNMENT (POLI3021)**
Credits (Min/Max): 3/3
This course focuses on the government, policies and politics of different nation-states around the world, and investigates the political science approaches to studying government and politics in different parts of the world. The focus is not only on forms of governments, but also the major political and social factors that affect political change in different world areas, the relationship between states and societies, and the comparative study of democratic and non-democratic nations. Cross-listed with POLI3021
INST3023
MODERN U.S. DIPLOMATIC HISTORY (HIST/POLI3023)
Credits (Min/Max): 3/3
This course presents a study of the major developments in American diplomatic history. Special emphasis is placed on the years from World War II until the present. Major international developments and their effects on American diplomacy are discussed along with the impact of various presidents and the influence of the United Nations. The interrelation between foreign policy and domestic opinion is also examined. Cross-listed with HIST/POLI3023

INST3025
DEVELOPMENT: POLITICAL, SOCIAL & ECONOMIC ISSUES (POLI3025)
Credits (Min/Max): 3/3
A study of the political, social, and economic realities of Latin America, Asia, and Africa. Emphasis is placed on ecological, racial, ethnic, and population problems, as well as on the legacy of colonialism, developmentalism, and dependency. Human rights and special problems of women will also be addressed. Cross-listed with POLI3025

INST3027
HISTORY OF MODERN EUROPE (HIST3027)
Credits (Min/Max): 3/3
A survey of modern European history (beginning with the turn of the century) that is intended to provide global awareness and an appreciation of the accomplishments of other cultures. This course also provides a particular perspective of the American way of life as it has been influenced by European cultures. Cross-listed with HIST3027

INST3028
EAST ASIAN HISTORY (HIST3028)
Credits (Min/Max): 3/3
An overview of the history of Korea, Japan, China, Singapore, Taiwan, Hong Kong, and Malaysia. The domestic, political, social, and economic bases of the historical development of these nations will be considered. Political influences of other world powers will be considered. Cross-listed with HIST3028

INST3033
AMERICAN FOREIGN POLICY (POLI3033)
Credits (Min/Max): 3/3
The reasons behind the foreign policy decisions of the U.S. government in recent decades are examined; different theories are explored for explaining shifts and continuities in foreign policy decision-making. Contemporary challenges to American foreign policy, from Iraq and security threats to peace-making efforts in the Middle East, are analyzed. Cross-listed with POLI3033

INST4048
INTERNATIONAL LEGAL ENVIRONMENT (INMT4048)
Credits (Min/Max): 3/3
This course introduces concepts of international laws of contracts, sales and negotiable instruments. It also provides an overview of problems related to dispute settlement in international business and governmental administrative conflicts that restrict commerce between residents of different nations. Cross-listed with INMT4048
PreRequisites: ADMG2009 - BUSINESS LAW I

INST4055
SENIOR SEMINAR IN INTERNATIONAL STUDIES
Credits (Min/Max): 3/3
This is the capstone course for all international studies students. It will be the vehicle for students to synthesize their knowledge of international relations through the development of individual research endeavors in a special topic relevant to their respective concentration areas. Students will have the opportunity to discuss and share their research with fellow students in a seminar format.

INST4057
INTERNATIONAL STUDIES- INDEPENDENT STUDY
Credits (Min/Max): 1/3
Students work independently with a faculty member on a topic of relevant interest to the advanced student pursuing a major in International Affairs.

ISTC1005
PRACTICAL COMPUTER APPLICATIONS
Credits (Min/Max): 3/3
This course provides the student with hands-on use of personal computers and Microsoft Office 2010. Email etiquette and management as well as effective and efficient access and evaluation of information from the Internet are also introduced. Emphasis is on learning the concepts and skills necessary to complete the task at hand using the computer, related software, and the Internet. While learning the keystrokes is important, equally important is using the right tool for the right job. Word processing, electronic spreadsheets, graphic presentations, and the Windows Operating environments including file and folder management are presented in this course.

ISTC1006
ADVANCED PRACTICAL COMPUTER APPLICATIONS
Credits (Min/Max): 3/3
This user-oriented course is for students who already understand the fundamentals of PC-compatible functions of Microsoft Windows and the Microsoft Office Suite software, Word, Excel, Access, and Power Point. This course provides the student with an introduction to the advanced features and functions of PC-compatible computer software, in general, and Microsoft Windows and Microsoft Office Suite in particular. Through coverage of the advanced features of those programs, the student will acquire the solid working knowledge of them required of today's professionals. In addition, the course will improve the student's working knowledge and proficiency with the basics of those programs. The course also provides peripheral coverage of the major components of management information systems and decision support systems.

ISTC1021
PROBLEM SOLVING
Credits (Min/Max): 3/3
This course provides step-by-step progression, with detailed explanations and many illustrations, from the basic of mathematical functions and operations to the design and use of such techniques as codes, indicators, control-breaks, arrays, pointers, file updates, report handling, data structures, and object-oriented programming. The tools of problem solving, including decision tables and trees, structure charts, IPO charts, algorithms, and flow-charts are demonstrated and explained. Throughout the course, typical business problems are presented for solutions, providing excellent experience for the students.

ISTC1025
COMPUTER HARDWARE
Credits (Min/Max): 3/3
This course provides both a theoretical and a hands-on, detailed, progressive examination of personal (PC) computer system hardware, both stand alone personal computers and distributed-data/networking hardware. Throughout the course, the concepts discussed, and the hardware-related problems presented for discussion and solution, are typical of the knowledge required to work with personal and business-world computer hardware applications, providing excellent experience for the students.

ISTC2005
IT: A GLOBAL PERSPECTIVE
Credits (Min/Max): 3/3
This course provides students with an introductory and general examination of computer-based systems and users as they exist throughout the world. A particular focus of this course is providing students with an overview of information technology, as it exists in both the developing as well as the developed world. To this end, students will examine computer use trends, industry trends, economic and resource patterns, employment trends and cultural patterns that affect or are affected by information technology.
PreRequisites: ISTC1005 - PRACTICAL COMPUTER APPLICATIONS

ISTC2008
INTRO TO CYBERSPACE
Credits (Min/Max): 3/3
This course introduces the students to the virtual world of the Internet. The course will focus on the vast array of on-line informational resources available through the Internet. Students will have the opportunity to work with the tools necessary to navigate through the net as well as develop web pages. Implications of the Internet, such as security and privacy, as well as future trends will also be discussed.
PreRequisites: ISTC1005 - PRACTICAL COMPUTER APPLICATIONS

ISTC2021
MGMT OF INFORMATION SYSTEMS
Credits (Min/Max): 3/3
This course provides discussion and analysis of current issues related to the management of information systems. The components of an information system; hardware, software, data, connectivity, procedures and people are discussed in relationship to a variety of information systems including collaboration information systems, social media information systems, and enterprise wide systems such as Enterprise Resource Planning, Customer Relationship Management and Supply Chain Management. Other major areas of analysis include cloud computing, business intelligence, and the Systems Development Life Cycle. The focus of the analysis is using Information Systems to gain a competitive advantage in the marketplace.

ISTC2025
COMPUTER-BASED TRAINING & DL
Credits (Min/Max): 3/3
This course focuses on the design, development and evaluation of computer and web-based training systems. An introduction to instructional design theory as it relates to computer and web-based instruction will be included. Additionally, this course will focus on the advantages and disadvantages of electronic educational communication.

PreRequisites: ISTC1005 - PRACTICAL COMPUTER APPLICATIONS

ISTC2030
NETWORKING
Credits (Min/Max): 3/3
This course provides students with an introductory examination of computer-based networked environments. Of particular interest in this course is providing students with both a conceptual as well as an applied understanding of networks and networking. Students will be introduced to the organizational framework in which networking exists. Additionally, students will have the opportunity to explore networking on practical and applied levels so that issues such as hardware and software solutions and applications, as they relate to networked environments, will be examined.

PreRequisites: ISTC1005 - PRACTICAL COMPUTER APPLICATIONS

ISTC2045
DATA BASE MANAGEMENT SYSTEMS
Credits (Min/Max): 3/3
This course provides the basic knowledge required to operate and use a computer to perform the practical tasks of data file creation, retrieval of data and maintenance of data files. DBMS's are used for all types of applications involving medium-to-large scale data files. Major focus is on the acquisition of a working knowledge of the theories, principles and operating procedures of data base management systems using a representative DBMS. This course is appropriate for all potential users of computers in all fields of study.

PreRequisites: ISTC1005 - PRACTICAL COMPUTER APPLICATIONS

ISTC2050
DISTRIBUTED DATA PROCESSING
Credits (Min/Max): 3/3
In this course the features and operation of centralized, decentralized and distributed data processing systems are examined. The impact of distributed systems on the business enterprise is examined. Technology implications of computer hardware, software and communications are discussed in relationship to the design, development and implementation of distributed data processing systems.

PreRequisites: ISTC1005 - PRACTICAL COMPUTER APPLICATIONS

ISTC3000
ADVANCED COMPUTER HARDWARE
Credits (Min/Max): 3/3
This course provides students with a more sophisticated and detailed examination of personal computer (PC) systems hardware with particular emphasis on distributed-data/networking hardware. Of particular interest in this course is the development of an expert awareness of the issues and technologies that currently serve and are most likely to continue to serve the computer-user community.

ISTC3005
LEGAL ISSUES & INFO TECH
Credits (Min/Max): 3/3
This course provides students with an introduction to and overview of those fundamental legal issues that are pertinent to the acquisition and deployment of information technology. Students will be given an overview of local, federal and international legal systems and their relationship to intellectual, civil and criminal legal principles as they apply to information technology.

PreRequisites: ISTC1005 - PRACTICAL COMPUTER APPLICATIONS

ISTC3008
WEB PAGE USABILITY & PROGRAMMING
Credits (Min/Max): 3/3
This course offers a comprehensive analysis of Web sites. Emphasis will be on the development of interactive web pages and the interpretation of data gathered from visitors for presentation to web site owners. Web sites will be loaded on to a network and evaluated for functionality, effectiveness and delivery of data exchange. The emphasis of this course is to produce dynamic, interactive web pages that will integrate with databases.

ISTC3010
IT SERVICES ADMINISTRATION
Credits (Min/Max): 3/3
This course offers a comprehensive investigation of the duties and responsibilities of an Information Technologist. Four areas of concern for the IT specialist in this capacity are: Help Desk support, Web Page Support, Training and Development and Customer/Service Relationships. During this course, the student will participate in the on campus Student to Student Help Desk.
ISTC3015
HUMAN-COMPUTER INTERACTION
Credits (Min/Max): 3/3
This course is an introduction to the interdisciplinary field of human-computer interaction (HCI). The study of HCI focuses on the interaction between users and their computer systems. The course also examines the implications and effects of human-computer interaction in and for society; conversely, the course explores ways that society influences human-computer interactions. Analysis of interface design will be included, in the context of evaluation and evolution of usability.
PreRequisites: ISTC1005 - PRACTICAL COMPUTER APPLICATIONS

ISTC3020
COMPUTER PROGRAMMING:COBOL
Credits (Min/Max): 3/3
This course introduces the student to computer programming using the COBOL (Common Business Oriented Language) programming language. The conventions of the language, its applications and applications-related advantages and disadvantages are presented. The course develops the student's proficiency in understanding and applying the problem-solving logic, methods and procedures of programming in this language, and of programming in general. This course is appropriate for all potential users of computers in business-related fields of study.
PreRequisites: ISTC1021 - PROBLEM SOLVING

ISTC3028
SCRIPTING FOR THE WEB I
Credits (Min/Max): 3/3
An introduction to content the student needs to create effective and interactive Web sites. Discover the integration of Web authoring tools and XHTML, HTML, Cascading Style Sheets (CSS) and web site design best practices to promote a successful site. This course will use the latest scripting language for websites. Revisit topics of ISTC2008 Intro to Cyberspace and introduce more advanced techniques involving hyperlinks, embedded objects, and multimedia activity in the web site.
PreRequisites: ISTC1005 - PRACTICAL COMPUTER APPLICATIONS

ISTC3030
LINUX
Credits (Min/Max): 3/3
This course provides a hands-on, step-by-step, progressive examination of the Linux/UNIX operating system. The student will explore Linux/UNIX commands, the various shells used in Linux/UNIX, and some of the applications available in Linux/UNIX, including X Windows and a variety of productivity applications (word processing, spreadsheet program(s), data base management system program(s) et al). Throughout the course, OS-related problems presented for solution are typical of personal and business-world applications of the OS, providing excellent experience for the students.

ISTC3031
ADVANCED NETWORKING & TELECOM
Credits (Min/Max): 3/3
This course builds on the foundation knowledge of ISTC2030 Networking. The content will help the student design, install, maintain and administer networks with confidence. Networking is an extraordinarily complex topic that is evolving daily, requiring skills to evaluate and compare new technologies; this course offers the student a framework for success in network topologies.
PreRequisites: ISTC2030 - NETWORKING

ISTC3034
PROGRAMMING IN JAVA
Credits (Min/Max): 3/3
This course introduces the student to computer programming using the cross-platform Java programming language. The conventions of the language, its applications and applications-related advantages and disadvantages are presented. Students will be introduced to the concepts and techniques of Object-Oriented Programming (OOP).
PreRequisites: ISTC1021 - PROBLEM SOLVING

ISTC3046
ADV DATA BASE MGMT SYSTEMS
Credits (Min/Max): 3/3
This course focuses on an investigation and application of advanced data base concepts including data administration, data base technology and selection and acquisition of data base management systems (DBMS). It includes an in-depth practicum in data modeling and system development in a data base environment.
PreRequisites: ISTC1005 - PRACTICAL COMPUTER APPLICATIONS

ISTC4042
SYSTEMS ANALYSIS & DESIGN
Credits (Min/Max): 3/3
This course is a comprehensive examination of systems and design theory and principle, including application of systems analysis and design to real world situations. Also investigated: the various relationships of computer hardware and software to systems analysis and design; how computer hardware and software affect the design of computer information systems. The course proceeds from a generalized introduction to an analysis of the systems concept and the systems of life cycle to the design of computer information systems.

ISTC4051
INFORMATION SYSTEMS TECNOLOGY- INTERNSHIP I
Credits (Min/Max): 1/6
A field experience in an information systems position, supervised by a field supervisor as well as college faculty. The internship is designed to increase understanding of IST and the IST-related issues and perspectives as they relate to the business and social environment.

ISTC4055
SENIOR SEMINAR
Credits (Min/Max): 3/3
This is a comprehensive systems course integrating the knowledge and abilities acquired in the IST courses and accounting/administration and management courses in the IST curriculum within a comprehensive system development project.

LEAD3001
DYNAMICS OF TEAMS
Credits (Min/Max): 3/3
The purpose of the team building course is to form the cohort into a team that will be supportive of each other. This course provides an examination of team processes, structure, and behavior in organizations. The module places special emphasis on problem solving in-groups, consensus building and using effective team processes and skill development. Students learn decision-making theory and apply those theories as they study the decision-making process. Using an interdisciplinary approach, the module addresses psychological, sociological, political and management approaches to decision-making. The course also focuses on tools used to enhance decision making including cost benefit analysis, responsibility charting and force filed analysis.

LEAD3051
INFORMATION LITERACY
Credits (Min/Max): 3/3
It is the purpose of this course to introduce students to the fundamental software application skills required to be productive in today's business world. This course provides the critical skills necessary to evaluate and determine useful quality information for decision-making in an organization. Topics such as problem solving, search strategies for research queries, how to identify good quality information, data collection and analysis, and finally effective communication of results will be discussed. Emphasis will be on formatting works cited, and creating charts and graphs and professional PowerPoint presentations.

LEAD3056
MANAGEMENT & FINANCIAL ANALYSIS
Credits (Min/Max): 6/6
The course is designed to teach the student how to work and manage diverse groups of people in complex organizations. This course looks at traditional and current philosophies of management, theories of motivation and empowerment, job design, contemporary management theories and recent trends in management. Also the focus will be on external capital sources and processes of financing, accounting principles, short and long term financing, and capital budgeting. It is an introduction to the concepts and the problems associated with management of capital.

LEAD3061
MACRO-ORGANIZATIONAL BEHAVIOR
Credits (Min/Max): 3/3
This course examines macro organizational behavior concepts like organizational learning, strategy, structure and design, change management and the role of business and society to the LEAD lexicon. This course will explore, dissect, and distinguish various approaches to employing these concepts as tools to enhance organizational performance. In so doing, we will examine the works of contemporary business writers such as Peter Drucker, Warren Bennis, Jay Conger, Henry Mintzberg, Noel Tichy, Charles Manz, and Peter Senge to name a few.

LEAD4001
LEADERSHIP & ETHICS
Credits (Min/Max): 3/3
The business ethics portion of this course provides students with an ethical framework they can apply in the workplace. Students are confronted with ethical issues and taught to resolve them in the organizational context. In addition, students are taught how an individual and an organization can be socially responsible. The leadership portion of this course engages the student in an active exploration of leadership—what is it, and how one develops this trait. To do this, the course emphasizes self-examination and application of leadership concepts as well as surveying various approaches to leadership development and theory.

LEAD4021
COMMUNICATING CHANGE
Credits (Min/Max): 3/3
The purpose of this course is to introduce students to theories and practices of effective interpersonal communication and public speaking relevant to organizational settings. Students study theory so that they have an understanding of why communication is central to achieving organizational goals, and why ethical communication is necessary to long-term organizational success. Students learn to apply theory by developing skills in listening, assessing organizational “audience” and barriers to communication, and by researching and giving presentations on social support, networking, and managing conflict. A segment of this course will also address the importance of communicating the change process in an organization. Students will study various approaches to announcing change and implementing change within an organization.

Within the Research portion of this course, the student will learn how to develop a survey. The survey must provide solutions to a problem and collect participants’ ideas and opinions are the subject. This survey will be distributed and results tabulated and discussed within the remaining courses of this program.

LEAD4031
HR CONCEPTS & NEGOTIATIONS
Credits (Min/Max): 3/3
The effective management of human resources is a key requirement for managers in any organization. This course concentrates on legal aspects of managing human resources in an organization. It covers laws that govern employee discrimination, safety and health, family and medical leave issues and termination. In addition, employee job performance measurement and compensation topics are addressed. This course concentrates on the relationship among employers, employees and unions in the private sector. It covers labor history and basic labor law, union organizing and union avoidance, collective bargaining, and contract administration, including labor arbitration.

LEAD4056
GLOBAL THINKING & E-COMMERCE
Credits (Min/Max): 3/3
The purpose of the global thinking course is to introduce the LEAD student to methods and implications of thinking on a global level. Multiculturalism will be a major component. The impact of different political systems will be briefly addressed, primarily in the context of how global politics affects business. Finally, the course will address how a business can thrive in a global economy and avoid problems unique to operating management of technology. The increasing recognition of its strategic, competitive value emphasizes the business importance of rethinking IT management.

LEAD4061
CAPSTONE PROJECT
Credits (Min/Max): 3/3
This course provides the critical skills necessary to evaluate and determine useful information for decision-making in an organization. The student will have an opportunity to study expert's research. We will explore problem solving, search strategies for research queries, how to identify good quality information, data collection and analysis, and finally effective communication of the results. The Capstone Project will replace current Research Project and should be introduced early in the program and be an ongoing assignment for the cohort. Perhaps, a chapter of an overall paper will be generated after each module, along with the module assignment.

The student will notice that this assignment of this course is spread out over a period of nearly 9 months to do the actual research for the project.

LRCX1001
LRX:INTRO & HISTORY
Credits (Min/Max): 1/1
LRCX1001 is the first course in a sequence of four which will introduce new students to the academic experience of four-year colleges in general and La Roche College in particular. Academically, the course will help prepare freshman for collegiate level course work, for career development, and for service through their respective disciplines. It will introduce students to the history and heritage of the entire college community that they have now joined and map out their journey through the LRC experience.

LRCX1001V
LRX: INTRO & HISTORY-VIRTUAL (LRCX1001)
Credits (Min/Max): 0/0
LRCX1001V is the first course in a sequence of four which will introduce new students to the academic experience of four-year colleges in general and La Roche College in particular. This is a non credit course designed for transfer students. It will introduce students to the history and heritage of the entire college community that they have now joined and map out their journey through the LRC experience.

LRCX1002
LRX: DIVERSITY & DISCRIMINATION
Credits (Min/Max): 1/1
LRCX1002 is the second course in a sequence of four of the LRC Experience. Its focus is on Diversity and Discrimination. Course work to be completed through a series of film & text. Information will be supplied through Blackboard.

LRCX2001
LRX:REGIONS OF CONFLICT
Credits (Min/Max): 1/1
LRCX2001 is the third course in a sequence of four in the La Roche Experience. The geographic focus changes with the current world/reality.
LRCX2002
LRX:ECONOMIC JUSTICE
Credits (Min/Max): 1/1
LRCX2002 is the fourth course in a sequence of four in the La Roche Experience. Its focus is Economic Justice. Course work is completed through a series of film/text. Other information is provided through Blackboard.

MATH0010
BASIC MATHEMATICS I++
Credits (Min/Max): 3/3
A course designed to meet the needs of students demonstrating deficiencies in basic mathematics skills. The course includes a review of the basic operations involving whole numbers, fractions, decimals, percentages, ratio and proportion. Emphasis is placed on problem solving. Course does not apply toward college graduation credit requirements.

MATH0010L
BASIC MATHEMATICS I-LAB
Credits (Min/Max): 0/0
This is the lab component of Basic Mathematics, the lecture component of which is designated MATH0010 Basic Mathematics. Students follow the MyFoundationsLab customized Learning Path determined by their performance on the Accuplacer® Diagnostic Test in Arithmetic. The individualized Learning Path targets those arithmetic skills necessary for college-level course work that require improvement. Students earn either a P(ass) or an Failure depending on their performance. This course does NOT count toward college-graduation credit requirements. In order to pass Basic Mathematics students must earn not only a grade of P in this lab but also a grade of B or higher in the lecture (MATH0010).

MATH0015
BEGINNING ALGEBRA++
Credits (Min/Max): 3/3
This course is intended for students studying algebra for the first time and for those who need a review of basic algebra before taking college algebra. The topics to be covered are the basic properties of real numbers, equations and inequalities, graphing of equations and inequalities, polynomials and factoring of polynomials, proportions and rational expressions, systems of equations, roots and radical expressions, and quadratic equations and their graphs. Upon successful completion of this course, students are strongly urged to fulfill their remaining mathematics requirement(s) without delay (strike while the iron of your knowledge is piping hot). Course does not apply toward college graduation credit requirements.

MATH0015L
BEGINNING ALGEBRA-LAB
Credits (Min/Max): 0/0
This is the lab component of Beginning Algebra, the lecture component of which is designated MATH0015 Beginning Algebra. Students follow the MyFoundationsLab customized Learning Path determined by their performance on the Accuplacer® Diagnostic Test in Elementary Algebra. The individualized Learning Path targets those elementary-algebra skills necessary for college-level course work that require improvement. Students earn either a P(ass) or an F(ailure) depending on their performance. This course does NOT count toward college-graduation credit requirements. In order to pass Beginning Algebra students must earn not only a grade of P in this lab but also a grade of B or higher in the lecture (MATH0015).

MATH1004
STATISTICS IN HEALTH CARE
Credits (Min/Max): 3/3
This course focuses on the applications of statistics to the health sciences and nursing fields. The major topics are exploratory data analysis (graphical and numerical descriptions of data); data production and its design; basic concepts and properties of probability and probability distributions, including the normal distribution and sampling distributions; statistical inference (inference about a population mean or proportion and about comparing two population means or proportions, chi-square test for goodness of fit, and ANOVA to compare population means). This course is reserved for students in the health-sciences and nursing programs.

MATH1010
COLLEGE ALGEBRA
Credits (Min/Max): 3/3
A traditional study of pre-calculus mathematics with emphasis on functions and relations. Includes a review of linear and quadratic equations, rational expressions, exponents, radicals and logarithms. Polynomial, exponential, and logarithmic functions are presented together with the conic sections, systems of equations, determinants, the binomial theorem and mathematical induction.

PreRequisites:

MATH1023
COLLEGE TRIGONOMETRY
Credits (Min/Max): 3/3
A traditional course in trigonometry including circular measure, trigonometric ratios, the trigonometry of right and obtuse triangles with applications, trigonometric functions and their graphs, inverse trigonometric functions, identities, and trigonometric equations.
PreRequisites: MATH1010 - COLLEGE ALGEBRA

MATH1029
PRE CALCULUS
Credits (Min/Max): 3/3
This is a transition course from algebra and trigonometry to, and may serve, therefore, as a preparation for, calculus. The topics covered include functions and their graphs, polynomial and rational functions, exponential and logarithmic functions, trigometric functions and analytic trigonometry, polar coordinates and vectors, and the conic sections.
PreRequisites: MATH1010 - COLLEGE ALGEBRA

MATH1030
CALCULUS FOR BUSINESS, ECONOMICS & MGMT SCIENCES
Credits (Min/Max): 3/3
A one-semester course in the differential and integral calculus of functions of a single variable. Emphasis on concepts and the skills of differentiation and integration with applications from Administration, Economics and Managerial Sciences.
PreRequisites: MATH1010 - COLLEGE ALGEBRA

MATH1032
ANALYTIC GEOMETRY & CALCULUS I
Credits (Min/Max): 4/4
The first semester of a three-semester integrated course in the elements of analytic geometry and differential and integral calculus. Included are the concept and applications of the derivative of a function of a single variable, differentiation of polynomials and the trigonometric functions, the chain, product and quotient rules, implicit differentiation, and differentials. Concludes with anti-differentiation, integration, area under graphs of functions and applications.
PreRequisites: MATH1010 - COLLEGE ALGEBRA

MATH1033
ANALYTIC GEOMETRY & CALCULUS II
Credits (Min/Max): 4/4
A continuation of MATH1032 including applications of the definite integral, area, arc length, volumes and surface area, centroids, average value and theorem of the mean for definite integrals. Derivatives and integrals of transcendental functions are followed by techniques of integration, L'Hopital's Rule and indeterminate forms and improper integrals. Also included are conic sections and polar coordinates.
PreRequisites: MATH1032 - ANALYTIC GEOMETRY & CALCULUS I

MATH1040
PROBABILITY & STATISTICS
Credits (Min/Max): 3/3
The study of the fundamentals of probability theory with applications to natural and social sciences as well as to mathematics. Discrete and continuous distributions, sampling theory, linear correlation, regression, statistical inference, estimation and analysis of variance are included.
PreRequisites: MATH1010 - COLLEGE ALGEBRA

MATH1040H
PROBABILITY & STATISTICS-HONORS
Credits (Min/Max): 3/3
An intensive one semester course in probability and statistics for science and honors students. Various discrete and continues probability distributions will be examined including the binomial, multinomial, Poisson, uniform, exponential, gamma, and normal distributions. Mathematical expectation, moment generating functions, liner combinations or random variable, sampling distributions, point estimations, confidence intervals, hypothesis testing, analysis of variance, regression, correlation and the method of least square will also examined.
PreRequisites: MATH1010 - COLLEGE ALGEBRA

MATH1070
FINITE MATHEMATICS FOR BUSINESS
Credits (Min/Max): 3/3
This course introduces MIST students to the non-statistical and non-calculus topics in mathematics that are most relevant to their majors. The major topics to be studied include some or all of the following: logic; set theory; relations, with applications to relational algebra and relational calculus; sequences, geometric series, and mathematics of finance; systems of linear equations and matrices; linear programming; probability; and game theory. Excel enhanced by Visual Basic for Applications is used throughout the course.
PreRequisites: MATH1010 - COLLEGE ALGEBRA
MATH2000
MATHEMATICS FOR LIBERAL ARTS
Credits (Min/Max): 3/3
As in-depth exploration of the applications of various types of mathematics, with an emphasis on problem solving skills. Writing skills are an integral part of this course. The connecting of mathematical ideas with other subject areas will be emphasized. These areas will include: art, biology, chemistry, coding, computers, demographics, fiction, genetics, logic, management, marketing, music, philosophy, physics, politics, psychology, and social planning. The discussion of original source documents will be an integral part of this course.
PreRequisites: MATH1010 - COLLEGE ALGEBRA

MATH2006
ANALYTIC THINKING & PROBLEM SOLVING
Credits (Min/Max): 3/3
This course develops the student's ability to critically analyze and solve problems, analogies, and work problems. A variety of problem solving techniques and tools are presented, such as chart and diagrams, flow charts, decision tables, and algorithms. Through the use of non-traditional exercises, a combination of techniques will lead to solutions. NOTE: This course may not be used to satisfy the mathematics requirements. Core Course.

MATH2023
GEOMETRY & MEASUREMENT
Credits (Min/Max): 3/3
An overview of the Euclidian and non-Euclidian geometries required for teaching mathematics, particularly middle school mathematics, focusing on geometrical shapes and their properties, spatial reasoning, geometrical shapes in nature and art, and application of measurements.
PreRequisites: MATH1010 - COLLEGE ALGEBRA

MATH2030
ANALYTIC GEOMETRY & CALC III
Credits (Min/Max): 4/4
A continuation of MATH1033 including a study of vectors, parametric equations, solid analytic geometry and functions of several variables. Includes partial differentiation, total differentials, multiple integrals and surface and line integrals, the theorems of Gauss and Stokes, and infinite series.
PreRequisites: MATH1033 - ANALYTIC GEOMETRY & CALCULUS II

MATH2031
ORDINARY DIFFERENTIAL EQUATIONS
Credits (Min/Max): 3/3
A study of first and second order differential equations, infinite series, Laplace transforms and power series together with existence of solution and uniqueness theorems.
PreRequisites: MATH2030 - ANALYTIC GEOMETRY & CALC III

MATH2050
DISCRETE MATHEMATICS I
Credits (Min/Max): 3/3
A basic course dealing with mathematics applicable to computer science. It provides an introduction to mathematical methods and covers such topics as: enumeration, set theory, mathematical logic, proof techniques, number systems, functions and relations, graphs and digraphs, trees, combinatorics, basic algebraic structures, recurrence relations, Boolean algebra, and analysis of algorithms.
PreRequisites: MATH1032 - ANALYTIC GEOMETRY & CALCULUS I

MATH2051
DISCRETE MATHEMATICS II
Credits (Min/Max): 3/3
A continuation of MATH1014. Topics to be covered will include some or all of the following: integers and integers Mod n; counting techniques, combinatorics, and discrete probability; graphs, trees, and relations; Boolean algebras; and models of computation such as grammars, finite-state machines, and Turing machines.
PreRequisites: MATH2050 - DISCRETE MATHEMATICS I

MATH2070
FINITE MATHEMATICS
Credits (Min/Max): 3/3
A survey of non-calculus mathematics that provides the solid foundation needed by students in business, social sciences, and non-science courses. Topics covered include linear functions, matrix linear programming, probability and statistics, mathematics of finance, Markov chains and decision theory.
MATH2075
INTRO TO APPLIED ANALYSIS
Credits (Min/Max): 3/3
This course is intended for students majoring in the natural sciences who are interested in specific applications of Calculus to Chemistry, Biology, Physics and Neuroscience. Possible topics include: applications of root finding, Taylor Polynomials, Taylor Series, differential equations numerical integration, Fourier series, the implicit function theorem, neuronal models.
PreRequisites: MATH1033 - ANALYTIC GEOMETRY & CALCULUS II

MATH3010
ELEMENTARY NUMBER THEORY
Credits (Min/Max): 3/3
A study of the properties of integers, the fundamental theorem of arithmetic, congruences, linear diophantine equations, quadratic residues and continued fractions.

MATH3015
LINEAR ALGEBRA
Credits (Min/Max): 3/3
A development of the theory of vector spaces from linear equations, matrices and determinants. Topics include linear independence, bases, dimensions, linear mappings, orthogonal reduction, diagonalization of matrices using eigenvectors and eigenvalues.

MATH3020
INTRO TO MATHEMATICAL NEUROSCIENCE
Credits (Min/Max): 3/3
PreRequisites: MATH1033 - ANALYTIC GEOMETRY & CALCULUS II

MATH3035
COMPLEX ANALYSIS
Credits (Min/Max): 3/3
A course focusing on the calculus of complex numbers. Topics covered include complex numbers and functions, differentiation and integration with complex variables, complex series, conformal representation and the calculus of residues.
PreRequisites: MATH2031 - ORDINARY DIFFERENTIAL EQUATIONS

MATH3040
PROBABILITY & STATISTICS I
Credits (Min/Max): 3/3
A calculus-based first course in probability and statistics for science and honors students. Various discrete and continuous probability distributions will be examined including the binomial, multinomial, Poisson, uniform, exponential, gamma and normal distributions. Mathematical expectation, moment generating functions, linear combinations of random variables, sampling distributions, point estimation, confidence intervals, hypothesis testing, analysis of variance, regression, correlation and the method of least squares will also be examined.

MATH3045
PROBABILITY & STATISTICS II
Credits (Min/Max): 3/3
A detailed study of topics in statistics: comparison of classical and Bavesian methods in conditional probability and estimation of parametrics, non-linear regression, multiple, partial and rank correlation, indices, time series, analyses of variance for two-way classification with and without interaction, design of experiments, reliability and validity of measurements and non-parametric tests.
PreRequisites: MATH3040 - PROBABILITY & STATISTICS I

MATH4003
HISTORY OF MATHEMATICS
Credits (Min/Max): 3/3
A survey course in the development of modern mathematics. Beginning with the rudimentary mathematical concepts developed in prehistoric times, mathematics grew sometimes slowly and sometimes rapidly with the insights of various cultures. In this course we trace this development through ancient Mesopotamia and Egypt, classical Greece, Arabic and Hindu cultures of the Dark and Middle Ages, the European Renaissance and on into the modern times. Special attention will be paid to major developments such as the emergence of mathematics as an organized, reasoned and independent discipline in Classical Greece; the emergence and development of major areas of mathematics such as of algebra, trigonometry, productive geometry, calculus, analytic geometry infinite series, non-Euclidean geometry; and how developments in mathematical thought have shaped the modern world.
PreRequisites: MATH2031 - ORDINARY DIFFERENTIAL EQUATIONS
MATH4015
MODERN ABSTRACT ALGEBRA
Credits (Min/Max): 3/3
An introduction to algebraic concepts such as groups, rings, integral domains and fields. The elementary number systems occupy a central place. Mappings, especially homorphisms, are introduced early and emphasized throughout the course.

MATH4020
GEOMETRY
Credits (Min/Max): 3/3
An overview of geometry in the light of modern trends with attention to axiomatic structure, including an introduction to hyperbolic and elliptic figures as geometric structures together with an overview of projective geometry.

MATH4035
REAL ANALYSIS
Credits (Min/Max): 3/3
An introductory to classical (real) analysis. Includes a rigorous treatment of logic, set theory, functions, countable and uncountable sets, the real number system, metric spaces, sequences, series, differentiation and integration.
PreRequisites: MATH2031 - ORDINARY DIFFERENTIAL EQUATIONS

MATH4045
DATA REDUCTION & ERROR ANALYSIS FOR THE PHYSICAL SCIENCES
Credits (Min/Max): 3/3
A first course in data reduction and error analysis with emphasis placed more upon hands-on experience than upon theory. Topics covered will include: sample statistics; the Binomial, Poisson, Gaussian and Lorentzian distributions; analysis of the propagation of errors; linear and nonlinear least squares; multiple regression and data manipulation techniques. Students will be expected to perform analyses using commercially available software and software of their own composition.

MATH4051
MATHEMATICS-INTERNSHIP I
Credits (Min/Max): 3/3
A practical experience in a field setting.

MATH4056
RESEARCH IN MATHEMATICS
Credits (Min/Max): 2/4
An individual investigation in the student's field of interest carried out under the supervision of a faculty member. The student is responsible for defining a problem, planning a course of investigation, and reporting higher results in a scientific paper.

MATH4057
MATHEMATICS-INDEPENDENT STUDY
Credits (Min/Max): 1/4
Independent study is an accelerated program for superior students in the division of natural and mathematical sciences. It is intended to allow a student to pursue studies in advanced topics. The student designs an independent study in conjunction with a divisional faculty member. To be eligible for independent study the student must comply with all appropriate college policies.

MATH4060
NUMERICAL MATHEMATICS & NUMERICAL COMPUTING I
Credits (Min/Max): 3/3
A survey of numerical techniques for numerically solving a variety of mathematical problems with an emphasis on application as opposed to theory. Topics to be covered include: sources of error in numerical computations, solving nonlinear equations, solving sets of simultaneous equations, interpolating polynomials, numerical integration and numerical differentiation.
PreRequisites: MATH2031 - ORDINARY DIFFERENTIAL EQUATIONS

MATH4061
NUMERICAL MATHEMATICS & NUMERICAL COMPUTING II
Credits (Min/Max): 3/3
Second semester of a survey course in numerical techniques for the numerical solution of a variety of mathematical problems with an emphasis on application as opposed to theory. Topics to be covered include: initial-value problems, partial differential equations, curve fitting and approximation of functions.
PreRequisites: MATH4060 - NUMERICAL MATHEMATICS & NUMERICAL COMPUTING I
MATH4090
JR/SR SEMINAR IN MATHEMATICS
Credits (Min/Max): 1/1
The seminar offers two aspects, one somewhat theoretical and the other applied. They are, respectively, an introduction to actuarial mathematics and a preparation for the Exam P Probability, which is first of four preliminary examination of Society of Actuaries.
PreRequisites: MATH2031 - ORDINARY DIFFERENTIAL EQUATIONS

MATH4094
SPECIAL PROBLEMS IN MATHEMATICS
Credits (Min/Max): 3/3
An individual investigation in the student's field of interest carried out under the supervision of a faculty member. The student is responsible for defining a problem, planning a course of investigation, and reporting higher results in a scientific paper.

MLAR1001
ELEMENTARY ARABIC I
Credits (Min/Max): 4/4
This course is designed to provide maximum opportunities for students to develop functional listening, speaking, reading and writing skills in the beginning Arabic. The goal of the course is the acquisition of a useful, communicative command of language at the Novice-Low to Novice-Mid level on the national scale, as established by the American Council on the Teaching of Foreign Languages (ACTFL) and the Educational Testing Service (ETS). This goal will be realized through maximum exposure to authentic target language input (oral and visual), active oral and written practice of real-life language tasks or functions (conversing with an exchange student, completing forms, etc.) and the exploration of cultural subtleties conveyed by language, thought and customs.

MLAR1002
ELEMENTARY ARABIC II
Credits (Min/Max): 4/4
This course is designed to provide maximum opportunities for students to develop functional listening, speaking, reading and writing skills in the beginning Arabic. The goal of this course is the acquisition of a useful, communicative command of the language at the Novice-Mid level on the national scale, as established by the American Council on the Teaching of Foreign Languages (ACTFL) and the Educational Testing Service (ETS). This goal will be realized through maximum exposure to authentic target language input (oral and visual), active oral and written practice of real-life language tasks or functions (conversing with an exchange student, completing forms, etc.) and exploration of cultural subtleties conveyed by language, thought and customs.
PreRequisites: MLAR1001 - ELEMENTARY ARABIC I

MLAR2001
INTERMEDIATE ARABIC I
Credits (Min/Max): 3/3
This course is designed to provide maximum opportunities for students to develop functional listening, speaking, reading and writing skills in beginning Arabic. The goal of this course is the acquisition of a useful, communicative command of the language at the Novice-Mid level on the national scale, as established by the American Council on the Teaching of Foreign Languages (ACTFL) and the Educational Testing Service (ETS). This goal will be realized through maximum exposure to authentic target language input (oral and visual), active oral and written practice of real-life language tasks or functions (conversing with an exchange student, completing forms, etc.) and exploration of cultural subtleties conveyed by language, thought and customs.
PreRequisites: MLAR1002 - ELEMENTARY ARABIC II

MLAR2002
INTERMEDIATE ARABIC II
Credits (Min/Max): 3/3
This course is designed to provide maximum opportunities for students to develop functional listening, speaking, reading and writing skills in beginning Arabic. The goal of this course is the acquisition of a useful, communicative command of the language at the Novice-Mid level on the national scale, as established by the American Council on the Teaching of Foreign Languages (ACTFL) and the Educational Testing Service (ETS). This goal will be realized through maximum exposure to authentic target language input (oral and visual), active oral and written practice of real-life language tasks or functions (conversing with an exchange student, completing forms, etc.) and exploration of cultural subtleties conveyed by language, thought and customs.
PreRequisites: MLAR2001 - INTERMEDIATE ARABIC I

MLAR3001
ARABIC LANGUAGE & CULTURE I
Credits (Min/Max): 3/3
As a continuation of Intermediate Arabic II, this course is part of a proficiency-based language program designed to provide maximum opportunities for students to develop functional listening, speaking, reading and writing skills in Arabic. The goal of the course is the acquisition of a communicative and accurate command of the language at the Intermediate Low to Intermediate Mid level on the national scale of language proficiency as established by the American Council on the Teaching of Foreign Languages (ACTFL). The course will enrich the students' vocabulary, grammar, writing and reading skills, as well as enable them to understand and converse accurately in Arabic. Basic texts help students connect the written and aural/oral aspects of Arabic through intensive reading that is focused on grammar and pronunciation. Students develop skills in writing at the paragraph level, translation, correct expression, and dictionary use.

PreRequisites: MLAR2002 - INTERMEDIATE ARABIC II

MLAR3002
ADVANCED ARABIC II
Credits (Min/Max): 3/3
As a continuation of Arabic Language & Culture I, this course is a part of a proficiency-based program designed to provide maximum opportunities for students to develop functional listening, speaking, reading and writing skills in Arabic. The goal of the course is the acquisition of a communicative and accurate command of the language at the Intermediate Low to Intermediate Mid level on the national scale of language proficiency as established by the American Council on the Teaching of Foreign Languages (ACTFL). The course will enrich the students' vocabulary, grammar, writing and reading skills, as well as enable them to understand and converse accurately in Arabic. Basic texts help students connect the written and aural/oral aspects of Arabic, through intensive reading that is focused on grammar and pronunciation. Students develop skills in writing at the paragraph level, translation, correct expression, and dictionary use.

MLED2000
ENGLISH LANGUAGE LEARNERS IN THE MULTICULTURAL CLASSROOM
Credits (Min/Max): 3/3
This course introduces the most important principles and practices for teachers of children with home languages other than English. Students examine the implications of cultural and linguistic variation for English Language learners. We focus on how educators work in the classroom, the school, and the community to support these learners' language development and academic learning.

MLED2005
STRUCTURES OF ENGLISH
Credits (Min/Max): 3/3
This course introduces the major structural elements of English for students intending to teach English as a Second Language. Students engage in systematic description and discussion of the phonetic, morphological, syntactic, semantic, and pragmatic systems of English. We investigate issues of dialect variation, prescriptive rules, and literacy development. Practical applications include analysis of ELLs' writing and speech samples.

MLED2010
LANGUAGE LEARNING & INSTRUCTION
Credits (Min/Max): 3/3
This course introduces the nature of language competence and the processes of first and second language development. A survey of the major theories of language learning leads to the evaluation of language and literacy practices in classroom instruction for second language learners. Important factors in language learning are identified and discussed, including linguistic knowledge, social interaction, the learning context, motivation, and age.

MLED3000
METHODS OF TEACHING & EVALUATING ENGLISH AS A SECOND LANGUAGE
Credits (Min/Max): 3/3
This course provides a comprehensive introduction to classroom instruction and assessment for ESL students. Students practice applying principles of language learning to the observation, analysis, selection, creation, and organization of classroom activities. A variety of techniques and strategies are explored, with emphasis on current proficiency-based approaches for learners who need English for social, academic, and socio-cultural purposes.

MLED3002
METHODS OF TEACHING & EVALUATING ENGLISH LANGUAGE LEARNERS
Credits (Min/Max): 3/3
This course provides a comprehensive introduction to classroom instruction and assessment for ESL students. Students practice applying principles of language learning to the observation, analysis, selection, creation, and organization of classroom activities. A variety of techniques and strategies are explored, with emphasis on current proficiency-based approaches for learners who need English for social, academic, and socio-cultural purposes.

MLED3005
CURRICULUM & MATERIALS DEVELOPMENT FOR ENGLISH LANGUAGE LEARNERS
Credits (Min/Max): 3/3
This course focuses on the application of principles and practices for teaching English Language Learners in the context of the curriculum, the program and the school community. Students select and design resources for an instructional unit that integrates English language skills with academic content learning. We investigate strategies and tools for placing and monitoring students, working with ESL students with special needs, and collaborating with school staff and parents, in order to further the language, cognitive, and social development of ELLs.

MLED3010
METHODS OF TEACHING AND EVALUATING FOREIGN LANGUAGE ED
Credits (Min/Max): 3/3
This course will focus on the teaching of foreign languages. A variety of teaching models and strategies for organizing the classroom will be explored. Emphasis will be placed on formulating objectives, selecting and organizing content, and developing various strategies to implement in a proficiency-based program. Techniques for evaluation of teaching effectiveness as well as evaluation of student learning will be discussed.

MLED3015
FIELD PLACEMENT/PRACTICUM TESOL
Credits (Min/Max): 1/1
This course uses a reflective model of teacher education to build practical knowledge about classroom instruction, evaluation, and school support services. Students participate in observation, interviews, and hands-on activities related to planning, carrying out lessons, and evaluating students. A developmental portfolio helps students connect theory and practice through reflection.

MLED3080
CURRICULUM & MATERIALS DEVELOPMENT FOR FOREIGN LANGUAGES
Credits (Min/Max): 3/3
This course is designed to provide the needed skills for foreign language instruction. Focus will be on developing, implementing, and evaluating instructional strategies and materials for both the elementary and secondary levels. In addition prospective foreign language teachers will learn to plan and assess appropriate learning activities for their students, and to reflect on their own learning strategies and behavior.

MLFR1001
ELEMENTARY FRENCH I
Credits (Min/Max): 4/4
This course is a part of a proficiency-based language program designed to provide maximum opportunities for students to develop functional listening, speaking, reading and writing skills in beginning French. The goal of the course is the acquisitions of a useful, communicative command of the language at the Novice-Mid to Novice-High level on the national scale, as established by the American Council on the Teaching of Foreign Languages and the Educational Testing Service. This goal will be realized through maximum exposure to authentic target language input (oral and visual), active oral and written practice of real-life language tasks or functions (e.g., conversing with an exchange student, completing forms, etc.) and exploration of cultural subtleties conveyed by language, thought and customs.

MLFR1002
ELEMENTARY FRENCH II
Credits (Min/Max): 4/4
As a continuation of Elementary French I, this course is a part of a proficiency-based language program designed to provide maximum opportunities for students to develop functional listening, speaking, reading, and writing skills in beginning French. The goal of the course is the acquisitions of a useful, communicative command of the language at a Novice Mid to Intermediate Low level on the national scale, as established by the American Council on the Teaching of Foreign Languages and the Educational Testing Service. This goal will be realized through maximum exposure to authentic target-language input (oral and visual), active oral and written practice of real-life language tasks or functions (e.g., conversing with an exchange student, making grocery lists, completing forms, etc.), and exploration of cultural subtleties conveyed by language, thought, and customs.

MLFR2001
INTERMEDIATE FRENCH I
Credits (Min/Max): 3/3
These courses are designed to build on the student's previous skills, thereby improving oral proficiency. Vocabulary acquisition and the reading of authentic aural and written materials broaden the student's knowledge and linguistic abilities. Classroom activities focus on development of skill in self-expression. The student has many opportunities to expand cultural knowledge through films, videotapes, and informal rendezvous. Course is not open to students with an advanced or superior oral proficiency level in French.

MLFR2002
INTERMEDIATE FRENCH II
Credits (Min/Max): 3/3
This course is designed to teach the beginning French student the four basic skills of listening, speaking, reading, and writing. The focus of this course is the development of aural/oral proficiency by means of vocabulary development, listening and speaking practice, and guided conversation. Class work emphasizes the acquisition of strategies for understanding, authentic listening and reading materials. Through such activities as classroom discussions, videotapes, and films, the student becomes acquainted with various facets of francophone culture. Course is not open to students with an advanced or superior oral proficiency level in French.

PreRequisites: MLFR2001 - INTERMEDIATE FRENCH I

MLFR3001
ADVANCED FRENCH LANGUAGE & CULTURE I
Credits (Min/Max): 3/3
This course is designed to advance the student's language proficiency through the development of communicative strategies such as: how to express one's feelings; how to get and give advice; how to make plans; how to react to an opinion and how to maintain discussions. The student gains experience in using socially acceptable formats for writing both personal and business correspondence. Through carefully chosen authentic texts, cross-cultural phenomena such as contemporary social issues and business practices are explored.

PreRequisites: MLFR2002 - INTERMEDIATE FRENCH II

MLFR3002
ADVANCED FRENCH LANGUAGE & CULTURE II
Credits (Min/Max): 3/3
This course is designed to advance the student's language proficiency through the development of communicative strategies such as: how to express one's feelings; how to get and give advice; how to make plans; how to react to an opinion and how to maintain discussions. The student gains experience in using socially acceptable formats for writing both personal and business correspondence. Through carefully chosen authentic texts, cross-cultural phenomena such as contemporary social issues and business practices are explored.

PreRequisites: MLFR3001 - ADVANCED FRENCH LANGUAGE & CULTURE I

MLFR3005
FRENCH CIVILIZATION
Credits (Min/Max): 3/3
A study of the French and Francophone culture, civilization, literary genres, and authors from the 16th-21st century.

PreRequisites: MLFR3002 - ADVANCED FRENCH LANGUAGE & CULTURE II

MLFR4057
FRENCH STUDIES-INDEPENDENT STUDY
Credits (Min/Max): 1/6
Independent study course for students who have demonstrated an intense commitment to investigate a particular area of French studies. The student will design an independent study in conjunction with the appropriate language faculty member.

MLIT1001
ELEMENTARY ITALIAN I
Credits (Min/Max): 4/4
This course is designed to provide maximum opportunities for students to develop functional listening, speaking, reading and writing skills in the beginning Italian. The goal of the course is the acquisition of a useful, communicative command of language at the Novice-Low to Novice-Mid level on the national scale, as established by the American Council on the Teaching of Foreign Languages (ACTFL) and the Educational Testing Service (ETS). This goal will be realized through maximum exposure to authentic target language input (oral and visual), active oral and written practice of real-life language tasks or functions (conversing with an exchange student, completing forms, etc.) and the exploration of cultural subtleties conveyed by language, thought and customs.

MLIT1002
ELEMENTARY ITALIAN II
Credits (Min/Max): 4/4
As a continuation of Elementary Italian I, this course is part of a proficiency-based language program designed to provide maximum opportunities for students to develop functional listening, speaking, reading, and writing skills in beginning Italian. The goal of the course is the acquisitions of a useful, communicative command of the language at a Novice Mid to Intermediate Low level on the national scale, as established by the American Council on the Teaching of Foreign Languages and the Educational Testing Service. This goal will be realized through maximum exposure to authentic target-language input (oral and visual), active oral and written practice of real-life language tasks or functions (i.e., conversing with an exchange student, making grocery lists, completing forms, etc.), and exploration of cultural subtleties conveyed by language, thought, and customs.

PreRequisites: MLIT1001 - ELEMENTARY ITALIAN I

MLIT2001
INTERMEDIATE ITALIAN I
Credits (Min/Max): 3/3
As a continuation of Elementary Italian II, this course is part of a proficiency-based language program designed to provide maximum opportunities for students to develop functional listening, speaking, reading and writing skills in intermediate Italian. The goal of the course is the acquisition of a useful, communicative command of the language at the Novice High to Intermediate Low level on the national scale as established by the American Council on the Teaching of Foreign Languages and the Educational Testing Service. This goal will be realized through maximum exposure to authentic target-language tasks of functions (e.g., ordering a meal, making travel arrangements, visiting a doctor's office, etc.) and exploration of cultural subtleties conveyed by language, thought and customs.

PreRequisites: MLIT1002 - ELEMENTARY ITALIAN II

MLSP1001
ELEMENTARY SPANISH I
Credits (Min/Max): 4/4
This course is part of a proficiency-based language program designed to provide maximum opportunities for students to develop functional listening, speaking, reading and writing skills in beginning Spanish. The goal of the course is the acquisition of a useful, communicative command of the language at the Novice-Mid to Novice-High level on the national scale, as established by the American Council on the Teaching of Foreign Languages and the Educational Testing Service. This goal will be realized through maximum exposure to authentic target-language input (oral and visual), active oral and written practice of real-life language tasks or functions (e.g., conversing with an exchange student, completing forms, etc.), and exploration of cultural subtleties conveyed by language, thought, and customs.

PreRequisites: MLSP1001 - ELEMENTARY SPANISH I

MLSP2001
INTERMEDIATE SPANISH I
Credits (Min/Max): 3/3
As a continuation of Elementary Spanish I, this course is part of a proficiency-based language program designed to provide maximum opportunities for students to develop functional listening, speaking, reading and writing skills in intermediate Spanish. The goal of the course is the acquisition of a useful, communicative command of the language at the Novice High to Intermediate Low level on the national scale as established by the American Council on the Teaching of Foreign Languages and the Educational Testing Service. This goal will be realized through maximum exposure to authentic target-language tasks of functions (e.g., ordering a meal, making travel arrangements, visiting a doctor's office, etc.) and exploration of cultural subtleties conveyed by language, thought and customs.

PreRequisites: MLSP1002 - ELEMENTARY SPANISH II

MLSP2002
INTERMEDIATE SPANISH II
Credits (Min/Max): 3/3
As a continuation of Intermediate Spanish I, this course is part of a proficiency-bases language program designed to provide maximum opportunities for students to develop functional listening, speaking, reading, and writing skills in intermediate Spanish. The goal of the course is the acquisition of a useful, communicative command of the language at a low level on the national scale, as established by the American Council on the Teaching of Foreign Languages and the Education Testing Service. This goal will be realized through maximum exposure to authentic target-language input (oral and visual), active oral and written practice of real-life language tasks or functions (e.g., conversing with an exchange student, going to the bank, using the telephone, going to the doctor's office, etc.), and exploration of cultural subtleties conveyed by language, thought, and customs.

PreRequisites: MLSP2001 - INTERMEDIATE SPANISH I

MLSP3001
ADVANCED SPANISH LANGUAGE & CULTURE I
Credits (Min/Max): 3/3
As a continuation of Intermediate Spanish II, this course is part of a proficiency-based language program designed to provide maximum opportunities for students to develop functional listening, speaking, reading and writing skills in Spanish. The goal of the course is the acquisition of a useful, communicative command of the language at the Intermediate-Low to Intermediate-Mid level on the national scale as established by the American Council on the Teaching of Foreign Languages(ACTFL) and the Educational Testing Service(ETS). This goal will be realized through maximum exposure to authentic target-language input (oral and visual), active oral and written practice of real life language tasks or functions (e.g. ordering a meal, making travel arrangements, etc.) and exploration of cultural subtleties conveyed by language, thought and customs.

PreRequisites: MLSP2002 - INTERMEDIATE SPANISH II
MLSP3002  
ADVANCED SPANISH LANGUAGE & CULTURE II  
Credits (Min/Max): 3/3  
As a continuation of Advanced Spanish Language & Culture I, this course is part of a proficiency-based language program designed to provide maximum opportunities for students to develop functional listening, speaking, reading and writing skills in Spanish. The goal of the course is the acquisition of a useful communicative command of the language at the "Intermediate-Mid to Intermediate High" levels on the national scale as established by the American Council on the Teaching of Foreign Languages (ACTFL) and the Educational Testing Service (ETS). This goal will be realized through maximum exposure to authentic target-language input (oral and visual), active oral and written practice of real life language tasks of "functions" (e.g. giving suggestions, making plans for the future, etc.) and exploration of cultural subtleties conveyed by language, thought and customs.  
Pre requisites: MLSP3001 - ADVANCED SPANISH LANGUAGE & CULTURE I

MLSP3005  
ADVANCED SPANISH GRAMMAR & COMPOSITION  
Credits (Min/Max): 3/3  
This course is structured to enhance the knowledge of grammar and the reading and writing skills of students who have already achieved an intermediate level or oral, written and reading proficiency in Spanish as measured on the ACTFL/ETS scale. Students will learn correct grammatical construction through literary readings and discussion, intensive vocabulary study, intensive study of grammar points, and composition practice.  
Pre requisites: MLSP3002 - ADVANCED SPANISH LANGUAGE & CULTURE II

MLSP3010  
ADVANCED SPANISH CONVERSATION  
Credits (Min/Max): 3/3  
This course is part of a proficiency-based language program designed to provide maximum opportunities for students to acquire speaking and listening comprehension skills in Intermediate Spanish to the Advanced levels on the national scale as established by the American Council on the Teaching of Foreign Languages (ACTFL) and the Educational Testing Service (ETS). This goal will be realized by the following means: Practice on stress, intonation and difficult pronunciation as needed; Presentation, discussions, and other activities in small groups and as a class; Speeches and debates prepared in advance; Listening comprehension activities and note-taking practice. This course will be conducted in Spanish to assist students in maintaining their proficiency goals.  
Pre requisites: MLSP3002 - ADVANCED SPANISH LANGUAGE & CULTURE II

MLSP3015  
APPLIED HISPANIC LINGUISTICS (SPAE3015)  
Credits (Min/Max): 3/3  
This course introduces the student to general linguistic theory and its application to the problems which teachers face in the foreign language classroom. Students will discover practical resolutions to problems encountered in the presentation of linguistic material. A study of the sound system of Spanish and training in native-like Spanish pronunciation will also be incorporated into the course. Cross-listed with SPAE3015  
Pre requisites: MLSP3005 - ADVANCED SPANISH GRAMMAR & COMPOSITION

MLSP3020  
SPANISH CULTURE  
Credits (Min/Max): 3/3  
This course will introduce the student to the study of peninsular Spanish culture. Students will study the early cultures which contributed to Spanish culture as it exists today. Also included is the study of historical influences, geography, economics, membership in the European Union (EU), religion(s), political system, art, literature, dance, music, architecture, traditions, customs, languages/dialects and other cultural symbols and trends in the various regions of the country. This course will be conducted in Spanish to assist students in achieving and maintaining their proficiency goals.  
Pre requisites: MLSP3002 - ADVANCED SPANISH LANGUAGE & CULTURE II

MLSP3025  
LATIN AMERICAN CULTURE  
Credits (Min/Max): 3/3  
This course will introduce the student to the study of culture including the relationships between the perspectives, products, and practices of the cultures of Latin American (as stated in the National Standards for Foreign Language Teaching). Students will study the early cultures which contributed to Latin American culture as it exists today. Also included is the study of the history, geography, economics, religions(s), political systems, art, literature, dance, music, architecture, traditions, customs and other cultural symbols of Latin America, lation society in the U.S. and in Equatorial Guinea. This course will be conducted in Spanish to assist students in maintaining their proficiency goals.  
Pre requisites: MLSP3002 - ADVANCED SPANISH LANGUAGE & CULTURE II

MLSP3030  
SURVEY OF SPANISH LITERATURE  
Credits (Min/Max): 3/3
This course covers the major literary periods, authors, trends and genres in Spanish Peninsular literature from the pre-medieval period through the 20th century from an historical perspective. Literary text will be read and discussed; they will include representative selections of each major literary period.

PreRequisites: MLSP3005 - ADVANCED SPANISH GRAMMAR & COMPOSITION

MLSP3040
SURVEY OF LATIN AMERICAN LIT
Credits (Min/Max): 3/3
A study of the major literary periods, trends and genres in Spanish American literature from pre-Columbian times through the 20th century from an historical perspective. Literary texts to be read and discussed include representative selections of key historic texts and literary figures from each major literary period.

MLSP4057
SPANISH LANGUAGE-INDEPENDENT STUDY
Credits (Min/Max): 1/3
Independent study course for students who have demonstrated an intense commitment to investigate a particular area of Spanish studies. The student will design an independent study in conjunction with the appropriate language faculty member.

MRKT2007
ADVERTISING & PUBLIC RELATIONS (ADMG2007)
Credits (Min/Max): 3/3
A comprehensive study of advertising, detailing its relationship to marketing practice. Topics such as advertising preparation, media evaluation, market research, pricing and retailing problems are included. The role of public relations in an organizational communication program is also explained. Cross-listed with ADMG2007
PreRequisites: ADMG2021 - MARKETING MANAGEMENT(MRKT2021)

MRKT2021
MARKETING MANAGEMENT (ADMG2021)
Credits (Min/Max): 3/3
A basic study of marketing systems in the American economy. This course includes identifying the activities involved in the flow of goods among manufacturers, brokers, wholesalers, retailers and consumers. The nature of demand, buyer behavior, costs and pricing, sales strategies, promotions and techniques are presented. Cross-listed with ADMG2021

MRKT3012
BUYER BEHAVIOR
Credits (Min/Max): 3/3
This course focuses on the role of buyers in the marketing process. Buyer behavior in the consumer marketplace as well as the organizational buying process is examined. The study of buying behaviors enhances understanding of what marketing strategies are likely to be effective, how humans operate in the marketplace, and what kind of affective, cognitive, and social mechanisms enter into the purchasing decision. A sampling of specific topics addressed includes the role of attitudes, learning and memory, and lifestyles and culture in the buying decision.
PreRequisites: ADMG2021 - MARKETING MANAGEMENT(MRKT2021)

MRKT3016
PERSONAL SELLING
Credits (Min/Max): 3/3
This course introduces the student to the basic principles and foundations of Personal Selling on three levels: industrial, commercial and retail. Emphasis is on the detailed analysis of the sales process as viewed by the salesperson. Other sales foundation topics covered include the organizational buying process, sales communications, the theory of adaptive sales, and ethical/legal issues in selling. Using a variety of instructional methods such as role-playing and video cases, students are given an opportunity to practice their newly acquired sales skills.
PreRequisites: ADMG2021 - MARKETING MANAGEMENT(MRKT2021)

MRKT3031
SPORTS & ENTERTAINMENT MARKETING
Credits (Min/Max): 3/3
Sports and Entertainment Marketing may be thought of as the specific application of marketing principles and processes to sports and entertainment. This course examines the complex and diverse nature of sports and entertainment marketing. A framework will be presented to help explain and organize the strategic sports and entertainment marketing process as well as the current structure of the sports and entertainment industry. Specific topics addressed include: understanding spectators, participants, and sponsors, sports marketing branding, women in sports, international sports marketing, and the emerging industry entertainment trends in music and motion pictures, sponsorship programs, ticket pricing and pricing models, stadium economics, and franchising as a distribution tool.
PreRequisites: ADMG2021 - MARKETING MANAGEMENT(MRKT2021)
MRKT3033  
MARKETING RESEARCH  
Credits (Min/Max): 3/3  
Explores the function which links the consumer, customer, and public to the marketer through information -- information used to identify and define marketing opportunities and problems; generate, refine, and evaluate marketing actions; and, monitor marketing performance. This course deals with the planning for, collection, and analysis of data relevant to marketing decision-making and the communication of the results of this analysis to management.  
PreRequisites: MRKT3012 - BUYER BEHAVIOR

MRKT3049  
INT'L MKT & EXPORT MGMT (INMT3049)  
Credits (Min/Max): 3/3  
An upper level course focusing on key management functions in international marketing: entry strategies, product and pricing politics, financing, promotion and distribution. The course will also concentrate on export management that is the major international activity of most small and medium-sized companies. Cross-listed with INMT3049  
PreRequisites: ADMG2021 - MARKETING MANAGEMENT(MRKT2021)

MRKT3050  
INTERNET MARKETING  
Credits (Min/Max): 3/3  
Marketers have been using electronic tools for many years, but the Internet and other new electronic technologies have created a flood of interesting and innovative ways to provide customer value. Internet Marketing is traditional marketing using electronic methods. It affects traditional marketing in two ways. First, it increases efficiency in established marketing functions. Secondly, the technology of E-marketing transforms many marketing strategies. The transformation results in new business models that add customer value and may increase company profitability. These new opportunities create many questions that are addressed in this course. How can firms leverage new technologies to maximum benefit? How much commitment should marketers make to Internet marketing programs?  
PreRequisites: ADMG2021 - MARKETING MANAGEMENT(MRKT2021)

MRKT4001  
MARKETING FOR NONPROFITS  
Credits (Min/Max): 3/3  
This course positions marketing as the most critical discipline needed for the success of non-profit organizations. Emphasis is placed on the influencing of behavior over a wide range of target markets including clients, donors, policy accomplished by organizing much of the discussion of strategic and tactical marketing options available for non-profit's own paid staff. This is accomplished by organizing much of the discussion of strategic and tactical marketing options available for non-profits around two central behavioral science models: Stages of Change and BCOS Drivers (Benefits, Costs, Others, Self-Efficacy). In addition, this course removes the misconception of non-profit enterprise flourishing everywhere in the world, including Asian and formerly communist countries. The latest research on institutional structure, volunteering, and fundraising is integrated through lectures, vignettes, and case examples

MRKT4014  
MARKETING STRATEGY  
Credits (Min/Max): 3/3  
A capstone course in marketing that emphasizes planning at the management level. Examines key concepts and issues that impact planning decisions, such as analysis of the marketing environment; formulation of marketing strategies; and development, implementation, and control of the marketing program. Using case studies, students are expected to develop comprehensive marketing plans and recommended solutions to specific situations encountered by marketing professionals operating in a wide variety of organizations.  
PreRequisites: MRKT3012 - BUYER BEHAVIOR

MRKT4016  
BRAND MANAGEMENT  
Credits (Min/Max): 3/3  
This course addresses the concept of branding which is of major importance to any company using a branding strategy. The role of the brand manager is examined in this combination theory and skills course. Various marketing techniques are studied for the overall responsibility of a brand in order to increase brand equity.

MRKT4018  
SERVICES MARKETING  
Credits (Min/Max): 3/3  
The service sector comprises over three-quarters of the US economy, and is continually increasing its dominance. Some estimates suggest that 90% of all new jobs are service positions. Traditionally, marketers have focused on the 4 P's, making marketing mix decisions for products that are finished when they exit a production line. However, service marketers must deal with a broader range of issues, addressed in this course, including design of the service production process, recruitment and training of service providers, and relationship marketing for customer retention.
MRKT4019
SPORT ADMINISTRATION & MGMT (ADMG4019)
Credits (Min/Max): 3/3
This course will provide a comprehensive, current and concise introduction to sports management and administration principles and practices. Functional overviews of industry skills are presented and exposure to organizational theory, law and sports governance, facilities and venues, sports marketing, ethical applications, broadcasting, sales, event management, agency, advertising, sponsorship, international sport, collegiate and amateur sport will be addressed in detail.

MRKT4031
CONTEMPORARY CONCEPTS IN MARKETING
Credits (Min/Max): 3/3
As the signature course in the Marketing Program, this is a seminar on issues currently drawing attention in the marketing literature and the business community that affect marketing management. Ethical considerations are explored that affect marketing policy-making. Through additional case analysis some of the worst marketing blunders and mistakes in history are examined and evaluated.
PreRequisites: ADMG2021 - MARKETING MANAGEMENT(MRKT2021)

MRKT4035
RETAIL MARKETING & MANAGEMENT
Credits (Min/Max): 3/3
Retail marketing examines the set of business activities that adds value to the products and services sold to consumers for their personal or family use. Topics include: store-based retailing, electronic and non-store retailing forms, merchandising, retail pricing, store layout and management, site selection, and retail market strategies.

MRKT4046
SALES MANAGEMENT
Credits (Min/Max): 3/3
The role of sales managers is examined in this combination theory and skills course. Various specialized managerial functions are studied such as sales department budgeting, sales force organization, territory design, sales forecasting, sales compensation, performance evaluation, sales training, sales personnel recruitment, and sales force motivation.
PreRequisites: MRKT3016 - PERSONAL SELLING

MRKT4051
MARKETING-INTERNSHIP I
Credits (Min/Max): 1/6
A field experience in a customer service, sales, advertising, retail, or marketing support position, supervised by a field practitioner as well as college faculty. The internship is designed to increase understanding of the various functional areas that comprise the field of marketing.

NADM5000
HEALTH CARE FINANCE
Credits (Min/Max): 3/3
This course is designed to provide the student with an overview of the health care environment and the financing of the health care system. An emphasis will be placed on financial techniques, such as cost estimation and forecasting, break-even analysis, variance analysis, and capital budgeting. Overview of hospital-based care using inpatient tools to predict cost and measure performance as well as managing long-term care resources will also be discussed. Content will enable the student to develop the knowledge and skills necessary for effective participation in financial management related to strategic planning, program budget planning and control as it relates to traditional and non-traditional health care systems.

NADM5017
NURSING ADMINISTRATION I
Credits (Min/Max): 3/3
This course is designed to provide the student with knowledge of organizational and management theories and processes in relation to the planning continuum, practice and institutional environments, human and financial resource management and accreditation standards as they relate to traditional and nontraditional health care systems.

NADM5020
NURSING ADMINISTRATION II
Credits (Min/Max): 3/3
This course is designed to provide the student with the opportunity to apply management principles and processes required of nurse administrators. Current issues and trends in clinical specialty areas will be identified, discussed and analyzed in relation to their impact on the management of a health care setting.
PreRequisites: NADM5017 - NURSING ADMINISTRATION I
NADM5025
NURSING ADMINISTRATION II: SEMINAR & PRACTICUM
Credits (Min/Max): 3/3
This practicum experience is designed to provide the student with the opportunity to integrate theory in a context of the nurse administrator's role. Emphasis is placed on the roles and functions performed by the nurse in an administrative role. During the 135 hour practicum, the student will be assigned to a nursing administrator who will assume the role of preceptor. Opportunities are provided to participate in a nursing administrative role. Students will interact with a variety of health care managers and professionals as well as participate in management, leadership, and teaching roles of the nurse administrator.
PreRequisites: NADM5017 - NURSING ADMINISTRATION I

NADM6000
NURSING ADMINISTRATION III
Credits (Min/Max): 3/3
This course is designed to provide the student with knowledge of the administrative issues that impact the delivery of nursing care within the context of the traditional and non-traditional health care systems. Topics such as third party payment, health policy, change management, quality improvement, resource competition and allocation in culturally diverse environments are included.
PreRequisites: NADM5020 - NURSING ADMINISTRATION II

NADM6025
NURSING ADMINISTRATION III: SEMINAR & PRACTICUM
Credits (Min/Max): 3/3
This practicum experience is designed to provide the student with the opportunity to integrate theory in a reality context of the administrator's role. This course requires 135 hours of clinical practicum, where the student will be assigned to a nursing administrator who will assume the role of preceptor. Opportunities are provided to participate in the executive role in different administrative settings. The student will have the opportunity to interact with a variety of health care managers and professionals. This is a continuation of the practicum experience initiated in Nursing Administration II Seminar and Practicum.
PreRequisites: NADM5020 - NURSING ADMINISTRATION II

NEDG5000
ASSESSMENT, MEASUREMENT & EVALUATION OF LEARNERS
Credits (Min/Max): 3/3
This course is designed to introduce the student to processes of assessment, measurement and evaluation for the classroom and clinical teacher. Test planning, construction and use of a variety of types of test items, item analysis for test improvement, methods of summarizing test scores, derived scores for interpretation of performance, development and use of norms in evaluation will be explored. In addition, the design and use of clinical assessment tools will be presented. The importance of timely, constructive formative evaluation of learners is emphasized as is the important of constructive self and peer evaluation.

NEDG5002
TEACHING & LEARNING: STRATEGIES FOR THE CLASSROOM & CLINICAL NURSING EDUCATION
Credits (Min/Max): 3/3
The course is designed to prepare the student to facilitate learning in classroom and clinical setting. Through analysis of educational theory, principles and evidenced-based practices, the learner will apply a variety of teaching strategies appropriate for content, setting, learner needs, learning style and learning outcomes. The use of information technologies to support the teaching-learning process is also explored.

NEDG5004
CURRICULUM DESIGN I: DEVELOPMENT OF CURRICULUM
Credits (Min/Max): 3/3
The course is designed to prepare the student to facilitate learning in classroom and clinical setting. Through analysis of educational theory, principles and evidenced-based practices, the learner will apply a variety of teaching strategies appropriate for content, setting, learner needs, learning style and learning outcomes. The use of information technologies to support the teaching-learning process is also explored.

NEDG5006
CURRICULUM DESIGN II: EVALUATION & REVISION OF CURRICULUM
Credits (Min/Max): 3/3
The course is designed to prepare the student to evaluate and revise curriculum based on institutional mission, philosophy, outcomes, learner needs, societal and health care trends and feedback from learners, agency personnel and accrediting agencies. Change theories and strategies to facilitate revision will be discussed.

NEDG5008
NURSING EDUCATION TEACHING PRACTICUM
Credits (Min/Max): 4/4
This course is designed to provide the student with the opportunity to integrate nursing education theory to the educational environment. The student will be mentored by a nurse educator with knowledge and expertise in the educational role. Focus of this practicum will be on implementation of the teaching role.
NSCI1001
THE NATURAL SCIENCES(SLSC1010)
Credits (Min/Max): 3/3
An introduction to the basic concepts of biology, chemistry and physics, which stresses practical applications. Topics include survey of the fundamental concepts of atoms and molecules as the basic building blocks of matter, an overview of the life sciences with an emphasis on human biology and a discussion of the principles underlying common physical phenomena. Open to non-science majors.

NSCI1005
DRUGS & THE HUMAN BODY
Credits (Min/Max): 3/3
This course deals with the properties and effects of drugs, and in a more general sense, with the interactions of chemical compounds in living systems. It is a discipline of biology and is closely related to other disciplines, particularly physiology and biochemistry.

NSCI1010
SCIENCE OF NUTRITION I
Credits (Min/Max): 3/3
This course covers the basic elements of nutrition and its relationship to health. It teaches students essentials of adequate diet and the nutritional needs of various members of the family.

NSCI1025
NORMAL & CLINICAL NUTRITION
Credits (Min/Max): 3/3
This course covers the fundamental principles of nutrition and their relationship to health. The role of diet in the prevention and treatment of representative pathophysiological conditions will be examined. This course is designed for students majoring in Nursing or interested in careers in the Health Sciences.

NSCI2005
KINESIOLOGY
Credits (Min/Max): 3/3
The student will study the skeletal and muscular systems of the body in depth, as well as analyze their interrelationship to one another. The interrelationships of nerves to muscle and bone movement will also be investigated. Analysis of movement is an important component. The interrelationships of one part of the body to another will be investigated. Applications will be made to athletic ability and dance technique. PreRequisites: BIOL1002 - INTRO TO THE HUMAN BODY: SYSTEMS THAT MOVE YOU

NSCS2011
INTELLIGENCE ANALYSIS & PRESENTATION TECHNIQUES (CRIM2011)
Credits (Min/Max): 3/3
This course examines the process used by analysts to develop strategic intelligence. Students will participate throughout the course as a member of a group tasked to complete an estimative project. Students will learn to apply strategic theory to critical national security problems. Cross-listed with CRIM2011
PreRequisites: CRIM1001 - INTRODUCTION TO CRIMINAL JUSTICE

NSCS3010
BUSINESS INTELLIGENCE
Credits (Min/Max): 3/3
This course explores the methods used to obtain and analyze data to create information that businesses can utilize in making decisions. An emphasis is placed on using public source information to meet the objectives of practical exercise scenarios. PreRequisites: ENGL1012 - COLLEGE WRITING II

NSCS3011
RESEARCH METHODS FOR ANALYSTS
Credits (Min/Max): 3/3
This course examines the research methods and presentation techniques utilized by intelligence analysts. The student will be immersed in the world of Open Source Intelligence and will be taught to use relevant analytical tools in the form of open source search techniques and Intellipedia software. Students will function as members of an intelligence cell where they will use analytical tools to create both team and individual intelligence reports focused on selected criminal and terrorist organizations. Each student in this course will, as a final exercise, be responsible for producing an intelligence product and presenting a PowerPoint-based briefing to a panel of experts drawn from the Intelligence Community.
PreRequisites: NSCS3010 - BUSINESS INTELLIGENCE
NSCS4005
NATIONAL SECURITY & INTELLIGENCE - SENIOR SEMINAR
Credits (Min/Max): 3/3
This course is the capstone course required of all national security studies majors. Senior students will engage in an in-depth study of both the historical and current national security policies of the United States and selected foreign countries. Students are expected to possess excellent research and writing skills to be successful in this course. They are required to write and orally present several short white papers dealing with critical issues in the areas of national security and intelligence. The students knowledge base is evaluated during this course through the use of a comprehensive examination that encompasses the six national security major required courses. The course culminates with an extensive white paper and oral presentation concerning a current national security policy of the United States or a foreign country if the policy impacts the security posture of the United States.
PreRequisites: NSCS2011 - INTELLIGENCE ANALYSIS & PRESENTATION TECHNIQUES (CRIM2011)

NSCS4012
EMERGENCY PREPAREDNESS & CRISIS MANAGEMENT (CRIM4012)
Credits (Min/Max): 3/3
This course examines the issues and processes associated with the most critical domains of security management. In particular, the course will focus on risk analysis, security surveys, response planning, and the principles of the all-hazards approach to risk management. Cross-listed with CRIM4012

NURG5002
NURSING THEORY & RESEARCH
Credits (Min/Max): 4/4
This course is designed to provide the student with knowledge about the interaction of theory and research for the acquisition of knowledge and for advanced nursing practice. It focuses on the value of scientific evidence and nursing as a discipline as the basis for providing quality care and improving nursing practice. The student will develop an understanding of the research process, acquire the knowledge and skills needed to critically evaluate nursing research and evidence-based practice. The interrelationship of theory and research will be explored, and extant theories that guide nursing practice will be examined.

NURG5013
ROLE DEVELOPMENT OF THE NURSE ADMINISTRATOR & NURSE EDUCATOR
Credits (Min/Max): 2/2
This course is designed to assist the student in defining and developing the advanced practice role of nurse educator or nurse administrator. The student will explore the core competencies of the roles of nurse educator or nurse administrator as these are enacted within the context of traditional and nontraditional health care and educational systems. From a theoretical perspective or role development, the student will begin to synthesize a personal framework for practice within the selected role.

NURG5020
HEALTH POLICY
Credits (Min/Max): 3/3
This course is designed to assist the student in understanding health care policy in the United States. This course critically examines the national health care agenda and nursing's role in relation to the health of the nation, global health, and global health policy. Federal, state, and local political structure and function are examined along with the hierarchy of political involvement, interest groups and lobbyists, advocacy strategies and ethical issues and the public policy change process. An overview of health care finance as it relates to health care systems/services is presented and strategies for influencing the regulatory process will be explored.

NURG5033
NURSING INFORMATICS IN NURSING ADMINISTRATION & NURSING ED
Credits (Min/Max): 3/3
This course is designed to provide the student with concepts of healthcare and nursing informatics for the nurse administrator and nurse educator integrating nursing science with computer technology and information science to identify, gather, process, and manage information. Current technology based health applications which support clinical, administrative, research, and educational processes and decision making will be emphasized. Trends and issues in using, designing, and managing health care information systems will be included as well as ethical and legal principles as they apply to health care information systems. Identifying and using appropriate technology for the task or project will also be discussed.

NURG5035
HUMAN DIVERSITY & SOCIAL ISSUES IN NURSING ADMINISTRATION & NURSING EDUCATION
Credits (Min/Max): 3/3
This course is designed to provide the student with an overview of human diversity and societal issues impacting nursing administration and nursing education. Strategies for incorporating diversity within the educational and work environment will be explored.

NURG6000
CAPSTONE RESEARCH EXPERIENCE
Credits (Min/Max): 3/3
This second research course is designed to provide the student with the opportunity to apply theoretical concepts and skills from the research methodology course and graduate nursing courses to the development of a capstone research experience. The student is guided in the preparation of a project specific to a phenomena related to nursing practice in the area of graduate study. Emphasis is placed on responsible participation in scientific inquiry and on adherence to principles of ethical research.

PreRequisites: NURG5002 - NURSING THEORY & RESEARCH

NURU1000  
INTRODUCTION TO NURSING  
Credits (Min/Max): 3/3  
This course is designed to provide an introduction to the organizational framework of the ASN program and to the profession of nursing. Concepts related to the nurse, client and the environment are presented. The student is introduced to the processes fundamental to nursing practice (nursing process, caring, communication/documentation and teaching/learning). In addition, selected theories and concepts applicable to a variety of client needs and settings are introduced.

NURU1005  
FOUNDATIONS OF CLINICAL NURSING  
Credits (Min/Max): 3/3  
This course is designed to provide students with the fundamental knowledge and skills necessary for the safe provision of therapeutic interventions for clients throughout the lifespan within the context of the nursing process. The student will develop beginning competence in performing basic nursing and physical assessment skills in the laboratory classroom. Opportunity for the student to apply knowledge from Introduction to Nursing as well as basic nursing and physical assessment skills with adult clients and their families will occur in the clinical component of this course.

NURU1005C  
FOUNDATIONS OF CLINICAL NURSING- CLINICAL  
Credits (Min/Max): 0/0  
This course is designed to provide knowledge and skills necessary for the safe provision of basic therapeutic interventions for patients throughout the lifespan within the context of the nursing process. The student will develop beginning competence in performing basic nursing and physical assessment skills in the laboratory classroom. Opportunity for the student to apply knowledge from Introduction to Nursing as well as basic nursing and physical assessment skills with adult clients and their families will occur in the clinical component of this course.

NURU2000  
MEDICAL SURGICAL NURSING OF THE ADULT I  
Credits (Min/Max): 6/6  
This course is designed to introduce students to the concepts foundational to the practice of medical surgical nursing of the adult client. In addition, the nursing process is used as the framework to explore the care of clients experiencing common acute and chronic disorders. Health promotion, disease prevention, health restoration, and care of the dying are explored as related to the disorders presented. Skills related to safe administration of medication, intravenous therapy, oxygen therapy and care of the client with wounds and selected orthopedic conditions will be presented in the classroom laboratory. Students will be guided in the application of knowledge and skills in the acute care setting with adult and elderly clients/families.  
PreRequisites: NURU1000 - INTRODUCTION TO NURSING

NURU2000C  
MEDICAL SURGICAL NURSING OF THE ADULT I-CLINICAL  
Credits (Min/Max): 0/0  
Clinical for Medical Surgical Nursing

NURU2000L  
MEDICAL SURGICAL NURSING OF THE ADULT I-LAB  
Credits (Min/Max): 0/0  
The focus of this course is the application of the nursing process to address adaptation to actual or potential health problems of the adult and their families with selected acute and chronic illnesses. Health promotion and disease prevention for young, middle-aged and older adults are also explored. Skills related to the safe administration of medications, intravenous fluids, and medical-surgical procedures will be practiced in the clinical laboratory and assessment skills will be further developed. The student will be guided in the application of knowledge and skills in the acute care setting with adult and elderly patients/families.

NURU2005  
LPN to RN TRANSITION COURSE  
Credits (Min/Max): 3/3
The licensed practical nurse (LPN) student enters the ASN program as a provider of care practicing within the standards of practice, code of ethics, and state board of nursing regulations for the LPN. This course is designed to assist the LPN to build upon this knowledge as the student makes the transition to the role of the registered nurse (RN). The student will be introduced to the conceptual framework of the ASN program and will explore the professional nursing roles, ANA scope, standards of practice, code of ethics and PA nurse practice act. The nursing process, caring, communication, documentation, and the teaching learning process as practiced by the registered nurse will be explored. Basic assessment skills, medication preparation, administration and IV therapy skills and other fundamental nursing skills will be evaluated.

NURU2010
MENTAL HEALTH NURSING
Credits (Min/Max): 4/4
This course is designed to introduce students to the concepts of mental health-mental illness across the lifespan. Utilizing the nursing process as the framework students will care for clients experiencing mental health problems. Therapeutic communication, developmental theories, and changes in behavior patterns are presented and explored. Students will be guided in the application of principles from biologic and behavioral sciences and nursing to assist the client and family to adapt to stressors and disruptions in mental health and mental health disorders. Health promotion and disease prevention as well as socio-cultural perspectives related to mental health will be studied. The clinical experience is structured to provide students with the opportunity to provide safe, quality care based on the nursing process to clients and families in various psychiatric mental health settings.
PreRequisites: NURU2000 - MEDICAL SURGICAL NURSING OF THE ADULT I

NURU2010C
MENTAL HEALTH NURSING-CLINICAL
Credits (Min/Max): 0/0
Clinical for Mental Health Nursing

NURU2012
CHILDBEARING & WOMEN'S HEALTH NURSING
Credits (Min/Max): 4/4
This course is designed to explore the role of the nurse in family centered care of the childbearing family before, during and after birth. Concepts and issues related to health promotion, disease prevention and illness, and care of women throughout the lifespan will also be addressed. Application of the nursing process in caring for childbearing women and their families will be emphasized. The clinical experience is structured to provide students with the opportunity to provide safe, quality care based on the nursing process to childbearing women and families in a variety of settings.
PreRequisites: NURU2010 - MENTAL HEALTH NURSING

NURU2012C
CHILDBEARING & WOMEN'S HEALTH NURSING-CLINICAL
Credits (Min/Max): 0/0
Clinical for Childbearing & Women's Health Nursing

NURU2015
NURSING OF CHILDREN
Credits (Min/Max): 4/4
This course is designed to provide the student with knowledge of the role of the nurse in health promotion of children and families during illness. Utilization of the nursing process will be emphasized in caring for children with acute and chronic health problems in a variety of ambulatory, community, acute, and transitional care settings. The clinical experience is structured to provide students with the opportunity to provide safe, quality care based on the nursing process to children and families in various pediatric health settings.
PreRequisites: NURU2010 - MENTAL HEALTH NURSING

NURU2015C
NURSING OF CHILDREN-CLINICAL
Credits (Min/Max): 0/0
Clinical for Nursing of Children

NURU2020
PHARMACOLOGY FOR NURSING PRACTICE
Credits (Min/Max): 2/2
This course is designed to introduce the student to the pharmacokinetics and pharmacodynamics of drug therapy with emphasis on the actions, interactions, adverse effects and nursing implications of each classification of drugs used to treat clients with diseases of body systems. Focus includes lifespan considerations, economics, legal, and ethical aspects of drug administration and client education.
PreRequisites: NURU1000 - INTRODUCTION TO NURSING
NURU2025
HIGH ACUITY NURSING
Credits (Min/Max): 6/6
This course is designed to provide the student with the advanced knowledge and skills required to care for patients and families experiencing complex and catastrophic stressors and complex acute and chronic illnesses. The use of technologies is integrated into the nursing process to provide safe, effective nursing care for patients as they adapt to these stressors. Application of the caring approach based on psychophysical and sociocultural concerns of clients and families is stressed. Precepted practice in critical care settings and clinical time in other acute care settings will provide the student with opportunities to translate knowledge and skills from the classroom setting to care of patients and families with these complex illnesses.
PreRequisites: NURU2012 - CHILDBEARING & WOMEN'S HEALTH NURSING

NURU2027
A COGNITIVE APPROACH TO CLINICAL REASONING IN NURSING
Credits (Min/Max): 3/3
This course is designed to provide the student with clinical reasoning skills required by professional nurses. Factors that influence the ability to effectively solve problems are examined to facilitate higher level thinking in simulated clinical situations. Strategies to decrease anxiety and improve test performance are an integral part of the cognitive/behavioral approach in this course.
PreRequisites: NURU2012 - CHILDBEARING & WOMEN'S HEALTH NURSING

NURU2030
TRANSITION FROM STUDENT TO GRADUATE
Credits (Min/Max): 3/3
This course is designed to introduce the student to the leadership role of the nurse in the provision of nursing care. Principles of management including delegation and legal aspects of management will be explored. The importance of appropriate and ethical use of resources and the sociopolitical issues related to health care and nursing are emphasized. The role of the nursing process in providing care for a group of patients is also explored. The changing dimensions of nursing as a profession and the commitment of the individual nurse to the advancement of nursing are investigated. Clinical experience will afford the student the opportunity to link the concepts with practice and is carried out under the direct supervision of a preceptor and through the guidance of course faculty.
PreRequisites: NURU2012 - CHILDBEARING & WOMEN'S HEALTH NURSING

NURU2121
MEDICAL SURGICAL NURSING OF THE ADULT II
Credits (Min/Max): 4/4
This course is a continuation of MS I and is designed to provide the students with the knowledge and skills required to care for adult clients and families experiencing selected acute and chronic disorders. Health promotion, disease prevention, rehabilitation, and restorative care of selected disorders will be explored. The students nursing care ability will be further developed during the instructor facilitated clinical experience.
PreRequisites: NURU2010 - MENTAL HEALTH NURSING

NURU3020
HEALTH ASSESSMENT IN NSG PRACTICE
Credits (Min/Max): 3/3
This course focuses on health assessment, health promotion, and disease prevention for major health concerns of individuals throughout the life span. Emphasis will be placed on refining the registered nurse's ability to develop an in-depth health history and health risk profile and to perform physical assessment of clients of varying ages. Evidence-based screening tests for early detection of disease, immunizations and prophylaxis to prevent disease and counseling to modify risk factors that lead to disease will be explored.

NURU3021
LEADERSHIP IN NURSING PRACTICE
Credits (Min/Max): 3/3
This course is designed to provide students an opportunity to broaden their knowledge of professional nursing practice by enhancing their leadership and management skills. Knowledge and skills of nursing leadership and management will be examined through didactic course work, and a 30 hour practicum experience structured to provide students with the opportunity to develop a project or provide a service in a selected healthcare setting. Core competencies for quality care as well as legal, ethical, and professional values will be explored as related to nursing leadership and management.

NURU3022
HEALTH TEACHING
Credits (Min/Max): 3/3
In this course students will be guided in appropriating knowledge foundational to health teaching. They will interrogate the concept of health, theories of teaching-learning and the connection among health beliefs, the nurse-family interrelationship and patterns of health practice. They will be invited to apply foundational knowledge to health teaching within institutional guidelines and changing health care environments. They will explore legal and ethical implications inherent in health teaching. Students will be guided in proposing implications for nursing research and practice in health teaching.
NURU3023
EVIDENCE BASED PRACTICE & NURSING RESEARCH
Credits (Min/Max): 3/3
This course is designed to provide the student an opportunity to explore the nature, value, and utility of nursing research, and the relationships among research, theory, and practice. An overview of the research process is presented, with emphasis on varying approaches and methodologies, conceptual consistency, and ethical considerations. Critical appraisal of published research affords the student the opportunity to identify valid, rigorous research necessary to support evidence-based practices.

NURU3024
NURSING DURING ACUTE ILLNESS
Credits (Min/Max): 3/3
The focus of this course is on the health care needs of acutely ill individuals. Emphasis will be on nursing interventions to assist individuals and families as they respond to acute illness. Nursing care necessary for stabilization, health restoration and rehabilitation will also be examined. Issues of significance to the acutely ill.

NURU3025
NURSING OF THE ADOLESCENT
Credits (Min/Max): 3/3
This course will provide the student with knowledge of the physical, emotional, intellectual and social health care dimensions of the adolescent in our society. The focus will be on the adolescent's developing health care needs and the role of the community, school or pediatric nurse who works with and cares for adolescents. Nursing interventions to promote health and prevent illness, including restorative and rehabilitative processes, will be examined.

NURU3027
MENTAL HEALTH NURSING
Credits (Min/Max): 3/3
This course is designed to examine the role of the nurse in care of individuals with common mental health disorders in primary care settings. The concepts of mental health and mental illness will be explored from neurobiological, personal, interpersonal and societal perspectives. Current mental health policies and initiatives and related nursing research will also be explored.

NURU3028
HEALTH CARE FOR OLDER ADULTS
Credits (Min/Max): 3/3
This course is designed to provide students the opportunity to explore the historical and contemporary health experiences of older people with an emphasis on health promotion, disease prevention, living with chronic illness, and evidence-based nursing interventions to improve and maintain the health of older people. Students will examine health disparities and common health problems in older adults. Ethical, legal, and health policy issues impacting health care for older adults will also be examined.

NURU3030
HEALTH PROMOTION, DISEASE & ILLNESS PREVENTION & HEALTH EDUCATION IN NURSING PRACTICE
Credits (Min/Max): 3/3
This course is designed to offer students the opportunity to explore the nurse's role in health promotion, disease and injury prevention and health education across the life span. Students will examine models and theories of health promotion, behavioral change and health education related to individuals and communities. Sociocultural, economic, genetic and political determinants that contribute to or hinder achieving optimal health are addressed. Evidence-based interventions that promote healthy behaviors of individuals and communities and prevent morbidity and mortality are analyzed.

NURU3035
QUALITY & SAFETY IN HEALTHCARE & NURSING PRACTICE
Credits (Min/Max): 3/3
This elective course provides the opportunity to explore quality and safety competencies in health care and nursing practice. Knowledge, skills, and attitudes related to these competencies will be explored as will the national agenda driving quality and safety initiatives, strategies to build a culture of quality and safety, interprofessional approaches to quality and safety, and global issues and strategies related to quality and safety. Selected issues related to safe, quality nursing care will be investigated.

NURU3036
INTRO TO HEALTH POLICY
Credits (Min/Max): 3/3
This course is designed to provide the student an overview of the context of health care including the organization and financing of patient services, how reimbursement is structured, and the scope and role of regulatory agencies that define boundaries of nursing practice. Health care policy issues and the political process addressing those issues will be examined. Strategies for influencing the political process by nurses, other health professionals, lay and special advocacy groups will be explored.
NURU4012
INTRO TO NURSING INFORMATICS
Credits (Min/Max): 3/3
This elective course provides the student with the opportunity to explore nursing informatics and technology applications in healthcare with emphasis on preparing entry level nurses with basic nursing informatics competencies. A brief history and evolution of health care technology, selected concepts, theories and models related to healthcare information systems, current systems and their uses, with emphasis on quality and safety in delivering patient care, and trends and future directions in implementing healthcare information systems will be introduced. Knowledge and skill in information processing and data management, professional roles, competencies, and skills of an informatics nurse as a project team member, and a systems design model will also be addressed.

NURU4020
CURRENT ISSUES IN NURSING
Credits (Min/Max): 3/3
This course is designed to provide the students with the opportunity to explore the contemporary context of professional nursing practice and health care delivery. Students will examine the major issues and trends in nursing and healthcare and consider the influence of socioeconomic, ethical, legal, and political variables as well as professional values on contemporary nursing practice.

NURU4021
COMMUNITY NURSING I
Credits (Min/Max): 3/3
This course is designed to provide the student the opportunity to explore concepts and practices of public health and community health nursing. Students will utilize their prior knowledge of nursing, humanities, natural and applied sciences to develop community nursing knowledge and skills to promote health of families, communities, and populations. The course focuses on health promotion and disease prevention and incorporates ethical and legal issues in community health nursing practice. In addition, the student will examine the impact of cultural, social and religious differences that impact community nursing practice. The 30 hour practicum experience is structured to provide students with the opportunity to develop a program or provide a service to promote health of a selected community.

NURU4023
NURSING RESEARCH II
Credits (Min/Max): 3/3
This course is designed to provide the opportunity for continued investigation into the role of research in nursing practice. Through a variety of research activities students will be invited to apply the concepts of research and the research process that were presented in Nursing Research I to an independent exploration of a selected area of interest in nursing.
PreRequisites: NURU3023 - NURSING RESEARCH I

NURU4024
ALTERNATIVE & COMPLEMENTARY THERAPIES IN NURSING(HEALING IN NURSING PRACTICE)
Credits (Min/Max): 3/3
Alternative and complementary therapies in nursing is an elective course for the RN-BSN majors. In this course the students will explore alternative and complementary therapies from the perspectives of foundational theories and the related therapies: mind-body-spirit, manipulation-based, natural products, and energy therapies. Current issues in education, practice, and research in the alternative and complementary therapies is the focus of this course.

NURU4026
ETHICAL & LEGAL ASPECTS IN PROFESSIONAL NURSING PRACTICE
Credits (Min/Max): 3/3
This course is designed to offer students the opportunity to examine the influence of the laws, legal and ethical issues on professional nursing practice in today's complex and changing health care delivery environments. Frequently encountered ethical and legal issues in nursing practice and various healthcare settings will be explored.

NURU4027
HEALTH CARE FOR WOMEN
Credits (Min/Max): 3/3
In this course, students will have the opportunity to explore the historical and contemporary health experiences of women with an emphasis on health promotion, disease prevention, and evidence-based nursing interventions to improve health care of women. Students will examine the health disparities and common health problems in women across the lifespan. The impact of ethical factors, legal factors and health care policy will also be examined. Students will also identify issues that impact women's health at the local, national and global levels.

NURU4029
COMMUNITY NURSING II
Credits (Min/Max): 3/3
This course is designed to provide the student with the continued opportunity to apply the principles of the nursing process to the health needs of a community-based population. The community itself is the client. The epidemiological process is used to assess the health status of a community and to identify community needs and the potential to address those needs. Political, economic, and environmental factors and their influence on health and the delivery of health care are reviewed and analyzed. Focus is on disease prevention and health promotion, education and maintenance.

PreRequisites: NURU4021 - COMMUNITY NURSING I

NURU4030
SCHOOL NURSE: CHILD HEALTH IN AN INCLUSIVE SETTING
Credits (Min/Max): 4/4
The course is designed to guide students in coming to understand the scope and responsibilities of the school nurse in assessing, planning, implementing, and evaluating school health for children K-12. The role of the school nurse in meeting the health care needs of all children, including healthy children, special needs children, children from different cultures, and children with ELL needs, will be a primary focus. Emphasis is on health promotion and maintenance at all levels of a child's development. The unique role of the school nurse in caring for children as well as collaborating with parents will be emphasized. Students will utilize evidence-based nursing practice as a basis for nursing care and school personnel. The course includes a 100-hour practicum under the guidance of a certified school nurse.

PreRequisites: EDSP3015 - INTRO TO LOW INCIDENCE DISABILITIES

NURU4032
PALLIATIVE & END-OF-LIFE NURSING CARE
Credits (Min/Max): 3/3
This course is designed to offer students the opportunity to explore the professional nurse's role in palliative care and care at the end of life. Students will examine dimensions of professional nursing practice with clients and families facing chronic life-threatening illnesses and end of life. Ethical and legal issues impacting nursing care will be examined. Evidence-based management of physical, psychosocial, and spiritual concerns of clients and their families at end of life and the palliative care of special populations will be investigated.

NURU4035
STRUCTURES INFLUENCING THE FAMILY/NURSE/PHYSICIAN RELATION
Credits (Min/Max): 3/3
This course is designed to explore a framework of fact, myth, symbol, and stereotype that influence the delivery of health care to families. The focus is on the complex web of communication in the interrelationship of family-nurse-physician. Students will be guided to analyze power and authority in the health care work force within the historical context of changing expectations and responsibilities.

NURU4036
FAMILY HEALTH NURSING
Credits (Min/Max): 3/3
This course is designed to assist the nurse in the provision of nursing care to patients and their families. The focus is on the knowledge base needed to care for, promote health, and prevent illness of families and on the role of the nurse in assisting families as they adapt to changes in health and illness. Students will apply the knowledge to various issues encountered in working with and caring for families.

NURU4037
HEALTH CARE FOR MEN
Credits (Min/Max): 3/3
In this course students will have the opportunity to explore the historical and contemporary health experiences of men with an emphasis on health promotion, disease prevention and evidence-based nursing interventions to improve health of men. Students will examine health disparities and common health problems in men across the lifespan. The impact of ethical, legal and health policy issues will also be examined. Students will identify issues that impact men's health at the local, national and global levels.

NURU4040
FOUNDATIONS OF FORENSIC NURSING
Credits (Min/Max): 4/4
This course is designed to provide the student with the opportunity to explore the unique roles and responsibilities of the forensic nurse in the care of individuals, families, and communities whose status or care is determined by legal or forensic issues. The scientific investigation, including evidence collection and preservation, medical testimony in the court system, and consultation with legal authorities, will be explored from the perspective of the forensic nurse. Knowledge and skills of forensic nursing will be explored through didactic course work and through a 30-hour practicum experience.

PreRequisites: CRIM1001 - INTRODUCTION TO CRIMINAL JUSTICE

PART1000
FR PERFORMANCE
Credits (Min/Max): 1/1
This course is designed to develop the artist's comprehension and execution of various forms of repertoire in an effort to guide the student's body and mind towards an articulate performance. This course is designed to offer the artist an array of dance voices via the recruitment of various guest choreographers to set original works for performance, the rights to learn and perform previously established works by established choreographers, and the opportunity to create and set creative works among the student population.

PART1001
MUSIC APPRECIATION I (SLAE1007)
Credits (Min/Max): 3/3
An overview of musical eras from the Middle Ages through the 20th Century (Bach, Beethoven and the boys). Various listening activities are geared for the non-musician. Cross-listed with SLAE1007

PART1002
MUSIC APPRECIATION II (SLAE1009)
Credits (Min/Max): 3/3
An introduction to jazz for the non-musician. Eras covered include the roots of jazz, blues, ragtime, swing, bop, cool, jazz rock, jazz fusion and current trends. Jazz artists ranging from Louis Armstrong and Ella Fitzgerald to Harry Connick, Jr. and Diana Krall. Cross-listed with SLAE1009

PART1004
FR BALLET TECHNIQUE
Credits (Min/Max): 3/3
This course is designed to develop the artist's knowledge of ballet technique through the emphasis of style, musicality, sensitivity, and precision. The artist will work to demonstrate a clear articulation of the French ballet vocabulary, the direct translation of the vocabulary into English, and the exact articulation of each movement as it is accomplished at both the barre and in centre practice.

PART1005
FR CONTEMPORARY/MODERN
Credits (Min/Max): 3/3
This class is designed to develop the artist's use of space, emotion, mood, and the deliberate use of gravity. This course will focus on traditional modern dance techniques such as Graham, Lewitsky, and Cunningham technique in addition to contemporary dance styles inclusive of release technique, contemporary ballet, and Bodiography technique.

PART1009
FR POINTE/PAS DE DEUX
Credits (Min/Max): 1/1
This course is designed to develop the artist's knowledge of pointe technique through the emphasis of strength, mechanics, artistry, and precision. The artist will work to demonstrate a clear articulation of the ballet vocabulary via the exact articulation of footwork in each movement as it is accomplished at both the barre and in centre practice. This class also designed to develop the artist's understanding of ballet and contemporary partnering. It will work to define the practices and techniques of shared movement and will encourage the artist to explore and examine how their individual body moves in space with another.

PART1012
FR VARIATIONS/REPERTOIRE
Credits (Min/Max): 1/1
Variations/Repertoire - is a course that explores various notable ballet and contemporary variations. Focusing on ballet technique and performance quality, this course seeks to expand on the student's dance performance knowledge and ability while exposing them to a wide selection of repertoire.

PART1020
FR MEN'S DANCE TECHNIQUE
Credits (Min/Max): 1/1
This class is designed to develop the male dancer's knowledge of ballet technique through the emphasis of style, musicality, sensitivity, and a love of dance. Placement will be determined by previous training and student potential as demonstrated in the audition process. Male students must complete a total of 8 credits in this course.

PART1022
FUNDAMENTALS OF MUSIC I (SLAE1012)
Credits (Min/Max): 3/3
A hands-on introduction to the language of music (notation, scales, melody, harmony, etc.) using recorders, percussion and listening examples from various musical genres. This class is built for the non-musician. Cross-listed with SLAE1012
PART1023
CHORUS
Credits (Min/Max): 1/1
The Choir of La Roche College provides an opportunity for students, faculty and staff to explore and perform group vocal music. Selected repertoire represents a wide variety of styles from the western European and American traditions, with special attention to other world music traditions. The choir presents several major concerts each year and participates in community projects throughout Southwestern Pennsylvania.

PART1024
INDIVIDUAL INSTRUCTION--VOICE
Credits (Min/Max): 1/1
This course consists of individual instruction in voice. The course is designed for both beginner and more advanced students. Private interview will determine level of instruction.

PART1025
INDIVIDUAL INSTRUCT--INSTRUMENT
Credits (Min/Max): 1/1
This course consists of individual instruction on a selected instrument. The course is designed for both beginner and more advanced students. Private interview will determine level of instruction.

PART1050
JAZZ/HIP HOP-DANCE ELECTIVE
Credits (Min/Max): 1/1
This is a one-hour course in the techniques of hip-hop dance.

PART2001
SO PERFORMANCE
Credits (Min/Max): 1/1
This course is designed to develop the artist's comprehension and execution of various forms of repertoire in an effort to guide the student's body and mind towards an articulate performance. This course is designed to offer the artist an array of dance voices via the recruitment of various guest choreographers to set original works for performance, the rights to learn and perform previously established works by established choreographers, and the opportunity to create and set creative works among the student population.

PART2004
SO BALLET TECHNIQUE
Credits (Min/Max): 3/3
This course is designed to develop the artist's knowledge of ballet technique through the emphasis of style, musicality, sensitivity, and precision. The artist will work to demonstrate a clear articulation of the French ballet vocabulary, the direct translation of the vocabulary into English, and the exact articulation of each movement as it is accomplished at both the barre and in centre practice.

PART2005
SO CONTEMPORARY/MODERN
Credits (Min/Max): 3/3
This class is designed to develop the artist's use of space, emotion, mood, and the deliberate use of gravity. This course will focus on traditional modern dance techniques such as Graham, Lewitsky, and Cunningham technique in addition to contemporary dance styles inclusive of release technique, contemporary ballet, and Bodiography technique.

PART2009
SO POINTE/PAS DE DEUX
Credits (Min/Max): 1/1
This course is designed to develop the artist's knowledge of pointe technique through the emphasis of strength, mechanics, artistry, and precision. The artist will work to demonstrate a clear articulation of the ballet vocabulary via the exact articulation of footwork in each movement as it is accomplished at both the barre and in centre practice. This class also designed to develop the artist's understanding of ballet and contemporary partnering. It will work to define the practices and techniques of shared movement and will encourage the artist to explore and examine how their individual body moves in space with another.

PART2010
DANCE HISTORY I
Credits (Min/Max): 3/3
Overview of the development of dance in the western world, within the context of the historical, practical, theoretical, and cultural.

PART2012
SO VARIATIONS/REPERTOIRE
Credits (Min/Max): 1/1
Variations/Repertoire - is a course that explores various notable ballet and contemporary variations. Focusing on ballet technique and performance quality, this course seeks to expand on the student's dance performance knowledge and ability while exposing them to a wide selection of repertoire.

**PART2015**
**DANCE HISTORY II**
**Credits (Min/Max):** 3/3
An introductory history of the development of dance. Dance will be examined as a form of human expression. Forms of ritual as well as art forms will be analyzed. Ballet, modern and jazz will be emphasized from their beginnings through their evolution to contemporary choreographed styles.
PreRequisites: PART2010 - DANCE HISTORY I

**PART2020**
**SO MEN’S DANCE TECHNIQUE**
**Credits (Min/Max):** 1/1
This class is designed to develop the male dancer's knowledge of ballet technique through the emphasis of style, musicality, sensitivity, and a love of dance. Placement will be determined by previous training and student potential as demonstrated in the audition process. Male students must complete a total of 8 credits in this course.

**PART2025**
**HISTORY OF MUSICAL THEATER (SLAE1097)**
**Credits (Min/Max):** 3/3
A survey of musical theater and its development from its roots through the early 20th century, the Ziegfield follies, the 1920's in New York, Broadway and Hollywood in the 1930's, the golden age of musicals and movies up to and including today's musical theater. Cross-listed with SLAE1097

**PART3000**
**JR PERFORMANCE**
**Credits (Min/Max):** 1/1
This course is designed to develop the artist's comprehension and execution of various forms of repertoire in an effort to guide the student's body and mind towards an articulate performance. This course is designed to offer the artist an array of dance voices via the recruitment of various guest choreographers to set original works for performance, the rights to learn and perform previously established works by established choreographers, and the opportunity to create and set creative works among the student population.

**PART3002**
**MUSICAL THEATRE PRODUCTION I**
**Credits (Min/Max):** 3/3
Dance production is a laboratory course providing each student with opportunity for hands-on training in the technical and performing aspects of theater. Each individual will be able to extend and broaden their production and performing experience.

**PART3003**
**MUSICAL THEATRE PRODUCCION II**
**Credits (Min/Max):** 3/3
Dance production is a laboratory course providing each student with opportunity for hands-on training in the technical and performing aspects of theater. Each individual will be able to extend and broaden their production and performing experience.

**PART3004**
**JR BALLET TECHNIQUES**
**Credits (Min/Max):** 3/3
This course is designed to develop the artist's knowledge of ballet technique through the emphasis of style, musicality, sensitivity, and precision. The artist will work to demonstrate a clear articulation of the French ballet vocabulary, the direct translation of the vocabulary into English, and the exact articulation of each movement as it is accomplished at both the barre and in centre practice.

**PART3005**
**JR CONTEMPORARY/MODERN**
**Credits (Min/Max):** 3/3
This class is designed to develop the artist's use of space, emotion, mood, and the deliberate use of gravity. This course will focus on traditional modern dance techniques such as Graham, Lewitsky, and Cunningham technique in addition to contemporary dance styles inclusive of release technique, contemporary ballet, and Bodiography technique.

**PART3009**
**JR POINTE/PAS DE DEUX**
**Credits (Min/Max):** 1/1
This course is designed to develop the artist's knowledge of pointe technique through the emphasis of strength, mechanics, artistry, and precision. The artist will work to demonstrate a clear articulation of the ballet vocabulary via the exact articulation of footwork in each movement as it is accomplished at both the barre and in centre practice. This class also designed to develop the artist's understanding of ballet and contemporary partnering. It will work to define the practices and techniques of shared movement and will encourage the artist to explore and examine how their individual body moves in space with another.

PART3012
JR VARIATIONS/REPERTOIRE
Credits (Min/Max): 1/1
Variations/Repertoire - is a course that explores various notable ballet and contemporary variations. Focusing on ballet technique and performance quality, this course seeks to expand on the student's dance performance knowledge and ability while exposing them to a wide selection of repertoire.

PART3015
DANCE PEDAGOGY I
Credits (Min/Max): 3/3
This course is an overview of dance teaching as a profession including requirements, challenges, and opportunities. Includes 10 hours of clinical laboratory experiences, directed observations, and limited participation in classroom settings. The material covered in this course equips the teaching candidate with a basis for forming a personal teaching philosophy and methods in its practical application to dance technique classes in a variety of teaching settings.

PART3020
JR MEN'S DANCE TECH
Credits (Min/Max): 1/1
This class is designed to develop the male dancer's knowledge of ballet technique through the emphasis of style, musicality, sensitivity, and a love of dance. Placement will be determined by previous training and student potential as demonstrated in the audition process. Male students must complete a total of 8 credits in this course.

PART3030
DANCE COMPOSITION I
Credits (Min/Max): 3/3
Dance composition is a comprehensive study, navigation, and connection of choreographic structures to create a unified work of choreography that is prepared for performance. All movement language is taken from the techniques of ballet, contemporary, jazz, hip hop, folk, religious, and pedestrian movement.

PART3050
SPECIAL TOPICS-TAP
Credits (Min/Max): 1/1
Pilates emphasizes the balanced development of the body through core strength, flexibility, and awareness in order to support efficient, graceful movement. Pilates is about lengthening and strengthening your muscles, leading to increased strength and improved flexibility. Each exercise movement flows smoothly into the next, encouraging the body to learn and remember new ways of movement and being, a mind-body connection.

PART3050A
HISTORY OF ROCK & ROLL::SPECIAL TOPIC(SLAE1011)
Credits (Min/Max): 3/3
An introduction to the early years of rock music (1950s - mid 1970s) for the non-musician. The class will include the roots of rock and roll, teen idols, the folk music craze, the British invasion, Motown, psychedelic music, singer-songwriters and the roots of metal. The history of the 50s and 60s will be highlighted by the various styles of music. Cross-listed with SLAE1011

PART4000
SR PERFORMANCE
Credits (Min/Max): 1/1
This course is designed to develop the artist's comprehension and execution of various forms of repertoire in an effort to guide the student's body and mind towards an articulate performance. This course is designed to offer the artist an array of dance voices via the recruitment of various guest choreographers to set original works for performance, the rights to learn and perform previously established works by established choreographers, and the opportunity to create and set creative works among the student population.

PART4004
SR BALLET TECHNIQUES
Credits (Min/Max): 3/3
This course is designed to develop the artist's knowledge of ballet technique through the emphasis of style, musicality, sensitivity, and precision. The artist will work to demonstrate a clear articulation of the French ballet vocabulary, the direct translation of the vocabulary into English, and the exact articulation of each movement as it is accomplished at both the barre and in centre practice.
PART4005
SR CONTEMPORARY/MODERN
Credits (Min/Max): 3/3
This class is designed to develop the artist's use of space, emotion, mood, and the deliberate use of gravity. This course will focus on traditional modern dance techniques such as Graham, Lewitsky, and Cunningham technique in addition to contemporary dance styles inclusive of release technique, contemporary ballet, and Bodigrophy technique.

PART4009
SR POINTE/PAS DE DEUX
Credits (Min/Max): 1/1
This course is designed to develop the artist's knowledge of pointe technique through the emphasis of strength, mechanics, artistry, and precision. The artist will work to demonstrate a clear articulation of the ballet vocabulary via the exact articulation of footwork in each movement as it is accomplished at both the barre and in centre practice. This class also designed to develop the artist's understanding of ballet and contemporary partnering. It will work to define the practices and techniques of shared movement and will encourage the artist to explore and examine how their individual body moves in space with another.

PART4012
SR VARIATIONS/REPERTOIRE
Credits (Min/Max): 1/1
Variations/Repertoire - is a course that explores various notable ballet and contemporary variations. Focusing on ballet technique and performance quality, this course seeks to expand on the student's dance performance knowledge and ability while exposing them to a wide selection of repertoire.

PART4020
SR MEN'S DANCE TECH
Credits (Min/Max): 1/1
This class is designed to develop the male dancer's knowledge of ballet technique through the emphasis of style, musicality, sensitivity, and a love of dance. Placement will be determined by previous training and student potential as demonstrated in the audition process. Male students must complete a total of 8 credits in this course.

PART4030
DANCE COMPOSITION II
Credits (Min/Max): 3/3
Dance composition II is a comprehensive development and departure from the studies of choreographic development in the preliminary composition course. This course is primarily focused on the creation of a larger group work and the presentation of that work without utilizing oneself as a key-performing participant.

PART4051
PERFORMING ARTS-INTERNERSHIP I
Credits (Min/Max): 1/6
The internship gives students an opportunity to study dance in a professional setting.

PART4055
SENIOR SEMINAR IN PER ARTS/DANCE
Credits (Min/Max): 3/3
An exploration of current trends, innovation and developments in dance in a seminar format. Students will discuss, compare and analyze ideas generated by assigned readings, as well as their work on capstone projects.

PHIL1020
LOGIC
Credits (Min/Max): 3/3
This course is designed to help the student understand the methods and principles necessary for correct reasoning. The correct use of reason is indispensable for written and spoken communication. The course deals with language and its uses, fallacies, propositions, syllogisms, inference, probability and scientific hypothesis.

PHIL1021
INTRO TO PHILOSOPHY(SLRS1012)
Credits (Min/Max): 3/3
This is a survey course that presents the principal philosophical problems, questions, and systems. Consideration is given to representative schools of philosophy, especially the foundational teachings in Plato and Aristotle. The relationship of philosophy to other disciplines, arts and sciences is examined. Cross-listed with SLRS1012
PHIL2022  
HISTORY OF GREEK PHILOSOPHY  
Credits (Min/Max): 3/3  
This course examines the rise and development of philosophy in ancient Greece. This includes the pre-Socratic philosophers in relationship to the birth of the science of nature, the Sophists and philosophy as rhetoric and skepticism, Plato and the ascent toward wisdom, Aristotle and the analysis of being.

PHIL2023  
HISTORY OF MODERN PHILOSOPHY  
Credits (Min/Max): 3/3  
The course examines the development of philosophy during the period of the scientific revolution from the 16th century through the 18th century. The problems discussed are: 1) the establishing of the conditions for the possibility of human knowledge, 2) determining the limits to that knowledge and 3) understanding the implications for the possibility of a science of nature and for the possibility of metaphysics as a science.

PHIL2026  
ETHICS(SLRS1013)  
Credits (Min/Max): 3/3  
A survey of historical and contemporary responses to significant moral problems encountered in the Christian life. Topics include conscience, racism, peace and war, ecology, population control, economic justice and capital punishment. Cross-listed with SLRS1013

PHIL3024  
CONTEMPORARY PHILOSOPHY  
Credits (Min/Max): 3/3  
The course examines the contemporary philosophies of existentialism, phenomenology, linguistic analysis and logical positivism. Some of the questions discussed are the impact of science on contemporary humans, the destruction of metaphysics and the problem of knowledge as seen from the perspective of the different philosophical movements.

PHIL3027  
BIOMEDICAL ETHICS  
Credits (Min/Max): 3/3  
The course addresses significant ethical issues and controversies that occur in the health professions. Students are not encouraged to adopt any particular ethical position or view but rather gain an ability to review and analyze the reasons that support various norms and opinions in this field.

PHYS1010  
PHYSICS FOR HEALTH SCIENCE  
Credits (Min/Max): 3/3  
This course is designed to provide a broad background in physics for those who will enter the allied health professions. Applications will be made to the biological and physiological sciences, as well as to the various types of equipment. Lecture and laboratory course.  
Prerequisites: MATH1010 - COLLEGE ALGEBRA

PHYS1010L  
PHYSICS FOR HEALTH SCIENCE-LAB  
Credits (Min/Max): 1/1  
Laboratory for PHYS1010 Physics for Health Science

PHYS1032  
GENERAL PHYSICS I  
Credits (Min/Max): 3/3  
This is the first of a three-semester introduction to calculus-based physics stressing experimental and problem-solving techniques. Concepts covered are mechanics, kinematics, Newton's laws of motion, conservation laws, rotational motion, gravitation, oscillation, and wave/acoustics.

PHYS1032L  
GENERAL PHYSICS I-LAB  
Credits (Min/Max): 1/1  
Laboratory for PHYS1032 General Physics I

PHYS1033  
GENERAL PHYSICS II  
Credits (Min/Max): 3/3  
The second of a three-semester introduction to calculus-based physics. Concepts covered are thermal properties and electromagnetism: thermodynamics, electricity, magnetism, electromagnetic wave, geometrical optics, and physics optics.
PreRequisites: PHYS1032 - GENERAL PHYSICS I

PHYS1033L
GENERAL PHYSICS II-LAB
Credits (Min/Max): 1/1
Laboratory for PHYS1033 General Physics II

PHYS2030
GENERAL PHYSICS III
Credits (Min/Max): 3/3
The third of a three-semester introduction to calculus-based physics. This course is devoted to the study of the two great theories that underlie almost all of modern physics, quantum theory and relativity theory. There is an emphasis on quantum mechanical description of semiconductor physics, which forms our modern electronics age (computers and electronic communication devices in general). A series of laboratory projects enables the student to retrace experimentally the development of modern physics.
PreRequisites: PHYS1033 - GENERAL PHYSICS II

PHYS2030L
GENERAL PHYSICS III-LAB
Credits (Min/Max): 1/1
Laboratory for PHYS2030 General Physics III
PreRequisites: PHYS1033L - GENERAL PHYSICS II-LAB

PHYS2080
ANALOG ELECTRONICS
Credits (Min/Max): 3/3
An introductory course of electronics. Students will learn the fundamental principles of electronics circuits while engaging in various laboratory projects using electronic components such as passive devices and integrated circuit chips. Topics to be studied include basic circuit theory, diode applications, Bipolar and Filed Effect transistors, operational amplifiers, and basic TTL gates. This course will provide students with both theoretical and practical knowledge necessary to start understanding of computers and data communication devices.

PHYS2080L
ANALOG ELECTRONICS-LAB
Credits (Min/Max): 0/0
Lab for PHYS2080 Analog Electronics

PHYS3075
COMPUTATIONAL PHYSICS
Credits (Min/Max): 3/3
This course will focus on analyzing problems of physics with numerical methods and simulation techniques. Various problems are selected from Classical Mechanics, Electromagnetism, Thermal/Statistical Physics, and Quantum Mechanics. It will provide students with additional computational skill and knowledge necessary for analyzing various models and simulations of physics and other disciplines.

PHYS3080
DIGITAL ELECTRONICS
Credits (Min/Max): 3/3
This is an intermediate digital electronics and focuses on the study of computer architecture, and digital signal processing technology. It will provide students with the working knowledge necessary for understanding in computer science and telecommunication technologies. Students will learn practical digital circuits while conducting practical laboratory projects. Typical digital integrated circuits and digital/analog interface chips will be used for designing and constructing a prototype computer, interfaces, and digital signal processing circuits.

PHYS3080L
DIGITAL ELECTRONICS-LAB
Credits (Min/Max): 0/0
Lab for PHYS3080 Digital Electronics

PHYS3082
ELECTRONICS COMMUNICATION
Credits (Min/Max): 3/3
This course will present the fundamental technology of wireless and cable telecommunications. Students will become familiar with modulation/demodulation and noise reduction for high-fidelity electronic and data communications. They will also learn advanced data communication technologies such as digital broadband technology. Transition from electronics (application of electrons) to photonics (application of lights and photons) is also presented. Hands-on laboratory projects will be conducted in connection with the basic hardware of telecommunication not covered in PHYS2080 Analog Electronics and PHYS 3080 Digital Electronics.
PHYS4075
PHYSICS OF INFORMATION THEORY
Credits (Min/Max): 3/3
This course will offer fundamental concepts of physics that forms information and computation theories. The first part of this course is an overview of information theory. The concept of entropy and negative entropy in Thermodynamics and Information will be discussed. Then, noise in electric communication will be treated as a stochastic process. The second part of this course is an introduction to quantum computation and information. Mathematical background of quantum mechanics will be overviewed for the theoretical background of quantum computation/information. Experimental feasibility will be also discussed with recent development. It will provide students with fundamental knowledge of classical and quantum computation/information.

PHYS4080
INSTRUMENTAL PHYSICS
Credits (Min/Max): 3/3
In this course, students will learn how to design and construct test and measurement instruments. They will design, construct various hands-on apparatuses and conduct measurements with their own instruments in the laboratory session. Students will also learn basic knowledge of design and construction of computer-based data acquisition systems and virtual instruments, emphasizing the application of microelectronics for controlling processes and systems. The integration of microprocessors with sensors/actuators and the use of digital device interface are central to these applications. In addition, typical computer network application of laboratory will be overviewed.

POLI1022
AMERICAN GOVERNMENT
Credits (Min/Max): 3/3
This course introduces students to the major American political institutions, the way in which the houses of Congress function, and the Presidency while also analyzing civil liberties, constitutional rights, policy-making, social policy issues, the role of political parties, the electoral process, the political role of the media, and foreign policy debates.

POLI2001
GLOBAL POLITICS(INST2001)
Credits (Min/Max): 3/3
This is an introductory course in the field of international relations, providing an overview of major theories and concepts of international relations and an historical background for contemporary world politics. Major topics include the contemporary international system, economic development, foreign policy behavior, international conflicts and international institutions. Cross-listed with INST2001

POLI2005
CONSTITUTIONAL LAW(CRIM2005)
Credits (Min/Max): 3/3
This course will explore the difficulty in interpreting the meaning of constitutional language. The interpretive role of the U.S. Supreme Court will be studied through an examination of landmark constitutional decisions. The major schools of thought that guide interpretation will also be studied. Cross-listed with CRIM2005

POLI2045
ISLAM IN THE WORLD (HIST/SOCL2045)
Credits (Min/Max): 3/3
In this course, the basic beliefs of Islam are reviewed, along with a brief history of Islam's overall development and its impact on the world and on various civilizations in different global regions. Islam's internal sects are analyzed, and its political impact on current politics in the world is explored. The role of U.S. foreign policy in dealing with the recent rise of Islam is also analyzed. Cross-listed with HIST/SOCL2045

POLI2075
PUBLIC POLICY
Credits (Min/Max): 3/3
In this course we study basic concepts and practices of the public policy process, from policy formulation to decision-making and implementation of policies by the government. The United States federal government is the major focus of inquiry although other governments may be referenced. This course is especially appropriate for those interested in knowing how a policy is created and how to analyze government policies.

POLI3002
HISTORY OF EUROPEAN DIPLOMACY (HIST3002)
Credits (Min/Max): 3/3
The internationally accepted style of diplomacy had its origins in Italy in the late 1400's. Emphasis is placed on the mechanisms of diplomacy as well as its use by European powers: classical diplomacy in the 19th century and the impact of that system on other areas of the globe. The decline of European style diplomacy in the World War/Cold War era is described. Cross-listed with HIST3002

**POLI3005**  
CONSTITUTIONAL LAW(CRIM3005)  
Credits (Min/Max): 3/3  
This course will explore the difficulty in interpreting the meaning of constitutional language. The interpretive role of the U.S. Supreme Court will be studied through an examination of landmark constitutional decisions. The major schools of thought that guide interpretation will also be studied. Cross-listed with CRIM3005.(Previously POLI2005)

**POLI3011**  
RESEARCH METHODS  
Credits (Min/Max): 3/3  
This course introduces the student to the design of explanatory models in political science and more commonly used quantitative and qualitative analytical techniques in doing political science research.

**POLI3015**  
HISTORY/POLITICAL THOUGHT (HIST3015)  
Credits (Min/Max): 3/3  
In this course we inquire into the origins, evolution and development of political philosophies, focusing on the theories that have shaped Western political thought from ancient times to the present day. Key concepts in Western political thought such as liberty, justice, morality, political rights, and democracy are examined. Students will also be asked to create their own political theories. Students will learn the genesis of political thought over the past 2,000 years, how to critically assess these theories, and how to create their own theories. Cross-listed with HIST3015.

**POLI3019**  
HISTORY & POLITICS OF AFRICA  
Credits (Min/Max): 3/3  
This course covers the key episodes in the history of Africa from pre-colonial times, through the colonial and post-colonial periods. We examine ancient kingdoms, stateless societies, inter-cultural exchanges, ethnicity, empire-creation and state-building. British, French, Belgian, Dutch and Portuguese colonial systems in Africa are then analyzed. We proceed to look at the anti-colonial independence movements, economic development in post-colonial Africa, post-colonial state-building and political changes in present-day Africa.

**POLI3021**  
COMPARATIVE GOVERNMENT(INST3021)  
Credits (Min/Max): 3/3  
This course focuses on the government, policies and politics of different nation-states around the world, and investigates the political science approaches to studying government and politics in various areas of the world. The focus in not only on forms of governments, but also the major political and social factors that affect political change in different world areas, the relationship between states and societies, and the comparative study of democratic and non-democratic nations. Cross-listed with INST3021

**POLI3023**  
MODERN U.S. DIPLOMATIC HISTORY (HIST/INST3023)  
Credits (Min/Max): 3/3  
This course presents a study of the major developments in American diplomatic history. Special emphasis is placed on the years from World War II until the present. Major international developments and their effects on American diplomacy are discussed along with the impact of various presidents and the influence of the United Nations. The interrelation between foreign policy and domestic opinion is also examined. Cross-listed with HIST/INST3023

**POLI3025**  
DEVELOPMENT:POLITICAL, SOCIAL & ECONOMIC ISSUES(INST3025)  
Credits (Min/Max): 3/3  
This course presents a study of the political, social, and economic realities of Latin America, Asia, and Africa. Emphasis is placed on ecological, racial, ethnic, and population problems, as well as on the legacy of colonialism, developmentalism, and dependency. Human rights and the special problems of women will also be addressed. Cross-listed with INST3025

**POLI3032**  
COMPARATIVE PUBLIC POLICY  
Credits (Min/Max): 3/3  
This course is an introduction to the formation and dissemination of public policy in various countries around the world. We examines the means by which political, economic, and social issues are addressed by governments. The impact of public policy decision-making is critically evaluated and compared among countries.
POLI3033
AMERICAN FOREIGN POLICY (INST3033)
Credits (Min/Max): 3/3
The reasons behind the foreign policy decisions of the U.S. government in recent decades are examined; different theories are explored for explaining shifts and continuities in foreign policy decision-making. Contemporary challenges to American foreign policy, from Iraq and Iran to Afghanistan, Syria and the Middle East are analyzed. Cross-listed with INST3033

POLI3036
HIST AMER POL VALUES(HIST3036)
Credits (Min/Max): 3/3
In this course we explore the central values, beliefs and ideas that have helped to both shape and reflect the changing history of the United States. Special attention is paid to how particularly important values and ideas reflected certain time periods in American history, and helped to make this country unique. America's values and beliefs evolved both from social changes and grassroots political movements as well as from its leaders and influential thinkers. Contemporary ideas and values in America are provided considerable attention. Cross-listed with HIST3036

POLI3037
THE AMERICAN PRESIDENCY
Credits (Min/Max): 3/3
In this course we compare and contrast different U.S. presidents though the history of the country, survey the strengths and weaknesses of different presidents, while analyzing the overall challenges to serving effectively as president. The role of the electoral college is examined with regard to the complexities of campaigning for and successfully competing in U.S. presidential elections, especially the upcoming election and the most recent election.

POLI3039
POLITICS AND SOCIETY(SOCL3039)
Credits (Min/Max): 3/3
The course is designed to familiarize the student with the social bases of political power. Politics is viewed as a process in relation to the social and economic structures, which influence its direction. A consideration of the effects which politics has on these structures is also offered. A detailed analysis of the primacy of politics in the 20th century is included. Cross-listed with SOCL3039

POLI3040
ETHNIC CONFLICT(SOCL3040)
Credits (Min/Max): 3/3
In this course we examine why ethnic groups sometimes get along very well, but other times engage in conflict. We query: What are the political and social origins of ethnic conflicts in various parts of the world? Do ethnic conflicts differ in different world regions? What national and international policies encourage ethnic conflict? How can we encourage ethnic groups to pursue peaceful accommodations? Cross-listed with SOCL3040

POLI3041
TERRORISM IN THE MODERN AGE
Credits (Min/Max): 3/3
This course explores the global political context which gives rise to terrorist groups and movements, while also differentiating between authentic terrorist movements and those which are radical but not terrorist. Emphasis is on the historical and contemporary evolution of terrorist movements, the reasons for their emergence, and the current status of present-day terrorist groups and movements.

POLI3045
HISTORY & POLITICS OF MID EAST (HIST3045)
Credits (Min/Max): 3/3
This course explores the peoples and history of the Middle East, from ancient times, including a procession of impressive empires, until their eventual domination by the Ottomans and finally, by British Empire. We investigate the accommodation of the British to Middle Eastern kingships and the impact of colonial state-building. We proceed to examine the establishment of the state of Israel and the evolution of Palestinian-Israeli relations over past half a century. Cross-listed with HIST3045

POLI3051
DEVELOPMENT IN SOUTHEAST ASIA (HIST/SOCL3051)
Credits (Min/Max): 3/3
This course looks at the history of social, political and economic development of Southeast Asia, excluding Indochina, and focusing primarily on Indonesia, Malaysia, and the Philippines. It will discuss the dependent nature of development of these countries and how such development affects the national historical experiences of these countries. Cross-listed with HIST/SOCL3051

POLI3052
EXPERIENCE OF MODERN WAR (HIST3052)
Credits (Min/Max): 3/3
In this course, the experience of modern war is analyzed as a contemporary political phenomenon with broad political implications for the understanding the relationship between national and international politics, on the one hand, and the actual experience of war, on the other. Contemporary and modern wars are studied from the perspective of the soldier in the field, as well as from the broader perspective of commander decision-making, generals' war strategies, and the global context of war-making. Also taken into account is the impact of war on the inhabitants of war-affected countries; on military veterans; and on the national political system of the countries involved in a war. Cross-listed with HIST3052

POLI3082
SOCIAL MOVEMENT & RESISTANCE (SOCL3082)
Credits (Min/Max): 3/3
This course examines the origin, growth, and dynamics of social movements as forms of social protest and resistance against state and global injustices. Discussions include case studies of various social and political groups, non-government organizations, and liberation and revolutionary movements in the U.S. and throughout the world. Cross-listed with SOCL3082

POLI4000C
HISTORY & POLITICS OF ITALY
Credits (Min/Max): 3/3
This course explores various facets of the general history of Italy from ancient times, through to the Roman Empire, and then on into the modern construction of Italy as a nation-state. The course also delves into recent Italian government and politics. Students will have the opportunity to explore specific research topics in Italian history or politics, such as art, architecture, culture, social life, culinary experiences, personal family histories, comparative urban design, military history, Italian prime ministers, Italian elections, and other topics.

POLI4051
POLITICAL SCIENCE-INTERNSHIP I
Credits (Min/Max): 1/3
A field experience in selected professional environments. The student is given the opportunity to integrate theoretical knowledge with practical application under the guidance of professionals at the particular institute to which the student is assigned.

POLI4055
SENIOR SEMINAR-POLITICAL SCIENCE
Credits (Min/Max): 3/3
A research methodology course that acquaints students with political research methods. Students will synthesize their knowledge of political science through the discussion of the research process and the writing and presentation of a research paper.

POLI4057
POLITICAL SCIENCE-INDEPENDENT STUDY
Credits (Min/Max): 1/3
Individual study course that is supervised by a full-time faculty member.

PSED1003
CONDITIONING I
Credits (Min/Max): 2/2
This course is designed to enable students individually to assess personal strengths and weaknesses and to develop an effective individualized physical program to alleviate weaknesses and to maintain strengths.

PSED1004
CONDITIONING II
Credits (Min/Max): 2/2
This course focuses on specific areas of physical activity, exercise, health, physical fitness, skill learning and body mechanics. Both men and women students receive instruction on theory and methods of physical activity and exercise in order to develop personal physical exercise programs.

PSED1005
INTRO TO SPORTS: WEIGHT TRAINING
Credits (Min/Max): 2/2
To develop a general understanding of overall strength training, techniques, and theories.

PSED1005E
TENNIS
Credits (Min/Max): 1/1
This course introduces the students to the basic fundamentals of the sport of tennis. This course aims to improve basic tennis skills to the student through instruction, demonstration, and execution.
PSED1005K
AEROBIC DANCE
Credits (Min/Max): 1/1
To develop a general understanding of overall physical conditioning and the means to which this state can be achieved. To show students that working out is fun and that Fitness is for LIFE.

PSED1005M
SOFTBALL
Credits (Min/Max): 1/1
This course is designed to introduce the student to the basic skills of softball.

PSED1007
ACADEMIC ORIENTATION FOR VARSITY ATHLETES
Credits (Min/Max): 3/3
This course will introduce students to the rigors of the varsity sport experience. It provides the information that the student needs to understand, organize, plan and thrive in the competitive environment of a collegiate sport program while integrating themselves into the university community. The cornerstone of this course is the varsity sport experience itself. Under the tutelage of our coaches, these student-athletes will learn how to prepare for and engage in physical and psychological contests of the highest order. In addition to engagement with the finest physiological training students are taught to work collaboratively in small and large groups to solve complex movement problems. Critical thinking is stressed as students negotiate the complex real world problem of being a student athlete in a collegiate athletic program. Social behavior, community, and scholarly conduct are continually addressed as the student-athletes attempt to integrate themselves into the college and local community.

PSED1008
PILATES
Credits (Min/Max): 1/1
Pilates emphasizes the balanced development of the body through core strength, flexibility, and awareness in order to support efficient, graceful movement. It is about lengthening and strengthening your muscles, leading to increased strength and improved flexibility. Each exercise movement flows smoothly into the next, encouraging the body to learn and remember new ways of movement and being, a mind-body connection.

PSED1009
MEDITATION
Credits (Min/Max): 1/1
Meditation uses breath work, concentration, and positive affirmations to elicit the relaxation response. Students will practice various meditative techniques and learn the many benefits and positive outcomes of meditation as a practice.

PSED1011
TURBO KICK
Credits (Min/Max): 1/1
Turbo Kick is a combination of intense kickboxing moves and fun dancing. These two types of cardiovascular exercise are choreographed to high energy and motivating music. The blending of intense cardio, muscle toning, as well as cool downs come together for the ultimate workout. Turbo Kick requires no previous experience.

PSED1014
INTRO TO FITNESS/SPORTS: YOGA
Credits (Min/Max): 1/1
Promote fitness and healthy living by introducing students to new sports and fitness activities. The actual sport or fitness type will change regularly. Yoga is the union occurring between the mind, body and spirit. Yoga is about creating balance in the body through developing both strength and flexibility. This is done through the performance of poses or postures, each of which has specific physical benefits. The poses can be done quickly in succession, creating heat in the body through movement or more slowly to increase stamina and perfect the alignment of the pose.

PSED4057
PHYSICAL EDUCATION-INDEPENDENT STUDY
Credits (Min/Max): 1/3
Independent study is an accelerated program for superior students in the division of natural and mathematical sciences. It is intended to allow a student to pursue an independent study in conjunction with a divisional faculty member. To be eligible for independent study the student must comply with all appropriate college policies.

PSYC1021
INTRO TO PSYCHOLOGY
Credits (Min/Max): 3/3
This survey course introduces all the major areas of psychology, from its origins in the fusing of medicine and biology with philosophical questions about the nature of the human mind through the emphasis on psychology as the science of behavior. Included are such diverse topics as: mental health, stress and coping; consciousness, sleep and dreams; psychopathology and its various treatments, social psychology; emotion and motivation; memory; intelligence; language; hypnosis; types of learning; sensation and perception; and the relationship of the nervous system to thoughts, feelings, and behaviors.

PSYC1021H
INTRO TO PSYCHOLOGY-HONORS
Credits (Min/Max): 3/3
This survey course introduces all the major areas of psychology, from its origins in the fusing of medicine and biology with philosophical questions about the nature of the human mind through the emphasis on psychology as the science of behavior and mental processes. Included are such diverse topics as: health, stress, and coping; consciousness, sleep and dreams; effects of psychoactive drugs on behavior and health; psychopathology; social psychology; hypnosis; types of learning and behavior management, information processing approaches including memory, encoding and retrieval; and the relationship of the nervous system to thought, feelings, and behaviors. Multiple activities and research projects allow students to experience psychology "up close and personal".

PSYC2015
HEALTH PSYCHOLOGY
Credits (Min/Max): 3/3
This course explores psychological applications involved in health and risk behaviors. The emphasis is placed on enhancement of health and the understanding and control of psychological processes that undermine health. Topics include examination of the psychology of stress, pain, illness and treatment, and addictive lifestyle behaviors of eating, drinking, and smoking.
PreRequisites: PSYC1021 - INTRO TO PSYCHOLOGY

PSYC2018
HUMAN SEXUALITY
Credits (Min/Max): 3/3
This course will explore the psychological influences on human sexuality including the psychodynamic, behaviorist, and social cognitive approaches. Developmental changes, adult sexuality, and contemporary issues will also be examined. The student will be exposed to research methodology involved in studying sexual behavior and attitudes.
PreRequisites: PSYC1021 - INTRO TO PSYCHOLOGY

PSYC2022
CHILD DEVELOPMENT
Credits (Min/Max): 3/3
The psychological principles of human growth and development with emphasis on the relative roles of genetic and environmental factors are the foci of the course. The life span segment covered in this course is infancy to adolescence. Children's physical, cognitive, social and personality development are examined.
PreRequisites: PSYC1021 - INTRO TO PSYCHOLOGY

PSYC2033
THE EXCEPTIONAL CHILD
Credits (Min/Max): 3/3
A survey of the psychological development of youngsters with physical, social, cognitive and emotional deviations. Emphasis is placed on procedures leading to social and psychological adjustments.

PSYC2036
PSYCHOLOGY & HUMOR
Credits (Min/Max): 3/3
Psychology and Humor introduces students to the content area and measurement and research issues on the topic of humor. Thematic use of material from the study of humor is used to illustrate many of the basic discipline areas of psychology, including understanding of theory, research methods, testing, personality, cognition, and development.

PSYC2040
ADOLESCENT PSYCHOLOGY
Credits (Min/Max): 3/3
Adolescence is studied from a developmental perspective. The course content begins with historical, cultural, and theoretical perspectives of adolescence and proceeds to cover adolescent development: physical, social, emotional, and personality. Family and peer relationships and the impact of schooling will also be studied. Identity formation and moral development will be discussed, as will psychological problems and disturbances relevant to the adolescent years.
PreRequisites: PSYC1021 - INTRO TO PSYCHOLOGY
PSYC2050
SPECIAL TOPICS IN PSYCHOLOGY:
Credits (Min/Max): 3/3
The course was designed as an introduction to the wellness model using Counseling theories to assist students in developing personal wellness strategies. Using current research, students will explore decision-making models looking at ethical, theoretical, multicultural, and practical concerns and skills in development of their own wellness strategies.
PreRequisites: PSYC1021 - INTRO TO PSYCHOLOGY

PSYC2061
EDUCATIONAL PSYCHOLOGY
Credits (Min/Max): 3/3
A study of psychology in education, individual differences, learning and teaching processes, evaluations of learning outcomes and educational and personal development of learners.
PreRequisites: PSYC1021 - INTRO TO PSYCHOLOGY

PSYC2152
APPLIED LEARNING
Credits (Min/Max): 3/3
This course will address basic principles of learning and conditioning as well as their usefulness in behavior modification. Applications to normal and abnormal behavior in the home, school, work and other environments will be emphasized.
PreRequisites: PSYC1021 - INTRO TO PSYCHOLOGY

PSYC3011
RESEARCH METHODS IN PSYCHOLOGY
Credits (Min/Max): 3/3
This course examines the major experimental designs and methods of psychology. The student will be exposed to the nature of psychology as a science, evaluation of research design and conclusions, conducting of research, preparation of research papers and ethics in research in psychology. Required for Psychology majors and minors and Child and Family Studies majors.
PreRequisites: CRIM2011 - INTELLIGENCE ANALYSIS & PRESENTATION TECHNIQUES (NSCS2011)

PSYC3020
DEATH & DYING(SOCL3020)
Credits (Min/Max): 3/3
This course is topical overview of some of the diverse areas of inquiry grouped under the general heading death and dying. The basic purpose of this course is to help students understand grief, loss, dying, and death-both as an objective fact and as it relates to their own personal experiences-and to apply this understanding their common experiences. The social, cultural, spiritual, emotional, and intellectual dimensions of death and dying will be examined from an interdisciplinary, but mostly social psychological and sociological perspective with the goal of enhancing the meaning of life and living. Cross-listed with SOCL3020
PreRequisites: PSYC1021 - INTRO TO PSYCHOLOGY

PSYC3023
ABNORMAL PSYCHOLOGY
Credits (Min/Max): 3/3
This course begins with definitions of abnormal behavior and proceeds to a review of possible causes. Most of the course focuses upon various DSM-IV classifications of abnormality, such as: mood disorders, anxiety disorders; acute and posttraumatic stress disorders; dissociate disorders; somatoform disorders; stress and physical health; personality disorders; eating disorders; substance use disorders; sexual and gender-identity disorders; and the schizophrenias.
PreRequisites: PSYC1021 - INTRO TO PSYCHOLOGY

PSYC3025
INDUSTRIAL & ORGANIZATIONAL PSYC
Credits (Min/Max): 3/3
This course studies the organizational structure and processes in a variety of areas, including personnel, recruitment, selection, placement and counseling; supervision and leadership; motivation and moral; the conditions of work; training, organizational climate; consumer psychology; multinational corporations and diversity in organizations.
PreRequisites: PSYC1021 - INTRO TO PSYCHOLOGY

PSYC3028
THEORIES OF PERSONALITY
Credits (Min/Max): 3/3
This course provides coverage of a broad range of personality theories in terms of each theory's core concepts, developmental considerations and statements about the periphery of human personality. Examples of the theories covered include: Sigmund Freud and Psychoanalysis; C. G. Jung and Analytic Psychology; Alfred Adler and Individual Psychology; Anna Freud and the Post-Freudians; Karen Horney and Humanistic Psychoanalysis; Erik Erikson and the life cycle; Wilhelm Reich and Somatic Psychology; William James and the Psychology of Consciousness; B. F. Skinner and Radical Behaviorism; George Kelly and Cognitive Psychology; Carl Rogers and the Person-Centered Perspective; Abraham Maslow and Transpersonal Psychology; Yoga and the Hindu Tradition; Zen and the Buddhist Tradition; Sufism and the Islamic Tradition.

PreRequisites: PSYC1021 - INTRO TO PSYCHOLOGY

PSYC3029
SOCIAL PSYCHOLOGY(SOCL/CMET3029)
Credits (Min/Max): 3/3
Social psychology is the study of human behavior as it is shaped by the psychosocial environment. Topics include person perception, small group interaction, theories and methods of attitude change, interpersonal attraction, conformity, aggression, prejudice, persuasion, altruism and prosocial behavior. Cross-listed with SOCL/CMET3029
PreRequisites: PSYC1021 - INTRO TO PSYCHOLOGY

PSYC3030
INTERPERSONAL & GROUP DYNAMICS
Credits (Min/Max): 3/3
This course reviews current psychological theory and research on small groups and interpersonal relations with an examination of interaction between individual behavior and group phenomena. The course provides a significant experience in the dynamics of a small group.
PreRequisites: PSYC1021 - INTRO TO PSYCHOLOGY

PSYC3031
TESTS & MEASUREMENTS
Credits (Min/Max): 3/3
A study of the objectives, principles and procedures of various types of measurement including educational and psychological instruments. Test construction, reliability, validity and basic statistical concepts for test use are presented.
PreRequisites: PSYC1021 - INTRO TO PSYCHOLOGY

PSYC3032
PSYCH OF ADULTHOOD & AGING
Credits (Min/Max): 3/3
Focusing upon middle and late adulthood, this course explores changes in perception, cognition (including memory and creativity), personality, and psychopathology in aging individuals. Topics include coping with the psychological changes of aging, counseling the elderly, the impact of psychological changes on social functioning.
PreRequisites: PSYC1021 - INTRO TO PSYCHOLOGY

PSYC3035
PHYSIOLOGICAL PSYCHOLOGY
Credits (Min/Max): 3/3
An examination of the physiological and biological constitution of the human species with emphasis on the physiological and biological correlates of human behavior. An examination of the techniques used by physiologists to assess those correlates is also included.
PreRequisites: PSYC1021 - INTRO TO PSYCHOLOGY

PSYC3040
COUNSELING THEORIES & METHODS I
Credits (Min/Max): 3/3
This is the first course in a two-course counseling sequence. Taken together, these two courses are designed to: a) familiarize students with the basic concepts in the field of counseling; b) introduce students to the major theoretical approaches to counseling and psychotherapy; and c) enable students to develop a level of counseling skill that will enable them to function effectively in a supervised setting. This first semester is more than 50% abstract (lecture/discussion) learning.
PreRequisites: PSYC1021 - INTRO TO PSYCHOLOGY

PSYC3041
COUNSELING THEORIES & METHODS II
Credits (Min/Max): 3/3
This is the second course in a two-course counseling sequence. Taken together, these two courses are designed to: a) familiarize students with the basic concepts in the field of counseling; b) introduce students to the major theoretical approaches to counseling and psychotherapy; and c) enable students to develop a level of counseling skill that will enable them to function effectively in a supervised setting. This second semester is more than 50% experiential (role-playing; classroom exercise in the use of specific counseling techniques) learning.
PreRequisites: PSYC3040 - COUNSELING THEORIES & METHODS I
PSYC3045
EVOLUTIONARY PSYCHOLOGY
Credits (Min/Max): 3/3
An in-depth exploration of the controversial theoretical position that human psychology has evolved following Darwinian principles. This perspective provides a provocative and compelling explanation for the human animal's cross-cultural similarities. This course emphasizes cognition and social behavior vis a vis natural selection and evolutionary fitness.
PreRequisites: PSYC1021 - INTRO TO PSYCHOLOGY

PSYC3063
CRIMINAL BEHAVIOR: LAW & PSYCHOLOGY(CRIM3063)
Credits (Min/Max): 3/3
This course, through an integration of psychology, criminology, political science and law, examines the role of the outlaw in both our community and global society. Elements of the course include psychological explanations of individual personality development, choice, both rational and thrill-motivated theories of criminality, examination of the role that powerful outlaws have played in our communities, and the rise of deviant individuals who have gained enormous power by capitalizing on the forces of globalization. The course also intertwines the legal means that society has employed to restrict the power of the outlaw in our society and the capacity of individuals to overcome attempts at domination. Cross-listed with CRIM3063
PreRequisites: CRIM1001 - INTRODUCTION TO CRIMINAL JUSTICE

PSYC3065
FORENSIC PSYCHOLOGY
Credits (Min/Max): 3/3
The course provides the student with a general introduction to the practice of forensic psychotherapy and forensic psychology. Forensic psychotherapy addresses therapeutic work with criminally inclined individuals whose behavior or level of psychological functioning is in some way related to their criminal offense. Forensic psychology addresses ways in which experts in psychological assessment and diagnosis contribute to the legal system.
PreRequisites: PSYC1021 - INTRO TO PSYCHOLOGY

PSYC3070
CRITICAL SKILLS FOR PSYCHOLOGY STUDENTS
Credits (Min/Max): 1/1
This one credit course addresses several skill areas of importance to upper level students: their required capstone classes (finding references, writing with APA, reading primary research); career planning (job searches, graduate school planning), advanced study/reading skills with emphasis on primary research.

PSYC3150
COGNITIVE PSYCHOLOGY
Credits (Min/Max): 3/3
Cognitive Psychology explores the interdependent processes that occur in everyday mental activity. Topics addressed include perception, attention, memory, problem-solving, and others. Students will discover the world of events that occur as they ask, "What was I thinking?!"
PreRequisites: PSYC1021 - INTRO TO PSYCHOLOGY

PSYC4032
COUNSELING SURVIVORS OF TRAUMA
Credits (Min/Max): 3/3
This course explores the nature and experience of trauma. Multiple theories are explored regarding the effects of traumatic impact on the individual psyche. Although the course emphasized the issues of adult survivors of early childhood trauma, especially sexual abuse and other maltreatment, issues relevant to other post traumatic stress related disorders with adults and children are included. The course is designed to provide students with an opportunity to begin to understand trauma as a construct, and work to understand the implications of trauma on personality development.

PSYC4050
SPECIAL TOPICS IN ADVANCED PSYCHOLOGY:
Credits (Min/Max): 3/3
A collection of courses covering a broad range of topics in advanced psychology, offered according to student need and interest. The precise title is announced during registration period for any given term. Counseling Survivors of Trauma: This course explores the nature & experience of trauma. Multiple theories are explored regarding the effects of traumatic impact on the individual psyche. Although the course emphasized the issues of adult survivors of early childhood trauma, especially sexual abuse & other maltreatment, issues relevant to other post traumatic stress related disorders with adults & children are included. The course is designed to provide students with an opportunity to begin to understand trauma as a construct, and work to understand the implications of trauma on personality development.
PreRequisites: PSYC1021 - INTRO TO PSYCHOLOGY
PSYC4051
PSYCHOLOGY-INTERNSHIP I
Credits (Min/Max): 1/6
An application of behavioral, developmental, group dynamics, and counseling principles through actual work experience. Internship may be repeated. Further information is available from instructor.

PSYC4052
PSYCHOLOGY-INTERNSHIP II
Credits (Min/Max): 1/3
An application of behavioral, developmental, group dynamics, and counseling principles through actual work experience. Internship may be repeated. Further information is available from instructor.

PSYC4055
SENIOR SEMINAR IN PSYCHOLOGY
Credits (Min/Max): 3/3
This is the capstone course that is required of all psychology majors. It is designed to assist students to complete their undergraduate study of psychology through independent reading and library and database research, writing of an integrated literature review, and class discussion of these seminar papers which are presented orally by the students.
PreRequisites: PSYC3011 - RESEARCH METHODS IN PSYCHOLOGY

PSYC4056
DIRECTED RESEARCH
Credits (Min/Max): 2/4
Individual research supervised by a full-time faculty member.

PSYC4057
PSYCHOLOGY-INDEPENDENT STUDY
Credits (Min/Max): 1/6
This course is limited to those few students who have demonstrated an unusual level of ability and an intense commitment to a particular area.

REAL1095
FUND OF REAL ESTATE & PRACTICE
Credits (Min/Max): 4/4
An introduction to the field of real estate sales and services. Explored, in this regard, will be the concepts of: public policies, legal implications, market dynamics, services involved and financial applications. Residential, commercial and industrial situations will be covered.

REAL3000
REAL ESTATE LAW & ETHICS
Credits (Min/Max): 3/3
This course covers the essentials of law as it pertains to real estate activities. Presented are the unique legal aspects of real estate transactions ranging from landlord-tenant relationships to the regulations of land development. Addressed also are the ethical issues of fraud and deceit and the legislation pertinent to real estate operations. A case study approach is utilized.

REAL3001
REAL ESTATE APPRAISAL
Credits (Min/Max): 3/3
An overview of the appraisal profession now regulated apart from the real estate business. Appraisals are used for pricing, financing, protecting or leasing property. Concepts discussed include: competitive market analysis, market value versus market price, market value versus cost, various approaches to value and the appraisal process.

REAL3002
REAL ESTATE FINANCE
Credits (Min/Max): 3/3
This course provides the basic concepts of real estate financing. Addressed is the nature and cycle of this kind of financing, the sources of funds, the types of legal and financial instruments used, the variety of loan arrangements utilized, the role of governmental agencies and the importance of the secondary mortgage markets. A case/workbook approach is used to facilitate the learning process.

REAL4051
REAL ESTATE-INTERNSHIP I
Credits (Min/Max): 1/6
A field experience in selected professional environments. The student is given the opportunity to integrate theoretical knowledge with practical application under the guidance of professionals at the particular institution to which the student is assigned.
REAL4057
REAL ESTATE-INDEPENDENT STUDY
Credits (Min/Max): 1/3
Independent study is intended to allow a student to pursue studies in advanced or special topics.

RELS1001
OLD TESTAMENT(SLRS1006)
Credits (Min/Max): 3/3
A general overview of the Old Testament in light of present historical, literary, theological, and archeological research. Cross-listed with SLRS1006

RELS1002
NEW TESTAMENT(SLRS1011)
Credits (Min/Max): 3/3
A general introduction to the New Testament and overview of the historical, religious and cultural milieu in which these Scriptures originated. Cross-listed with SLRS1011

RELS1003
WORLD RELIGIONS(SLRS1003)
Credits (Min/Max): 3/3
This course examines the historical development together with the religious beliefs and practices of the major religions of the world including Hinduism, Buddhism, Jainism, Sikhism, Confucianism, Taoism, Shinto, Judaism, Christianity, Islam and Zoroastrianism. The teachings of each religion regarding the Absolute, the world, the nature of humans, the problem facing humans, the solution of the problem for humans, Community and Ethics, Rituals and Symbols, and what happens after death will be studied. The course also includes an examination of the beginnings of religion in human history as well as the characteristics of tribal and national religions. Cross-listed with SLRS1003. Class starts the week of 01/26/2015

RELS1011
CHURCH HISTORY
Credits (Min/Max): 3/3
An examination of the unfolding and growth of Christian thought in the Western world and analysis of the notion of theological development.

RELS1012
CHRISTIAN RITUAL & WORSHIP
Credits (Min/Max): 3/3
A study of the meaning or ritual and worship in Christianity, major steps in the development of the Eucharist (especially in the Western traditions, the impact of the Reformation on the meaning and form of worship and a brief discussion of common symbols.

RELS1015
MORAL THEOLOGY
Credits (Min/Max): 3/3
A survey of the principles of moral conduct based upon the writings of the New Testament and the teaching of the Catholic Church and of Contemporary Catholic moral theologians, topics include sin, human action, conscience and decision making.

RELS1016
SACRAMENTAL THEOLOGY
Credits (Min/Max): 3/3
An examination of the foundational elements of the Church's sacramental life from the perspectives of theology, history and anthropology beginning with a discussion of the lived experience of sacraments and developing various models which have guided sacramental praxis, with emphasis on the contemporary influences of symbol and ritual studies.

RELS1018
SURVEY OF CATHOLIC DOCTRINE
Credits (Min/Max): 3/3
This course offers a general overview of the nature of Revelation, Faith, and the sources of Revelation, together with an overview of the more important doctrinal and moral teachings of the Catholic Church.

RELS2014
CHRISTOLOGY(SLRS1005)
Credits (Min/Max): 3/3
A systematic study of the beliefs of the church in the person of Jesus as reflected in Scripture and the early church councils and a survey of contemporary Christological teaching. Cross-listed with SLRS1005
RELS2020
WOMEN & RELIGION(SLRS1014)
Credits (Min/Max): 3/3
A survey of women's place in society, past and present, as it has been and is affected by religious teachings, laws and customs and examination of the attitudes toward women in the Hebrew and Christian Scriptures, in the writing of the early church fathers, the Protestant Reformers, and in the current religious structures of Catholics, Protestants, and Jews. Cross-listed with SLRS1014

RELS2033
MYSTERY OF GOD
Credits (Min/Max): 3/3
Can the existence of God be demonstrated? An examination is made of basic arguments for God's existence: the ontological, the cosmological, the teleological, the moral and the argument from religious experience.

RELS2034
CHURCH: INSTITUTION & COMMUNITY
Credits (Min/Max): 3/3
The Church is both an institution and a community of people united in their belief that Jesus is the Savior of the World. This course examines the Church from a scriptural, historical and theological perspective.

RELS2050
SPECIAL TOPICS IN RELIGIOUS STUDIES
Credits (Min/Max): 3/3
A collection of courses covering a broad range of topics in religious studies, offered according to student need and interest.

RELS3031
RELIGION & SOCIETY
Credits (Min/Max): 3/3
An analytical presentation of religion as a social institution emphasizing the function of religion in society and its relationship to the conflict and change that characterize modern American life.

RELS3037
RELIGIOUS INFL ON US DVMT (HIST3037)
Credits (Min/Max): 3/3
An examination and interpretation of the religious forces that shaped American social structures, moves, law and popular opinion from the time of the first Spanish missionaries to the end of the 20th century with emphasis on religious liberty in American ideal and in religious pluralism. Cross-listed with HIST3037

RELS3040
VARIETIES OF EARLY CHRISTIANITY (HIST3040)
Credits (Min/Max): 3/3
This course treats Christianity from its origins through the medieval period. Special attention is given to internal issues and external forces, which caused conflict, adjustment, development, and finally varieties within the Christian world. For instance, it explores how dissident movements, the conversion of Constantine, the Germanic invasions, and the rise of Islam, feudalism, and papal power affected Christianity. The course also attempts to analyze how tensions between the institutional church and popular religious movements influenced society. Cross-listed with HIST3040

RELS3045
SPECIAL TOPICS IN SCRIPTURE
Credits (Min/Max): 3/3
After the person of Jesus, St. Paul is, perhaps, the most important person in the development of Christianity. At the same time, he is the most controversial figure. Many people view Paul as the source of all that is wrong with Christianity: sexism, authoritarianism, anti-Semitism, and polarization. As we join the universal Church in celebrating a special Jubilee Year in honor of the Apostle Paul, come join us for research, study, and reflection on this ambiguous man and his role in shaping Christianity.

RELS4051
RELIGIOUS STUDIES-INTERNSHIP I
Credits (Min/Max): 1/3
A field experience in selected professional environments. The student is given the opportunity to integrate theoretical knowledge with practical application under the guidance of professionals at the particular institution to which the student is assigned.
RELS4052
RELIGIOUS STUDIES-INTERNSHIP II
Credits (Min/Max): 1/3
A field experience in selected professional environments. The student is given the opportunity to integrate theoretical knowledge with practical application under the guidance of professionals at the particular institution to which the student is assigned.

RELS4055
SENIOR SEMINAR IN RELIGIOUS STUDIES
Credits (Min/Max): 3/3
This seminar consists of research into two or three themes in religious studies, selected and mutually agreed upon by the director of the seminar and the students registered for it. The research is progressive in depth leading to a final conclusion, presentation or paper by the members of the seminar.

RELS4056
DIRECTED RESEARCH-RELIGIOUS STUDIES
Credits (Min/Max): 2/6
Individual research in religious studies supervised by a faculty member. The student defines a problem, constructs and carries out a research program and reports on the findings of the research in a critical and analytical paper.

RELS4057
RELIGIOUS STUDIES-INDEPENDENT STUDY
Credits (Min/Max): 1/3
The independent study is intended to give an opportunity to students with superior ability to pursue an area of study in religious studies that is very specific in focus and/or not covered in existing offerings.

SASU3001
MEXICO: STUDY ABROAD/STUDY USA
Credits (Min/Max): 1/1
The La Roche Experience aims to provide students with the opportunity to experience and share the spirit, mission, and rich heritage of the Sisters of Divine Providence. The congregation of Divine Providence, founded in 1851, is an international community of vowed women and associates who seek to make God's Providence visible by responding to the needs of the time and co-creating a world of compassion, justice and peace. Building on the service learning opportunities, simulation exercises, and opportunities for theological and spiritual experience of LRCX1001, the learning objective of LRCX1002 is to allow students to continue to build a common pool of metaphors through their participation in reading and discussing common texts and reflecting upon media experiences with particular emphasis to economic justice and environmental sustainability. Study Abroad + Study U.S.A. Website

SASU3002
NAVAJO NATION: STUDY ABROAD/STUDY USA
Credits (Min/Max): 1/1
Perhaps the most significant issue confronting Native American peoples today is that of land use. Having lost the vast majority of their ancestral lands through treaty, conquest, and forced removal, Native tribal nations subsist largely on submarginal reservation lands that are beset by an array of problems: inadequate resources, air and water pollution, assaults on sacred sites, conflicts with local, state, and federal governments and with surrounding non-Native populations, and so on. At the same time, the value many of these lands possess for coal, uranium, and other mineral and energy interests produces both positives (income and employment) and negatives (health and other risks) for the affected tribes. Finally, overarching these material issues are ethical conflicts within Native communities and between Native and non-Native communities concerning the proper spiritual relation to and use of the land. In this course, we will explore the various issues related to contemporary Native American land use and land ethics through travel to the Navajo Nation reservation in Arizona and New Mexico, through study of print materials and conversation with Native peoples, and through community service projects on-site. This Study USA course thus provides students with insight and experience concerning an important contemporary topic, while engaging issues of diversity and discrimination, regional conflict, and economic (and particularly environmental) justice. As such, it fulfills the 1-credit LRCX1002, LRCX2001, or LRCX2002 requirement of the La Roche Experience. Study Abroad + Study U.S.A. Website

SASU3003
ITALIAN & GREEK CIVILIZATIONS: STUDY ABROAD/STUDY USA
Credits (Min/Max): 1/1
This course presents the legacies of the classical Italian and Greek civilizations, which served as the foundation of Western civilization. Students will be introduced to the history, language, music, architecture and art of these cultures in order to foster an appreciation for the Classical world. Participants will have the opportunity to experience and compare the cultural diversity of these countries and explore some of the most famous historical sites in the world. Study Abroad + Study U.S.A. Website

SASU3004
GALAPAGOS ISLAND COMMUNITIES: STUDY ABROAD/STUDY USA
Credits (Min/Max): 3/3
Communities are not just about people. A biological community refers to all populations of all species occupying a specified area. This course will examine the communities (human and non-human) of one of the most unique ecosystems on Earth: the Galapagos Islands. Participants will be able to observe, first hand, the diversity of wildlife and environmental conditions that gave rise to Darwin's theory of evolution by natural selection. The course will promote, through experiential learning, an understanding of the impact of human activity on the rest of the natural world and the interdependence among all living things.

SASU3005
INTERNATIONAL ARCHITECTURE & DESIGN: STUDY ABROAD/STUDY USA
Credits (Min/Max): 3/3
An overview of the architecture, design, and culture of the foreign countries to be visited. This course is offered in conjunction with a Study Abroad/USA trip. The trip will take place during the May-mester, following the completion of the course. All students must be enrolled in the course to be eligible for the trip. The country/countries of interest will be determined for each given year.

SASU3010
FRENCH CULTURE: STUDY ABROAD/STUDY USA
Credits (Min/Max): 1/1
This course introduces students to the unique character of France. The course will familiarize students with French culture; history, language, cuisine, architecture, and art. This course provides a direct experience of French culture and the unique opportunity to explore a host of French cultural and historical sites. Students will be able to test their values and perceptions as they compare the French culture to the American.

SASU3012
GUATEMALA: STUDY ABROAD/STUDY USA
Credits (Min/Max): 1/1
The La Roche Experience aims to provide students with the opportunity to experience and share the spirit, mission, and rich heritage of the Sisters of Divine Providence. The congregation of Divine Providence, founded in 1851, is an international community of vowed women and associates who seek to make God's Providence visible by responding to the needs of the time and co-creating a world of compassion, justice and peace. Building on the service learning opportunities, simulation exercises, and opportunities for theological and spiritual experience of LRCX 1001, the learning objective of LRCX 1002/2001/2002 is to allow students to continue to build a common pool of metaphors through their participation in reading and discussing common texts and reflecting upon real experiences with particular emphasis to Diversity/Discrimination, a Region of Conflict or Economic Justice.

SASU3013
ISLAM IN THE WORLD: STUDY ABROAD/STUDY USA
Credits (Min/Max): 1/1
This course takes students to Istanbul, Turkey to experience the city's rich history, especially as a cultural meeting point between east and west. The city's glorious past, first under the Byzantine Empire, and later as the seat of the great Ottoman Empire, would expose students to the conflation of European and Islamic civilizational influences in a modern cosmopolitan center.

SASU3020
EXPLORING FINLAND'S EDUCATIONAL EXCELLENCE: STUDY ABROAD/STUDY USA
Credits (Min/Max): 1/1
Finland's educational system churns out students who consistently top the world in mathematics and science test scores. The country's increasingly diverse public school classrooms average about 30 students, yet students spend only a few hours inside the class and receive less homework than any other group of students anywhere in the developed world. What's the secret? It begins with understanding Finland's most revered profession - teaching. This course takes us to schools and government offices in the city of Helsinki, where we are able to observe classes in session and hold conversations with students and teachers. Our trip will also take us to interesting and quaint places around the city to help us explore the culture and history of Finland, whose community-oriented society provides the premise for a very healthy and happy country.

SASU3023
SERVICE LEARNING: STUDY ABROAD/STUDY USA
Credits (Min/Max): 1/1
SP15: Bolivia: will substitute for LRCX1002-Diversity/Discrimination or LRCX2002-Economic Justice

SLAE1001
ART IN EVERYDAY LIFE
Credits (Min/Max): 3/3
This Select Aesthetics course provides non-GD/ID majors with an opportunity to explore visual art as expressed in forms that impact our daily lives such as signage and graphics, product design, advertising imagery, mass media and publications, decoration, and fashion. Emphasis will be placed on the appreciation of aesthetic elements in functional form, design principles, motivational themes underlying visual communication, and cultural identities as manifested in visual art. The course will enable students to understand that, rather than being an isolated category of objects in a museum, art exists as a meaningful reality in what we read, see, and use.
This course consists of a series of directed studio art experiences in basic and painting techniques, specifically designed for the non-art/design major.

This course is intended to provide an opportunity to explore Mac computer art. The students will experience the computer studio process of creating art in relevant software, using a digital camera to manipulate images and final image animation. The effect of styles, techniques and art movements on computer images will be explored. Attention will be given to archival inks and paper. Lecture and video will provide an introduction to the new and brief history of electronic images. Cross-Listed with GCDN2005

Dance is one of the world's oldest art forms, and one of the most popular today. Dance is everywhere around the globe: in the barrios, on television and youtube; in ballet classes, bars, kindergartens, mountain villages, house parties and sometimes in the streets. This course introduces students to a coherent way of seeing, talking and writing about, creating and performing a wide variety of dance and movement customs and styles. We will watch, read about, and do dance. Through dance this course introduces students to aesthetics, how people respond to art. We will learn a strategy to find commonalities in various dance traditions. The course in intended to be both fun and informative. No dance training/experience needed.

As an element of design, color defines the world around us. We react to it both physically and emotionally throughout our lives. This course for non-design majors will provide students with a broad understanding of color, encourage color awareness, and provide a basis for the creative and confident use of color.

An overview of musical eras from the Middle Ages through the 20th Century (Bach, Beethoven and the boys). Various listening activities are geared for the non-musician. Cross-listed with PART1001

This course is designed specifically for female students who are interested in receiving formal lessons and hands-on instruction in signing a capella barbershop harmony with an established, award-winning barbershop chorus, Pittsburgh's Greater Harmony Chorus. This course is located off-campus.

An introduction to jazz for the non-musician. Eras covered include the roots of jazz, blues, ragtime, swing, bop, cool, jazz rock, jazz fusion and current trends. Jazz artists ranging from Louis Armstrong and Ella Fitzgerald to Harry Connick, Jr. and Diana Krall. Cross-listed with PART1002

A course in improvisational drama with emphasis on educational and motivational skills, games and the performing arts. Workshop participation is expected. Cross-listed with SPCH1022

An introduction to the early years of rock music (1950s - mid 1970s) for the non-musician. The class will include the roots of rock and roll, teen idols, the folk music craze, the British invasion, Motown, psychedelic music, singer-songwriters and the roots of metal. The history of the 50s and 60s will be highlighted by the various styles of music. Cross-Listed with PART3050A
SLAE1012
FUNDAMENTALS OF MUSIC(PART1022)
Credits (Min/Max): 3/3
A hands-on introduction to the language of music (notation, scales, melody, harmony, etc.) using recorders, percussion and listening examples from various musical genres. This class is built for the non-musician. Cross-listed with PART1022

SLAE1025
AESTHETICS OF ADVERTISING
Credits (Min/Max): 3/3
This course will be an analytical analysis of the Aesthetics of Advertising. Successful and unsuccessful advertising will be discussed in relationship to their visuals, the message that is being sent and the impact it has on the target audience. Students will explore and scrutinize the use of visual design elements and the message these elements are sending to the target audience. Students will gain an understanding of the powerful impact visuals play in persuading, informing and entertaining consumers to help brand, provide distinct product details/separation/recall and send a memorable message to a specific target audience.

SLAE1097
HISTORY OF MUSICAL THEATER (PART2025)
Credits (Min/Max): 3/3
A survey of musical theater and its development from its roots through the early 20th century, the Ziegfield follies, the 1920's in New York, Broadway and Hollywood in the 1930's, the golden age of musicals and movies up to and including today's musical theater. Cross-listed with PART2025

SLDD1001
COMING OF AGE: FILM & LITERATURE (DD) LIT & AESTHETICS
Credits (Min/Max): 3/3
This course is designed to introduce students, particularly non-English majors, to literary and cinematic criticism through the study of diverse works of literature and film. The focus of the course is twofold. First, we will consider works thematically - exploring a central issue in each term/section, such as Fantasy, Detective/Mystery, War, or Coming of Age through works that may come from various times and cultures. Second, we will investigate the works aesthetically by developing vocabularies and techniques for understanding our two major media (texts and cinema). In examining, discussing, presenting, and writing about these works, students will gain insight into the development, concerns, and significance of the genres, and more general knowledge of the theories and practices of textual and cinematic analysis. By Coming of Age, we do not mean all stories with children and adolescents in them. In fact, for any film or piece of literature to fit our course, it must show a change, sometimes call a Rite of Passage, by at least one main youthful character into a new adult/mature role and/or identity. This can be either fiction or non-fiction. The character(s) may face challenges, for example, of responsibility, danger, and/or romance. The age of the character may be from childhood into early adulthood. So it's yes to Peter Pan and Holes but no to Cocoon.

SLDD1002
FANTASY: FILM & LITERATURE (DD) LIT & AESTHETICS
Credits (Min/Max): 3/3
This course is designed to introduce students, particularly non-English majors, to literary and cinematic criticism through the study of diverse works of literature and film. The focus of the course is twofold. First, we will consider works thematically - exploring a central issue in each term/section, such as Fantasy, Detective/Mystery, War, or Coming of Age through works that may come from various times and cultures. Second, we will investigate the works aesthetically by developing vocabularies and techniques for understanding our two major media (texts and cinema). In examining, discussing, presenting, and writing about these works, students will gain insight into the development, concerns, and significance of the genres, and more general knowledge of the theories and practices of textual and cinematic analysis. By Fantasy, we do not mean all things that are Fictional or Adventurous. Most Fiction is actually very realistic, and so is not Fantasy.

SLDD1003
MYSTERY: FILM & LITERATURE (DD) LIT & AESTHETICS
Credits (Min/Max): 3/3
This course is designed to introduce students, particularly non-English majors, to literary and cinematic criticism through the study of diverse works of literature and film. The focus of the course is twofold. First, we will consider works thematically - exploring a central issue in each term/section, such as Fantasy, Detective/Mystery, War, or Coming of Age through works that may come from various times and cultures. Second, we will investigate the works aesthetically by developing vocabularies and techniques for understanding our two major media (texts and cinema). In examining, discussing, presenting, and writing about these works, students will gain insight into the development, concerns, and significance of the genres, and more general knowledge of the theories and practices of textual and cinematic analysis. By Mystery, we do not mean any fiction about a crime and/or has some unresolved element(s) to it but those Mysteries that involve fictional detectives, criminals, and the investigative methods.

SLDD1004
WRITING & SINGING THE BLUES: AFRICAN-AMERICAN LIT & MUSIC (DD) LIT & AESTHETICS
Credits (Min/Max): 3/3
This course is designed especially for the non-English major and explores the fundamental principles of literary and cultural analysis and an overview of the African-American tradition in music: call and response, spirituals, work songs, soul, jazz, rhythm and blues, rap, and gospel music. No prior knowledge of music or literary theory is expected. This class starts the week of 01/26/2015

SLDD1005
THE BIBLE AS LITERATURE(DD) LIT & PHILOSOPHY
Credits (Min/Max): 3/3
This course will explore the Hebrew and Christian Scriptures as literary texts. Students will examine the language, images, and structures of selected books of the Bible. Various approaches to Biblical study will be utilized including form and source criticism, narrative analysis, genre analysis, and rhetorical analysis. Issues to be addressed include the variety of interpretative strategies, the choice of translations, narrative and characterization strategies, the influence of the Bible on Western Tradition.

SLDD1005H
THE BIBLE AS LITERATURE(DD) LIT & PHILOSOPHY
Credits (Min/Max): 3/3
This course will explore the Hebrew and Christian Scriptures as literary texts. Students will examine the language, images, and structures of selected books of the Bible. Various approaches to Biblical study will be utilized including form and source criticism, narrative analysis, genre analysis, and rhetorical analysis. Issues to be addressed include the variety of interpretative strategies, the choice of translations, narrative and characterization strategies, the influence of the Bible on Western Tradition.

SLDD1006
JESUS IN FILM & HISTORY(DD) PHILOSOPHY & HISTORY
Credits (Min/Max): 3/3
The story of Jesus is told and retold in every age and culture. For more than two centuries, however, there has also been a serious project of seeking the historical Jesus. In recent times this has engaged such disciplines as history, cultural anthropology, and archeology. This course will provide the opportunity for viewing and discussing a variety of film portrayals of Jesus in comparison with the canonical gospel accounts and current historical Jesus research. Both socio-rhetorical reading of the Gospels arising from current biblical scholarship and readings of the films arising from narrative theology will be emphasized. Attention will also be given to relevant historical methods and historiography.

SLDD1007
WAR: FILM & LITERATURE(DD) LIT & AESTHETICS
Credits (Min/Max): 3/3
This course is designed to introduce students, particularly non-English majors, to literary and cinematic criticism through the study of diverse works of literature and film. The focus of the course is twofold. First, we will consider works thematically - exploring a central issue in each term/section, such as Fantasy, Detective/Mystery, War, or Coming of Age through works that may come from various times and cultures. Second, we will investigate the works aesthetically by developing vocabularies and techniques for understanding our two major media (texts and cinema). In examining, discussing, presenting, and writing about these works, students will gain insight into the development, concerns, and significance of the genres, and more general knowledge of the theories and practices of textual and cinematic analysis. By War, we do not mean any tale that has some conflict, fighting, or battle in it. These stories must be fictional or creative non-fiction (not a history textbook, for example)

SLHS1001
MAJOR ISSUES IN MODERN U.S. HISTORY
Credits (Min/Max): 3/3
This course is designed for non-History majors to study controversial historical events and issues during the past century. Students will analyze topics including the Cold War, the Civil Rights Movement, the Vietnam War, and key social issues and political crises.

SLHS1002
MULTICULTURAL HISTORY OF THE U.S.
Credits (Min/Max): 3/3
In this course we examine the history of different ethnic and racial immigrants in the United States; the process of ethnic assimilation into mainstream American culture; and how different groups and races have been treated by the U.S. government. In addition, we examine the reasons that ethnic and racial groups departed their own countries to emigrate here, and recent immigration experiences and changes in U.S. immigration policy.

SLHS1002H
MULTICULTURAL HISTORY OF THE U.S.-HONORS
Credits (Min/Max): 3/3
In the Honors section of Multi-Cultural History of the United States, we study the development of U.S. society, focusing on the role of European immigrants, African-Americans, Native Americans, Hispanic-Americans and Asian-Americans. Concepts of multicultural diversity, racism and inter-group relations are explored within a comparative historical framework. These are related to the development of social classes in general and of working-class sub-cultures in the U.S.
SLHS1003
HISTORY OF THE WORLD
Credits (Min/Max): 3/3
Students will examine the historical development of the world. Although the pre-modern period of history will be addressed, particular emphasis will be placed on the modern period and how industrialization has affected both developed and developing regions of the world. Special attention will also be given to methodologies related to historical anthropology, as well as economic, social, cultural and intellectual history. Questions of race, class and gender will be interwoven with an awareness of global diversity and multi-culturalism. Section "02" starts the week of 01/26/2015

SLLT1001
SING&RAISE:CONTEMPORARY POETRY
Credits (Min/Max): 3/3
This course is designed especially for the non-English major. It is designed to introduce students to the writing of exceptional American poets since the Second World War. This course will also emphasize fundamental principles of English as a discipline, including: attentive and generous readings of texts; the use of primary and secondary sources in interpreting texts; and analysis of both the form and content of a particular genre, in this case, poetry. No prior knowledge of contemporary American poetry is expected.

SLLT1002
WORLD LITERATURE 1(ENGL2021)
Credits (Min/Max): 3/3
A study of selected works in a variety of genres centered primarily around major literary movements from antiquity through the Renaissance. Cross-listed with ENGL2021

SLLT1003
SHAKESPEARE ON FILM(ENGL3021)
Credits (Min/Max): 3/3
This course is designed to introduce non-majors to literary study through viewing film adaptations of Shakespeare and reading the printed texts. By examining the relationship between the texts of the play and their film interpretations, students will examine and analyze dramatic genres central to literary study, including tragedies, comedies, histories and romances. Cross-listed with ENGL3021

SLLT1005
THIS GREAT GAME:LIT & BASEBALL
Credits (Min/Max): 3/3
The relationship between Baseball and America provides a decade-by-decade opportunity to examine prevailing American attitudes, customs, and beliefs. The game of baseball, American history, and literature will be examined in this course.

SLLT1007
THE FIRE & ROSE:RELIGIOUS WORLD POETRY
Credits (Min/Max): 3/3
This course is designed especially for the non-English major. It is designed to emphasize fundamental aspects of English as a discipline, including: attentive and generous readings of texts; the use of primary and secondary sources of interpreting texts; and analysis of both the form and content of a particular genre, in this case, poetry. No prior knowledge of world religious poetry is expected.

SLLT1008
CONTEMPORARY LITERATURE (ENGL3062)
Credits (Min/Max): 3/3
This course is designed to introduce non-majors to the principles of literary and cultural criticism through the study of a range of prose fiction from the last thirty years of the 20th Century. The focus of the course is to identify and interpret the thematic and stylistic interests of Western and non-Western contemporary fictions from the period, paying special attention to the various ways of understanding or seeing (cultural, political, and psychological) which different cultures bring to the production of literature By examining, discussing, and writing about these works, students will gain specific insight into a rapidly globalizing literary aesthetic as well as an understanding of modern critical literary analysis. Cross-listed with ENGL3062

SLLT1009
LITERATURE OF THE ENVIRONMENT
Credits (Min/Max): 3/3
In this course, students will undertake in-depth study of the fundamental principles of literary analysis through an exploration of American, British, and Native American literature concerning the physical environment and its relationship to human beings and societies. Beginning with Classical and Romantic instances of pastoral poetry, the course will trace the nineteenth-century dawning of an environmentalist consciousness and the twentieth-century legacy of literature protesting environmental degradation. The course will conclude with considerations of two contemporary developments in the tradition of environmental literature: the emergence of ecocriticism (literary criticism centered on the relationship between language and the natural world), and the rediscovery of Native American environmentalism as a model for human being in, and wardenship of, the Earth. Students will thus learn to connect literature and the study of literature to issues of significance in the present time.
SLLT1010
WORLD LITERATURE II (ENGL2022)
Credits (Min/Max): 3/3
A study of selected works in a variety of genres centered primarily around major literary movements from the Renaissance through contemporary literature. Cross-listed with ENGL2022

SLLT1011
ISSUES IN AMERICAN LIT II (ENGL2039)
Credits (Min/Max): 3/3
Literature from the time of the Civil War to Post World War II will be examined as it portrays such issues as our pluralistic society, war, death, characters caught in a limiting environment, responses to the age of anxiety, protest, evolving attitudes toward male and female identity and relationships, ethical responsibility, disenchantment, reconciliation and the celebration of the human potential. The course will also introduce basic technical elements of each genre used by American authors. Cross-listed with ENGL2039

SLLT1012
SPECIAL TOPICS IN LITERATURE (ENGL4040)
Credits (Min/Max): 3/3
The "Select Literature" designation covers a range of courses with varying content or "subject" matter but with the common objective of providing non-majors with an opportunity to learn the fundamental principles of literary analysis. Cross-listed with ENGL4040

SLLT1013
ISSUES IN AMERICAN LIT I (ENGL2036)
Credits (Min/Max): 3/3
Literature from Puritan times up to the Civil War will be examined as it portrays such issues as responses to a new environment, ecology, ethnic and sexual stereotyping, literature as didactic message or entertainment, ethical choice, pessimistic and optimistic views of human nature. The course will also introduce basic technical elements for each genre used by American authors. Cross-listed with ENGL2036

SLLT1014
COMIC BOOKS & GRAPHIC NARRATIVE
Credits (Min/Max): 3/3
In this course, we will explore the medium of graphic narrative or sequential art. We will study the antecedents, origins, and development of graphic narrative, the cultural contexts and significance of the medium, and the verbal and pictorial properties of the form. At the same time, we will develop sufficient proficiency in the form to produce our own graphic narratives. The course thus provides students historical, theoretical, and practical knowledge of an important and emergent form of narrative art.

SLLT1015
STUDIES IN LITERATURE (ENGL3015):
THEATER IN THE CITY: The theater in the City is a six-week summer course, which meets on Tuesdays on campus and sees a play on Thursday at one of the city's many theaters. Summer 2012 the planned selections are Noel Coward's "Private Lives" (Pittsburgh Public Theater); Lee Hall's "The Pitman Painters" (Irish and Classical Theater); Maggie Kate Coleman's "Pop" (City Theater); Frank Floyd Hightower's "The House That Carol Built" (Kuntu Repertory Theater); and August Wilson's "Gem of the Ocean" (Pittsburgh Playwrights at the August Wilson Theater). Cross-listed with SLLT1015 WOMEN IN LITERATURE: This course explores the novel as it has been practiced by women writers and examines specific contributions they have made to the novel. It is particularly appropriate to study women writers in the context of the novel form, since historically the rise of the novel occurs concurrently with the emergence of women writers. Each novel will be considered individually as well as in relation to its larger cultural context and to the other novels under study. Authors generally include Mary Wollstonecraft, Virginia Woolf, Kate Chopin, Charlotte Perkins Gilman, Jean Rhys, Alice Walker, Toni Morrison, Amy Tan, Sue Monk Kidd, Linda Hogan, and Katherine Stockett. Cross-listed with SLLT1015 Topics from world literature involving various literary genres and themes. Possible semester topics include: Black Literature, Contemporary Literature, Women in Literature, and Biblical Themes in Literature.

SLLT1029
THEATER IN THE CITY (ENGL3047)
Credits (Min/Max): 3/3
This course is designed to teach students the basic components of theater, and to experience various plays being performed in Pittsburgh. It will also examine the history of many of the local theaters in the city. Cross-listed with ENGL3047

SLP101
INTRO TO COMMUNICATION SCIENCE & DISORDERS
Credits (Min/Max): 3/3
Course taken at Duquesne by students in the Speech-Language Pathology Program.

SLP205W
NORMAL SPEECH & LANGUAGE DEVELOPMENT
Credits (Min/Max): 3/3
SLRS1002  
**WORLD VIEWS & IDENTITY**  
Credits (Min/Max): 3/3  
This course provides an introduction to philosophy and philosophical thinking through an in-depth study of the fundamental philosophical disciplines of metaphysics and ontology. This includes an examination of the relationship between cultural traditions and their views on the nature of reality, or Being. An essential component of these worldviews entails perspectives regarding individual or personal identity and meaning, that is, issues about the nature of self. This analysis of metaphysics and ontology will be grounded primarily upon the study of critical texts.

SLRS1003  
**WORLD RELIGIONS(RELS1003)**  
Credits (Min/Max): 3/3  
This course examines the historical development together with the religious beliefs and practices of the major religions of the world including Hinduism, Buddhism, Jainism, Sikhism, Confucianism, Taoism, Shinto, Judaism, Christianity, Islam and Zoroastrianism. The teachings of each religion regarding the Absolute, the world, the nature of humans, the problem facing humans, the solution of the problem for humans, Community and Ethics, Rituals and Symbols, and what happens after death will be studied. The course also includes an examination of the beginnings of religion in human history as well as the characteristics of tribal and national religions. Cross-listed with RELS1003. Class starts the week of 01/26/2015

SLRS1005  
**CHRISTOLOGY(RELS2014)**  
Credits (Min/Max): 3/3  
A systematic study of the beliefs of the church in the person of Jesus as reflected in Scripture and the early church councils and a survey of contemporary Christological teaching. Cross-listed with RELS2014

SLRS1006  
**OLD TESTAMENT(RELS1001)**  
Credits (Min/Max): 3/3  
This course will introduce students (non religious studies majors) to contemporary Old Testament scholarship. The 47 books of the Old Testament were composed over 800 years beginning in the 10th c. B.C. and extending to the 2nd c. B.C. To fully appreciate and correctly interpret any O.T. book, students must be aware of the historical developments in Israel as well as in the surrounding Near East during the period in which a book was composed. Students will also be instructed in the basic tenets of textual criticism, source criticism, form criticism, and redaction criticism as these pertain to the books of the Old Testament. Cross-listed with RELS1001

SLRS1008  
**PARABLES AS LITERATURE**  
Credits (Min/Max): 3/3  
In this course students will study the parables of the Gospel tradition, their roots in the rabbinical schools, cultural settings and parallels. The course will also examine the form through both literary and cinematic comparisons in contemporary culture.

SLRS1009  
**SURVEY OF THE GOSPELS (PENDING SENATE APPROVAL)**  
Credits (Min/Max): 3/3  
This course is an introduction to the four Gospels of Matthew, Mark, Luke and John. It will begin with an examination of textual criticism, source criticism, form criticism, and redaction criticism as these disciplines impact on the Gospels as literature.

SLRS1011  
**NEW TESTAMENT(RELS1002)**  
Credits (Min/Max): 3/3  
A general introduction to the New Testament and overview of the historical, religious and cultural milieu in which these Scriptures originated. Cross-listed with RELS1002

SLRS1012  
**INTRO TO PHILOSOPHY(PHIL1021)**  
Credits (Min/Max): 3/3  
This is a survey course that presents the principal philosophical problems, questions, and systems. Consideration is given to representative schools of philosophy, especially the foundational teachings in Plato and Aristotle. The relationship of philosophy to other disciplines, arts and sciences is examined. Cross-listed with PHIL1021
SLRS1013
ETHICS(PHIL2026)
Credits (Min/Max): 3/3
A survey of historical and contemporary responses to significant moral problems encountered in the Christian life. Topics include conscience, racism, peace and war, ecology, population control, economic justice and capital punishment. Cross-listed with PHIL.2226

SLRS1014
WOMEN & RELIGION(RELS2020)
Credits (Min/Max): 3/3
A survey of woman's place in society, past and present, as it has been and is affected by religious teachings, laws and customs and examination of the attitudes toward women in the Hebrew and Christian Scriptures, in the writing of the early church fathers, the Protestant Reformers, and in the current religious structures of Catholics, Protestants, and Jews. Cross-listed with RELS2020

SLSC1001
INTRO TO CHEMISTRY: BRAVING THE ELEMENTS
Credits (Min/Max): 3/3
This course, designed especially for the non-science major, explores the fundamental aspects of chemistry in a variety of familiar and often newsworthy contexts. Applications to environmental problems, drug design, plastics and polymers, and alternative energy sources are some of the facets of this important science. A variety of activities will allow students to investigate chemical phenomena. No prior knowledge of chemistry is expected.

SLSC1002
INTRO TO BIOLOGY: BUGS & BREW
Credits (Min/Max): 3/3
This course is an introduction to the biological sciences for the non-science major that presents fundamental principles of biology through a study of human interactions with microbes, such as bacteria and viruses. Topics will include an explanation of what microbes are, how they are similar to and different from other living things, where and how they live, and the roles of microbes in making food and beverages, in biotechnology for agriculture, medicine, or pollution control, and in human diseases. Discussion of current topics from the news and hands-on discovery activities will be included.

SLSC1005
INTRO TO COMP SCI: BITS, BYTES & BEYOND
Credits (Min/Max): 3/3
This course is designed specially for the non-Computer Science major. It is designed to emphasize fundamental aspects of Computer Science as a discipline. Students will be introduced to what a computer is, how it works, and how we interface with it. Attention is given to analyzing our thought processes during problem solving and developing algorithms for later use in a program. No prior knowledge of computer science is expected.

SLSC1006
INTRO TO PHYS SCIENCE: MOTION, MATTER & MIND
Credits (Min/Max): 3/3
This course is designed for anyone interested in experiencing first-hand the process of the scientific inquiry. In this process students and the professor will pose investigable questions about some physical phenomena. Students will then use the analysis of observations from experiments to develop an understanding of these physical concepts. This understanding will develop through individual, small group and whole class investigation and discussion. As a final stage in this cycle, connections will be made to the classical laws and principles of physics and chemistry, which govern these phenomena.

SLSC1006H
INTRO TO PHYS SCIENCE: MOTION, MATTER & MIND-HONORS
Credits (Min/Max): 3/3
This course is designed for anyone of the honor program who is interested in experiencing first-hand the process of the scientific inquiry and modern concepts of physics. In this process students and the professor will pose investigable questions about some physical phenomena which you observe everyday and not everyday. The student will then observe and/or conduct hand-on experiments to understand these physical concepts more. In addition, each student will be assigned extra weekly assignments and an individual term project for completion of the course.

SLSC1007
CSI-CHEMISTRY: CHEMICAL PRINCIPLES IN CRIMINALISTICS
Credits (Min/Max): 3/3
This course provides an introduction to the principles of chemistry within the context of forensic science applications. In particular, study of atomic and molecular structure, bonding, energy changes, and chemical reactions will provide the foundation for examining a variety of analytical tools as they are used in the solving of crimes. The course includes an introduction to spectroscopy and chromatography, as well as traditional wet chemistry methods. While this is not a standard laboratory course, students will participate in a variety of laboratory activities.
SLSC1008
PRINCIPLES OF CHEMISTRY I (CHEM1007)
Credits (Min/Max): 3/3
An introduction to the basic principles of general, organic and biochemistry. The principles are related to living systems including the properties and metabolism of proteins, carbohydrates, lipids and nucleic acids. Lecture and laboratory course. Cross-listed with CHEM1007

SLSC1009
INTRO TO BIOLOGY:CSI
Credits (Min/Max): 3/3
This course is an introduction to the biological sciences for the non-science major that presents fundamental principles of biology through a study of crime scene investigations and forensic biology. Topics will include the scientific method of investigation; the nature of biological samples including important structures and functions in cells, tissues and organisms; the structure, functions and analysis of DNA; the use of DNA and other biological evidence in forensics, including issues related to inheritance and population genetics; and the study of biological evidence in context with the natural environment where it is found. Discussion of current topics from the news and hands-on discovery activities will be included.

SLSC1010
THE NATURAL SCIENCES(NSCI1001)
Credits (Min/Max): 3/3
An introduction to the basic concepts of biology, chemistry and physics, which stresses practical applications. Topics include survey of the fundamental concepts of atoms and molecules as the basic building blocks of matter, an overview of the life sciences with an emphasis on human biology and a discussion of the principles underlying common physical phenomena. Open to non-science majors.

SLSC1011
LIFE SCIENCE(BIOL1001)
Credits (Min/Max): 3/3
An introductory course directed toward the development of an answer to the question: What is life? The course explores various life processes and the human person's position in the total scheme. Emphasis is placed on current scientific discoveries. This course is not open to science majors. Cross-listed with BIOL1001

SLSC1012
INTRO TO COMPUTER SCIENCE (CSCI1002)
Credits (Min/Max): 3/3
This course is an introduction to the field of computer science. A scientific foundation of many aspects of CS will be developed upon which more advanced CS courses will build. Topics include: computer design, computer programming, information processing, algorithm design, operating systems, software engineering, and artificial intelligence. Cross-listed with CSCI1002

SLSO1002
INTERNATIONAL JUSTICE SYSTEMS
Credits (Min/Max): 3/3
This select social/cultural systems course familiarizes the student with a variety of justice systems found throughout the world. Based on history, culture, and a variety of other influences, the justice system of various countries reflect distinctive national priorities, political influences, and forms of government. The debate concerning due process versus crime control is viewed from the international perspective.
PreRequisites: ENGL1012 - COLLEGE WRITING II

SLSO1004
RACE & ETHNICITY(SOCL1034)
Credits (Min/Max): 3/3
A study of the social relationships of racial, ethnic, religious and other minority groups with emphasis on personal, cultural and social development. Cross-listed with SOCL1034. Class starts the week of 01/26/2015.

SLSO1006
RACE, CLASS & GENDER: INTRO TO SOCIOLOGY(SOCL1021)
Credits (Min/Max): 3/3
This course is an introduction to the study of society through the critical analysis of social relations, behavior, and organization. It is designed to facilitate students to develop a broad knowledge of how social structures and human behavior influence each other, as well as to identify the issues that arise from such interactions. In order for students to critically analyze contemporary social issues and problems, such discussions will focus along the dimensions of race, class, and gender. No prior knowledge of sociology is expected. Cross-listed with SOCL1021

SLSO1007
GLOBAL SOCIAL PROBLEMS(SOCL1023)
Credits (Min/Max): 3/3
This course is a study of current social problems that take place across the globe. It emphasizes the application of sociological concepts to the critical analysis of social issues and problems in contemporary societies throughout the world, including the U.S. Cross-listed with SOCL1023

SLSO1008
HUMAN COMMUNICATION(CMET1001)
Credits (Min/Max): 3/3
In this course the student examines human, verbal, non-verbal and visual communication. Through an interactive classroom the student will combine the theory and definitions of the text with their experience to clarify and understand the concepts that make up human communication. In the classroom, writing, making presentations, working in groups, solving problems and applying creativity to the concepts of communication will be some of the ways the students learn and reinforce the subject matter. Written papers, research and computer-mediated-communication further reinforce the concepts of the course and serve as a means of evaluation of the student's understanding and absorption of the material. Cross-listed with CMET1001

SLSO1008H
HUMAN COMMUNICATION-HONORS
Credits (Min/Max): 3/3
In this course the student examines human, verbal, non-verbal and visual communication. Through an interactive classroom the student will combine the theory and definitions of the text with their experience to clarify and understand the concepts that make up human communication. In the classroom, writing, making presentations, working in groups, solving problems and applying creativity to the concepts of communication will be some of the ways the students learn and reinforce the subject matter. Written papers, research and computer-mediated-communication further reinforce the concepts of the course and serve as a means of evaluation of the student's understanding and absorption of the material.

SOCL1021
RACE, CLASS & GENDER: INTRO TO SOCIOLOGY(SLSO1006)
Credits (Min/Max): 3/3
This course is an introduction to the study of society through the critical analysis of social relations, behavior, and organization. It is designed to facilitate students to develop a broad knowledge of how social structures and human behavior influence each other, as well as to identify the issues that arise from such interactions. In order for students to critically analyze contemporary social issues and problems, such discussions will focus along the dimensions of race, class, and gender. No prior knowledge of sociology is expected. Cross-listed with SLSO1006

SOCL1023
GLOBAL SOC.PROBLEMS(SLSO1007)
Credits (Min/Max): 3/3
This course is a study of current social problems that take place across the globe. It emphasizes the application of sociological concepts to the critical analysis of social issues and problems in contemporary societies throughout the world, including the US. Cross-listed with SLSO1007

SOCL1034
RACE & ETHNICITY(SLSO1004)
Credits (Min/Max): 3/3
A study of the social relationships of racial, ethnic, religious and other minority groups with emphasis on personal, cultural and social development. Cross-listed with SLSO1004. Class start the week of 01/26/2015.

SOCL2008
SOCIOLOGY OF WORK & OCCUPATIONS
Credits (Min/Max): 3/3
Work and occupations are examined in historical and contemporary contexts. Emphasis will be placed on the characteristics of professions and the attempts of occupations to professionalize. Focus will be on the macro level (the effects of advancements in technology, bureaucratization and unionization on the division of labor), the microlevel (job satisfaction and alienation), and on the interface between macro and micro levels (do individuals of equal ability have equal access to prestige careers regardless of race, ethnicity, gender, age, or other attributes).

SOCL2016
POLICE & SOCIETY(CRIM2016)
Credits (Min/Max): 3/3
This course reviews current issues and problems in law enforcement and interrelations with the society-at-large and cultural/ethnic sub-groups. It examines informal exercise of police authority or force, governmental/agency policies, legal requirements, role demands and conflicts experienced by police officers, and the norms of the police sub-culture. Cross-listed with CRIM2016
PreRequisites: CRIM1001 - INTRODUCTION TO CRIMINAL JUSTICE

SOCL2022
SPORTS & GLOBALIZATION
Credits (Min/Max): 3/3
Using sociological theories and concepts, this course analyzes how society defines and organizes sports. This course also looks at how sports as a (local and globalized) social activity influences important aspects of our lives such as family, education, politics, the economy, media, and religion. It also examines how sports participation affects our ideas about, among other things, gender, class, ethnicity, conformity, and violence.
SOCL2030
JUVENILE DELINQUENCY (CRIM2030)
Credits (Min/Max): 3/3
This course will offer an analysis of Juvenile Delinquency and the juvenile justice system. It will examine the theories of the causes of juvenile crime and the processes of the juvenile justice system. Cross-listed with CRIM2030

SOCL2038
WEALTH, POWER, & PRESTIGE
Credits (Min/Max): 3/3
The course presents a study of the causes and consequences of political, economic and social inequality. The systematic ranking of individuals and aggregates is analyzed. Institutional and non-institutional determinants of inequality are examined so as to understand the distribution of wealth, status and prestige in society.

SOCL2040
FOUNDATION OF SOCIAL THOUGHT
Credits (Min/Max): 3/3
The course examines sociological theories, with emphasis on the works of Durkheim, Marx, Weber, and G.H. Mead and other major contributions to sociological thought.

SOCL2043
SOCIOLOGY OF MENTAL HEALTH
Credits (Min/Max): 3/3
An introduction to the field of sociological practice. Provides an understanding of micro and macro sociological theory and how it is used to assess, analyze, and diagnose human problems. Introduces students to casework and problem solving with small groups, organizations, and families. Acquaints students with the broad range of professional opportunities for the sociological practitioner.

SOCL2045
ISLAM IN THE WORLD (HIST2045/POLI2045)
Credits (Min/Max): 3/3
In this course, the basic beliefs of Islam are reviewed, along with a brief history of Islam's overall development and its impact on the world and on various civilizations in different global regions. Islam's internal sects are analyzed, and its political impact on current politics in the world is explored. The role of U.S. foreign policy in dealing with the recent rise of Islam is also analyzed. Cross-listed with HIST/POLI2045

SOCL2061
SOCIAL GERONTOLOGY
Credits (Min/Max): 3/3
A general introduction to social gerontology with emphasis upon the normal aspects of aging. Review of current hypotheses and findings concerning the aging processes are addressed.

SOCL2062
HUMAN SERVICES IN MODERN SOCIETY
Credits (Min/Max): 3/3
A study of the role of social services in contemporary society. This course is designed to assist students in exploring theories, practices and careers in the helping professions.

SOCL2070
CULTURE & HUMAN SOCIETIES
Credits (Min/Max): 3/3
Sociological study of what we mean by culture is taken and critically applied to the discussion of global-historical transformations in human social development, from the period of simple societies to the present age of complex, industrial, and globalized societies.

SOCL3002
PROBLEM PERSPECTIVES IN AGING
Credits (Min/Max): 3/3
This course has a social problem orientation. The material deals with the major unmet needs of older people. The approach focuses upon the current status of older people in American society, identifies the deficiencies in particular areas and examines the resources available to the aged to deal with specific problems.

SOCL3004
HEALTH, MEDICINE AND SOCIETY
Credits (Min/Max): 3/3
The study and analysis of the health care system, including the definitions and behaviors in health and disease, the types and roles of practitioners and the forms and problems of health care delivery. Contemporary issues in American health care are examined.

SOCL3008
SOCIOLOGY OF WORK & OCCUPATIONS
Credits (Min/Max): 3/3
Work and occupations are examined in historical and contemporary contexts. Emphasis will be placed on the characteristics of professions and the attempts of occupations to professionalize. Focus will be on the macro level (the effects of advancements in technology, bureaucratization and unionization on the division of labor), the microlevel (job satisfaction and alienation), and on the interface between macro and micro levels (do individuals of equal ability have equal access to prestige careers regardless of race, ethnicity, gender, age, or other attributes).

SOCL3011
RESEARCH METHODS (INST3011)
Credits (Min/Max): 3/3
This course examines major research methods. The student will be exposed to the development and evaluation of research design and conclusions, conducting of research, preparation of research papers and ethics in research. The emphasis will be on survey methods, participant observation and ethnographic research. Cross-listed with INST3011
PreRequisites: MATH1040 - PROBABILITY & STATISTICS

SOCL3020
DEATH & DYING (PSYC3020)
Credits (Min/Max): 3/3
This course is a topical overview of some of the diverse areas of inquiry grouped under the general heading death and dying. The basic purpose of this course is to help students understand grief, loss, dying, and death—both as an objective fact and as it relates to their own personal experiences—and to apply this understanding to their common experiences. The social, cultural, spiritual, emotional, and intellectual dimensions of death and dying will be examined from an interdisciplinary, but mostly social psychological and sociological perspective with the goal of enhancing the meaning of life and living. Cross-listed with PSYC3020.

SOCL3025
SOCIAL CHANGE & DEVELOPMENT
Credits (Min/Max): 3/3
The exploratory study of social change and its impact on the social institutions of contemporary society. The course examines various theories, processes and areas of social change and presents an overview of the social effects of modernization on non-industrialized societies.

SOCL3026
WOMEN IN AMERICAN SOCIETY
Credits (Min/Max): 3/3
This course is an introduction to the field of women's studies that focuses on the significance of gender in shaping the culture, society, and influence of the United States. Drawing upon a diverse set of theories, methods, and approaches from the social sciences, this course focuses primarily on the interrelated dynamics of gender at both the individual and societal levels in the United States, although we will view this country from both a comparative and an international perspective, showing how gender-related social and cultural phenomena vary across countries. Among the topics covered are cultural norms and values, socialization, interpersonal behavior, strategies of power and influence, gender-based violence, sexuality and reproduction, and social institutions such as the family, workplaces, government, education, religion and the media.

SOCL3027
FAMILY RELATIONS
Credits (Min/Max): 3/3
A sociological analysis of the family with emphasis on historical trends and contemporary family life in the United States. The study includes family relationships and functions, family disorganization and change, with an overview of the family as a major social institution.

SOCL3029
SOCIAL PSYCHOLOGY (PSYC/CMET3029)
Credits (Min/Max): 3/3
Social psychology is the study of human behavior as it is shaped by the psychosocial environment. Topics include person perception, small group interaction, theories and methods of attitude change, interpersonal attraction, conformity, aggression, prejudice, persuasion, altruism and prosocial behavior. Cross-listed with PSYC/CMET3029
PreRequisites: PSYC1021 - INTRO TO PSYCHOLOGY

SOCL3030
THEORIES OF CRIMINAL DEVIANCE (CRIM3030)
Credits (Min/Max): 3/3
An examination of the etiology and major theories of criminality, with special reference to the rational choice, routine activity, biological and psychosocial theories of deviance. This course will examine criminal deviance by analyzing both criminal and victim populations, with particular emphasis on crime typology and the analysis of criminal behavior. The responses of the Criminal Justice System and private security experts to criminal behavior from situational crime prevention techniques to correctional treatment methods are explored and discussed. Cross-listed with CRIM3030

PreRequisites: ENGL1012 - COLLEGE WRITING II

SOCL3031
RELIGION & SOCIETY
Credits (Min/Max): 3/3
An analytical presentation of religion as a social institution emphasizing the function of religion in society and its relationship to the conflict and change that characterize modern American life.

SOCL3036
SOCIOLOGY OF ADDICTIONS
Credits (Min/Max): 3/3
A study of the causes and consequences of addictions. The relationship of public policy to addictions in society, the family, and the workplace is analyzed. Addictions are viewed as ingestive (alcohol, drugs, eating disorders) and/or behavioral (gambling, sexual, workaholism). Societal responses are explored.

SOCL3037
VICTIMS OF ABUSE & NEGLECT
Credits (Min/Max): 3/3
This course addresses the social and psychological conditions, which give rise to the physical abuse of children and adults. The principal focus is an examination of child abuse and neglect, battered spouses, victims of rape and assault and victims in institutions. The effects on the individual and possible societal responses are also explored.

SOCL3039
POLITICS & SOCIETY(POLI3039)
Credits (Min/Max): 3/3
The course is designed to familiarize the student with the social bases of political power. Politics is viewed as a process in relation to the social and economic structures, which influence its direction. A consideration of the effects which politics has on these structures is also offered. A detailed analysis of the primacy of politics in the 20th century is included. Cross-listed with POLI3039

SOCL3040
ETHNIC CONFLICT(POLI3040)
Credits (Min/Max): 3/3
In this course we examine why ethnic groups sometimes get along very well, but other times engage in conflict. We query: What are the political and social origins of ethnic conflicts in various parts of the world? Do ethnic conflicts differ in different world regions? What national and international policies encourage ethnic conflict? How can we encourage ethnic groups to pursue peaceful accommodations? Cross-listed with POLI3040

SOCL3041
CITIES & GLOBALIZATION
Credits (Min/Max): 3/3
This course examines the social dynamics of urbanization, urban social structure, and urban development. It analyzes, through various theories of urban sociology, the city as a form of social organization and as centers of economic and political processes. It also looks at how globalization has impacted various cities around the world in terms of their growths and declines.

SOCL3050
EDUCATION & SOCIETY
Credits (Min/Max): 3/3
This course is a critical analysis of education as a social institution. It looks at the interactive relations between education and the social dimensions of class, race, ethnicity, and gender, both in the US and in selected countries around the world.

SOCL3051
DEVELOPMENT IN SOUTHEAST ASIA (HIST/POLI3051)
Credits (Min/Max): 3/3
This course looks at the history of social, political and economic development of Southeast Asia, excluding Indochina, and focusing primarily on Indonesia, Malaysia, and the Philippines. It will discuss the contingent and dependent nature of development of these countries under the larger framework of global capitalism, and how such development affects the national historical experiences of these countries. Cross-listed with HIST/POLI3025
SOCL3081
ENVIRONMENT & SOCIETY
Credits (Min/Max): 3/3
This course is designed to provide an approach to study and analyze the interactions between society and the environment, and the political economic impacts of environmental problems. Focus will be on both the social causes of and social responses to various environmental problems, at the local, national, and global levels.

SOCL3082
SOCIAL MOVEMENT & RESISTANCE (POLI3082)
Credits (Min/Max): 3/3
This course examines the origin, growth, and dynamics of social movements as forms of social protest and resistance against state and global injustices. Discussions include case studies of various social and political groups, non-government organizations, and liberation and revolutionary movements in the US and throughout the world. Cross-listed with POLI3082

SOCL4050
SPECIAL TOPICS IN ADVANCED SOCIOLOGY
Credits (Min/Max): 3/3
A collection of courses covering a broad range of topics in advanced sociology, offered according to student need and interest. The precise title is announced during registration period for any given term.

SOCL4051
SOCIOLOGY-INTERNSHIP I
Credits (Min/Max): 1/6
A field experience in a social institution. The students are given the opportunity to integrate their theoretical knowledge with practical application under the guidance of professionals at the particular institution where they are assigned.

DIRECTED RESEARCH
Credits (Min/Max): 1/4
Individual research supervised by a full-time faculty member.

SOCL4057
SOCIOLOGY-INDEPENDENT STUDY
Credits (Min/Max): 1/3
This course is limited to those few students who have demonstrated an unusual level of ability and an intense commitment to a particular area.

SPAE3005
SPANISH GRAMMAR AND COMPOSITION
Credits (Min/Max): 3/3
This course is structured to enhance the knowledge of grammar and the reading and writing skills of students who have already achieved an intermediate level or oral, written and reading proficiency in Spanish as measured on the ACTFL/ETS scale. Students will learn correct grammatical construction through literary readings and discussion, intensive vocabulary study, intensive study of grammar points, and composition practice.
PreRequisites: MLSP3002 - ADVANCED SPANISH LANGUAGE & CULTURE II

SPAE3010
ADVANCED GRAMMAR
Credits (Min/Max): 3/3
Using texts written by contemporary Spanish and Hispanic authors, students will increase their knowledge of vocabulary including idiomatic expressions and they will review more complex grammatical structures. Stylistics will also be addressed.
PreRequisites: MLSP3002 - ADVANCED SPANISH LANGUAGE & CULTURE II

SPAE3015
APPLIED HISPANIC LINGUISTICS (MLSP3015)
Credits (Min/Max): 3/3
This course introduces the student to general linguistic theory and its application to the problems which teachers face in the foreign language classroom. Students will discover practical resolutions to problems encountered in the presentation of linguistic material. A study of the sound system of Spanish and training in native-like Spanish pronunciation will also be incorporated into the course.
PreRequisites: MLSP3005 - ADVANCED SPANISH GRAMMAR & COMPOSITION

SPAE3030
SURVEY OF SPANISH LITERATURE
Credits (Min/Max): 3/3
Using texts written by contemporary Spanish and Hispanic authors, students will increase their knowledge of vocabulary including idiomatic expressions. Complex grammatical structures will be reviewed and practiced in written form. Stylistics will also be addressed. This course will be conducted in Spanish to assist students in maintaining their proficiency goals.
PreRequisites: MLSP3005 - ADVANCED SPANISH GRAMMAR & COMPOSITION

SPAE3040
SURVEY OF LATIN AMERICAN LIT
Credits (Min/Max): 3/3
A study of the major literary periods, trends and genres in Spanish American literature from pre-Columbian times through the 20th century from an historical perspective. Literary texts to be read and discussed include representative selections of key historic texts and literary figures from each major literary period.
PreRequisites: MLSP3005 - ADVANCED SPANISH GRAMMAR & COMPOSITION

SPCH1001
MODERN PUBLIC SPEAKING
Credits (Min/Max): 3/3
